Officials of several parties have cautioned it will take several days to fully understand the implications of the balloting. Civic Forum officials have said privately they would consider 40 percent support a victory.

Voters have been encouraged by politicans from President Vaclav Havel on down to vote for individual candidates rather than for parties, and the 42 parties participating in the elections have formed all manner of coalitions.

In at least 15 towns, Civic Forum even formed coalitions with the communists.

#90329u0030 11/25/1990 ~United Press International
(NOV. 25) UPI - Poland is holding an election for president today. Surveys show Solidarity union leader Lech Walesa favored by the voters, but he is NOT expected to win the 50 percent he needs to avoid a second round of voting December 9th. The election is the first by the people for a Polish president since the 1920's. Polish President General Wojciech Jaruzelski is resigning under pressure.

Security sources in Beirut say two Israeli soldiers were seriously injured today when a woman guerrilla, carrying a bag full of explosives, blew herself up near an Israeli partol in south Lebanon. The Syrian Social Nationalist Party said in a statement that all members of the patrol were killed. But security sources said two Israeli soldiers were critically injured.

A spokesman for the Israeli army says an Israeli navy patrol intercepted a boat off the Lebanese coast yesterday and killed five guerrillas who were attempting to infiltrate Israel by sea. A pro-Syrain group claimed responsibility for the attempted infiltration.

Security sources in Lebanon say the last militia group has ended its holdout in Beirut, clearing the way for a unified and de-militarized Beirut for the first time since civil war began in 1975. The pullout of the Christian Lebanese Forces militia from its strongholds was the last step in the plan to have Lebanese troops deployed in the Beirut area.

A combination of melting snow and five inches of rain is causing flooding in western Washington state. More than one-thousand residents were forced from their homes yesterday by rivers over-flowing their banks. Governor Booth Gardner activated the National Guard to help control widespread flooding and to evacuate residents. Farms were reported under water and livestock stranded.

A suburban Chicago man took off Friday on an American Airlines flight from O'Hare International Airport for San Juan, Puerto Rico, the first leg of a 27-thousand 808-mile trek. Trey Urbahn is attempting to land a spot in the Guinness Book of World Records by flying around the world in three days. If Urbahn arrives home as scheduled tomorrow morning on United Flight 44 from Honolulu, he will have covered six continents and every time zone.

#90329u0075 11/25/1990 ~United Press International
(NOV. 25) UPI - The homicide rate in the nation's capital has hit a new high... a record 436 in 1990. It's the third record year for murders in the District of Columbia. But the proportion of slayings classified by police as drug related has fallen from 66 percent in 1988 to 39 percent this year. The number of juveniles and adults testing positive for drug use after being arrested has also dropped in the last year.

The editors of the newspapers at eight Ivy League colleges say ''jobs and low oil prices at home are NOT worth a war'' against Iraq. The newspaper editors sent a letter to President Bush and congressional leaders Saturday, criticizing the escalation of the U-S military presence in Saudi Arabia.

A member of Miami's Yahweh sect has pleaded innocent to charges he murdered four men. Federal officials charge that to gain entry into the Yahweh sect's elite ''Brotherhood'' cadre... followers had to kill a ''white devil'' and bring back a severed body part as proof of the killing.

Customers and employees at a bank branch in Beverly Hills tackled a masked robber Saturday... and held him until police arrived. The robber gave a note to a teller demanding money... but the teller hit the alarm button. Other people in the branch pounced on the would-be thief.

Police in the Miami area say revenge prompted a man to open fire on a family celebrating Thanksgiving. Three members of the family were wounded by the gunfire. Police are searching for a suspect who was angry at the family because a cousin of the victims shot and killed his brother last year.

A robber with a gun was shot to death by the boyfriend of his intended victim in the Los Angeles area. Police say the boyfriend and the suspect struggled and the gun went off. Police say the boyfriend was NOT hurt... even though a bullet bounced off his beeper.

Authorities from Indiana's LaGrange County have picked up an Amish man who was jailed in Illinois for abducting and trying to ''deprogram'' his estranged wife and daughter. The man is accused of abducting his wife and daughter on Halloween... and holding them captive for 20 days.

A utility company in Rochester, New York, may develop a second source of income. Rochester Gas and Electric is considering using warm water discharged from its power plant as a fish farm. Company officials say they can raise clean... uncontaminated bullheads and rainbow trout in the water.

#90329u0077 11/25/1990 ~United Press International

(NOV. 25) UPI - Egypt says it has arrested an Egyptian border guard on suspicion of firing shots across the Egyptian-Israeli border near the Red Sea resort of Eilat, killing four Israelis and injuring 24 others. The Israeli envoy said the man opened fire on a bus carrying workers and a group of civilian cars on the road which runs parallel to the Israeli- Egyptian border.

Officials in Boulder, Colorado, say at least 16 structures have been destroyed and more than 65-hundred acres have been burned in a wildfire. Around 100 people were evacuated from a threatened subdivision. The flames were being fanned by 60 mile an hour winds. A man who said he dragged a burning mattress

from his rural home was arrested and charged with startng the fire.

Security sources in Beirut say two Israeli soldiers were seriously injured today in a suicide bombing. They aay a woman carried a bag full of explosives near an Israeli patrol in south Lebanon and blew herself up. The Syrian Socialist Nationalist Party said in a statement that the woman carried out the attack to mark the 52 anniversary of the party.

Preliminary returns are expected later today in Czechoslovakia's local elections, the first free polling for local and country government offices in four decades. Officals of several parties have said it will take a few days to fully understand the implications of the balloting in the nation's republics.

Polish citizens are voting today in the nation's first free presidential elections since 1922. Initial turnout was reported light, despite the public interest in the six-way presidential campaign. Electoral officials attributed the low early turnout to damp, cold weather. In Krakow, Pope John Paul was listed among those eligible to vote at one of the polling stations.

Canada's foreign affairs secretary says that Jordan's King Hussein has an important mediation role to play in bringing the Persian Gulf crisis toward a peaceful settlement. Joe Clark, the Canadian secretary for external affairs, told reporters at a news conference that his discussions with King Hussein yesterday gave him more insight into the gulf crisis.

(NOV. 25) UPI - Four Israelis were killed today and 24 were injured when an Egyptian border guard fired shots across the Egyptian-Israeli border. The Israeli envoy said the man was wearing a military uniform, but it was NOT clear if he was a member of the Egyptian army or police. The envoy said the unidentified man opened fire on a bus carrying workers and a group of civilian cars.

Thousands of dissidents battled riot police in Seoul and other large South Korean cities today in violent demonstrations aginst President Roh Tae-woo's government. The protesters included students, workers and farmers. The clashes erupted following rallies in major cities to protest alleged government suppression of popular movements for democracy and to oppose the Uruguay Round negotiations.

Solidarity leader Lech Walesa is expected to win Poland'ssix-way presidential

race today and face a run-off in two weeks with his closest rival. The voting today marks the first time Poles are electing their own president in a general election. The two leading contenders, Walesa and Prime Minister Tadeusz Mazowiecki, both cast their ballots and predicted they would win.

Namibian officials say security forces intercepted and captured six Spanish vessels fishing illegally in the country's territorial waters. The Namibian fisheries minister says Namibian forces fired shots at two other vessels, but they escaped. Soldiers were placed aboard the six vessels and were ordered to sail to a Namibian port.

Police in Italy say at least four people were killed today when an oil company helicopter with 13 people aboard crashed into the Adriatic sea in windy weather. The chopper was flying to an Italian offshore oil rig. First reports from the accident scene said that there appeared to be NO survivors.

Chrysler Corporation chairman Lee Iacocca says he would like ''an inside'' job to help President Bush run the country. In his first interview with Playboy magazine, Iacocca said he ''like to run the economic side of the business.'' Playboy says it has been asking Iacocca to grant an interview for about two decades. The magazine goes on sale Tuesday.

#90329u0131 11/25/1990 ~United Press International

(NOV. 25) UPI - The nation's capital is also the nation's murder capital again this year. District of Columbia police report slayings in 1990 have reached 436- a record for the third year in a row even though there are fewer drug-related slayings this year. D-C Police Chief Isaac Fulwood added about 12-hundred recruits to his force and deployed more officers at night this year.

More than one-thousand people have been evacuated from nine counties in western Washington state, where floodwaters are raging for the second time in two weeks. Flooding is so bad in North Bend that crews decided to punch a hole in a dike to let some of the water in the town flow back into the Snoqualmie River. A levee in Skykomish is damaged and in danger of collapsing.

A fast-moving wildfire is still burning out of control near Boulder, Colorado. Firefighters are trying to control the blaze with back fires and fire lines. But Chinook winds have pushed the flames across more than 65-hundred acres. 15 buildings have been destroyed and more than 100 people evacuated.

A sheriff's deputy in Florida's Tampa area has been charged with making bomb threats to pharmacies. Investigators say he was addicted to painkillers, and stole drugs while the stores were evacuated because of his threats. The nine-year veteran of the Hillsborough department was fired Friday after he admitted telephoning 17 threats in 24 days. He says he became an addict after surgery to remove his appendix.

A police lieutenant in Marion, Indiana, begins a one-week supension Monday. He left the keys in a squad car, and it was stolen while he responded to a report of a disturbance. Leaving the keys in the car violated a department rule.

A 17-year-old Korean-American is the winner of America's Miss Teen pageant. Sarah Dawn Hammer from Cedar, Minnesota, was crowned in Kansas City Saturday night. Contestants are judged on academics, volunteer service and talent. Laura Gordon of Trumbull, Connecticut, was first runner-up and Brandi Peters of Oklahoma City came in third.

A Chicago suburban man is on his way around the world... trying to do it in three days. Trey Urbahn hopes to land a line in the Guinness Book of World Records by flying 27-thousand 808 miles in three days. The United Airlines employee is flying commercial lines all the way.

RANCHO MIRAGE, CA (NOV. 25) UPI - Model Cheryl Tiegs and actor-writer Tony Peck were married in a private twilight ceremony Friday at the home of Frank Sinatra, it was announced.

It is the third marriage for Tiegs, 43, and Peck, who have been romantically involved for the past seven years, publicist Monroe Friedman said.

The couple, who spent Thanksgiving at Sinatra's home, decided over the holiday weekend to get married.

Attending the ceremony were Frank and Barbara Sinatra, the groom's sister actress Cecilia Peck and attorney Robert Marx.

Tiegs, one of the highest-paid models ever to pose before a camera, was born in Alhambra, Calif., and began winning modeling assignments as she was entering college at UCLA.

She previously was married to movie director Stan Dragoti and photographer Peter Beard.

Peck is featured in an upcoming television series, ''Hollywood Detective Barr Nunn,'' which is being shot in Utah and is to begin airing next spring, Friedman said.

#90329u0188 11/25/1990 ~United Press International

(NOV. 25) UPI - Foreign ministers of the U-N Security Council are preparing for a meeting next week to discuss the Persian Gulf crisis and a possible resolution authorizing the use of force to force Iraqi troops from occupied

Kuwait.

Iraqi authorities have admitted that several teen-aged students were arrested in Baghdad for causing ''a state of panic'' in schools. The admission followed UNconfirmed reports by travelers that eight teen-aged girls were killed in schoolyard clashes between authorities and dissenting teen-agers.

A fast-moving fire continues to burn out of control near Boulder Colorado. So far, the blaze has destroyed about 65-hundred acres and forced the evacuation of about 100 residents. The flames were threatening a subdivision.

More than one-thousand people fled their homes in western Washington state Saturday as a tropical storm caused rivers to flow over their banks. The water washed out roads and broke through dikes.

Residents of the central Philippines are bracing for another typhoon, just two weeks after another storm left almost 400 people dead. The latest storm has 93 mile an hour winds and was located about 580 miles east of the Philippines.

The editors of eight Ivy League college newspapers Saturday criticized President Bush's escalation of the U-S military presence in Saudi Arabia. A letter was sent to Bush from the editors of school papers from Harvard, Yale, Princeton, Columbia, Brown, Dartmouth, University of Pennsylvania and Cornell.

Residents of Czechoslovakia continued voting Saturday for local officials in the country's first such elections in more than four decades. The voting is seen as a key step in the transition to multi- party democracy.

#90329u0219 11/25/1990 ~United Press International
(NOV. 25) UPI - Around the world... around the clock... the latest news from U-P-I.

District of Columbia Police Chief Isaac Fulwood says only a national gun control law will help reduce the killings in the nation's capital. Washington has already set a third consecutive yearly record for murders... with 436 reported in 1990. Fulwood says 78 percent of this year's homicide victims had been shot.

The Red Cross has opened 14 emergency shelters in western Washington state to house the homeless. More than one-thousand people have been evacuated from their homes because of flooding which some locals say is the worst they've ever seen. Nine counties are affected.

Firefighters expect to be at work all weekend near Boulder, Colorado... where a fire has charred more than 65-hundred acres. More than 100 people in a two-square-mile have been evacuated. The fire has destroyed 15 buildings and

is heading toward a subdivision called Crestview Estates.

Today is the third anniversary of the death of former Chicago Mayor Harold Washington... Chicago's first black mayor. And on the eve of the anniversary, black Alderman Danny Davis announced he will run for mayor. Davis will challenge Mayor Richard Daley.

Japan expects the fourth straight annual increase in production of cars and trucks. Brisk exports paved the way. The Japan Automobile Manufacturers' Association says production for the first 10 months of this year totaled 11-Million 236-thousand units.

San Diego police say four transvestites have been killed since summer. And they have a new slaying to investigate. The body of a male transexual with breast implants was found along a mountain road Friday. The decomposing body was at first thought to be a woman's.

-30- 1908

#90329u0225 11/25/1990 ~United Press International

(NOV. 25) UPI - Egyptian Foreign Minister Boutros Ghali expressed regret today at a border incident in which an Egyptian soldier apparently crossed into Israel and opened fire on passing vehicles. The gunman killed four people- three of them Israeli soldiers- and wounded 23 others before apparently being wounded by Israeli troops before he fled back into Egypt. Egyptian authorities said they arrested a border guard on suspicion of firing the shots. The shooting occurred about six miles from the resort city of Eilat.

A statement by the group calling itself the Islamic Jihad Movement in Palestine issued a statement in Beirut that stopped just short of claiming responsibility for the attack at the Israeli- Egyptian border. The statement said the group- quoting now- ''saluted the heroic Egyptian soldier who aimed a bullet today at the heart of the enemy....''

In the Israeli-declared ''security zone'' in southern Lebanon, a woman guerrilla brandished an explosive-laden bag and blew herself up against an Israeli military patrol, wounding two Israeli soldiers. The suicide attack occurred just hours after an Israeli gunboat intercepted a boat off the coast and killed four guerrillas of the Popular Front for the Liberation of Palestine-General Command. The pro-Syrian Social National Party said the 19-year-old woman carried out the attack to mark the 52nd anniversary of the group.

Italian police say a chartered helicopter ferrying workers to an off- shore oil rig crashed into the Adriatic Sea just off the coast of Italy. They say all 13 people aboard the chopper are believed dead. Italian state television says an eyewitness reported seeing the helicopter explode in flight a few hundred yards off the Italian coast.

Officials in Prague say about 75 percent of the eligible voters cast ballots in local elections in the Czech republic, and a moderate turnout was indicated in the eastern republic of Slovakia. Voters went to the polls on Friday and Saturday in Slovakia, and just yesterday in the Czech Lands of Moravia and Bohemia. It was the first free ballot for local and county government officials since 1938.

In Poland, voters are casting ballots in the nation's first general presidential election. Solidarity union founder Lech Walesa is expected to get the most votes among six candidates and to face a run-off against his closest rival in two weeks. About 27 and one- half-Million people are eligible to vote.

#90329u0230 11/25/1990 ~United Press International

NEW YORK (NOV. 25) UPI - A young Marine who was home for Thanksgiving and set to leave for Saudi Arabia this week was killed by a hit-and-run driver early Sunday as he tried to help another motorist who was stranded on a freeway.

Lance Cpl. Reynaldo Martindale, 19, was declared dead at the scene following the 5:29 a.m. incident, police spokesman Officer Scott Bloch said. A friend of Martindale's was injured and in stable condition.

The good Samaritans were passing through a neighborhood in Queens when they noticed a woman in a stalled car in the northbound lanes of the Van Wyck Expressway.

''They stopped to help and as they pushed it (the woman's auto) off the highway, they were struck by an unidentified vehicle that fled,'' Bloch said.

Joseph Parris said his grandson had been in the Marines for about 18 months, and most recently spent about six months in Europe. The Brooklyn man said his grandson was always trying to lend a hand to people who needed help.

''He was that type of person,'' Parris said. ''He was a very intelligent boy, and he liked the Marines very much.''

Martindale had suffered injury to the head and his legs were broken, Bloch said. The Marine, stationed at Camp LeJeune, N.C., was on his way to catch a flight back to camp after the Thanksgiving holiday when the incident occurred, Parris said.

Martindale's friend, Steven Morales, 24, of Queens, was taken to Jamaica Hospital in stable condition with ankle injuries, Bloch said.

Martindale had been scheduled to leave North Carolina to serve in Operation Desert Shield in Saudi Arabia sometime later in the week, according to Barbara

Perrino, a hospital nursing supervisor who said she had spoken with Morales.

The motorist who the men stopped to help was unhurt. Her name was unavailable. Police were investigating the hit-and-run incident.

Perrino said Morales told her, ''The worst thing that happened to me today is that I lost my friend. I want this in the paper and on television because I hope that the person who hit us hears this and feels guilty. He should feel guilty.''

Parris said Martindale's oldest brother, Howard, serves in the Armed Forces in Alaska.

''I helped raise them since the oldest was 8 years old,'' said Parris. ''They are like my own.''

-30- 2494

#90329u0241 11/25/1990 ~United Press International

NEW YORK (NOV. 25) UPI - A state assemblyman scheduled a Monday hearing on the violence-marked Daily News walkout, while strikers increased pressure on the tabloid newspaper's last big department store advertiser.

Assemblyman Frank J. Barbaro, D-Brooklyn, arranged for a hearing into the strike by 2,500 News workers that was in its 32nd day Sunday and has been marred by arson, fire bombings, vandalism and brawling.

Police said there have been 196 reports of strike-related violence and 89 arrests.

The purpose of the hearing, according to Barbaro's announcement, is to obtain information that might be useful in formulating state legislation addressing issues in the labor dispute.

The issues include management's hiring of out-of-state security personnel - some dressed as paratroopers - to protect News property, newspaper vendors, and non-union employees chosen to replace strikers so that the News could continue to publish, the announcement said.

''We are going to have several witnesses at the hearing to testify about the hiring of strike breakers in the form of security forces that are not even registered to operate in New York state,'' said Barry Lipton, president of The Newspaper Guild, which represents striking editorial workers.

Lipton said the Guild and the Allied Printing Trades Council, an umbrella group of striking craft unions, will bear down on Alexander's, the last of the big department stores advertising in the News by picketing its several store in the city at shopping malls in the metropolitan area.

Pickets handed out leaflets Sunday asking shoppers not to enter Alexander's because it still advertises in the News.

Macy's and A&S, the News's other large store advertisers, terminated advertising in the paper during the weekend. Macy's, the paper's largest advertiser, spent about $6 million a year on News ads.

''Alexander's is our major target now,'' Lipton said. ''If we can get it to withdraw, the News won't have much revenue coming in from ads. Two-hundred of the 260 regular advertisers already have dropped out.''

Lipson claimed management, not the reported unavailability of federal mediators, was to blame for a negotiating meeting by the Guild and the Daily News failing to materialize Friday. He said the union was in contact with the Federal Mediation Service three times to schedule the meeting but News management never contacted the service.

''We haven't heard a word from management for two-and-a-half weeks,'' Lipton said.

''We have asked for information on who was hired to replace News strikers, what their pay is and what sort of contract with them exists, information we are entitled to under federal labor law that is pertinent to bargaining. Until we get that information we won't engage in negotiations.''

Meanwhile, News executives brushed off an offer by Gov. Mario Cuomo to intervene as a mediator in the strike, the governor announced Sunday.

''The unions are eager, but we're waiting for management,'' Cuomo said. ''They say they will consider it at the appropriate time, but not having heard from management, I assume they don't consider it the appropriate time.''

State Labor Commissioner Thomas F. Hartnett and George E. McDonald, president of the Allied Printing Trades Council, said they also had requested a meeting with News publisher James Hoge to discuss the issues of the strike but were rebuffed. Hartnett said he was told Hoge would ''think about it.''

John T. Sloan, spokesman for the News said Hoge would not meet with any union leaders.

By midweek, strikers will publish the second edition of its strike newspaper, Real News, running 12 pages. Lipton said 1 million copies will be printed and distributed throughout the city.

#90329u0248 11/25/1990 ~United Press International

(NOV. 25) UPI - TODAY'S PEOPLE:

SEX AND THE FOUNTAIN OF YOUTH: At last, Dick Clark reveals the secret of his youthful appearance - sex. In an upcoming issue of Longevity magazine, the ''American Bandstand'' maven says, ''Sex is a very important part of my life. Having the right partner, as I do, means a lot. Sex keeps me young. The more you want it, the more youthful you are, mentally and physically.'' Clark, 61, has been with his third wife, Kari, for 13 years.

BART SPEAKS IN OHIO: Bart Simpson - or least his voice - returned home to Kettering, Ohio, to visit her family during the Thanksgiving weekend. Nancy Cartwright says she doesn't mind having a well-known voice and an unknown face. ''I like the anonymity because it gives me the choice to reveal it or not,'' she said. Cartwright says was supposed to try out for the voice of Lisa Simpson but had a hunch she could do Bart better. ''Actually with the sound of my voice, I do boys better than I do girls,'' she said. ''I had no idea that it was going to be the runaway hit that it is. I had no idea it was going to (be on) T-shirts and key chains and flashlights and everything else.''

SILVER THOUGHTS: Ron Silver has plenty to keep him busy when he's not acting. ''People are so afraid to say what they honestly think, make a decision or take sides,'' Silver, one of the stars of the movie ''Reversal of Fortune,'' said in an interview with The Washington Post. ''To me, neglect and indifference are states devoutly to be avoided in a democracy.'' He's involved in helping homeless children and abortion rights. ''I went to a dinner the other night for Republicans for Choice because, for me, pro-choice is a threshold issue. I'm a Democrat but I'll cross lines. I'm in favor of the death penalty so is that an anomaly, an aberration or what?''

GLIMPSES: Writer-director Joseph L. Mankiewicz, a four-time Oscar winner, will be honored by the Academy of Motion Picture Arts & Sciences with a special tribute at New York's Museum of Modern Art Thursday. The night also will feature a discussion of Mankiewicz's work, which includes ''A Letter to Three Wives'' and ''All About Eve'' ... Paul Newman and his wife, Joanne Woodward, star as straight-laced Midwesterners facing changing times in ''Mr. and Mrs. Bridge'' and Newman says there are some similarities between the movie and real life. ''Joanne really thinks I am Walter Bridge,'' he said. ''Remember that scene where India (Mrs. Bridge) announces she is going to leave Walter, although she has no intention of doing so? Once I packed a suitcase and announced I was leaving Joanne. I slammed out of the house. But I was back in a couple of hours, knocking on the front door.''

#90329u0250 11/25/1990 ~United Press International

ATHENS, Greece (NOV. 25) UPI - Iranian Foreign Minister Ali Akbar Velayati and his counterparts in the six-nation Gulf Cooperation Council will meet in Muscat for the second time in two months, the official Islamic Republic News Agency said Sunday.

Velayati made the announcement after discussing the Persian Gulf crisis with Omani Foreign Minister Youssef bin Alavi in Tehran. He mentioned no date for the meeting, the second in two months.

The Iranian foreign minister was also to visit Moscow to discuss the crisis with Soviet Foreign Minister Eduard Shevardnadze.

An IRNA dispatch monitored in Athens quoted Irish Foreign Minister Garard Collins as saying Iran could play an important role in defusing the crisis spawned by Iraq's Aug. 2 invasion of Kuwait.

Velayati held two rounds of discussions with Alavi, who flew unexpectedly to Tehran Saturday, two days after Iraqi Foreign Minister Tareq Aziz visited Muscat.

IRNA said Alavi handed a message to Iranian President Akbar Hashemi-Rafsanjani from Omani ruler Sultan Qaboos bin Said ''dealing with the situation in the region.''

The Voice of the Islamic Republic radio said Velayati and Alavi discussed the crisis and Iran's relations with the GCC, of which Oman is a member-state along with the United Arab Emirates, Kuwait, Saudi Arabia, Qatar and Bahrain.

A Tehran radio broadcast monitored in Athens said Velayati and Alavi discussed the danger of war and the need for the foreign ministers of Iran and the GCC to hold a second meeting, either in Tehran or in Muscat.

The first such meeting was in New York in September, shortly after Iraq made sweeping concessions to Iran to hurry up the peace process between the two countries as a multinational force was building up in Saudi Arabia.

Velayati told reporters Iran and Oman ''share common views on the future and stability of the region in the long run.'' Iran condemned Iraq's invasion of Kuwait as well as the presence of western forces in the area.

Collins, in Tehran about the same time as Alavi, said before leaving that he and Velayati discussed the crisis. ''Iran has a key role in defusing the crisis and can assume an important role in the stability of the region,'' IRNA quoted Collins as saying.

Velayatis forthcoming visit to Moscow is at the invitation of the Soviet foreign minister ''to review the current situation in the region, '' IRNA said. No date was given for the Moscow trip.

Tehran radio said a senior Iranian Foreign Ministry official left for Baghdad early Sunday, to discuss outstanding issues between Iran and Iraq and matters relating to a resumption of pilgrimages by people on both sides.

#90329u0306 11/25/1990 ~United Press International

(NOV. 25) UPI - The official Amman Radio says about 100 German hostages arrived in the Jordanian capital today from Baghdad aboard an Iraqi airliner. The report says the hostages were freed to mark Iraqi appreciation for recent remarks by German Chancellor Helmut Kohl. The German leader called for a peaceful solution to the Persian Gulf crisis earlier this month.

The official Tehran Radio says the foreign ministers of Iran and Oman met in the Iranian capital city today to discuss latest developments in the Persian Gulf crisis. The report said the two also discussed the possibility of convening a second meeting of the foreign ministers of the Gulf Co-operation Council and Iran. The Omani official flew to Iran just two days after the Iraqi foreign minister made an unexpected visit to Oman.

The Israeli army says a heavily armed gunman believed to be an Egyptian soldier crossed into Israel near the resort city of Eilat and opened fire on passing vehicles. A spokesman says four people were killed and 23 wounded in the incident... the third attack along Israeli borders in 24 hours. The gunman crossed the border back into Egypt, and Egyptian officials say they arrested a border guard on suspicion in the attack. Egyptian officials also expressed regret over the incident.

In the Israeli-declared ''security zone'' in southern Lebanon, a suicide bomber carrying a bag of explosives killed herself and wounded two Israeli soldiers. Off the Lebanese coast, an Israeli navy patrol intercepted a boat and killed five guerrillas who were attempting to infiltrate Israel by sea.

Thousands of dissident students, workers and farmers battle riot police in Seoul and other South Korean cities today in violent anti-government demonstrations. The battles broke out after rallies sponsored by the hard-line National Alliance for Democratic Movements. The group was protesting alleged government suppression of democratic movements.

Authorities in New York City say police seized about 100 pounds of explosives that were stashed in the belly of a Miami-bound jetliner. They say police arrested one man who apparently was ferrying the explosives for sale in Puerto Rico. The M-80 explosives were discovered in four 25-pound boxes in the luggage area of Pan Am Flight 402, which was being readied for take-off from

John F. Kennedy International Airport.

(NOV. 25) UPI - President Bush is prepared this week to ask the United Nations Security Council to give the go-ahead to take military action against Iraq if necessary. Secretary of State Baker will gather with the foreign ministers of the Security Council on Thursday to try to hammer out the 11th and toughest resolution against Iraq since it annexed Kuwait August 2nd.

The head of the U-S Episcopal Church says President Bush needs to exert more energy trying to reach a diplomatic solution to the Persian Gulf crisis. Bishop Edmond Browning... the presiding bishop of the country's two-point-five Million Episcopalians... said in Rhode Island that the U-S needs to work harder at the negotiating table. He warned that going to war would be a terrible catastrophe, and it would be difficult for the country to recover.

First returns from Czechoslovakia's historic elections are expected tonight. However, because of the complicated and extensive list of coalitions, the impact of the results will not be known until Wednesday or Thursday. Czechoslovakia's first free vote for local officials since 1948 began Friday in one republic and began in two others yesterday.

There's a report that the U-S Postal Service will NOT appeal an arbitrator's order to re-instate seven female employees fired for walking off their jobs because of poor working conditions. The postal clerks were fired last winter for refusing to work in a nearly freezing Chicago building.

Winter visitors to Miami Beach may find the sands a little narrower. High winds and storms are washing away the beach. Miami Beach imported about 14-Million cubic feet of sand in 1979 to expand the beach... and a touch-up three years ago added more sand.

#90329u0353 11/25/1990 ~United Press International

EASTERN SAUDI ARABIA (NOV. 25) UPI - A delegation from the British Parliament visited the famed ''Desert Rats'' armored brigade Sunday and said later there would be no change in British Gulf policy after Margaret Thatcher's resignation.

''The people concerned are perfectly certain that there will be no change of policy,'' said Michael Mates, a Conservative member of Parliament and chairman of the Defense Select Committee.

''The entire government is behind this effort, as is the opposition, as are all parties in the House, as indeed is every jack Englishman and woman,'' Mates said, rejecting any change resulting from Thatcher's announcement last week that she would step down as prime minister.

''I think there is a very broad measure of agreement, indeed, throughout the United Kingdom about how the Americans have reacted in the gulf and how the British government has come to the support of Saudi Arabia and the United States forces,'' added Lord Pym, a Conservative member of the House of Lords.

''It is not a particularly controversial subject,'' Pym said.

The two British officials, part of a 13-member delegation, spoke at a news conference after riding in battle tanks and observing maneuvers by the famed ''Desert Rats'' of the 7th Armored Brigade, whose members sport a patch with a picture of a red rat on their arms.

The ''Desert Rats,'' whose unit was named after a signaller's pet Jerboa rat, earned their reputation as a crack tank unit in the campaign in north Africa during World War II, where they fought the German Afrika Corps in some of the bitterest tank battles of the conflict.

The members of Parliament held their news conference in front of two tanks covered by camouflage netting at the 7th Infantry Brigade camp in eastern Saudi Arabia. The British troops are part of a U.S.-led multinational force deployed in the Persian Gulf region after Iraq's Aug. 2 invasion of Kuwait during an oil and border dispute.

Winston Churchill, a Conservative member of Parliament and the grandson of Britain's World War II prime minister, told reporters he was impressed by the scale of the buildup and the high morale of the British troops.

He described the presence of 2,500 allied aircraft in the area as ''probably the greatest concentration of air power the world has ever seen'' and said the buildup to an allied army of 500,000 soldiers should give ''a formidable message to (Iraqi President) Saddam Hussein.''

Echoing comments made recently by visiting members of the U.S. Congress,

Churchill said the allies would no longer be satisfied by an Iraqi withdrawal from Kuwait.

''We're not only talking about the withdrawal of Iraqi forces from Kuwait, we're talking about getting rid of Iraq's budding nuclear and existing chemical and biological weapons and long-range delivery systems,'' Churchill said.

''That is unacceptable to everyone in the region here and that is something we must not leave the desert until it is resolved,'' he said.

Churchill, a former war correspondent for the Times of London, also had some advice for the allied military leaders.

''If and when the moment comes for action, we must optimize in those areas where we have the greatest advantage - and that is air power,'' he said. ''There is no need for large-scale casualties provided we make our dispositions and our plans in a sensitive way.''

He said he covered the 1967 and 1973 Arab-Israeli wars.

''I've seen with my own eyes the fate of an army in the desert that loses its air cover, flying low over the Sinai and the Golan Heights to see literally hundreds of burned-out tanks, armored personnel carriers and self-propelled guns as far as the eye could see to the horizon.''

Addressing the widespread popular support in Britain for the gulf buildup, John Home Robertson, a Labor member of Parliament, said, ''I wouldn't like anyone to think, in America or anywhere else, that anyone in Britain wants war.''

''I think the people in Britain, the opposition and the government want the United Nations resolutions to be honored and they want the aggressor to leave Kuwait,'' he said. ''It would be far better if that could be done without a war, but if it's going to be necessary to have a war, then so be it.''

#90329u0356 11/25/1990 ~United Press International

MIAMI (NOV. 25) UPI - A new genetic study shows most of the endangered panthers in the Everglades are not pure-bred Florida panthers at all, but hybrids that may not be entitled to protection under the Endangered Species Act.

The Florida panther is the only wild panther left east of the Rocky Mountains, and is Florida's state animal.

But no more than 13 of the estimated 30 to 50 panthers in the wild are

pure-bred, said Melody Roelke, a veterinarian with the U.S. Fish and Wildlife Service. The rest are more closely related to the South American puma.

Scientists at the National Cancer Institute compared genetic codes in the panthers' cells and found two distinct families.

One, in the Big Cypress National Preserve, was founded by pure Florida panthers. The other, in Everglades National Park, apparently descended from South American pumas set free in the 1950s.

The two families have been breeding together and their offspring are hbyrid mixtures of panther and puma.

Panthers and pumas are subspecies of the cougar or mountain lion. Genetic evidence suggests they shared a common ancester 250,000 years ago when the species evolved into a North American and a South American type.

The genetic mixing probably began in the 1950s at Everglades Wonder Garden, a roadside attraction in Punta Gorda whose owners kept a female panther and bred her to cats they believed were also panthers.

Between 1957 and 1967, seven Punta Gorda cats were released into Everglades National Park at the request of scientists who thought the cats were pure-bred and wanted to restore the parks' vanished panther population.

In 1986, biologists noticed that the Everglades Park cats lacked two distinctive Florida panther traits - a kinked tail and a cowlick along the spine.

To find out why, they appealed to the cancer lab, which has done genetic studies of rare animals hoping to learn more about inherited diseases.

Scientists used blood and tissue samples to compare the Florida panthers to cougar subspecies from Chile, Oregon, Texas, Arizona, Colorado and Utah.

The tests showed the Everglades cats matched the South American puma but the Big Cypress cats did not.

Hybridization, or breeding between distant relatives of the same animal species, is usually considered good because it is nature's way of revitalizing a group of animals in danger of dying out.

But the federal Engandered Species Act doesn't protect hybrid animals. That means the cats carrying the South American puma genes may be at risk of losing their legal protection.

Since the Endangered Species Act is also a crucial means of protecting wilderness lands where the panthers roam, the lands are also at risk.

''The Florida panther is suffering from too much information,'' said the study's lead author, Dr. Stephen O'Brien, chief of viral carcinogenesis research at the National Canter Institute. ''I don't think the cat ... should be penalized because we know more about it than we used to, but that could happen.''

The new genetic information also poses a dilemma for bioligsts who are trying to design a captive breeding program to save the panthers.

They could select only pure-bred animals, which already suffer the effects of inbreeding. Scientists say all of the pure-bred males have only one testicle, and 90 percent have abnormalities in their sperm.

That choice would greatly increase the chance of the program's failure and the panthers' ultimate extinction.

Mixing hybrid cats and pure-bred panthers would probably increase the chance of preserving an animal called the Florida panther. But as the generations pass, the animal could lose the traits that make the Florida panther unique.

At least one Everglades cat has already crossed into the Big Cypress and is breeding with panthers there, Roelke said. If nature is left alone, scientists suspect all the wild panthers will eventually be descended at least in part from the South American cats.

While biologists seek more detailed research, the Fish and Wildlife Service has proposed a federal rule that would bar the captue or killing of any wildcat ''similar in appearance'' to the Florida panther and would offer habitat protection. If approved, it would take effect in August.

#90329u0377 11/25/1990 ~United Press International

WASHINGTON (NOV. 25) UPI - The world may need long-term trade sanctions against Iraq even if it withdraws from Kuwait to blunt its desire for dangerous new weapons, such as nuclear bombs, Defense Secretary Richard Cheney said Sunday.

President Bush raised the issue of Iraqi efforts to develop nuclear weaponry during his Thanksgiving Day visit to U.S. troops in Saudi Arabia. He warned that Iraqi President Saddam Hussein has ''never possessed a weapon he did not use.''

Cheney, during an appearance on the CBS program ''Face the Nation,'' cited Iraq's use of chemical weapons against Kurdish rebels and Iranian forces and pointed to repeated attempts by Saddam's regime to obtain the components needed to produce a nuclear weapon.

''If he were to come into compliance (with U.N. resolutions) and withdraw from Kuwait, you still are going to have to worry about the problem of his acquisition of sophisticated weapons,'' Cheney said.

''That is going to require, I think, a far more aggressive set of sanctions than we have seen up to now. That would mean the sanctions are not going to go

totally away. You're going to try to deny him any further access to the kind of technology he would need to develop this capability. Clearly, it would require an agreement among the nations of the world that this man will not be allowed to succeed.''

An international trade embargo has been employed against Iraq since its Aug. 2 invasion of Kuwait.

Appearing on the same program, Senate Majority Leader George Mitchell, D-Maine said Iraq's efforts to obtain nuclear weapons had been known for years, but the United States looked the other way because of Iraq's value in the 1980s as a counterbalance to Iran.

Public opinion polls recently have indicated that many Americans rank concern over Iraqi acquisition of nuclear weapons as a compelling reason for U.S. action in the Persian Gulf.

Cheney said Iraq could have a ''crude (nuclear) device'' as soon as one year. Many analysts believe Iraq is five to 10 years from having a small nuclear arsenal, while some say it could be two years or less.

''He's working this problem very hard,'' Cheney said. ''It's only a matter of time until he acquires nuclear weapons and the capability to deliver them.''

#90329u0424 11/25/1990 ~United Press International

LONDON (NOV. 25) UPI - The three contenders to succeed Margaret Thatcher as prime minister spent Sunday trying to woo uncommitted Conservative members of parliament through newspaper and television interviews.

The candidates each portrayed themselves as the one best able to unite the party after its most rancourous feud in decades, one which forced Thatcher to announce her resignation last week.

All three men also praised Thatcher, embraced most of her policies, but distanced themselves from the poll tax - a controversial new local tax that prompted massive demonstrations and helped make Thatcher the most unpopular prime minister since public opinion polling began here in 1937.

Tuesday, the 372 Conservative members of Parliament will vote by secret ballot for leader of the party, who then automatically becomes prime minister.

A batch of public opinion polls released Sunday showed the Conservatives would beat the Labor party in the next general election if Michael Heseltine, a former Defense Secretary, or John Major, the chancellor of the exchequer, led the party, but the race would be closer if Douglas Hurd, the foreign secretary became prime minister.

Thatcher has not endorsed any of the three candidates, but before the recent political crisis Major was considered her heir apparent, the one she believed would most faithfully carry on her policies.

According to the Sunday Times newspaper, Thatcher will vote for Major on Tuesday, but will not publicly endorse him.

Thatcher will resign as a member of parliament if Heseltine, the man who forced her to step down by denying her victory in last Tuesday's first round, wins, the Sunday Times said, quoting unnamed ''close friends.''

Each camp has claimed to be close to the magic number of 187, the number of votes needed to win Tuesday.

Heseltine won 152 votes in the first round, but many analysts believe most of those were ''anybody but Thatcher'' votes. His aides insist he is gaining as many votes as he is losing.

The Independent on Sunday newspaper said its poll of MPs showed Major capturing 87, Heseltine holding 50 and Hurd trailing with 29. The remainder were undecided or refused to comment.

Hurd said he expected the vote to go to a third and final round, which would be held Thursday if no candidate gets 187 votes Tuesday. The final round would be decided by a complicated transfer vote mechanism in which first and second preferences would determine the outcome.

Hurd is regarded as a second choice of many Heseltine and Major supportes.

Heseltine's candidacy was boosted Saturday by endorsements from two ex-Cabinet members who were once Thatcher's most loyal supporters.

Sir Geoffrey Howe, the former foreign secretary and deputy prime minister, and Nigel Lawson, the ex-chancellor of the exchequer, who both resigned from Thatcher's Cabinet over antagonism to greater European integration, said Heseltine was best suited to become prime minister.

Howe is described in the British press as the man who handed Heseltine the knife against Thatcher. In his first interview since his devastating resignation speech on Nov. 13, which forced the Conservative differences over greater European integration into the open, Howe said he did not intend to topple Thatcher.

#90329u0432 11/25/1990 ~United Press International

NEW YORK (NOV. 25) UPI - Police Sunday found 100 pounds of explosives in the

belly of a Miami-bound jet and arrested a suspect who said he had planned to sell the cache in Puerto Rico, authorities said.

The M-80 explosives were found in four 25-pound boxes in the luggage area on Pan Am Flight 402 as the plane was being readied for takeoff at John F. Kennedy International Airport in Queens, said Port Authority Police Officer Philip Montuori.

Police later learned that Jose Molina-Nieves, 52, of Rio Grande, Puerto Rico, had bought the explosives in New York's Chinatown for sale in San Juan, Montuori said.

A worker loading the aircraft noticed the boxes at 8:15 a.m. and alerted authorities, the officer said.

Port Authority Officer Kevin Devlin said Molina-Nieves was arrested at the airport. The suspect was traveling with his wife and daughter, a girl about 10 years old, and the family apparently planned to board Flight 402.

The flight eventually departed without incident and the explosives were transported to the Bronx for detonation, Devlin said.

''He doesn't speak much English. He told us through an interpreter that he puchased a quantity of explosive devices in Chinatown and was bringing them back to Puerto Rico to resell,'' Devlin said.

''The stuff was found when the baggage handler accidentally ripped a box open and found these items,'' he said. ''He notified Pan Am security who notified us.''

Devlin said Port Authority police had notified the FBI and other federal authorities, but federal proseuctors decided not to prosecute Molina-Nieves.

''Apparently they (federal authorities) don't believe his intent was to do damage to the aircraft,'' Devlin said.

The suspect was turned over to city police and Molina-Nieves was expected to be arraigned later, Devlin said.

(NOV. 25) UPI - Arab news reports indicate that Iraq is moving onto more of a war footing by conscripting youths under 15 years of age and ordering peasants to report to their reserve units. Word of new mobilization action in Iraq comes amid reports that the United States will seek a U-N Security Council meeting on Thursday to authorize military options to get Iraq out of Kuwait. Reports say Iraq will use the children to guard vital military and economic installations, freeing regular troops for combat in Kuwait.

An Iraqi charter flight today carried 104 German and one British national to Frankfurt, Germany, where the former hostages were greeted by cheering friends and relatives. Iraqi leader Saddam Hussein announced previously that he would free all remaining German hostages in Iraq and Kuwait. The German Foreign Ministry says another seven Germans held in Kuwait did NOT get to the airport in time to make today's flight but will be on a later one.

There have been three attacks in Israeli border areas in 24 hours, and Egyptian officials expressed regret over one of them. The Egyptians say they are holding a border guard on suspicion of firing the shots that killed four Israelis and wounded 23 others today near the resort town of Eilat. Israel says a heavily armed gunman cross into Israel from Egypt and opened fire on passing vehicles.

The other anti-Israeli attacks occurred in the Israel-declared ''security zone'' in southern Lebanon and off the Lebanese coast. An Israeli naval patrol intercepted and killed five guerrillas attempting a seaborne infiltration. In southern Lebanon, a woman killed herself and injured two Israeli soldiers by triggering a bag of explosives.

Diplomatic sources in Paris say Cambodian resistance leader Prince Norodom Sihanouk is urging the four main factions in Cambodia to hold what he terms a ''fraternal meeting'' in the French capital. The sources reported that Sihanouk wants the meeting as soon as possible. They say the resistance leader wants the meeting to be ''non-official.'' Sihanouk is in Paris on what he called a private visit.

A young Marine on leave for the Thanksgiving holiday was killed before dawn this morning by a hit-and-run driver on an expressway in Queens, New York. Police say 19-year-old Lance Corporal Reynaldo Martindale and a friend had stopped to help a woman whose auto had stopped on the roadway. They say the two were pushing the car off the roadway when another vehicle struck them. The Marine's friend is hospitalized in stable condition.

-30- 2724
#90329u0539 11/25/1990 ~United Press International

MOSCOW (NOV. 25) UPI - Embattled Soviet Premier Nikolai Ryzhkov indicated Sunday he will not fade away and that the upcoming Congress of People's Deputies will have to force his ouster if it desires.

Ryzhkov's resignation has been rumored ever since Soviet leader Mikhail Gorbachev last Saturday outlined a new plan of government in which the president would control the government ministers.

But Ryzhkov said on Soviet television such a government restructuring requires a change in the constitution that only the Congress of People's Deputies can approve.

Since the Congress, parent body of the Supreme Soviet, meets on Dec. 17, Ryzhkov appeared to indicate he would hold out until then.

''In any case, this question should be decided by the Congress,'' Ryzhkov said. ''If it supports the new system, it must amend the constitution.''

A similar session of the 2,250-person Congress in Feburary was required to create the office of presidency for Gorbachev because it concerned a constitutional change.

Cryptically, Ryzhkov said: ''I am ready for any variant if it will help the government.''

But the overall tenor of Ryzhkov's remarks was it would require a constitutional change to force him out as the Soviet premier.

''I will not change my principles, no matter what structural changes will take place,'' Ryzhkov said. ''I have firm life convictions, firm political conditions, and I do not intend to change them.''

Ryzhkov said he had expected he would leave in December when the republics finally decide whether to accept a new union treaty reconstituting the state into a Union of Soviet Sovereign Republics - dropping the word ''Socialist'' from the country's old name, the Union of Soviet Socialist Republics.

But Ryzhkov said Gorbachev gave him only 30 minutes notice last Saturday by telephoning and saying he was going to propose the restructuring that very morning, changes that in effect would remove Ryzhkov.

Ryzhkov, son of a Russian coal miner in the Ukraine, was non-comittal when asked if he would continue in politics if he were removed.

Ryzhkov's star began falling when Gorbachev turned to Russian President Boris Yeltsin to work out an economic plan after the parliament last June failed to give final approval to Ryzhkov's blueprint for a semi-market economy.

But throughout the debate this autumn, Ryzhkov never wavered in his contention that a price reform and higher prices had to be the first step in any effective economic reform.

In what was a surreal atmosphere in October, Gorbachev combined the design he had worked out with Yeltsin, the so-called 500-day plan, and a variant of Ryhzkov's formula. The parliament duly passed it.

In the early years of perestroika, Ryzhkov was a major figure, sent as a trouble shooter to all major hot spots, including Chernobyl after the nuclear disaster, Armenia following the December 1988 earthquake and Central Asia to restore order after ethnic killings there of Meskhetian Turks.

Ryzhkov, whose uncles were also all miners, was the point man in settling the nationwide coal strike of two years ago for which he earned little praise but a constant battering in the news media.

In an indication of the base he would use to build a new political life, Ryzhkov said he hoped any new government would honor the settlement he signed with the colliers.

Ryzhkov portrayed himself as the guarantor that the settlement with miners would be carried out.

Without him, he said, ''it cannot be excluded some changes could take place in the case of a new government.'' He said he hoped this would not happen.

#90329u0554 11/25/1990 ~United Press International

(NOV. 25) UPI - Iraq reportedly is mobilizing children and peasants in preparation for war, as U-S officials urge allies on the U-N Security Council to approve a resolution to put military sanctions on Iraq. An Iraqi opposition group is quoted as saying children under 15 were being mobilized, and officials ordered peasants to report to their reserve units by December 15th.

The official Islamic Republic News Agency says the Iranian foreign minister and his six counterparts in the Gulf Co-operation Council will hold a meeting in Oman for the second time in two months. The announcement came after the Iranian official met with his Omani counterpart in Tehran.

Iraq, meanwhile, sent a chartered airliner out to Amman, Jordan, and then Frankfurt, Germany, with 104 Germans and one British national on board... hostages freed from Iraq and Kuwait. Cheering friends and relatives greeted the hostages at the Frankfurt airport.

The Israeli Army says four Israelis were killed and 23 wounded when a heavily armed gunman cross the border from Egypt and opened fire on passing vehicles

near the resort town of Eilat. Egypt expressed regret over the incident and said it had arrested a border guard on suspicion of doing the shooting.

The shooting incident near the Egyptian border is the third border- area attack in 24 hours in Israel. Authorities say a naval patrol intercepted and killed five guerrillas trying to infiltrate Israel from off the Lebanese coast. And a woman set off a bag of explosives near an Israeli patrol, killing herself and injuring two soldiers.

A Miami report says the U-S Customs Service is investigating allegations that an Israeli criminal network operating out of Miami trained and helped arm Colombian cocaine-traffickers. The report says the Israeli criminals apparently engineered an Israeli government shipment of 500 automatic weapons to Antigua that was diverted to the Colombians.

A young Marine home for Thanksgiving before shipping out for Saudi Arabia was struck and killed by a hit-and-run motorist this morning on an expressway in Queens, New York. Police say 19-year-old Reynaldo Martindale and a friend were helped a stranded motorist get her car off an expressway when they were struck. The friend is hospitalized in stable condition.

Voters in Poland are casting ballots in the nation's first free presidential election today, choosing from among six candidates. Solidarity union founder Lech Walesa is expected to end up in a run-off with another candidate in two weeks.

#90329u0775 11/25/1990 ~United Press International

(NOV. 25) UPI - Arab news reports say Iraq is conscripting school children, apparently to guard vital military and economic installations so regular troops are available for combat duty. And Baghdad Radio says peasants who make up part of the nation's reserve force have been ordered to report for duty by December 15th.

Senate Majority Leader George Mitchell of Maine says he believes the administration should give the U-N-backed embargo more time to force Iraq to withdraw from Kuwait before resorting to military action.

The Iranian foreign minister says he will fly to Moscow to discuss the Gulf crisis with his Soviet counterpart. He also announced that he will meet with six other Arab foreign ministers from the Gulf Co- operation Council.

Egypt expressed regret and said it is holding the border guard suspected of being the gunman who crossed the border into Israel and opening fire on passing vehicles near the town of Eilat. Israel says four Israeli were killed and 23 others wounded in the incident.

More woes today because of flooding in Washington state. A quarter- mile section of the old Interstate 90 floating bridge across Lake Washington in Seattle broke loose and sank. State transportation officials closed the new I-90 span as well, while workers determined whether it is in danger, too.

Authorities say the howling Chinook winds that blew a fire across more than six-thousand acres outside Boulder, Colorado, subsided overnight, giving firefighters a better chance to encirle the blaze and control it. The flames destroyed 15 structures and forced about 100 sub- division residents from

their homes for a time last night.

Another Colorado fire is threatening to paralyze the seventh-busiest airport in the nation, Stapleton Airport in Denver. Authorities say the cause of the fire has NOT been determined, but flames erupted in two 400-thousand-gallon tanks containing jet fuel.

Early returns from the first free presidential election in Poland show Solidarity union founder Lech Walesa with an overwhelming lead... but still NOT enough to win election outright. Walesa is capturing about 41 percent of the vote but will have to face his closest competitor in the six-man field in a run-off election in two weeks.

#90329u0859 11/25/1990 ~United Press International

(NOV. 25) UPI - Iraq apparently is moving to carry out its announced plan to put another quarter-Million troops in Kuwait. Arab news reports say the Iraqis are conscripting school children under 15 years of ago and have ordered peasants to report to their reserve units by December 15th.

Another 125 hostages were released from Iraq today. Cheering relatives welcomed 104 Germans and one British national at the Frankfurt airport, where a chartered Iraqi jet landed after a flight from Baghdad. In Athens, 10 freed Greek hostages arrived from Amman, Jordan.

Defense Secretary Cheney says the world may need long- term trade sanctions against Iraq, even it if withdraws from Kuwait. He says the continued sanctions might be needed to blunt the Iraqi quest for dangerous new weapons, including nuclear bombs.

President Bush returned to the White House today after a weekend at the Camp David retreat in the Maryland mountains. The chief executive was resting up from his eight-day trip to Europe and the Mideast and preparing for a coming two-day visit to Mexico.

New York Port Authority police say 100 pounds of explosives were found in the belly of a Miami-bound jetliner at J-F-K International Airport today and 52-year-old Puerto Rican was arrested. A spokesman says the man told them he bought the explosive devices in New York's Chinatown to re-sell in Puerto Rico.

Officials say it will take 24 to 30 hours for two 400-thousand-gallon jet fuel tanks to burn themselves out at Stapleton Airport in Denver. They say firefighters are pouring retardant foam on the tanks and water on nearby tanks that are even bigger to prevent them from exploding.

A new genetic study shows that most of the endangered panthers in the Everglades are NOT pure-bred Florida panthers but are hybrids that may NOT be entitled to protection under the Endangered Species Act.

-30- 2041

#90329u0920 11/25/1990 ~United Press International

(NOV. 25) UPI - Iraq reportedly is acting more like a nation at war these days. Reports in the Arab media say the Iraqis are enlisting school children under age 15 and have ordered peasants who make up part of the reserves to report for duty by December 15th. The children apparently will be used to guard military and economic installations, thereby freeing regular troops for combat duty.

There could be a new Arab attempt to solve the Persian Gulf crisis. The Iranian foreign minister announced today that he will meet with his six counterparts from the Gulf Co-operation Council to discuss the crisis. He also said he is going to Moscow to discuss the Gulf situation with Soviet Foreign Minister Eduard Shevardnadze.

A Miami report says the U-S Customs Service is looking into allegations that an Israeli criminal network operating out of Miami trained and helped arm Colombian drug-traffickers. The report says the Israeli criminals in Miami engineered a Jerusalem government shipment of 500 automatic weapons to Antigua in 1989 that was diverted to the Medellin cartel. One of the weapons reportedly was used to assassinate a Colombian presidential candidate.

At least one person is reported missing in record flooding in Washington state where a quarter-mile section of an old floating bridge across Lake Washington east of Seattle broke loose and sank today. A helicopter pilot said the west end of Interstate 90 bridge went down ''like a battleship.'' More than one-thousand people were forced from their homes last night, as officials reported that 12 major rivers over- flowed their banks. The Red Cross said it opened 21 shelters in nine counties and most of them were full.

Early projections show Solidarity union founder Lech Walesa with an overwhelming lead in the first free presidential election in Poland. But they also reveal a stunning upset in the making. A businessman who lived abroad for 20 years has taken a lead over Prime Minister Tadeusz Mazowiecki. The projections by a German polling firm showed Walesa with 39-point-one percent of the vote, meaning he will have to face a run-off contest in two weeks.

An attorney for Nazi war criminal Klaus Barbie says his client has survived appendicitis and a hernia operation since being extradited to France but now has cancer. The left-wing attorney who unsuccessfully defended Barbie against war crimes charges says he is leading a campaign to get the 76-year-old known as the ''Butcher of Lyon'' released from prison to undergo further treatment.

#90329u0987 11/25/1990 ~United Press International
(NOV. 25) UPI - Officials in Washington State are asking for outside help as floodwaters continue to wreak havoc in western and central parts of the state. The National Guard will transport 100-thousand sandbags from New York beginning tomorrow. Many counties in western Washington have run out of sandbags... and officials say Snohomish County, hardest hit by the rising waters, have stopped sandbagging efforts altogether because of ''lack of success.''

Iraq reportedly has begun mobilizing schoolchildren and peasants in preparation for war. Cairo Radio reports that Iraqi President Saddam Hussein is drafting children under 15 to guard vital military and economic installations. The move will free soldiers up for combat missions. There's NO official confirmation of the report but Baghdad Radio says Iraq's ruling Revolutionary Command Council ordered peasants who form part of the country's reserves to report for duty in their units by December 15th.

Arab radio stations also quote U-S Secretary of State Baker as saying during a visit to Bogota, Colombia, that the U-N Security Council will vote Thursday on military sanctions against Iraq. The stations say Baker hopes as many of the Security Council's 15 members as possible will authorize force if that becomes necessary. Canadian Foreign Minister Joe Clark told reporters in Cairo today that he doesn't expect the multi- national force to strike at Iraq before the U-N vote.

More than 260-thousand railway workers in the five new eastern German states have voted to strike tomorrow to demand wage hikes and job security. A union spokesman says about 97 percent of the railway employees of the former East German state railway... the Deutsche Reichsbahn... voted in support of the general strike. The walkout is expected to begin affecting passenger and freight services tomorrow. Trains transporting essential consumer goods will be exempt from the strike.

Early projections show Polish Solidarity union founder Lech Walesa has grabbed the lead in Poland's first direct presidential election. Walesa is expected to capture 39-point-one percent of the vote in a six-way race... still short of the 50 percent required to avoid a runoff. But in a dramatic upset, the projections show a businessman who lived abroad some 20 years has swept into second place ahead of Prime Minister Tadeusz Mazowiecki. Wealthy Stanislaw Tyminski has 23-point-four percent. Mazowiecki has 20 percent.

In Czechoslovakia, returns show the pro-democracy Civic Forum has taken a commanding lead in local government elections in the Czech Republic as the nation continues to participatory democracy. The conservative Christian Democratic movement is leading in Slovakia. The balloting was held Friday and yesterday in Slovakia and yesterday only in the Czech lands of Moravia and

Bohemia. The elections were the first for local and county government offices since 1938.

#90329u1186 11/25/1990 ~United Press International

(NOV. 25) UPI - Iraq reportedly is beefing up its armed forces in preparation for war. Cairo Radio says the government is drafting schoolchildren under age 15 and giving peasants until December 15th to report for duty. The reports say the children will guard vital military installations.

In Washington, Defense Secretary Cheney says long-term trade sanctions may be needed against Iraq even if it withdraws from Kuwait. The reason, says Cheney, is to blunt Baghdad's desire for dangerous new weapons, such as nuclear bombs.

Authorities in Boulder, Colorado, say they've nearly contained a six-thousand-acre wildfire. The erratic, fast-moving fire was fanned by gale-force winds as it consumed thousands of acres and 15 structures.

In Denver, officials say two giant 400-thousand-gallon tanks containing aviation fuel are burning at Stapleton Airport and is threatening even larger tanks nearby. Officials say the blaze caused flight delays of up to three hours.

Flood waters eased in all parts of Western Washington this evening, but authorities are keeping an eye on at least nine rivers swollen to the brink from weeks of heavy rains.

Winter storm warnings for heavy snow were posted today for north- central Montana and the northwest and southwest mountains and passes of Wyoming and the mountains of Utah. St. Mary and East Glacier, both in Montana, reported up to 27 inches of snow.

Astronomers today announced plans to create the most detailed map of the universe ever attempted. They say the three-dimensional map that will be 100 times more complete will help answer fundamental questions about the structure and evolution of the cosmos.

A record 100-thousand spectators lined the route in Pasadena today to laugh and cheer as the Doo Dah Parade ambled jerkily through its 15th occasional edition. The Doo Dah Parade is an irreverent preamble to more traditional holiday pageants.

-30- 2083

#90329u1234 11/25/1990 ~United Press International

(NOV. 25) UPI - The U-N Security Council meets this week to discuss a resolution on using force to oust Iraq from Kuwait. The Bush administration

has warned of the pitfalls of letting the Persian Gulf crisis drag on. But Senate Majority Leader George Mitchell today called for continued reliance on the international trade embargo to force Iraq to withdraw from Kuwait. Mitchell says congressional leaders are monitoring developments in the effort against Iraq but he says there's NO sentiment to give President Bush a blank check for use of military force.

Embattled Soviet Premier Nikolai Ryzhkov appears to be softening on his earlier threat to resign if Parliament approves Soviet President Gorbachev's new government reorganization plan. Ryzhkov today indicated on Soviet television that the upcoming Congress of People's Deputies will have to force his ouster. He said- ''In any case, this question should be decided by the Congress.''

In South Africa, African National Congress leader Nelson Mandela says black political movements are trying to force a united front in advance of power-sharing negotiations with the minority white government. Speaking to a rally of more than 10-thousand people in a black township east of Johannesburg Mandela appealed for closer links with the radical Pan Africanist Congress, a splinter movement of the A-N-C. He says unity among the movements is vital to the negotiations.

New York authorities today found 100 pounds of explosives on a Miami- bound Pam Am jetliner. Authorities say the M four 25-pound boxes in the luggage area of the plane as it was being readied for takeoff at Kennedy International Airport. Police arrested a 52-year-old Puerto Rico man who said he had planned to sell the cache in his homeland.

The key figures in the bitter strike at the New York Daily News testify tomorrow before the State Assembly's Labor Committee about the numerous firebombings and vandalism that have marked the month-long labor dispute. The panel is considering crafting legislation in response to the violence stemming from the strike by 25-hundred News workers. Police report there have 196 reports of strike-related violence and 89 arrests since the walkout began October 25th.

#90330b0009 11/26/1990 ~Business Wire

CAMPBELL, CALIF. (NOV. 26) BUSINESS WIRE - Zilog Inc. Monday announced that Edgar A. Sack, president and chief executive officer has been elected chairman of the board of directors.

This position had not been previously filled.

Sack, a veteran of the semiconductor industry, joined Zilog in 1985. In June 1989 he led the acquisition of the company by its employees and the Warburg Pincus Capital Co. L.P.

In addition to Sack, the Zilog board of directors includes William Janeway, Henry Kressel of Warburg Pincus and Tom Connors of TJC Investments.

Speaking on behalf of the board, Janeway said: ''Zilog has made commendable progress over the past five years and has just completed its 57th straight month of profitable operations. With revenues of approximately $100 million, Zilog has a strong balance sheet that carries less than $10 million of debt.

''In addition, during 1990, the company has introduced over twenty new products. Warburg Pincus is pleased to be associated with Zilog in these endeavors.''

Zilog Inc., formed in 1975, produces a complete line of microprocessors, microcontrollers and peripheral circuits for the datacommunications, intelligent peripheral, consumer and military markets.

Zilog's Superintegration library includes the popular Z80 8-bit CPU, the Z8 8-bit microcontroller, the Z8000 16-bit CPU, the industry standard SCC (Serial Communications Controller), the high performance 10 Mb/second USC (Universal Serial Controller) and numerous peripheral cores and cells.

NORTH HOLLYWOOD, CALIF. (NOV. 26) BUSINESS WIRE - Ventura Entertainment Group Ltd. (NASDAQ:VEGG) and its subsidiary Ventura Motion Picture Group Ltd. (NASDAQ:VMPG) have jointly filed a lawsuit in federal court against Herzog, Heine, Geduld Inc., John E. Herzog; and Mark Matheson, Walter W. Cruttenden III, Cruttenden & Co. Inc.; Michael Murphy doing business as Overpriced Stock Service; and other yet unnamed defendants for conspiracy and violations of Securities and Exchange Commission regulations involving securities fraud and stock manipulation (Section 10b-5) of the Securities Exchange Act, according to the Los Angeles law firm of Cooper & Dempsey, counsel for Ventura.

The lawsuit states, among other charges, that:

(a) The Defendants, through means of interstate commerce and the mails, began implementing their scheme to manipulate downward the trading price of Ventura Entertainment Group's common stock by the use of fraudulent and deceptive devices including disseminating false and misleading information about Ventura Entertainment Group while short selling Ventura Entertainment Group's common stock in violation of the Rules of Fair Practice of the NASD and the Securities Exchange Act of 1934.

(b) The Defendants, in an effort to artificially drive the price of Ventura Entertainment Group securities downward, have engaged in short sales of securities without making the required, ''affirmative determination that it will receive delivery of the security from the customer or that it can borrow the security on behalf of the customer for delivery by settlement date.''

Irving Einhorn, a 17-year veteran of the Securities and Exchange Commission and former chief of its Los Angeles office, has been retained by the companies in connection with this litigation as special counsel to advise as to appropriate litigation and regulatory responses with regard to what the companies believe are activities by certain persons or firms who are engaging in illegal short sales of the companies' stock in the open market.

Ventura Entertainment Group is a fully integrated entertainment production company which, directly and through its subsidiaries, produces television commercials, develops and produces network, cable and syndicated television series, miniseries, MOWs, theatrical motion pictures, music/variety specials and live events for the domestic and international marketplace. The company also produces and publishes music, and owns the Ventura Media Center in Orem, Utah, one of the largest production facilities outside of Los Angeles.

#90330b0020 11/26/1990 ~Business Wire

TEMPE, AZ (NOV. 26) BUSINESS WIRE - UDC-Universal Development L.P. (NYSE:UDC) Monday declared fourth quarter distributions on its common, Series A preferred and Series B preferred shares.

The board of directors voted to pay distributions of 10 cents per common share 93.75 cents per Series A preferred share and 90.625 cents per Series B preferred share.

All distributions are payable Jan. 7, 1991, to shareholders of record Dec. 17.

Gary A. Rosenberg, chairman and chief executive officer, said ''the amount of the fourth quarter 1990 common distribution, reflecting continued slow buyer demand and a highly competitive business environment, results in regular common distributions of $1.80 per share for 1990.

''The rate of common distributions for calendar year 1991 will be established by the board of directors at its first quarter 1991 meeting,'' Rosenberg said.

UDC also reaffirmed its previously announced open market common share repurchase plan, which will permit the company or its affiliated entities to purchase up to 300,000 of its outstanding common shares and approved an open

market purchase plan for up to 300,000 of its outstanding preferred shares.

No purchase has been made pursuant to the prior authorization.

''Market purchases of UDC common and preferred shares may represent an advantageous use of capital from time to time,'' Rosenberg said. ''This authorization provides management with the opportunity to take action on a timely basis.''

UDC builds quality upscale family and adult residential communities in the Sun Belt, with operations in Arizona, California, Florida, Georgia, Noth Carolina and South Carolina.

Its common and preferred shares are traded on the New York Stock Exchange.

SAN FRANCISCO (NOV. 26) BUSINESS WIRE - Grubb & Ellis Realty Income Trust (NASDAQ/NMS:GRIT) said Monday that Hopkins Development Co., the prospective buyer of its Livermore Arcade Shopping Center, has advised the REIT that it will not close the purchase of the property because of a dispute between the REIT and the lessor to the REIT of a leasehold interest in a portion of the property.

The REIT previously announced entering into the contract with Hopkins for the sale of the property at approximately the property's appraised value.

The REIT stated that it did not believe that any sale of the Livermore property would be completed in 1990.

The dispute involves the lessor's assertion that options which would extend the term of the REIT's leasehold interest from Jan. 31, 1991 to Jan. 31, 2001 have not been properly exercised. The leasehold interest is in 21,600 square feet of improvements, which are part of the 110,000 square-foot shopping center.

If the lessor is correct, it could have an adverse effect on the earnings and assets of the REIT. The REIT is investigating the matter and intends to vigorously pursue its position that the leasehold interest has been extended to Jan. 31, 2001.

Grubb & Ellis Realty Income Trust is advised by Grubb & Ellis Realty Advisers Inc., a wholly owned subsidiary of Grubb & Ellis Co., one of the nation's largest real estate services firms.

#90330b0042 11/26/1990 ~Business Wire

BOSTON, MASS. (NOV. 26) BUSINESS WIRE - A clearer understanding of how to store high level nuclear waste from weapons facilities and power plant reactors is emerging with the help of a computer model developed by a research chemist at Lawrence Livermore National Laboratory.

William L. Bourcier told scientists here at the annual meeting of the Materials Research Society that he and his colleagues are using computers to assess the probable behavior of nuclear waste incorporated into a chemically resistant borosilicate glass over periods up to 10,000 years. After 10,000 years, the radioactive elements will have decayed away and will no longer be harmful.

Scientists have proposed combining borosilicate with the radioactive elements most commonly found in high level nuclear waste -- including plutonium, americium and neptunium -- and placing it in double-walled metal storage containers in an underground geological repository.

The storage container's inner wall would be lined with stainless steel containing iron, chromium and nickel, with an outer material likely to be an alloy of either stainless steel, copper or nickel.

Bourcier's work is currently focused on predicting the behavior of the glassified mixture should it come in contact with groundwater and rocks present at a repository site.

The computer simulations allow many types of scenarios to be investigated quickly. For example, if the climate were to change and affect the temperature and chemistry of the ground water at the repository site, the effects of these changes on the performance of the repository could be predicted.

Because the simulations do not yet incorporate all the chemical processes that take place in nature, they are being developed in conjunction with laboratory investigations that mimic the expected repository conditions.

Lawrence Livermore National Laboratory, managed by the University of California for the U.S. Department of Energy, conducts research and development important to national goals, including national defense.

Current research programs include weapons, energy, biomedicine and the environment. The Laboratory has had a longstanding commitment to develop new methods and technologies to protect the environment and enhance the nation's

economic competitiveness.

#90330b0049 11/26/1990 ~Business Wire

OKLAHOMA CITY (NOV. 23) BUSINESS WIRE - Alexander Energy Corp. Monday announced it had received a commitment from John Hancock Mutual Life Insurance Co. for $2.1 million to develop eight initial horizontal wells in a 30-well Austin Chalk program in Burleson County, Texas.

Interests in the Austin Chalk leases are held jointly by Alexander and John Hancock through AEJH 1987 Limited Partnership. Alexander's share of AEJH 1987 working interest is a 25 percent back-in.

The partnership's proposed cost to share in the development of the 30-well Austin Chalk program is $5.5 million, or approximately 20 percent of this $28.5 million drilling program. Evaluations indicate gross reserves of the program have the potential to exceed five million barrels of oil and 28 billion cubic feet of gas.

Reserves, net to AEJH 1987, are estimated to be 773 thousand barrels of oil and five billion cubic feet of gas. Net gas flow to the partnership, after recoupment of the capital investment, is estimated at $12.5 million. The company will operate at least 20 of the 30 proposed wells.

The projections of this 30-well program are based on the success of the Falkenberg-Mills No. 1, AEJH 1987's initial horizontal participation in the Austin Chalk. The well was completed during the second quarter of 1990 with reported initial potential of 1,200 barrels of oil and 600 Mcf of gas per day.

Bob G. Alexander, president, said, ''The economics of this program are based on pre-August 1990 prices and are conservative projections. It is also realistic to assume that as the program progresses we will acquire farm-ins and non-consent interests that could substantially increase AEJH 1987's current interest.''

He further remarked, ''We are pleased that Hancock has joined us in this project and look forward to the continuation of our ongoing relationship.'

Alexander Energy Corp. is an oil and gas exploration and production company based in the Mid-Continent Area, with operations in the Gulf Coast and Rocky Mountain Areas. The company's common shares are traded in the over-the-counter market under the NASDAQ symbol AEOK.

PHOENIX (NOV. 26) BUSINESS WIRE - Millions of containers of Lunch Buckets are on their way to feed the troops in Saudi Arabia.

The Dial Corp., a unit of Greyhound Dial Corp., has received a $20.9 million defense logistics agency contract for combat meals for Operation Desert Shield.

''It's our understanding that the servicemen requested better meals,'' said Andrew S. Patti, Dial's president. ''The troops have so many restrictions in that desert environment that food is the only touch of luxury they have. So, good food means an awful lot to them. We're glad our Lunch Bucket line has the quality and the variety of meals they're looking for.''

Already the trucks are rolling out of the company's Fort Madison, Iowa, food plant with 84,000 cases of Lunch Buckets, the nation's most popular microwaveable meals. This is the first of many weekly shipments.

But the army won't be microwaving them. Their cooks have figured out that they can remove the plastic lids from the Lunch Buckets and toss hundreds of them into huge vats of hot water. Heat ten minutes, and they are ready to eat. And due to the insulated container, they remain hot for 30 minutes.

Soldiers in the field will be dining on hearty beef stew, spaghetti 'n' meat sauce, macaroni 'n' beef, lasagna, pasta 'n' chicken, chili mac, pasta Italiano and chili with beans. The product is being trucked to Tinker Air Force Base in Oklahoma, and Sharp Army Depot in California, where it will be airlifted to Saudi Arabia.

GREENWICH, CT (NOV. 26) BUSINESS WIRE - Walsh, Greenwood & Co., a Connecticut-based investment firm, announced Monday that it and its affiliates have acquired additional shares of common stock of The Shirt Shed Inc. (NASDAQ/NMS:SHRT), and certain securities convertible into or exercisable for shares of Shirt Shed common stock.

Assuming full conversion and exercise of its securities, Walsh Greenwood and its affiliates own 3,413,303 shares of Shirt Shed common stock, representing approximately 40 percent of the outstanding common stock on a fully diluted

basis.

Those shares, together with shares owned or purchasable by management of Shirt Shed, represent in excess of 50 percent of such common stock and may therefore represent the ability to effect certain changes through the voting of such shares, including, without limitation, a proposed acquisition of Shirt Shed by Signal Apparel Co. Inc. (NYSE:SIA), an affiliate of Walsh Greenwood.

Signal is currently in discussions with Shirt Shed regarding the proposed acquisition by Signal of all outstanding shares of common stock of Shirt Shed not currently owned by Signal at a price of $4 per share.

In addition to the shares of common stock described above, Signal currently holds a $6 million subordinated note which, under certain circumstances, is convertible into shares of Shirt Shed's preferred stock and, at $3 per share, into 2 million shares of Shirt Shed's common stock.

DENVER (NOV. 26) BUSINESS WIRE - A Continental Airlines widebody aircraft arrived in Denver early this morning, carrying 26,000 pounds of foam to be used in the airport firefighting effort.

The special flight left Houston at 1:12 a.m., arriving at Stapleton at 2:15 a.m. The foam was transported in 44 55-gallon drums. The drums, loaded aboard a special Continental Airbus A-300 flight, were delivered to Stapleton Airport authorities and the Denver Fire Department upon arrival.

Continental has also assisted its competitor, United Airlines, during their fuel supply crisis. Continental has permitted numerous United aircraft to take on fuel at Continental facilities in Denver. Additionally, many United passengers have been able to avoid inconvenience or delay by switching to Continental flights.

Continental's operations in Denver have not been affected by the major fire at the airport fuel storage depot. On Sunday, approximately 85 percent of Continental's flights departed on time, there were no delays exceeding 30 minutes, and no cancellations related to the fire.

Continental has relocated most of its Denver operations from Concourse C to Concourse D, which is connected to a separate fuel storage facility. The fuel storage facility serving Concourse D has a 240,000 gallon capacity, and is served by its own pipeline supply system.

LA SALLE, COLO. (NOV. 26) BUSINESS WIRE - Miller Diversified Corp. (OTC) Monday announced that in two unrelated transactions it has made an investment in a loan servicing package and acquired a commodities trading firm.

In the first transaction, Miller acquired an interest in a loan servicing package that could return more than three times Miller's total investment over the life of the package.

Norman M. Dean, chairman of the board, said Miller and two partners in the venture jointly purchased a loan servicing package that's expected to service $55 million in loans over a 10-year period. Miller and its partners made small cash investments and the remaining 80 percent of the $700,000 purchase price was financed by one of Miller's partners. Miller is not obligated under that note. Under terms of the agreement, Miller expects to recoup its investment within three years and then realize an approximate 300 percent return on its investment over the final seven years of the package.

In the second transaction, Miller acquired LaSalle Commodity and Cattle Services Co., a Colorado-based commodity trading firm. In addition to offering commodities trading services to the general public, Miller will make

the service available to its cattle customers and to shareholders of Miller Diversified.

''The ability to provide commodity trading services is an important adjunct to our principal business of custom cattle feeding,'' Dean said, adding that LaSalle Commodity and Cattle Services has been profitable since inception in 1987.

NASDAQ Update

In another development, Dean said Miller Diversified appears to meet the criteria for listing its stock on the NASDAQ quotation system and intends to make formal application for such listing in early December, once November financial statements are available.

LOS ANGELES (NOV. 26) BUSINESS WIRE - The United Way, reflecting its commitment to being responsive to the changing needs of the greater Los Angeles community, recently selected 22 health and human service agencies serving diverse ethnic populations as candidates for admission to United Way membership.

Having completed the first two phases of a rigorous five-phase admissions process, these agencies will receive a total of $469,484 in funding for this fiscal year.

These agencies are the first to be selected as potential United Way member agencies in five years. They were selected because of their capacity to address the priority needs in ethnic communities identified in a recent needs assessment conducted by United Way.

Also, for the first time on an area-wide basis, 12 non-United Way agencies were identified to receive technical assistance from United Way in organizational development, planning, marketing and public relations.

In announcing the selected agencies, Feelie Lee, Ph.D., chair of the United Way System-Wide Admissions Committee said, ''These decisions reflect United Way's commitment to develop new kinds of relationships that better reflect the ethnically diverse nature of the greater Los Angeles/San Bernardino area. We are expanding and diversifying to meet the needs of this ever-changing community.''

It is anticipated that successful candidates will become United Way member

agencies in the next 18-24 months.

SAN JOSE, CALIF. (NOV. 26) BUSINESS WIRE - Digital Microwave Corp. (NASDAQ/NMS:DMIC) and AT&T Network Systems Monday announced a development and supply agreement for the design of a new generation of Synchronous Digital Hierarchy (SDH) based digital microwave radio products.

Under the terms of the agreement, Digital Microwave and AT&T will jointly develop a new family of digital radio products for global applications requiring SDH transmission. Technology which evolves from this joint development effort will be available to both companies for future products.

Both companies will market this new radio product line, with AT&T concentrating on high-capacity applications and Digital Microwave on low- to medium-capacity.

''We are very pleased to be in partnership with AT&T on these leading-edge products,'' commented William E. Gibson, president and chief executive officer of Digital Microwave Corp. ''Since 1985, we have continually enhanced and expanded our relationship with AT&T, and today's resulting partnership is evidence of the continuing growth of our relationship.''

''This agreement is an important step that both companies are taking and is a major element of AT&T's global strategy for synchronous radio products,'' said Robert J. Sanferrare, vice president, AT&T Network Systems.

Headquartered in San Jose, Digital Microwave Corp. is a leading supplier of high performance short-haul transmission products to domestic and international markets.

LOS ANGELES (NOV. 26) BUSINESS WIRE - Winners Circle Inc. (NASDAQ:WNRS), which does business as High Five Sportswear, Monday announced the completion of its first steps toward creating a nationwide sales representation force.

Winners Circle is a manufacturer of garments for the national corporate and promotional industry, and has previously sold its products only through the efforts of a two-person internal sales force located at its Los Angeles headquarters.

Lester D. Abrams, president of Winners Circle, pointed out that the company generated approximately $4 million in sales during its fiscal year ended Feb. 28, 1990, with only a small internal sales staff.

He went on to note that, although it is far too early to predict how quickly the company's new sales representatives will begin generating orders, especially in light of current economic conditions, the company's market share should begin to expand because of the increased coverage the developing sales force will afford.

Abrams said that the execution of Winners Circle's first territorial sales representation agreements with several outside groups will have a variety of beneficial effects. ''In the first place, there will simply be a lot more people out there selling our products,'' he stated.

''This is important in our business, since sales are generally based upon the development of close personal relationships, virtually day-to-day and face-to-face contact is needed.

''Even more important than the sheer number of sales personnel carrying our line is the fact that this first group of sales representatives includes people who have been selling large quantities of apparel and non-apparel promotional items to substantial purchasers for many years.

Winners Circle's core business involves the design, manufacture and sale of garments, including jackets, sweatshirts, sweatpants and T-shirts that carry

the logo, slogans or other promotional messages of customers, such as Paramount Home Video, the Disney Cos., Wells Fargo Bank, Motown Records, the Los Angeles Lakers, General Rent A Car, Warner Bros., BASF Corp. and a variety of ski companies, who use the company's products to enhance their image, sell their products and increase employee performance and morale.

The company's initial public offering was consummated in late July of 1990.

SALT LAKE CITY (NOV. 26) BUSINESS WIRE - S.N.L. Financial Corp. (NASDAQ:SNLFA) reported that total assets of the corporation increased 4.15 percent to $211 million as of Sept. 30, 1990, from $203 million at Dec. 31, 1989.

S.N.L. Financial Corp. reported for the nine months ended Sept. 30, 1990, a net income from operations of $300,000, or 11 cents per share. For the nine months ended Sept. 30, 1989, the net income from operations was $2,264,000, or 87 cents per share.

Total net income excluding the accounting changes was $870,000, or 33 cents per share, for the nine month period ended Sept. 30, 1989. Revenues for the nine months ended Sept. 30, 1990, were $19,353,000 and $18,309,000 for the nine months ended Sept. 30, 1989.

The company noted that total life sales, excluding annuities, have increased 9 percent over 1989's levels and the cemetery and mortuary revenues have increased 47 percent over the 1989 levels.

S.N.L. Financial Corp. reported net loss for the three months ended Sept. 30, 1990, of $(55,000), or (2 cents) per share, as compared to income of $1,231,000, or 47 cents per share, for the three months ended Sept. 30, 1989. Total net income, excluding the accounting changes, was $766,000, or 29 cents per share, for the three month period ended Sept. 30, 1989.

Revenues for the three months ended Sept. 30, 1990, were $6,109,000 as compared to $6,201,000 for the three months ended Sept. 30, 1989.

A provision has been established for security losses of $300,000, a result of certain securities in which it has been deemed that the realization at sale or liquidation would be less than the carrying value.

TUSTIN, CALIF. (NOV. 26) BUSINESS WIRE - Care Enterprises Inc. announced Monday that its board of directors has accepted a commitment from Smith Management Co. to purchase $3 million principal amount of Care's Convertible Secured Notes due Dec. 31, 1993 (''Notes'').

The Notes will bear interest at 1 percent above prime, payable through Sept. 30, 1992, at the option of the issuer, in shares of common stock. The Notes will be secured by a first mortgage lien on two skilled nursing facilities and may be converted into shares of common stock at the prevailing market price, subject to a negotiated floor and ceiling price.

If the Notes were fully converted and all interest was paid in shares of common stock through Sept. 30, 1992, an aggregate of between 3,236,000 and 4,685,000 shares of common stock would be issued, which, when added to the number of shares which Smith and its affiliates presently control, would amount to approximately 40 percent to 48 percent of the outstanding common stock of Care, on a post-effective basis.

In connection with its purchase of Notes, Smith Management has also agreed to provide Care with a $1 million line of credit. Advances will bear interest at 3 percent above prime and will mature on Dec. 31, 1993. The line of credit will be secured by the same properties as secure the Notes.

The transaction with Smith Management is subject to the effectiveness of Care's Plan of Reorganization, as well as approval by the United States Bankruptcy Court.

#90330b0125 11/26/1990 ~Business Wire

LOS ANGELES (NOV. 26) BUSINESS WIRE - Hilton Hotels Corp. Monday announced sweeping changes in HHonors, its frequent traveler reward program.

With these changes, Hilton believes itself to be the first major hotel chain to reduce the costs associated with its program while increasing the flexibility provided to its members. Hilton is also shifting its program emphasis to better reward its core customers.

''Hilton's goal is to ensure the long-term viability of the HHonors program, because of its value to both the company and its customers. While other hotels

are eliminating their programs, we are committed to providing the benefits our customers have come to expect as long as it makes economic sense,'' says Mike Ribero, Hilton's senior vice president, marketing. ''These changes allow us to bring program economics to reasonable levels while also incorporating new benefits and enhancements at little or no incremental cost.''

A primary benefit of these changes is the unprecedented flexibility for all HHonors members. For example, members can now have hotel rewards issued to anyone of their choosing. They can also make their points go further through ''Point Stretcher'' rewards where certain hotels require less points during certain times of the year for a free stay.

And, if members need additional points to reach a desired reward level, they can use the Point Purchase Option to ''buy'' points with a check or credit card.

''Imagine that you want to take that dream vacation in August, but won't have enough points until November,'' says Ribero. ''Now Hilton's Point Stretchers and Point Purchase Option can help members take their rewards when they want them.''

As part of targeting its most frequent guests, Hilton's VIP HHonors program is introducing new rewards that provide entree to some of the world's most exclusive sporting and entertainment events like the Super Bowl, World Series, Academy Awards or Grammy Awards. Other perks include redeeming points for products like racing bicycles, all-expense-paid African safaris or discounts on European vacations.

Hilton Hotels Corp., a publicly owned international lodging company, owns, manages and franchises more than 260 hotels and resorts in major cities, suburban areas, airports, resort and gaming destinations worldwide.

LOS ANGELES (NOV. 26) BUSINESS WIRE - Warner Technologies Inc. announced at its annual shareholder meeting of Nov. 19, 1990, that sales for the first fiscal quarter ending Sept. 30, 1990, were $815,102, yielding pretax profit of $9,033.

Sales and profit (loss) for the same period last year were $146,792 and $(161,774), respectively. Net worth increased to $248,544. Management emphasized that results obtained during any one period are not necessarily indicative of results which may be achieved over a full year or in the future.

Management also reviewed company operating results for the full fiscal year ended June 30, 1990, in which a net profit of $25,112 was reported on sales of $1,743,803.

Backlog of unfilled orders presently stands at approximately $1.4 million. In addition, the company has been advised that it has been selected to perform the installation of energy-efficient lighting systems for two municipalities in its New England territory. The total value of these contracts is estimated at approximately $965,000.

Contracts to begin installation will be executed once final approval has been obtained from the local utility company providing rebates to those municipalities.

Management highlighted various marketing and installation activities occurring through its new Northeast U.S. headquarters in Needham, Mass. In general, significant progress has been made toward building a new business base in that region, with a number of proposals for lighting projects having been provided to customers to date.

A copy of the company's most recent 10-Q Report may be obtained by contacting Thomas S. Hathaway at the company's executive offices. Warner Technologies designs energy-efficient lighting systems.

DENVER (NOV. 26) BUSINESS WIRE - Nevada Goldfields Corp. reported an unaudited after-tax loss of US$2,060,000, or 17 cents per share, on revenues of US$2,197,000 for the first fiscal quarter, ended Sept. 30, 1990.

This loss includes $792,000 in depreciation, depletion and amortization, and $1,254,000 in financial charges. Of the latter amount, $900,000 is non-cash expenses attributable to the early conversion of approximately 60 percent of the 10 percent convertible subordinated debentures due 1991, with the balance being interest expenses on bank and debenture borrowings.

Subject to the successful buyout of the $7 million term note, as previously announced, the bank interest expense will be eliminated.

The company sold 5,206 ounces of gold and 23,664 ounces of silver and had net operating revenues of $2,197,000. Operating expenses, including $477,000 of inventory adjustment, amounted to $1,877,000. Net cash provided by operating activities amounted to $326,000.

The company is proceeding with its debt reduction activities and 750 ounces of gold were delivered against the company's gold loan on Sept. 1, 1990. A further 750 ounces is being set aside for the gold loan payment due Dec. 1, 1990. A short term note for $250,000 was repaid during the quarter.

Nevada Goldfields Corp. is a Canadian public company with two gold mines in Nevada. Its shares trade on The Toronto Stock Exchange under the symbol NGF, on NASDAQ under the symbol NGFCF, and on the Stuttgart Exchange, Germany, under the symbol NGF SG.

GRANDVIEW, MO (NOV. 26) BUSINESS WIRE - North American Savings Bank Monday announced net earnings for the quarter ended Sept. 30 of $786,729, or 34 cents per share.

This compares to net income of $5,353,561, or $3.35 per share for the like period in the prior year. The fourth quarter earnings in 1989 included a $7.6 million gain, prior to applicable taxes, attributed to the sale of the bank's subsidiary, Premium Financing Specialists Inc.

The bank's fiscal year ended Sept. 30 reflected a net loss of $369,048, or 18 cents per share. This compares to a net income of $6,719,039, or $4.20 per share for the fiscal year ended Sept. 30. North American exceeds the current and fully phased-in capital requirements.

During the quarter, North American received approval from its stockholders to change its name from North American Savings Association to North American Savings Bank. This change was made to more accurately reflect the business generally being conducted by North American.

The bank's stock is traded through NASDAQ under the symbol NASB.

SAN JOSE, CALIF (NOV. 26) BUSINESS WIRE - Maxtor Corp. (NASDAQ:MXTR) announced the appointment of Mark Fischer-Colbrie to the newly-created position of vice president of finance for its Maxtor California operation.

''Mark's appointment reflects the rapid growth of Maxtor Corp. worldwide,'' said Bert Moyer, president and chief operating officer of Maxtor California.

''Maxtor California is now focused to take advantage of our strengths in the 5.25-inch and high-end, 3.5-inch disk drive markets, including the world-class manufacturing capabilities we have demonstrated. We expect Mark's addition to the Maxtor California management team will further secure our position as the technology and market leader in the 1990s.''

In his new position, Fischer-Colbrie is responsible for financial, accounting and treasury activities at Maxtor California including its Singapore and

Penang, Malaysia, operations. Maxtor California's European and Far East sales and accounting offices are also part of his charter. He reports to Moyer and to Mike Kowalski, corporate vice president of finance.

Maxtor California designs and manufactures high-performance, high capacity 5.25-inch and 3.5-inch magnetic disk drives. With headquarters in San Jose and manufacturing operations in Singapore and Malaysia, it employs nearly 5,000 people worldwide.

A Maxtor Corp. employee since the company was founded, Fischer-Colbrie has been Maxtor's corporate controller for the past four years. A new corporate controller has yet to be named. Reporting to Fischer-Colbrie are K.T. Yip, Maxtor California Far East controller, and three assistant Maxtor California controllers.

Prior to Maxtor, Fischer-Colbrie was general accounts manager at Shugart Associates from 1979 to 1982. A Syracuse, N.Y., native, Fischer-Colbrie holds a bachelor of arts in history and German studies from Stanford University and a M.B.A. in finance and marketing from the University of California at Berkeley.

Maxtor Corp., San Jose, was founded in 1982. Maxtor designs and manufactures high-performance Winchester and optical data storage products in San Jose; Longmont, Colo; Singapore; Hong Kong and Malaysia. Its products range from 40MB to more than 2GB capacity and are designed for desktop and portable computer systems, workstations, local area networks and mainframes.

Maxtor employs more than 9,000 people worldwide.

DAYTON, OH (NOV. 26) BUSINESS WIRE - NCR Corp. has announced a joint marketing agreement with LanVision of Cincinnati, for selling Statview, an image-based medical records application.

The five-year agreement allows LanVision to operate under an Independent Software Vendor relationship, receiving revenue credit for the software with NCR taking revenue credit for the hardware.

Statview is the first application ported to NCR's Document Management System

(DMS), an industry-standards based platform for high volume document imaging. The DMS platform consists of several NCR products, including a NCR System 3000 UNIX server, laser printers, scanners, optical disk units, and a NCR value-added Plexus developer's toolset as the system software.

The Statview application was developed in conjunction with medical records personnel from 16 of the largest hospitals in Ohio and surrounding states. LanVision's first site installation for Statview is the 450-bed University of Cincinnati Medical Center, where they are currently installing the first phase of a $2.5 million contract to implement image-based medical records hospital-wide.

''Of all the applications where document imaging is a necessity, medical records imaging represents the largest opportunity for cost justification,'' says Brian Patsy, president of LanVision. ''If hospitals want to reap the full return on their investment in imaging of medical records, then they must get that image out to the clinicians where they work.''

According to Patsy, the University of Cincinnati contract represents the expectation of an average sale of Statview and the associated NCR hardware.

The LanVision/NCR marketing agreement also incorporates NCR's ACCESS 2000 connectivity tools, which provide simultaneous windows into other hospital systems and remote physician sites for results reporting or patient demographics.

''The medical records focus of LanVision's Statview application and the connectivity offered by NCR's products will make this agreement beneficial to the healthcare market,'' said Michael A. Hax, acting director for NCR's healthcare industry marketing group.

''We entered this agreement because LanVision shares NCR's philosophy of an open systems architecture dedicated to a client server environment.''

NCR and LanVision participated jointly and introduced their respective products for healthcare imaging at the recent American Medical Record Association Convention (AMRA) in Seattle.

Feedback from several sources, including consultants attending AMRA, was positive. ''Statview's ease of use was viewed as an excellent tool for encouraging physicians and other health care providers to use such systems,'' said Deborah Kohn, DAK SYSTEMS.

''Incorporating NCR's ACCESS 2000 connectivity tools into the product is critical for expanding medical record images throughout the hospital and into other systems. The LanVision/NCR partnership demonstrates a commitment to providing quality information systems and service.''

NCR, based in Dayton, develops, manufactures, markets and supports business information processing systems for worldwide markets.

NEW YORK (NOV. 26) BUSINESS WIRE - Travel Counselor Magazine, the publication for professional career travel agents, will appear this coming spring in a joint publishing venture by CMP Publications' Travel Group and ICTA, the Institute of Certified Travel Agents.

ICTA, with headquarters at Wellesley, Mass., is recognized throughout the travel industry for its leadership in establishing the only professional accreditation for travel agents and industry executives, known as Certified Travel Counselor (CTC).

The organization has graduated more than 13,000 CTC's, with an additional 7,000 agents currently enrolled in its accreditation program.

H. Wayne Berens, CTC, ICTA chairman said, ''We conducted a survey among ICTA's members, staff and management and determined that a need for Travel Counseler magazine does exist. We expect it to fill a vital market niche and become a key tool in the hands of professional travel counselers.''

Travel Counselor magazine will be edited under guidelines and direction of an ICTA Editorial Advisory Board led by CMP Travel Group editorial director Linda Ball, who also will serve as editor-in-chief of the new publication.

According to Ball, ''Travel Counselor will be a truly unique publication because, for the first time, travel agents will have a magazine that addresses their career. Most other travel publications tend not to go beyond the need for straight product information.

''Travel Counselor is completely different. Our editorial foucs will treat the profession as a career and address working with travel suppliers, as well as the personal and academic needs, ethical issues and the full range of topics that any career professional needs to succeed.''

ICTA president Dr. Judith Zacek, CTC, said, ''Part of ICTA's mission is to provide and maintain high industry standards through education. Travel Counselor magazine will be an important vehicle in helping fulfill our mission by reaching those travel counselors who are most serious about career growth.

Travel Counselor magazine will be published by CMP Publications' Travel Group,

which is located at Manhasset, N.Y. The group also publishes Tour & Travel News, Business Travel News, Tour & Travel Marketplace and a variety of specialized travel publications and supplements.

CARROLLTON, TX (NOV. 26) BUSINESS WIRE - Westcott Communications Inc. (NASDAQ:WCTV) and Electronic Data Systems Corp. have entered into a 10-year agreement effective from Oct. 1 which allows WCI's Automotive Satellite Television Network (ASTN) to be recieved on the GM Pulsat network which is expected to serve almost 10,000 GM dealerships.

Under the new agreement, WCI will market ASTN to members of the GM Pulsat network at a reduced fee of $265 per month. GM Pulsat members subscribing to ASTN will be able to receive programming immediately with no installation delay or capital outlay by WCI.

As part of the new agreement with EDS, WCI is paying EDS $1,690,000 for existing downlink equipment at GM dealerships. Such amount is payable to EDS over 14 months ending in November 1991 without interest. WCI will remove the downlink equipment as EDS installs GM Pulsat equipment and this equipment will be available for use in WCI's other networks.

In addition, WCI will pay EDS a GM Pulsat network access fee per subscribing dealer which will range from $50 to $75 per month depending on the method of payment of the ASTN subscription fee by the dealer and the number of GM Pulsat members subscribing to ASTN. However, no access fees for existing ASTN subscribers will be payable until Jan. 1, 1992.

Upon completion of the deployment of the GM Pulsat network (scheduled to begin in January of 1991 at a rate of 400 sites each month) and the existing Chrysler Dealer Network, almost 15,000 dealerships will be equipped with the necessary hardware to receive ASTN programming.

Carl Westcott said, ''The signing of this agreement confirms the EDS/GM long-term commitment to television as a superior means of communicating with the GM dealer body.''

LOS ANGELES (NOV. 26) BUSINESS WIRE - Thrifty Corp., a chain drug and sporting goods retailer, Monday announced the appointment of Eve A. Rich to head its flagship chain of Thrifty Drug stores.

Rich, 49, most recently was chairman and chief executive officer of the Los Angeles-based Contempo Casuals stores, a unit of The Neiman-Marcus Group Inc. She will serve as president of Thrifty Drug, which operates 577 drug stores located mainly in Southern California. Her appointment is effective Dec. 3.

''We are extremely pleased to acquire an executive with such experience, a successful track record in the retailing industry and extensive knowledge of the Southern California specialty retailing market,'' said Daniel A. Seigel, president and chief operating officer of Thrifty Corp., the parent of Thrifty Drug stores.

During the 10 years Rich led Contempo, the women's fashion retailer grew from a regional chain of 28 stores to a national company of 241 stores.

''Her proven abilities in understanding markets, motivating employees and managing retail operations will be valuable skills as we work to improve operations at Thrifty Drug stores,'' said Leonard H. Straus, Thrifty Corp. chairman.

Rich fills a vacancy created last August when Richard G. Eils left the company to pursue other interests. Rich will report to Seigel.

Thrifty Corp. is a wholly owned subsidiary of Pacific Enterprises (NYSE:PET), a $7 billion holding company that is also based in Los Angeles. Pacific Enterprises' other subsidiaries include the Los Angeles-based Southern California Gas Co., the nation's largest natural gas utility, and Pacific Enterprises Oil Co., a leading domestic oil and gas exploration company with headquarters in Dallas.

LOS ANGELES (NOV. 26) BUSINESS WIRE - Paul M. Harris, chairman of the board of Guardian Bancorp (ASE:GB), announced Monday that the board of directors has authorized a 5-for-4 stock split.

The stock split will be effective for all shareholders of record on Dec. 10, 1990, and new certificates will be issued on or about Dec. 24, 1990.

Existing stock certificates will remain valid and outstanding.

No fractional shares will be issued. Instead, the company will distribute cash to each shareholder in lieu of fractional shares on the basis of the closing price of the stock on the record date.

Guardian Bancorp is the holding company of Guardian Bank, which has its head office at 800 South Figueroa St., Los Angeles.

#90330b0616 11/26/1990 ~Business Wire

MENLO PARK, CA (NOV. 26) BUSINESS WIRE - Informix Corp., (NASDAQ:IFMX) and ASCII Corp. Monday announced that ASCII has made a five percent equity investment in Informix.

ASCII distributes Informix's UNIX-based data management and Wingz software in Japan.

''ASCII and Informix have had a long-term relationship for more than seven years. The success that they have had with our products has made the Japanese market a very important one for Informix,'' said Phil White, CEO of Informix.

''Their investment in Informix enahances our relationship and enables us to take full advantage of ongoing opportunities in the Japanese market. It also complements the 10 percnet investment that Informix made last year in ASCII Information Systems (AIS), an ASCII subsidiary involved in systems integration in Japan.''

Under the terms of the agreement, ASCII will purchase from Informix five percent, or 671,833 shares of the company's common stock at $10 per share, for a total purchase price of approximately $6.7 million. The agreement contains limitations on the number of additional shares ASCII can acquire in the future.

''ASCII and Informix have been strategic business partners for more than seven years and we are fully commited to Informix's information management technology,'' said Mr. Kay Nishi, president, ASCII Corp. ''We are pleased to further cement this relationship to build a strong presence in the client/server database wars.''

ASCII is leading the Japanese and Asian markets in contributing to the growth of open systems computing. As part of that movement, ASCII has played a key role in linking Informix with significant value-added resellers and hardware manufacturers.

For example, through ASCII, Informix recently agreed with Fujitsu to jointly

develop OS/2-based versions of Informix's high performance database engine and application development tools.

ASCII was the first company to distribute UNIX-based relational database technology in Japan after selecting Informix software products in 1983. This long-term relationship has contributed to Informix's current leadership position in the Japanese UNIX database market.

ASCII Corp., headquartered in Tokyo, was founded in 1977. It has six divisions, including the System Software Division, which has the strategic relationship with Informix. ASCII's 1989 revenues approximated in U.S. dollars were more than $200 million.

Informix Software Inc., the wholly owned subsidiary of Informix Corp., is a leading supplier of information management software providing solutions from the database through the desktop.

Informix products include powerful distributed database management systems, robust application development tools, and graphical- and character-based productivity software for delivering information to every significant desktop platform.

With corporate headquarters in Menlo Park, Informix has European headquarters in London, and Asia/Pacific headquarters in Singapore.

PHILADELPHIA (NOV. 26) BUSINESS WIRE - Kids and candy are as much a part of the holiday season as Santa and his reindeer.

But for thousands of Philadelphia youngsters, there's little hope of over-stuffed stockings as this season unfolds.

Whitman's Chocolates, a Philadelphia tradition since 1842, is beginning what it hopes will become another Philadelphia tradition, a special holiday party for hundreds of the city's disadvantaged youngsters.

Two hundred boys and girls, some living in shelters for the homeless, will be special guests of Whitman's at the party to be held at 1 p.m. Saturday Dec. 1, at the candy maker's Northeast Philadelphia headquarters.

''All children are entitled to having a festive holiday season, but that obviously doesn't happen,'' explains Jay G. Shoemaker, Whitman's president.

''As a member of the Philadelphia community, this is the least we can do to make the holiday season a little brighter for some very deserving youngsters.''

Whitman's employees, who annually gather for a company holiday party, will be making a personal gift to every boy and girl at the event.

The party, which is being sponsored with the help of the Urban Coalition, of which Shoemaker is a board member, features special appearances by the likes of Santa, Frosty and the Philadelphia Police Department special puppet players. This will be the first time the puppets take to their new stage, which is being specially constructed by Whitman's employees.

CARROLLTON, TX (NOV. 26) BUSINESS WIRE - Westcott Communications Inc. (NASDAQ:WCTV) Monday announced that it had entered into an agreement in principle to acquire American Heat Video Productions Inc., for an aggregate consideration of approximately $3.2 million payable $2.5 million in cash at the closing of the acquisition and the remainder one year from the closing.

Consummation of the acquisition of American Heat is subject to the negotiation and execution of a definitive agreement, the completion to WCI's satisfaction of a detailed review of the business operations and financial condition of American Heat, the receipt of necessary consents, waivers and approvals from governmental authorities, lenders and others, and certain other conditions.

American Heat, based in St. Louis, produces and distributes on a subscription basis training material on video cassettes to over 2,300 fire departments throughout the United States. American Heat's unaudited operating results reflect revenues of $1,700,000 and net income of $371,000 for the eight months ended Aug. 31.

WCI recently announced the formation of a television network to serve fire departments and emergency personnel via satellite. Carl Westcott said, ''The acquisition of American Heat will enable WCI to serve fire departments of all sizes and provide existing relationships with over 2,300 fire departments which will accelerate our entry into marketing WCI satellite-delivered services to fire departments.''

Westcott Communications is a business communications company operating the Automobile Satellite Television Network and the Law Enforcement Television Network. Its stock is traded on NASDAQ under the symbol WCTV.

#90330b0623 11/26/1990 ~Business Wire

ALBANY, NY (NOV. 26) BUSINESS WIRE - Trans World Music Corp. (TWMC) Monday reported third quarter sales of $74,432,000 and net income of $992,000, or $.11 per share.

For the nine month year-to-date period the Company reported sales of $218,187,000 and net income of $5,042,000, or $.56 per share. Earnings per share of $.11 for the third quarter compares to $.21 per share for the same quarter of the prior year, which included an after-tax charge of $.06 per share for closed stores.

For the year-to-date period, earnings per share of $.55 compares to $.36 per share for the prior year, which included after-tax charges totaling $.23 per share for litigation expense and closed stores.

Store sales in the third quarter were increased by 87 new store openings, including 40 openings in the third quarter. Sluggish economic conditions, particularly in the Northeast, caused comparable store sales to trend downward in the third quarter, resulting in an overall 1 percent increase.

Thirty Saturday Matinee video-for-sale stores were opened during the quarter, bringing the total to 59 stores. Also, after the close of the third quarter, but prior to the Thanksgiving weekend, the Company opened 22 additional music and video stores and still expects to end the year with approximately 550 stores.

Gross profit margins improved in both the quarter and year-to-date periods, as a result of shrinkage control programs and a slight improvement in markdowns. Selling, general and administrative expenses in both the quarter and year-to-date periods were affected by incremental start-up costs for opening the new stores and completed during early November.

Trans World Music is one of the largest specialty retailers of prerecorded music and video products operating stores under several distinct store formats throughout the eastern half of the United States. The Company operates retail stores under several names including Record Town, Tape World, Coconuts, and Saturday Matinee, and may be found in large regional malls, freestanding and strip center locations.

WEST WARWICK, RI (NOV. 26) BUSINESS WIRE - Astro-Med Inc., (NASDAQ:ALOT) reports net income of $591,000, equal to 18 cents per common share, on sales of $6,845,000, for the third quarter, which ended Oct. 27, 1990.

These results represent a record in both sales and earnings for any third quarter in the history of the company. During the corresponding quarter of the prior year, the company had net income of $450,000, equal to 14 cents per common share, on sales of $5,659,000.

For the current nine-month period, the company reports net income of $1,464,000, equal to 45 cents per common share, on sales of $19,945,000. During the corresponding period of the prior year, net income was $1,306,000, equal to 40 cents per common share, on sales of $17,027,000.

Sales increased by 21 percent over the corresponding quarter of last year, while earnings per share increased by 29 percent. In the current quarter, gross profit margins increased to 51 percent from the 49 percent level of last year.

According to Albert W. Ondis, chief executive officer, ''Sales of our products particularly those introduced most recently, were strong in all markets. Export sales rose to 15.9 percent of total sales, up from 11.7 percent last year, underscoring the growing importance of our export markets.

''With strong incoming orders, we expect to post further gains in the fourth quarter, to make the current fiscal year the best in the history of Astro-Med.''

Astro-Med is a leading manufacturer of high speed specialty printers employed in the aerospace, industrial, medical, scientific and educational fields.

#90330b0627 11/26/1990 ~Business Wire

NORTH VANCOUVER, BRITISH COLOMBIA (NOV. 26) BUSINESS WIRE - As of Nov. 21, 1990, National Fuelcorp Limited has been listed on the OTC Market.

National Feulcorp Limited is also pleased to announce that in cooperation with Natural Gas Resources-Southern Union and Texaco, Fuelcorp now has a contract to install the first public self-serve style natural gas high speed automotive dispensing system in Texas.

Fuelcorp's dispensers will be equipped with a remote reader for the ease of the station operators. This Austin installation is scheduled for opening on

Dec. 15, 1990.

In a landslide victory Garry Mauro has been re-elected the Commissioner of the Texas General Land Commission -- his clean air legislation (already passed) is aimed at automotive exhaust and the ''states'' clear choice is natural gas.

Recently the President of the United States, George Bush, has signed the new Federal Clean Air Act. The legislation significantly reduces air pollution over a set period. Fuelcorp, as a result, should directly benefit from this legislation.

Because of the adverse publicity surrounding the V.S.E. emanating from the televised documentary and coupled with the huge push for clean air in the United States, Fuelcorp's corporate decision is to obtain greater access to the U.S. marketplace.

Fuelcorp directors will return to Texas early in December to attend the official opening of this very special station. The company has also arranged to enter further negotiations with two Texas organizations.

National Fuelcorp Limited constructs and manufactures natural gas filing bars at service stations for automobiles. The company also franchises conversion centers to convert cars from regular gasoline to natural gas.

FORT WASHINGTON, PA. (NOV. 26) BUSINESS WIRE - Greenwich Pharmaceuticals Inc. announced the departure of John A. Scarlett, M.D., vice president of clinical research, and Richard E. Kruger, Ph.D., vice president of pre-clinical development.

Dr. Scarlett, whose contract expires at the end of the year, will leave effective Dec. 31 to join Novo Nordisk as senior vice president, medical and scientific affairs. Dr. Kruger resigned on Nov. 15 to pursue his own consulting firm.

''Both Dr. Scarlett and Dr. Kruger have greatly contributed to the company's clinical and pre-clinical programs,'' said Edwin R. Thompson, president and chief executive officer of Greenwich.

Thompson added, ''The clinical development of our first drug, THERAFECTIN

(amiprilose HCl) is in excellent shape. Our pre-clinical program, which involves the development of the company's new compounds, has never been stronger. We do not expect the departure of these two individuals to disrupt either our clinical or pre-clinical activities nor the preparation of the THERAFECTIN New Drug Application (NDA).''

Greenwich Pharmaceuticals is a development stage company in business to identify, develop and market synthetic carbohydrate drugs for the treatment of chronic inflammatory diseases.

SAN JOSE, CALIF. (NOV. 26) BUSINESS WIRE - Aptix Corp. (formerly Connectus Corp.), a start-up firm conceived to develop, manufacture and market field-programmable integrated solutions for component interconnects, has raised $8.4 million in its initial round of financing.

Principal investors include the Sprout Group and Kleiner, Perkins, Caulfield & Byers. Additional Aptix first-round investors include Glenwood Ventures; Mayfield Associates; Institutional Venture Partners; Shaw Ventures; Hill Carman, Kirby and Washing; Advanced Technology Ventures; Equity Venture Capital; and KME Venture Capital.

Initial applications of the funds raised in this first round of financing will be devoted to product development, said Dr. Amr Mohsen, chairman, president and chief executive officer of Aptix.

Stated Mohsen: ''We here at Aptix have a very exciting mission. This initial funding allows the company to concentrate on developing component interconnect technologies that enable systems designers to achieve greater control and flexibility in the systems design process.''

According to Mohsen, the successful first-round capitalization was achieved because the venture capital community viewed Aptix' market thrust as very exciting. ''The component interconnect arena is an area that appears to be ripe for innovation,'' said Keith Geeslin, general partner of the Sprout Group.

Aptix also announced the appointments of Geeslin and Lacroute to its board of directors. The board of directors currently includes Mohsen; Doug Broyles, general partner, Glenwood Ventures; Dr. Frederico Faggin, president and chief executive officer, Synaptics; Dr. Carver Mead, professor of computer science and electrical engineering, California Institute of Technology; and Dr. Richard Newton, professor of computer science, University of California, Berkeley.

Aptix was founded in 1989 by Amr Mohsen, founder and former president and chief executive officer of Actel Corp. The company is located at 225 Charcot, San Jose, Calif. 95131. Telephone, 408/428-6200.

SOUTH SAN FRANCISCO, CALIF. (NOV. 26) BUSINESS WIRE - Toshiba America MRI Inc. announced Monday that it has received 510(K) notification from the FDA on three of its Magnetic Resonance Imaging (MRI) products, allowing the company to market its MRT-150A system, MRT-50A version 10 software and Advanced C-Spine Coil systems for the MRT-35 in the United States.

''The MRT-150A high-field and MRT-50A mid-field systems utilize Toshiba's pioneering research in superconductive magnets and 3D imaging, giving medical professionals the ability to use MRI in new areas, such as cardiac diagnoses and pre-surgical neurological studies. We're very excited about the life-saving potential of these new diagnostic systems,'' said Kiyotaka Asahina president of Toshiba America MRI.

The Advanced C-Spine Coil completes Toshiba's line of spinal diagnostic tools used in its MRI systems.

Toshiba America MRI, based in South San Francisco, developed these new systems in conjunction with the University of California San Francisco's Radiologic Imaging Lab and other research institutions in the United States.

Toshiba, with over 550 MRI systems installed worldwide, has the largest installed base of mid-field systems.

THE HAGUE, NETHERLANDS (NOV. 26) BUSINESS WIRE - AEGON (NASDAQ: AEGNY), the

international insurance group, Monday announced improved financial results for the first nine months of 1990.

Net income increased by 14.3 percent from Dfl 346.4 million to Dfl 396.1 million ($213 million (a)). As mentioned in AEGON's second quarter results announcement, the effect of windstorm damage claims on net income was about Dfl 16 million. Excluding the effect of currency exchange rate changes, the gain in net income would have been 17.5 percent.

With the number of shares increased by the rights issue of May, 1989, earnings per common share rose by 6.5 percent from Dfl 8.77 to Dfl 9.34 ($5.02). Without the storm damage, the increase in net income per share for the first nine months of 1990 would have been 10.8 percent. Excluding the impact of exchange rate fluctuations, net income per share rose by 9.5 percent.

Compared to the first nine months of 1989, consolidated revenues rose by 4.8 percent from Dfl 9,086 million to Dfl 9,519 million ($5,112 million). Excluding currency exchange rate influences, revenues rose by 10.8 percent. Annuity deposits - not included in consolidated revenues - rose by 13.3 percent from Dfl 1,734 million to Dfl 1,965 million ($1,055 million).

In the first nine months of 1990, revenues of the Dutch insurance operations showed further growth, benefitting especially from higher life insurance premium income and interest. Revenues from accident and health and general insurance operations remained at virtually the same level as last year.

The Dutch insurance operations considerably increased their net income contribution. Group Life and Individual Life, as well as accident and health insurance, showed significant growth. In the first nine months of 1990, earnings from general insurance operations lagged behind, but were nevertheless positive. The negative effect of the claims caused by storm damage was offset by positive earnings development in the second and third quarter.

Compared to the first nine months of 1989, the Friesch-Groningsche Hypotheekbank (FGH Bank) reported improved results, particularly in its Dutch operations.

Revenues of AEGON USA showed a considerable increase in dollar terms. However, in guilder terms, revenues rose more moderately. Total US revenues also include revenues of the Home Service Division purchased from Washington National earlier this year. Revenues from both life insurance and health insurance increased compared to the first nine months of 1989.

#90330b0645 11/26/1990 ~Business Wire
AGOURA HILLS, CA (NOV. 26) BUSINESS WIRE - Fortune Petroleum Corp. (NASDAQ:FPEX) reported Monday an increase in revenues of $112,000 (49 percent) and $59,000 (8 percent) for the three months and nine months ended Sept. 30, 1990, as compared with the same 1989 periods.

The company realized a net income of $88,000, or 7 cents per share, and incurred a loss of $41,000, or 3 cents per share, respectively, for the three-months and nine-months periods ended Sept. 30, 1990.

The primary cause of the increase in revenues was the rise in oil prices to an average of $21.62 (36 percent) per barrel for the three months ended Sept. 30, 1990, compared with $15.93 for the three months ended Sept. 30, 1989.

During the previous quarter ended June 30, 1990, the average price received by Fortune was $13.80 per barrel. Gas production was slightly lower in the last quarter due to mechanical problems associated with its gas processing plant.

Dan Pasquini, president, stated he is encouraged with the activities in which the company is now involved. It is hoped that the acquisition of all the oil and gas interests of Fairbanks and Haas Inc. can be finalized prior to year end. Also the company owns an 8 percent working interest in a well recently drilled in Montebello on a 500 acre land block.

This well has resumed testing in excess of 130 barrels of oil per day. Fortune is currently enjoying an average price of $27 per barrel for its produced crude. ''Things have taken a turn to the brighter side and it is hoped the company can continue this positive trend,'' commented Pasquini.

Fortune Petroleum is an independent oil and gas exploration and production company with its principal properties located in California.

MARLBORO, MASS. (NOV. 26) BUSINESS WIRE - Stratus Computer Inc. Monday announced two products that are designed to enhance the high-volume flow of critical online business information between diverse computers, software applications, and proprietary and industry-standard networks.

The first, Network Express, helps link dissimilar proprietary hardware, software, and networking platforms; the second, OSI Server, establishes a

platform for the development of applications that comply with the Open Systems Interconnect (OSI) model of the International Standards Organization (ISO). OSI is the emerging standard that defines communication between hardware and software products from different manufacturers.

Network Express is a software product originally developed and marketed for Stratus systems by Scientific Software Inc. of Atlanta. Under a new original equipment manufacturer (OEM) agreement, the product will now be marketed exclusively by Stratus.

Network Express addresses the absence of a single industry data communications programming standard that is fully implemented. It helps companies unite previously incompatible computers into a single online transaction processing environment. Under the new agreement, the product's local area and wide area networking capabilities will be extended. In addition, Network Express will be enhanced to support Stratus' OSI Server product, enabling businesses to link their proprietary networks with industry-standard OSI networks.

Release 2.0 of Stratus' OSI Server software product enables application developers to write OSI-compliant applications for both local area and wide area networked computers. It extends the capabilities of the product's first release, which was designed only for wide area network applications.

Both Network Express and OSI Server are designed for use on Stratus' XA2000 Continuous Processing Systems.

Stratus Computer Inc. is a leading supplier of fault-tolerant computer systems for critical online applications, such as online transaction processing and online data communications and telecommunications. The company offers the broadest range of fault-tolerant systems and maintains the highest standard for computer reliability.

SAN ANTONIO (NOV. 26) BUSINESS WIRE - Builders Design Inc. (NASDAQ Symbol:BDNI, BSE symbol:BDI) Monday announced it has entered into a letter of intent to acquire New Era Interiors Inc., a privately-owned, Phoenix-based company which markets and sells floor coverings to residential and commercial builders in three locations in Arizona and Southern California.

Jack Cook, president of Builders Design, stated that New Era would be acquired entirely for stock and that the number of shares of Builders Design common

stock to be issued in the transaction would be determined after completion of a financial and accounting review by the parties.

Cook also stated that the proposed transaction is subject to the negotiation and execution of a definitive acquisition agreement and to obtaining any necessary regulatory and other consents and approvals.

Tbrough its Phoenix-based wholly-owned subsidiary, Letco Inc., Builders Design markets and sells floor, wall and window coverings to residential and commercial builders and on a retail basis through nine stores located in Arizona and California.

Cook explained that the combination of the Letco and New Era operations was expected to provide marketing and sales opportunitities which would result from their combined market share as well as other benefits from economies of scale.

Builders Design Covertible Preferred Stock, Redeemable Common Stock Purchase Warrants and Class A Redeemable Common Stock Purchase Warrants are also traded in the over-the-counter market.

BEAVERTON, ORE. (NOV. 26) BUSINESS WIRE - Cadre Technologies Inc. Monday introduced teamwork/4.0 to give software and systems engineers the most complete, open and robust Computer-Aided Software Engineering (CASE) tools for C, Ada and C+ + applications development.

Cadre's CASE products address each phase of the software development process from initial specifications to implementation and are complemented by advanced testing capabilities throughout the entire life cycle.

An extensive array of leading-edge products and enhancements in teamwork/4.0 expands the teamwork family of highly modular, yet tightly integrated, high-performance software analysis, design, coding and reverse engineering products. The new additions include teamwork/SIM for dynamic modeling and real-time simulation; teamwork/C Rev for reverse engineering C code; teamwork/DSE, an Ada design-sensitive editor; expanded object-oriented analysis (OOA) support; heterogeneous network support: a new teamwork/DPI Document Production Interface; and a major new release of PathMap.

''Teamwork/4.0 is the most comprehensive concept-to-code solution available for Ada, C and object-oriented developers today,'' said David Dayton, Cadre's executive vice president. ''Teamwork/4.0 delivers the tools developers need to

increase productivity and improve product quality at each stage of the development process. At the same time it offers multiple entry points into CASE for organizations who want to take advantage of CASE but may not be starting a new product.

''Cadre is committed to protecting our customers' existing investment while providing them with a strategic and technological foundation for future growth of their software engineering environments.''

The introduction of teamwork/4.0 is an integral part of Cadre's Unified CASE solutions strategy. Unified CASE provides users with a tightly integrated, modular product line to support the technical and embedded software and systems development life cycle.

Cadre Technologies provides a family of CASE products for software development and integration from concept through code with testing throughout and with specific test solutions for the embedded market. Cadre also provides a full set of product and methods training based upon widely adopted analysis and design methodologies.

Headquartered in Beaverton, with a division in Providence, R.I., Cadre has more than 15,000 installations internationally and a customer base that includes Boeing, General Electric, Eastman Kodak, Federal Express, Lloyds Band and Philips.

BOISE, IDAHO (NOV. 26) BUSINESS WIRE - Albertson's Inc. (NYSE/PSE:ABS) announced record sales of $2.02 billion for the 13 weeks ended Nov. 1, 1990, an increase of 9.7 percent over the $1.84 billion for the same quarter last year. During the period identical store sales increased 4.4 percent.

Earnings for the third quarter increased 20.7 percent to $55.8 million or 42 cents per share compared to $46.3 million, or 35 cents per share last year.

Sales for the 39 week period were $6.11 billion, an increase of 11.4 percent over the $5.48 billion for the same period last year. Earnings were $159.9 million, an increase of 17.3 percent over the $136.3 million for the same period last year. Earnings per share were $1.20 compared to $1.02 last year.

For the 39 weeks, gross margin was 23.11 percent compared to 22.72 percent for the same period last year. This improvement was due primarily to efficiencies realized from new distribution centers. Operating and administrative expenses, as a percent to sales, increased to 18.89 percent from 18.67 percent.

Warren E. McCain, chairman of the board and chief executive officer, stated, ''We are pleased with the third quarter results. Our gross margin increased due to a strengthening of the company's retail gross margin and contributions from our new distribution centers. We will continue to invest in building our identical store sales and continue with the cost containment programs we have in place for all
our expense categories.''

During the quarter five new stores were opened for a total of 19 new stores for the nine months. Eighteen stores have been closed during the first nine months as the company continues its program of weeding out small stores and unproductive stores. The company anticipates opening 33 stores during 1990.

Remodels were completed on seven stores during the quarter for a total of 23 completed for the nine months. For the year, the company expects to complete 38 remodels.

At Nov. 1, 1990, the company operated 524 stores in 16 western and southern states.

CAMBRIDGE, MASS. (NOV. 26) BUSINESS WIRE - Interleaf Inc. has signed a cooperative software agreement with IBM.

In the agreement, Interleaf authorizes IBM representatives to market Interleaf publishing software for the IBM RISC System/6000. Interleaf will set prices, terms and conditions for its software.

Mark Ruport, Interleaf's senior vice president of sales and marketing said, ''We are finding an enormous demand worldwide for our publishing software on the IBM RISC System/6000, and our agreement with IBM will enable Interleaf and IBM to respond even more effectively to this demand. We are delighted with the deepening of our relationship with IBM.''

The RISC System/6000 family, announced by IBM in February, provides powerful computing performance at competitive prices.

Interleaf active publishing technology provides full solutions for accessing

information, transforming it into text and graphics, distributing it electronically or on paper, and managing the flow of documents and information. Users can create text and graphic documents and can import data into Interleaf publishing software from popular word processors, PC's, computer-aided design (CAD) systems, scanners and mainframes.

Interleaf publishing software automatically hyphenates and spell checks in 13 languages, and supports European paper sizes, keyboard layouts, and character sets.

With 31 sales offices in the United States and Canada, and subsidiaries and distributors in Europe, Latin America, and Asia/Pacific, Interleaf has more than 50,000 users.

NEW YORK (NOV. 26) BUSINESS WIRE - James B. Farley, chairman and chief executive officer, of Mutual Of New York (MONY) has announced the appointment of Richard Daddario to chief financial officer of the financial organization.

Daddario will report directly to Farley.

Daddario, 43, came to MONY in 1989 as senior vice president and corporate controller, and was responsible for corporate accounting, which included financial reporting, investment accounting and the cost management area.

Prior to joining MONY, Daddario was vice president and corporate controller of Primerica Corp., a financial services and specialty retailing company, which he joined in 1985. He was previously with the Hartford Insurance Group, The Travelers Insurance Group and was senior audit manager at Arthur Andersen & Co.

Daddario graduated from the University of Hartford with a M.S. in Accounting and a B.S. in Economics and Finance. He is also a Certified Public Accountant. Daddario and his wife, Patricia, have two children and reside in Wilton, Conn.

In business since 1843, Mutual Of New York (MONY) sold the nation's first mutual life insurance policy. Today, MONY has nearly $22 billion in assets under management, and is an industry leader in providing outstanding and innovative insurance, pension and investment products and services to more than one million policyholders and customers.

NEW YORK (NOV. 23) BUSINESS WIRE - James B. Farley, chairman and chief executive officer, of Mutual Of New York (MONY) has announced the promotion of K. Rone Baldwin to senior vice president, responsible for Corporate Development.

Baldwin will continue to report to Farley.

Baldwin joined MONY in 1989 as vice president, Corporate Development, responsible for directing and coordinating strategic planning activities, and for developing new business growth opportunities for MONY.

Previously, Baldwin was a vice president in Mergers and Acquisitions at Goldman, Sachs & Co. in New York City. Prior to that he was a principal at Booz, Allen & Hamilton Inc., working in the New York and Tokyo offices.

Baldwin earned his M.B.A. from Harvard Business School, and a B.A. in Physics from Amherst College. He and his wife Carol have a daughter and reside in Manhattan.

In business since 1843, Mutual Of New York (MONY) sold the nation's first mutual life insurance policy. Today, MONY has nearly $22 billion in assets under management, and is an industry leader in providing outstanding and innovative insurance, pension and investment products and services to more than one million policyholders and customers.

#90330b0678 11/26/1990 ~Business Wire
CANTON, MA (NOV. 26) BUSINESS WIRE - Hills Department Stores, Inc. (HDS/NYSE) today announced its third quarter operating results for the period ended November 3, 1990.

Sales for the quarter ended November 3, 1990 increased 5.9 percent to $557.7 million from $526.8 million for the corresponding period a year ago. Same store sales increased 1.7 percent on a fiscal basis during this period. Same store sales on a comparable calendar basis, adjusting for a 53-week year in 1989, were up 4.7 percent for the quarter. The Company reported an operating profit of $24.0 million as compared to $31.5 million the year before.

After interest and non-cash charges, Hills reported a net loss of $4.0 million in the 1990 third quarter, or $0.21 per share versus net income of $2.2

million, or $0.11 per share in the same period last year. John Brouillard, newly appointed President and Chief Operating Officer, commented, ''Sales increased for the third quarter; however, our margins were under pressure from the cost of expanded promotion and the recent sluggish retail environment.''

Senior management changes also were announced by the Company. John C. Brouillard, (42), formerly Executive Vice-President and Chief Financial Officer, has been promoted to President and Chief Operating Officer and has also been named to the Company's Board of Directors. Mr. Brouillard has been a member of Hills' senior management team for the past thirteen years. Stephen A. Goldberger, (47), has resigned as Chairman of the Board, President, Chief Executive Officer and a director of the Company, to pursue other opportunities.

Thomas H. Lee, (46), a director of Hills since 1985, has been elected Chairman of the Board and Chief Executive Officer. Mr. Lee is President of Thomas H. Lee Company, a Boston-based private investment firm which manages capital in excess of $1.7 billion, and is engaged in providing debt and equity financing for leveraged acquisitions and recapitalizations. Mr. Lee is Hills' largest common stockholder.

In a separate action, the Company also named Norman Matthews, (57), to the Company's Board of Directors. Mr. Matthews, formerly President of Federated Department Stores and Chairman of the Gold Circle discount division, is currently a retail consultant.

The Company also announced that it has finalized a revised bank agreement with its existing bank group. Mr. Brouillard noted, ''We are gratified by the show of support by our bank group, and are pleased to have completed this recent amendment.''

Hills Department Stores, Inc. is a discount store chain, operating in 14 states, with 214 locations compared with 204 stores a year ago.

#90330b0685 11/26/1990 ~Business Wire

HIGHLAND PARK, ILL. (NOV. 26) BUSINESS WIRE - The world's first private practice Positron Emmission Tomography (PET) medical imaging system has been installed at the Greenberg Radiology Institute.

The most advanced medical imaging system available today, PET uses short-lived radioisotopes to provide metabolic information about the brain, heart and other organs. Most other imaging techniques can only provide anatomic information.

There are a handful of PET systems currently operating worldwide, all at major university hospitals and medical research centers.

PET provides in-vivo biochemical information uniquely valuable in assessing tissue viability in heart disease for bypass surgery candidates, and tumors for treatment planning.

PET is also useful is the differentiation of dementias such as Alzheimer's disease, for many psychiatric disorders, and for assessing pre-surgical focal epilepsy candidates.

''Unlike much conventional imaging instrumentation, PET is a revolutionary diagnostic imaging device that visualizes and quantifies dynamic function, making it an ideal modality for the diagnosis and management of certain cardiovascular and cerebral diseases,'' said Greenberg, Institue founder and chairman Irving M. Greenbery, M.D.

Designed in 1983, the Greenberg Radiology Institute, comprised of 70,000 square-feet, situated on an eight-acre campus 25 miles north of Chicago, is one of the largest free-standing radiology clinics in the world. The Greenberg practice was the first to introduce mobile CAT scanning and the first Magnetic Resonance Imaging (MRI) service in the Midwest.

The newly installed Siemens ECAT PET System includes the scanning unit and

console, and a state-of-the-art computer for processing the images.

Siemens is the world's largest medical electronics supplier, and is recognized as the leader in developing high-technology diagnostic imaging systems for healthcare.

WASHINGTON (NOV. 26) BUSINESS WIRE - W. R. Grace & Co. Monday announced that it has received approval from the Environmental Protection Agency for use of a naturally occurring beneficial fungus as a new biological control for two plant diseases. A subsidiary of Grace was earlier granted an exclusive license by the U.S. Department of Agriculture's Agricultural Research Service (ARS) for its use.

A strain of Gliocladium virens, discovered and researched in U.S. Department of Agriculture laboratories, was approved as a greenhouse biological control for two diseases that cost growers more than $1 billion a year. It is the first biocontrol fungus approved to control a plant disease in the U.S. ARS invented and patented the technology for formulating Gliocladium into easily applied pellets. Grace, working in cooperation with ARS scientists, further developed the technology.

''Almost any seed or seedling is vulnerable to attack by these fungi, which can destroy 10 to 30 percent of a crop,'' said Robert D. Lumsden, plant pathologist with the federal research agency. Among damping off's victims: geraniums, snapdragons, chrysanthemums, celosia, poinsettias, cotton, corn, beans and soybeans.

In tests done by Lumsden and ARS plant pathologist James C. Locke, Gliocladium reduced--by 80 to 95 percent--plant loss caused by the fungi, results similar to those obtained with chemical fungicides.

The scientists hope that, by selecting better strains of the fungus or improving the nutrients in the pellet, the biocontrol can consistently reduce damage by 95 to 100 percent.

Today's approval allows Gliocladium's use on any plants grown in a greenhouse--including ornamentals and edibles like tomatoes, cabbage or broccoli. Grace may seek approval for outdoor use of the biocontrol fungus as markets open up, according to Dr. van Remoortere.

Resembling granular fertilizer, the pellets are made of dormant fungal spores, wheat bran, and alginate--a natural gel-like material that binds the particle together.

When the pellets are moistened, the spores germinate and the fungus multiplies and controls the disease.

Gliocladium is a naturally occurring organism that was isolated from Maryland

soil by scientists at Beltsville's Biocontrol of Plant Diseases Laboratory in the early 1980's. Chemist William J. Connick, Jr., with an ARS laboratory in New Orleans, LA, originally developed the alginate pellet formulation to encapsulate herbicides to kill weeds on top of the soil.

#90330b0695 11/26/1990 ~Business Wire

WHITE PLAINS, NY (NOV. 23) BUSINESS WIRE - Drew Industries Inc. (NASDAQ National Market: DREW) announced Monday that it had sold certain assets of its White Metal ladder manufacturing subsidiary to R.D. Werner Co. Inc., a privately-owned corporation based in Greenville, Pa.

Drew also anticipated that it will liquidate the remaining assets of White Metal during the next twelve months.

R. D. Werner has not acquired the White Metal name, will not produce White Metal ladders, will not operate White Metal's business and has not assumed any liabilities of White Metal. The purchase price for the assets purchased by R.D. Werner is largely dependent upon results of operations associated with certain of the assets purchased.

As a result of this sale and additional write-offs applicable to discontinued operations as well as the write-off of goodwill and related assets, due to the restructuring of its postal product line, Drew will report an after tax loss solely from these write-offs of approximately $15.5. million ($3.31 per share).

The losses applicable to White Metal consist of the write-off of goodwill; White Metal's operating losses for the current fiscal year, and anticipated losses on the sale and liquidation of the White Metal assets, offset by a portion of the anticipated future proceeds to be received as a result of the sale to R.D. Werner.

Although the loss is significant, a substantial portion of the losses are attributable to write-offs of goodwill and other non-cash items. The cash impact to Drew is not expected to exceed the company's borrowing capacity and the company's lender has consented to the transaction.

The company announced that fiscal 1990 operating results from Drew's two primary operations, Kinro and Leslie-Locke, are expected to show improvements from the prior year, without giving effect to the write-off of the postal assets. The sale of certain assets of White Metal will permit Drew to

concentrate its resources and efforts on expanding these on-going operations. Operating results for fiscal 1990 are anticipated to be reported by Drew by Nov. 29, 1990.

Drew is engaged in the manufacture of a wide variety of home improvement building products for the contract and do-it-yourself home construction and remodeling industry, consisting of ornamental iron railings and security products, residential and commercial ventilation products, skylights and rakes and the manufacture of aluminum windows for the manufactured housing industry, and aluminum windows and doors for recreational vehicles.

EDISON, NJ (NOV. 26) BUSINESS WIRE - Pentech International Inc. (NASDAQ:PNTK) a designer, manufacturer and marketer of writing and drawing instruments, said Monday earnings rose 33 percent to a record $3,923,849, or 33 cents per share, for the fiscal year ended Sept. 30, 1990, compared to earnings of $2,940,464, or 25 cents per share, for the prior year.

Revenues for the year rose a record 30 percent to $29,913,261, compared to revenues of $23,023,873 a year ago.

Norman Melnick, Pentech president and chief executive, said he was pleased with the earnings and sales growth, attributing them to ''an expansion of the company's unique product line, a rise in shelf space allocated for Pentech items and growing consumer demand for Pentech products.''

Melnick noted that management was looking forward to continued growth in 1991, based on the strong reception that several of Pentech's newer products have received from the company's retail buyer customer base.

Pentech designs and markets a broad selection of colorful consumer-oriented writing and drawing instruments, including pens, markers, pencils and crayons, as well as a variety of products for the commercial marketplace.

These modestly priced items are widely distributed in most of the prominent mass market retail outlets, primarily throughout the United States and Canada under Pentech trade names.

PITTSBURGH (NOV. 26) BUSINESS WIRE - Heinz U.S.A., a division of H.J. Heinz Co., and The Hearst Corp. Monday jointly announced Family Works!, a comprehensive television public affairs campaign to support and celebrate the vitality and resiliency of the modern American family.

The television campaign marks the first time that a locally oriented programming and marketing package on the scale of Family Works! has been sponsored nationally. It is part of a broader Heinz campaign commitment, in excess of $10 million, directed toward families which will integrate broadcast print advertorials, in-store promotions, and grassroots activities and events.

Leo Burnett, the largest single buyer of television in the United States, and the agency of record for Heinz U.S.A., will be working with Heinz and Hearst to execute the television campaign.

''Family is at the heart of Heinz,'' said Brian Ruder, vice president of marketing, Heinz U.S.A. ''We have a special relationship with our consumers because Heinz products are a part of many close family gatherings. Family Works! is a multi-media campaign that pays tribute to and touches the American family -- in all of its diverse forms -- and identifies workable solutions to the unique challenges of family life in the 1990s.

The concept of a broad family initiative was developed for Heinz by Cone Communications Inc., a leading independent national public relations and marketing firm.

The campaign will be made available to local television stations across the country by Hearst Entertainment Distribution, and will be presented at the January 1991 convention of the National Association of Television Programming Executives (NATPE) in New Orleans.

The Hearst Corp. is one of the largest diversified communications companies in the world. In addition to publishing 14 major consumer magazines, 12 daily newspapers, books and business publications, Hearst owns and operates seven radio and six television stations, produces and distributes programming for both broadcast and cable, and syndicates editorial material and comics both domestically and overseas. Hearst is a partner in the Arts & Entertainment, Lifetime, and ESPN cable networks and has an extensive network of licensees overseas publishing Hearst magazines in 60 foreign editions.

Heinz U.S.A. is the largest affiliate of the H.J. Heinz Co., a $6.1 billion

company headquartered in Pittsburgh, Pa. Heinz U.S.A. markets its family of products, including Ketchup, 57 Sauce and Homestyle Gravy, primarily under the Heinz label throughout the United States.

CHARLOTTESVILLE, VA. (NOV. 26) BUSINESS WIRE - American Telecommunications Corp. (ATC), a new subsidiary of Comdial Corp., has been formed to target a growing niche of the business phone market...small businesses with under five employees, and the 25 million people who do some work at home.

ATC's first product, EZ-Comm, a two-line full-featured system supporting up to six telephones on a common intercom path, will be available in January, 1991, through Comdial's nationwide distribution network.

Larry Tate, a 24-year veteran of Stromberg-Carlson and Comdial, has been named president of ATC, which is also based in Charlottesville. Tate was formerly Comdial's vice preisident of manufacturing.

Tate said, ''The phones will be sourced products, produced to our design specifications and high quality standards. All service and support will be provided with Comdial's technical staff in Charlottesville, so we'll be offering a cost effective product with Comdial's established high level of technical support.''

ATC is also developing additional products including single and two-line feature phones, a caller indentification device and an integrated telephone and answering machine. All will be targeted at small businesses.

Tate added, ''Early customer interest in the new ATC designs has been extremely favorable, and we expect ATC to be a significant contributor to Comdial sales growth in 1991.''

MONTGOMERY, AL (NOV. 26) BUSINESS WIRE - Blount Inc. (ASE:BLT.A) Monday declared a regular quarterly dividend on its Class A common stock of 11-1/4 cents per share and a regular quarterly dividend on its Class B common stock of 10 cents per share.

Both dividends are payable Jan. 2, 1991, to shareholders of record at the close of business Dec. 14, 1990.

The dividend on the Class A common stock reflects the 1-1/4 cents per share additional dividend that the Class A shareholders are entitled to over the per-share dividend paid on the Class B common stock.

Blount is an international manufacturing and construction company headquartered in Montgomery.

AMBLER, PA (NOV. 26) BUSINESS WIRE - Interspec, Inc. (NASDAQ:ISPC) announced Monday that the Boards of Directors of both Interspec and Siemens Ultrasound, Inc. have approved the recently announced research and development agreement and distribution agreement for specialized medical diagnostic products.

Under these agreements, Interspec will develop medical ultrasound systems for radiology and anesthesiology applications, to be jointly funded by Interspec and Siemens. Ultrasound systems developed under the research and development agreement will be manufactured by Interspec and sold by the Siemens organization. Interspec will be responsible for marketing and servicing its radiology systems in North America.

Edward Ray, Chairman and Chief Executive Officer of Interspec, stated, ''The agreements with Siemens will permit Interspec to expand its technology into new markets while continuing to focus on its core business, the private practice and hospital cardiovascular markets. Coupled with Interspec's improved financial condition resulting from the sale of Vingmed Sound, Interspec should be well-positioned for the future.''

Interspec recently announced it has entered into a stock purchase agreement for the sale of its Norwegian subsidiary, Vingmed Sound A/S, to Sonotron Holding A.G. The companies have also concluded a distribution agreement whereby Interspec would continue as the exclusive distributor of Vingmed Sound's products in North America.

The purchase price for the Vingmed Sound shares will be approximately $17,000,000 in cash plus the assumption of up to to $5,250,000 in outstanding bank debt. The net proceeds will be used to retire certain debt and for working capital needs.

Vingmed Sound designs and manufactures the Vingmed Color Flow Mapping (CFM) System, a medical diagnostic ultrasound imaging instrument primarily used by cardiologists and vascular specialists at clinics and hospitals around the world.

Sonotron, a Swiss corporation whose principal offices are located in Zug, Switzerland, is a subsidiary of Diasonics, Inc. (AMEX:DIA). Sonotron is a leading distributor of medical ultrasound products in Europe.

Ray noted, ''Sonotron has been working with Vingmed Sound since 1986 to

develop the European market for the Vingmed CFM System. Sonotron is the largest distributor of Vingmed Sound products, having purchased more than half of all Vingmed CFM Systems sold during 1990. Interspec has a high regard and enthusiasm for Vingmed Sound's products, and we look forward to continuing our relationship with Vingmed Sound as the exclusive distributor of the Vingmed CFM System in North America, by working together on selected technology programs, and through mutual OEM arrangements,'' concluded Ray.

The acquisition, which is expected to be completed in early 1991, is subject to the satisfaction of certain conditions, including the approval of certain agencies of the Norwegian Government.

Interspec develops, manufactures, markets and services medical ultrasound systems, probes, transducers and related accessories and supplies. It is a leading supplier of ultrasound systems and supplies to the cardiology market and is a leading supplier of transducers and probes to manufacturers of medical ultrasound systems.

ELMSFORD, N.Y. (NOV. 26) BUSINESS WIRE - V Band Corp. (NASDAQ/NML:VBAN) announced Monday the signing of a multi-million dollar purchase agreement with Technical Telephone Systems Inc. (TTSI) of Staten Island, N.Y.

The agreement, worth $3 million in 1991, represents a commitment on behalf of both V Band and TTSI in providing state-of-the-art technology for dealing and trading communications equipment and the highest level of service to the financial marketplace.

''TTSI has had a long term relationship with V Band Corporation. This agreement is mutually beneficial and further serves to strengthen our relationship in the future,'' stated George Cruzado, chief executive officer and co-founder of TTSI.

TTSI is V Band's second largest worldwide product distributor.

The agreement comes on the heel of V Band's June, 1990, announcement of its new digital trader communication system, ViAX DN, and V Band's November, 1990, estimated $4 million sale of ViAX DN to Daiwa Securities by Mitsubishi Electric in Japan.

The ViAX DN provides users with high performance functionality and unparalleled reliability based on a distributed digital design and network cost saving associated with backroom size reduction, data integration and network management capability. ViAX DN is fully compatible with both analog and digital line terminations.

V Band Corp., is a leader in the design and manufacturing of high-density, electronic key telephone systems used by the world's leading financial industries in the trading and dealing of stocks, bonds, commodities and currencies, and by airlines, utilities, railroads, emergency services and the military in communications control centers.

#90330b0751 11/26/1990 ~Business Wire

SYDNEY, AUSTRALIA (NOV. 26) BUSINESS WIRE - Westpac Banking Corp. (NYSE:WBK) and the Trustees of the Westpac Australian Staff Superannuation Scheme (superannuation fund) have received court documents challenging the transfer to the bank, earlier this year, of a portion of the substantial overfunding of the superannuation fund.

It should be noted that the plaintiff is a member of the bank staff and a member of the superannuation fund. The Australian Bank Employees Union is not the plaintiff as reported in the press.

Four of the eight Trustees are Westpac Banking Corp. employees and are elected by the members of the superannuation fund. Some current trustees are Union members and one was, in fact endorsed by the Union.

An examination of the superannuation fund by an independent actuary confirmed that the fund was in surplus by around A$1 billion and was substantially overfunded.

The actuary to the superannuation fund made recommendations with respect to this situation. As a result of these recommendations, the trustees and the bank determined that A$300 million of the surplus was to be used to improve the members' benefits and A$300 million was to be returned to the bank.

One of the consequences of this decision is that thousands of retired officers will receive increased pensions. Furthermore, the staff contribution rate has been reduced. As part of an on-going consultative process, a survey of bank staff has been carried out to determine their views as to the form of further improvements to members' benefits.

The superannuation fund is a defined benefit fund. In the unlikely

circumstances that the fund moved to a deficit then the bank is obliged to see that the fund is actuarially sound and any shortfall corrected.

The bank and the trustees gave careful consideration to an acted on legal and actuarial advice regarding both the proposal to return part of the surplus and to improve the benefits of existing and retired members of the fund. They believe that these actions were both legally and ethically correct and the claim will be defended vigorously.

#90330b0754 11/26/1990 ~Business Wire

HOPKINTON, MASS. (NOV. 26) BUSINESS WIRE - On Wednesday, Nov. 21, 1990, a preliminary finding of liability was issued by a Middlesex Superior Court jury against EMC Corp. for misappropriation of certain trade secrets by Cambex Corp.

As part of the finding, the jury recommended an award of $2 million.

Cambex alleged that EMC Corp. had received from RPB Consulting Inc. certain trade secrets dealing with the memory configuration table changes necessary to reconfigure memory capacities for the IBM 3080 series of computers.

The 3080 memory upgrade market which ended in 1989, was a minor part of EMC's business; less than 5 percent.

EMC and RPB Consulting Inc. vigorously dispute the preliminary jury finding and will be filing motions with the court to have the jury finding overturned before a judgment is entered next year. An appeal is also likely.

Both RPB Consulting and EMC strenuously denied any misappropriation of any proprietary Cambex property, and EMC maintained that no improper or illegal activity took place. EMC further maintained that the microcode changes were not proprietary to Cambex Corp. and EMC presented evidence that it had developed some of the microcode changes itself and, when necessary, had purchased the changes from multiple, readily available sources in the marketplace.

Independent testimony at the trail showed there were as many as 11 different vendors from which the microcode change could be obtained.

Despite the initial findings of the jury, EMC intends to vigorously pursue its position in this matter to ultimately prove that no illegal activity took place.

EMC Corp. supplies innovative, high performance storage products and related services for midrange and mainframe computers worldwide.

MIAMI (NOV. 26) BUSINESS WIRE - Cruise America Inc. (AMEX:RVR) Monday announced net earnings of $2,066,000 or 37 cents per share for the second quarter ended Oct. 31, 1990, a 34 percent increase over the $1,540,000 or 28 cents per share for the like period in 1989.

The company announced revenues of $24,517,000 for the quarter compared to $22,825,000 for the like period in 1989, a 7 percent increase. Net earnings for the six months ended Oct. 31, 1990, were $6,375,000 or $1.15 per share, a 46 percent increase over the $4,363,000 or 79 cents per share for the like period in 1989.

Revenues for the six months were $50,349,000, up 11 percent from the $45,519,000 for the six months ended Oct. 31, 1989.

Leading the growth in revenues was Rental Revenue, which increased 11 percent to $17,103,000 for the quarter ended Oct. 31, 1990 from $15,344,000 for the like period in 1989. For the six-month period ending Oct. 31, 1990, Rental Revenue was $33,403,000, an 11 percent increase over the $29,973,000 reported for the like period a year ago.

Rental Vehicle Sales (sales of vehicles retired from the rental fleet) declined 8 percent to $5,885,000 in the second quarter from $6,371,000 for the like period in 1989. A sluggish economy and uncertainty about the Mideast combined to put downward pressure on sales of leisure durables nationwide.

Rental Vehicle Sales for the six-month period ending Oct. 31, 1990, were $13,309,000, representing a 6 percent increase over $12,513,000 for the like period in 1989.

Cruise America Inc. is the largest company in North America specializing in the rental and sale of recreational vehicles.

NEW YORK (NOV. 26) BUSINESS WIRE - The board of directors of Fischbach Corp. announced that Robert R. Kiley, currently chairman and chief executive officer of the Metropolitan Transit Authority of New York, has been appointed president and chief executive officer of Fischbach, effective immediately.

Kiley has held his current position at the MTA since 1983, during which time he played a major role in improving the financial and operating conditions of the greater New York transportation system, which has a current annual operating budget of approximately $5 billion.

Prior to his MTA position, Kiley was chairman of the board and chief executive officer of the Massachusetts Bay Transportation Authority for four years.

He has also been an adjunct professor in Boston University's MBA program. Kiley was Deputy Mayor of the City of Boston from 1972 to 1975. He is a graduate of the University of Notre Dame.

Kiley replaces Donald Brenner, who will return to his position as head of the Brenner Group, a Chicago accounting and consulting firm.

Fischbach Corp. is a wholly owned subsidiary of American International Group Inc. and is one of the nation's oldest and largest electrical and mechanical contracting firms.

KING OF PRUSSIA, PA (NOV. 23) BUSINESS WIRE - Envirosafe Services Inc. (NASDAQ: ENVI) Monday announced that the company's Ohio subsidiary filed a motion for reconsideration with the Ohio Hazardous Waste Facility Board.

The motion requests the board to reconsider its vote on Aug. 29, which denied the Ohio company's application to contruct a new disposal cell. It also requests reconsideration of the 185,000 ton annual limitation placed upon the facility if the new cell is authorized and the board's action on post-closure funding requirements.

Previously, an Adjudication Panel of the board had recommended the authorization of the new cell and an annual capacity limitation of 300,000

tons. ''Although we have not received the written record of the Board's August 29, 1990 decision, our legal research indicates there is precedent for an early filing of a Motion for Reconsideration,'' C. Edward Ashby, Jr., president and chief executive officer, said. ''Given the dwindling capacity remaining available to us, we have elected to move forward with our Motion before the written decision is available in the hope that the Board, upon reflection on the evidence and clarification, will conclude that the proposed construction meets the statutory requirements and will reverse their August 29 decision,'' he stated.

Envirosafe Services is a leading provider of land disposal services for environmentally sensitive wastes. The company owns major disposal sites in Ohio and Idaho -- two of the 20 such sites authorized under federal law.

#90330b0781 11/26/1990 ~Business Wire

LEXINGTON, KY (NOV. 26) BUSINESS WIRE - Restaurant operators who'd like to emulate the success of a high-growth Lexington restaurant company might heed this advice from one of its owners:

To ensure customer satisfaction, treat your employees well.

That philosophy has worked well for Mike Scanlon and Tom Root, who two years ago founded the Thomas and King Inc. company on that premise.

Bursting from the starting gate, Thomas and King has opened franchised casual-style Applebee's Neighborhood Bar and Grill restaurants in the Lexington, Cincinnati, Columbus, Dayton and Phoenix metropolitan areas.

Since last year, the number of employees has more than doubled and sales have tripled to a projected $17 million, growth rates that would make many publicly held restaurant chains envious. Average sales at Thomas and King restaurants routinely rank at the top or among the top 5 percent of the 151 Applebee's restaurants across the country, company or franchised.

Besting others within the Applebee's chain is no small feat, considering that Restaurant Business this year ranked Applebee's International as the nation's fastest growing restaurant chain.

''We don't do anything magic,'' says Scanlon, 36, president of Thomas and King. ''But what we do, we do well.''

Indeed.

Scanlon and 38-year-old Tom Root, the company's director of operations, say those sales figures indicate that their philosophy of ''customer service through employee fulfillment'' works. And, says Scanlon, it just makes sense.

''The byword of the 1990s is service,'' says Scanlon, who has been involved in the Applebee's concept since 1985. ''We've already established in the 1970s and 1980s that people want value. That's not going to change. Today, people want to be taken care of, whether you're a blue collar, yuppie, or a zillionnaire,'' Scanlon says.

The first step for ensuring that service exceeds customer expectations is to treat employees and managers well. The resulting good feelings then naturally spill over to restaurant guests.

''The way we treat each other is the way our guests get treated. We treat our employees courteously, and we're attentive to them. I don't want to pretend that it's heaven -- our employees earn their money. But our philosophy is, if you abuse your employees, they're going to take it out on the guests.

''If you use the approach we're using, suddenly you become the company that everyone wants to work for,'' says Scanlon.

Scanlon and Root's approach is sometimes unorthodox. One month they may take Applebee's managers and their spouses on a dinner cruise; the next, they'll change to combat fatigues and head to the woods to battle in ''splat'' wars with harmless paint ammunition. They've attended a professional baseball game and have also competed against one another in miniature race cars.

Their management approach is combined with a strict adherence to company procedures to ensure that customers consistently receive quality food and service. By standardizing many routine tasks, employees are free to use their own creativity to find ways to satisfy guests.

Combined with Applebee's broad-based menu and moderate prices (in the $2.45 to $8.50 range), their style has resulted in high repeat customer traffic at their restaurants, Scanlon says. He praises the company and its concept for the key role that they've played in Thomas and King's development.

#90330b0788 11/26/1990 ~Business Wire

MORRISTOWN, N.J. (NOV. 26) BUSINESS WIRE - AT&T Computer Systems Monday

expanded its networked computing capabilities with the introduction of the StarServer(TM) S and enhancements to its line of SNA host connectivity software.

The StarServer S is a powerful uniprocessor server based on the Intel(a) i486 microprocessor and Extended Industry Standard Architecture (EISA) bus. It will be exhibited at COMDEX/Fall '90 in Las Vegas.

''Today's announcements dramatize AT&T Computer Systems' commitment to offer the broadest range of servers, from 386 to the industry-leading symmetric multi-processor StarServer E, and into the RISC-based System 7000 and StarServer FT,'' said Scott Perry, vice president of marketing and strategy.

''Our servers, supported by UNIX(R) System V and StarGROUP(R) LAN Manager Server, offer customers an unmatched range of choices and provide an interoperability platform for a variety of desktop operating systems, including MS(a)-DOS, OS/2(a), UNIX and Macintosh(a), and traditional computing environments such as SNA.''

The StarServer S offers significant price/performance benefits over other machines in its class, Perry said. Running at 33 MHz and rated at 26.5 MIPS, it provides two to three times the raw computing power of a 386/33 MHz processor.

The company said the StarServer S can function as a server, a multi-user processor or both simultaneously, a capability unique to AT&T's server product line. This enables customers to achieve maximum cost-effectiveness as they migrate from multi-user computing environments to client/server environments.

''The StarServer S provides a logical growth path for users of 286 and 386 technologies who need to move up to a high-performance server,'' Perry said. ''It offers higher performance for existing applications and the ability to take advantage of new applications that use 486 and Small Computer System Interface (SCSI) technology.''

AT&T also enhanced its SNA host connectivity products, which enable users to access critical mainframe applications and information using the networked computers on their desktops. The StarGROUP SNA Gateway enables MS-DOS workstations to emulate IBM 3270 terminals and printers. It provides connectivity to SNA mainframe environments from AT&T StarGROUP LAN Manager Server networks. The release of StarGROUP SNA Gateway announced today offers enhanced security, support for diskless PCs, and options that optimize client PC memory. AT&T's Host Connectivity Software also now supports UNIX System V Release 4.0, the latest release of the system.

NEW YORK (NOV. 26) BUSINESS WIRE - Ehrlich Bober Financial Corp. issued its results for its first fiscal quarter ended Sept. 30.

As previously disclosed, on Oct. 8, the board of directors of Ehrlich Bober decided to cease the ongoing operations of its principal subsidiary, Ehrlich Bober & Co. Inc. As a consequence, the results for this period are not comparable to the prior period.

For the three months ended Sept. 30, the company reported a net profit $110,000, reflecting primarily the reversal of accounting estimates made for the period ended June 30.

As discussed in the company's annual report on Form 10-K, for the year ended June 30, the board of directors has determined to seek to enter into other operating businesses through the acquisition of existing companies. At present, there are no plans to acquire any specific company or engage in any particular line of business.

	For the three months ended Sept. 30,

CHARLESTON, S.C. (NOV. 26) BUSINESS WIRE - John M. Settle, president and chief executive officer of Home Federal Savings Bank (''Home Federal'') (NASDAQ:HFSB), Monday announced that Home Federal's board of directors has unanimously approved a plan providing for the reorganization of Home Federal as the subsidiary of a newly formed holding company to be known as Carolina Financial Corp.

Under the plan, the existing stockholders of Home Federal will exchange their shares of Home Federal common stock for an equal number of shares of common stock in the new holding company which will thereafter own all of the outstanding shares of Home Federal. Implementation of the plan is subject to the approval of the Office of Thrift Supervision and the stockholders of Home Federal.

Home Federal intends to present the plan to its stockholders for approval at its annual meeting of stockholders, to be held in January 1991.

Settle stated that the primary reason behind the proposed reorganization is the belief by management of Home Federal that diversification of business activities and future business acquisitions and combinations can be more easily and advantageously accomplished through a holding company structure than through Home Federal directly.

Also, the holding company will have the ability to repurchase outstanding shares of the company's stock, which may increase book value and may support the price of the stock.

At the present time, however, the proposed holding company has not formulated any specific plans to engage in other lines of business after it commences operations.

Home Federal is a federally chartered and insured savings bank operating three full-service offices in Charleston. The common stock of Home Federal Savings Bank is traded in the over-the-counter market under the NASDAQ symbol HFSB.

#90330b0804 11/26/1990 ~Business Wire

BURLINGTON, MASS. (NOV. 26) BUSINESS WIRE - Recognition Equipment Inc. and Siemens Nixdorf Information Systems Inc. announced Monday they have completed the planned acquisition of Recognition's Wand Products Division by Siemens Nixdorf.

The purchase price was approximately $8.75 million, subject to certain possible after-sale adjustments. Recognition's first quarter results for the

quarter ending Jan. 31, 1991, are expected to include a gain of approximately $6 million from the sale.

The purchase of this business by Siemens Nixdorf strengthens its already prominent worldwide position in many industries, especially in the retail industry as one of the principal suppliers of point-of-sale and in-store customer service systems.

The sale of the business unit by Recognition Equipment Inc. is in line with its overall plan to focus its products on the market for document imaging, which the company announced in October 1989. Several of its non-imaging business units have been sold.

Albert Holler, president and chief executive officer of Siemens Nixdorf said, ''This acquisition continues to show our intention to grow strongly in the United States through bringing to the market the best coordinated solutions for our customers and prospects. By adding the Wand Products operation to our company, we have a springboard to continue to develop technology that will keep us as leaders in industries such as data entry, banking and retail both here and worldwide, and to be able to export to other Siemens Nixdorf subsidiaries.''

Recognition, headquartered in Dallas, and its wholly owned subsidiary, Plexus Software Inc., manufacture, sell and service image and data capture hardware and software systems for customers throughout the world.

Siemens Nixdorf Information Systems in the United States provides complete data processing solutions to customers, with products ranging from PCs to super minicomputers. U.S. headquarters are in Burlington, Mass. along with over 110 sales and service, research and development locations and 1,300 employees throughout the country. It is a subsidiary of Siemens Nixdorf Informationssyteme AG of Munich, Federal Republic of Germany -- Europe's largest computer company with over 50,000 employees.

#90330b0807 11/26/1990 ~Business Wire

GREAT NECK, NY (NOV. 26) BUSINESS WIRE - BRT Realty Trust (NYSE:BRT) Monday announced its results of operations for the year and fourth quarter ended Sept. 30.

For the year ended Sept. 30, the Trust reported revenues of $30,743,000

compared to $34,108,000 reported for the year ended Sept. 30, 1989. After a provision for possible losses of $34,577,000, the Trust reported a net loss of $21,406,000, or a net loss of $2.91 per share, for the year ended Sept. 30.

In comparison, for the year ended Sept. 30, 1989, the Trust reported net income of $17,038,000, or $2.31 per share, after a loss provision of $1.7 million. The weighted average number of shares outstanding during fiscal 1990 were 7,359,508 compared to 7,362,119 during fiscal 1989.

Revenues for the fourth quarter ended Sept. 30, 1990 were $6,725,000 compared to $8,587,000 recorded in the corresponding quarter last year. During the fourth quarter ended Sept. 30, the Trust reported a net loss of $27,796,000, or a net loss of $3.78 per share, after a provision for possible losses of $28,977,000. During the corresponding quarter last year, the Trust reported net income of $3,711,000, or 50 cents per share, after a loss provision of $800,000. The weighted average number of shares oustanding during the fourth quarter of fiscal 1990 were 7,346,624 compared to 7,379,433 during the fourth quarter of fiscal 1989.

Commenting on the results for the year and three month period ended Sept. 30, and the Trust's financial position at Sept. 30, Israel Rosenzweig, president of BRT Realty Trust, stated that the well publicized difficulties in the real estate markets served by the Trust, particularly in the New York Metropolitan area, have accelerated over the past few months. These conditions, coupled with a general lack of liquidity in the real estate industry, caused the Trust to take a large provision for possible losses at year end.

The provision taken at year end brings the total allowance for possible losses of $26,329,000 or 12 percent of the Trust's total assets at Sept. 30. Rosenzweig noted that the increase in non-earning loans to $46,260,000 or 22 percent of total assets at Sept. 30, and the increase in real estate acquired by foreclosure and held for sale to $24,548,000 (net of allowances and write-offs) or 11 percent of total assets at Sept. 30, were among the factors considered in determining the provision. The Trust has approximately $74,600,000 of shareholders' equity after reflecting fiscal 1990 results.

BRT Realty Trust is a mortgage-oriented real estate investment trust (REIT) specializing in short-term mortgage lending. -0- T

SAN JOSE, CALIF (NOV. 26) BUSINESS WIRE - Digital Microwave Corp. and AT&T Network Systems Monday announced a development and supply agreement for the design of a new generation of Synchronous Digital Hierarchy (SDH)-based microwave radio products.

Under the terms of the agreement, Digital Microwave and AT&T will jointly develop a new family of digital radio products for global applications requiring (SDH) transmission. Technology which evolves from the joint development effort will be available to both companies for future products.

Both companies will market this new radio product line, with AT&T concentrating on high-capacity applications and Digital Microwave on low- to medium-capacity.

''We are very pleased to be in partnership with AT&T on these leading-edge products,'' commented William E. Gibson, president and CEO of Digital Microwave. ''Since 1985, we have continually enhanced and expanded our relationship with AT&T, and today's resulting partnership is evidence of the continuing growth of our relationship.''

''This agreement is an important step that both companies are taking and is a major element of AT&T's global strategy for synchronous radio products,'' said Robert J. Sanferrare, vice president, AT&T Network Systems.

WASHINGTON (NOV. 27) COMTEX - Car Mart Inc. filed a registration statement with the SEC in which it proposes to offer 700,000 units.

Each unit consists of two shares of Class A common stock and two Class A warrants.

The initial public offering price is $6.00 per unit.

D.H. Blair & Co. Inc. is underwriting the offering.

Car Mart commenced operations in June, 1988.

The company's business presently consists of purchasing retail installment contracts from automobile dealers at a discount and reselling those contracts to banks at a profit.

The company's executive office is located at 370 17th Street, Suite 5060, Denver, Colorado 80202 and its telephone number is (303) 592-4311.

NEW YORK (NOV. 26) - Rock star Mick Jagger and his companion of 12 years, U.S. actress Jerry Hall were wed last week in Bali, Indonesia, the publicist for the Rolling Stones said Monday.

Mr. Jagger had announced in 1983 that the two would wed "any day now."

During a six-week vacation in the Far East, the two celebrated an Indonesian wedding ceremony Wednesday, said Lori Somes of the publicity firm Rogers and Cowan.

The couple's two children Elizabeth, aged 6, and James, aged 5, were present at the wedding.

Mr. Jagger's best man was Alan Dunn, a close friend of the rock star and a former Rolling Stones tour manager.

The British rock star has two other children -- Jade, from his marriage to Bianca Perez Morena de Macias, and Karis, by the actress Marsha Hunt.

KATHMANDU (NOV. 26) - Nepalese Prime Minister Krishna Prasad Bhattarai said Monday that India had agreed to purchase power generated from Nepal's 600 million-dollar Arun Three hydroelectric power project.

"This will help us to redress the long-standing trade imbalance with India," Mr. Bhattarai told reporters on his return from New Delhi, where he had stopped off after attending the South Asian Association for Regional Cooperation summit in the Maldives.

The construction of Arun Three had been delayed because of India's previous indecision about buying power from the project.

During his visit to New Delhi, Mr. Bhattarai said he held informal talks with his Indian counterpart Mr. Chandra Shekhar regarding bilateral cooperation on other river projects in Nepal.

BELGRADE (NOV. 26) - The Croatian government will demand a devaluation of the dinar, the high rate of which is harming the republic's export-oriented economy, Tanyug news agency reported on Monday.

The dinar's parity of seven to the Deutsche mark has remained stable since last December, even though inflation has been more than 100 per cent since that time.

Croatian deputy premier Franjo Greguric said on Monday in Zabreb that a dinar devaluation would give the Croatian economy a six-month respite, enabling it to begin economic restructuring. He also said that Croatia would stop making certain unspecified contributions to the federal budget.

Mr. Greguric illustrated the Croatian economy's difficult situation by pointing out that production had fallen by 10 per cent this year, and investments by 15 per cent.

Last week, Serbia announced a cut in its contribution to the federal budget. Serbia, Crotia and Slovenia have been sharply criticized by the Yugoslav prime minister for indiscipline, endangering the Yugoslav program of reforms based on restrictive anti-inflationary policies.

WASHINGTON (NOV 26) - A team of U.S. security experts is inspecting U.S. Government buildings in Beirut to determine if they have been damaged since

U.S. diplomatic personnel pulled out more than a year ago, the State Department said Monday.

The security team arrived in Beirut Sunday for the inspections but it has "no diplomatic business," said spokeswoman Nancy Beck.

She said the United States had not decided to return its diplomatic staff to Beirut. They were evacuated September 5, 1989, after hostile demonstrations erupted there.

"We hope to return our American diplomatic personnel when we can reasonably be assured of their safety and effectiveness," said Ms. Beck.

The inspection follows the swearing in earlier this month of the new U.S. Ambassador to Lebanon, Ryan Crocker.

WASHINGTON (NOV 26) - Senior U.S. and Cuban officials discussed the Gulf crisis in the highest-level meeting between the two countries since they opened diplomatic offices in each other's capitals more than a decade ago, officials said Monday.

The meeting Sunday, a reflection of U.S. concern over the crisis, brought together Under Secretary of State Robert Kimmitt, the third-ranking official at the State Department, and the head of Cuba's dipolmatic mission here, Jose Arbesu.

Until now the most senior U.S. official to meet with the chief Cuban diplomat in Washington was the assistant secretary of state for Latin American affairs.

The meeting Sunday was limited to a discussion of consulations on the Gulf crisis at the United Nations, where Cuba holds one of 10 non-permanent seats on the U.N. Security Council, a spokesman for the Cuban mission said.

A U.S. official said Mr. Kimmitt invited Cuba to a meeting Thursday, at the foreign minister level, during which the United States is to seek approval of a resolution setting a deadline for Iraq to withdraw from Kuwait or face military action.

LISBON (NOV. 26) - The U.S.-backed rebels of the National Union for the Total Independence of Angola (UNITA) killed 1,728 civilians in military actions over the first 10 months of this year -- an average of over 170 per month -- the Angolan government said on Monday.

In a statement carried by the official ANGOP news agency monitored here, the government said 1,695 civilians were injured in UNITA attacks in the same period, while almost 3,000 were kidnapped -- 33 of them never to be seen again.

The statement, issued by the information ministry, said that rebel attacks had destroyed 178 high-voltage electricity pylons, 21 bridges, 281 vehicles and a diamond-washing plant.

They had also damaged three hydro-electric dams, an oil depot and two hospitals and destroyed 2,728 private houses.

#90330d0770 11/26/1990 ~French/German News Agency

NEW YORK (NOV 27) - The five permanent members of the United Nations Security Council have reached extensive agreement here on the text of a resolution aimed at stepping up the pressure on the Iraqi government to withdraw its forces from Kuwait.

Diplomats said the draft, to go before the Security Council on Thursday, is based largely on a text formulated by the United States, with phrasing added to give Iraq President Saddam Hussein ''one final opportunity, as a pause of goodwill'' to withdraw.

There were said to be intense negotiations between the five permanent members - the United States, the Soviet Union, China, France and Britain - on when the ultimatum should be set for Iraq to withdraw from Kuwait as demanded in earlier U.N. resolutions.

In the discussions which finished late Monday, Washington was reported to have pressed for a January 1 deadline before the United Nations sanctions military force to remove Iraqi troops from Kuwait.

The Soviet Union and France wanted to set the ultimatum for two weeks later,

on January 15, it was reported.

Soviet U.N. ambassador Yuliy Vorontsov said after the talks that the next U.N. resolution ''may be the last one against Iraq''.

He said the document will be a ''serious and an important one ... and we all hope that after that, there will be a political and peaceful solution, and an Iraqi withdrawal out of Kuwait''.

Diplomats said more discussions among Security Council members would continue Tuesday.

BRUSSELS (NOV 27) - A Soviet official has warned the European Economic Community that some three million of his countrymen might emigrate at least temporarily to EEC states when they gain the right to travel freely abroad next year, Italian Social Affairs Minister Carlo Donat Cattin said Monday.

He said the Soviet labor minister, Vladimir Shcherbakov, had requested a meeting Sunday evening with the 12 labor ministers of the EEC to discuss the issue of Soviet immigration.

Mr. Donat Cattin told a press conference here that Mr. Shcherbakov was forced to cancel the meeting for reasons of domestic policy, but that he had hoped to "draw our attention to the fact that the number of Soviet workers expected to temporarily emigrate had jumped from one to three million."

The Italian official said the immigration of workers from Eastern Europe could "become uncontrollable" if urgent measures were not taken.

But he added that the exodus was likely to ease up after several years when Eastern Europe would be in a position to absorb its own labor force.

LONDON (NOV. 26) - Lord Home of the Hirsel, a former Conservative prime minister, was hospitalised on Monday after suffering a "small stroke," his nephew Mark Douglas-Home said.

Lord Home, who is 87, headed the British government from 1963 to 1964, when he was known as Sir Alec Douglas Home.

He received a life peerage in 1974.

It was Lord Home who as head of the Conservative Party in 1965 designed the

present system under which the party elects its leaders -- and under which a successor to Prime Minister Margaret Thatcher is to be selected this week.

Prior to the change in rules, the leader was chosen by consensus by the party leadership, without any election.

#90330d0920 11/26/1990 ~French/German News Agency

MIAMI, FLORIDA (NOV. 26) - A U.S. judge Monday told prosecutors of deposed Panamanian ruler Manuel Antonio Noriega to prove his frozen monetary assets were drug tainted or pursuade foreign governments to free the 20 million dollars to pay his lawyers.

U.S. District Judge William Hoeveler said he would order a hearing on the frozen accounts within 10 days to determine if the money was earned illegally.

Prosecutors agreed in June to free the money. Later, they said foreign governments had filed their own confiscation orders against the 27 accounts.

Mr. Hoeveler has said he may have to appooint government-paid defense lawyers in the case unless Mr. Noriega's lawyers were paid. He said Monday he would give the government another chance to unfreeze the accounts.

The judge also expressed concern that the former military strongman would not receive a fair trial because Cable News Network (CNN) had tapes of telephone conversations between Mr. Noriega and his lawyers.

"I am deeply concerned about the image that this case seems to be acquiring -- that the defendant is not going to be able to get a fair trial," said Mr. Hoeveler.

"There's an obvious need by all of us in a case like this to show that our system, in fact, does work from top to bottom," he added.

Mr. Noriega is accused of accepting 4.6 million dollars in bribes from Colombia's Medellin drug cartel to help them ship cocaine to the United States.

#90330d1120 11/26/1990 ~French/German News Agency

HAMBURG, GERMANY (NOV. 27) - The Renault Clio was voted Car of the Year 1991, ahead of Nissan's Primera and the Opel Calibra, by a jury of automobile journalists from 17 European countries, the German magazine Stern announced in its edition to be published Monday.

It was the second consecutive year a French car won the citation, after the Citroen XM was voted Car of 1990. The previous winner was the Fiat Tipo.

A 58-member jury gave the Clio 312 points, followed by 258 points for the Nissan Primera and 183 points for the Opel Calibra.

The Peugeot 605 placed fourth, followed by the Mazda Miata in fifth place.

The latest model of the Renault line, the small-capacity Clio has been on sale in France since June. It is being manufactured at the rate of 2,400 per day, with more than 72,000 units sold so far in France.

#90330d1200 11/26/1990 ~French/German News Agency

MANILA (NOV. 27) - The Gulf crisis and natural calamities took their toll on the Philippine economy this year, resulting in a mere 3.58 percent growth in the first nine months, the government's statistics office said Tuesday.

Real gross national product (GNP) growth for the period was 3.58 percent, down from 5.45 percent in the same period last year, the National Statistical Coordination Board (NSCB) said.

Gross domestic product (GDP) growth was sharply down to 2.78 percent, from a 5.64 percent growth in the same period of 1989, NSCB spokesmen said.

They attributed the slowdown to high oil prices after Iraq swallowed up Kuwait in August, to drought and a severe power shortage due to inadequate generating capacity in the first quarter, a killer earthquake in July and destructive typhoons.

Finance Secretary Jesus Estanislao said Sunday that the economy would grow by 3.5 percent this year, down from the more than five per cent average in the past four years, and suffer a brief recession in 1991, when growth would be in positive figures but below the 2.3 percent population growth rate.

#90330d1320 11/26/1990 ~French/German News Agency

HONG KONG (NOV. 27) - Sub-tropical Hong Kong, known for its hot, humid weather, is the world's top exporter of furs and is striving to keep that title despite a persistent fall in the product's export value since 1987.

The slump in value of about one-third was largely prompted by "an oversupply of raw fur in the past few years when too many fur animals were bred in farms in the West," said a local veteran in the trade, David Chan.

The problem has also hit two key competitors, South Korea and Greece, said Mr. Chan, vice-president of the Federation of Fur Manufacturers and Dealers.

However, Mr. Chan expressed some optimism about Honk Kong retaining its position as the world's top exporter.

"Our export value may have gone down, but our volume -- the number of fur clothing pieces -- has actually gone up, and this shows fur coats are selling better as they've become cheaper," he said. "We should still be the first next year."

Mr. Chan said an international call to stop killing animals for their fur carries negligible impact in Asian markets.

"Almost all of our raw fur supply comes from farmers, mostly in Scandinavia," he said. "I see no difference between breeding fur animals for their fur and breeding cows and chicken for their meat."

The value of Hong Kong's fur exports fell 34 per cent in 1988 to 2.3 billion Hong Kong dollars (295 million U.S.) from a high of 3.5 billion dollars (448 million U.S.) in 1987.

The figure for last year was around 2.2 billion dollars (295 million U.S.), after a slight downturn.

Japan is the biggest buyer, snapping up 68 per cent of Hong Kong furs, mostly mink, folllowed by the United States with 20 per cent and Canada with three per cent.

While exports to the top three markets all dwindled in the first eight months of this year, the value of those bound for South Korea registered a dramatic 1,000 per cent increase to 9.3 million dollars (1.2 million U.S.)

#90330d5620 11/26/1990 ~French/German News Agency

SEOUL (NOV. 26) - South Korea's recent diplomatic successes with Eastern Europe and China have paid off in trade, which has soared between the former foes, a government report said Monday.

The Economic Planning Board (EPB) said in a report to be submitted Monday to the National Assembly that trade with East European countries, including the Soviet Union, increased 14.9 percent to 4.2 billion dollars last year.

During the first eight months to August this year, the trade volume with these countries was 3.3 billion dollars, up 20 percent from the same period of last year.

Exports during the eight months jumped 30.2 percent to 1.6 billion dollars and imports increased 11.7 percent to 1.67 billion dollars, the report said.

Trade with the Soviet Union leaped 64.3 percent to 488 million dollars over the same period last year, mainly due to massive purchases of South Korean consumer goods by the Soviet Union.

Trade with other East European countries soared by 83.1 percent in the same period to 412 million dollars.

South Korea established diplomatic relations with the Soviet Union in September, winding up its two-year efforts to normalize ties with East European countries.

Trade with China in the first eight months crept up a mere five percent to 2.3 billion dollars because of China's economic depression and austerity policy.

As of the end of September, the accumulated investments in the East European countries, the Soviet Union and China amouted to 175 million dollars for 49 projects.

Thirty four of them, worth 74 million dollars, are now underway, the report said.

Over the past year Seoul has exchanged embassies with several members of the former East Bloc. It has also exchanged trade offices with China.

#90330d5790 11/26/1990 ~French/German News Agency

Berlin (NOV. 26) - Most of the railway system in the eastern part of Germany was idle Monday in the first major strike since German unification seven weeks ago.

Only suburban passenger trains in Berlin were still running after eastern railway workers walked off the job Sunday night demanding massive wage increases to bring pay closer to western levels.

Rail union spokesman Reinhard Sauer said a shutdown of 26 key stations had

succeeded in stalling the entire Deutsche Reichsbahn passenger and freight network shortly before dawn. Workers are also demanding guarantees against redundancies.

The Reichsbahn, which has not been integrated with its efficient western equivalent, the Deutsche Bundesbahn, has hinted at plans to lay off 68,000 workers to cut costs and increase productivity.

Bernd-Volker Guenther, Berlin general manager of the rail system, said strikers at a station on the border to Poland had succeeded in backing up trains all the way to Berlin.

Two threats were received early Monday to blow up suburban Berlin stations, possibly from enraged passengers, Guenther said.

German unification on October 3 has led to smouldering labour unrest as eastern workers compare their pay with wages that are two or three times higher in the west. Housing in the east is cheaper, but most other costs of living are on the same level.

TOKYO (NOV. 26) - Japanese trading firm Nissho Iwai Corp. and Satellite Transmission Systems of the United States have won a 500 million dollar to supply satellite facilities to Romania, a Nissho Iwai official said Monday.

The order provides for the construction of a ground station for satellites operated by the European Telecommunications Satellite Organization, he said.

The facility, expected to start operating in June, will allow Romania to expand international telecommunications services and receive West European television programs, the official said.

The order marks the first sale of Western satellite equipment to Romania.

TOKYO (NOV. 26) - Eishiro Saito plans to resign as chairman of Japan's powerful Federation of Employer Organisations (Keidanren) next month, nearly 18 months before his current term expires, news reports said Monday.

The reports said he would be replaced by Gaishi Hiraiwa, the chairman of Tokyo Electric Co. Ltd. who is also vice chairman of the employer group.

Mr. Saito, honorary chairman of Nippon Steel Corp., the world's biggest steelmaker, has headed Keidanren since 1986.

-30- 657
#90330d5900 11/26/1990 ~French/German News Agency
TOKYO (NOV. 26) - Former foreign minister Hiroshi Mitsuzuka said Monday the Japanese government planned to give 20 million dollars in medical aid to the Soviet Union, according to press reports.

It would be Japan's first financial aid to the Soviet Union, long hindered by a still-unresolved territorial dispute between the two countries.

Jiji Press quoted Mr. Mitsuzuka as telling a conference in Tokyo that the government would supply the funds for the Soviets to purchase medical equipment to treat victims of the 1986 Chernobyl nuclear disaster.

Mr. Mitsuzuka was not available for comment, while the foreign ministry acknowledged studying possible medical aid to the Soviet Union but denied that an amount had already been fixed.

The money would be channeled through the World Health Organization, Mr. Mituzuka, a senior member of the ruling Liberal Democratic Party, said.

#90330d5960 11/26/1990 ~French/German News Agency
SINGAPORE (NOV. 26) - A 24-member U.S. military team began talks with Singapore defence officials Monday on implementation of their new accord giving U.S. forces expanded use of naval and air facilities here.

A U.S. spokesman said the technical team from the U.S. Pacific Command arrived Sunday for a week of discussions on various aspects of the agreement.

The city-state offered Washington greater use of its faclities in August 1989 to reduce U.S. reliance on bases in the Philippines where the arrangements are up for renegotiation.

A memorandum of understanding signed November 13 in Tokyo by Singapore Prime Minister Lee Kuan Yew and U.S. Vice-President Dan Quayle provided for "modest increases" in U.S. use of existing port and airport facilities.

A U.S. statement issued Saturday said the talks here were expected to cover "types and frequencies of U.S. Air Force deployments, logistics, storage requirements, office space, U.S. Navy berthing needs, fueling, housing and legal matters."

But there was still no word on how the two sides resolved the thorniest issue in the negotiations: the fate of any U.S. servicemen arrested on criminal charges in Singapore where narcotics trafficking carries a mandatory death

penalty.

Neither side has released a copy of the agreement signed in Tokyo covering use of Sembawang port in Singapore's north and Paya Lebar airport in the southeast. The increased U.S. activity was expected to start within the next three to six months.

The agreement allows the U.S. Air Force to send aircraft to the island-republic several times a year on training deployments of several weeks each while the U.S. navy planned to increase the duration and number of its ship visits here.

The contingent of U.S. military personnel assigned here year-round will be boosted from the current 20 to about 95, and another 75 air force men and women will come here temporarily on each training mission.

#90330d6030 11/26/1990 ~French/German News Agency

TOKYO (NOV. 26) - Eishiro Saito resigned as chairman of Japan's powerful Federation of Employer Organizations (Keidanren) Monday, almost 18 months ahead of schedule, a Keidanren official said.

The 79-year-old chairman was stepping down to make way for younger businessmen to run the influential group.

Mr. Saito, who is also honorary chairman of Nippon Steel Corp., the world's biggest steelmaker, has headed the Keidanren since 1986. His current two-year term was not due to expire until May 1992.

He would be replaced by Gaishi Hiraiwa, 76, the chairman of Tokyo Electric Co. Ltd. who is vice chairman of the employer group.

The Keidanren board accepted the resignation and nomination of the new chairman at a meeting in Tokyo on Monday. The changeover would be formally put to a meeting of Keidanrern members next month.

MOSCOW (NOV. 26) - The Soviet Union is budgeting for a 50 per cent drop in oil exports next year compared to this year, according to the draft budget presented to parliament Monday.

"The exports (for oil) will be reduced by a factor of about two compared to the level forecast for 1990," the text said.

Global production of petroleum products is expected to reach 560 million

tonnes, compared to 575 million tons this year, the text also said.

New Delhi (NOV. 26) - Public servants in the Indian part of Kashmir returned to work Monday at the end of a 71-day strike, newspapers here reported.

The 137,000 staff agreed to go back to work after Kashmir Governor Girish Saxena agreed in ten hours of talks with the strike committee to reinstate five senior civil servants. They had been sacked September 16 for alleged contacts to Kashmir separatists.

LONDON (NOV. 26) - The first of some 40 ships chartered by the Ministry of Defence to take reinforcements of men and material to the Gulf were preparing to leave this week for Saudi Arabia in an operation which will nearly double the strength of Britain's Desert Shield contingent.

Loading operations started at the weekend at the German port of Emden and were about to begin at the port of Marchwood in southern England.

Altogether 14,000 men are to be transported to the Gulf by January to join the estimated 16,000 British soldiers, including 11,000 infantry men already operational in the Saudi Arabian desert.

The bulk of British land forces will form a 25,000-man First Division under the orders of General Rupert Smith, due to be operational in January.

The majority of the 14,000 Gulf reinforcements are from the 4th infantry brigade based at Verden in Germany. The 7th brigade of "Desert Rats" which has been in the Gulf since October was also stationed in Germany.

The men themselves are not due to leave until end December but the first military hardware will leave from Germany and Britain this week.

The equipment includes 43 Challenger tanks, more than 150 light armoured tanks about 50 mobile cannons, 12 long-range missile launchers of the Multiple Launch Rocket System (MLRS) type, 24 Rapier anti-aircraft missile launchers and 18 Lynx combat helicopters.

The First Division will have a total of 175 Challenger tanks and nearly 250 light armoured vehicles by January, military experts said.

Two British minesweepers are also due to leave for the Gulf to join three already there. Experts said the ships would be particularly useful in the case

of an amphibious operation on the coast of Kuwait.

The reinforcements were announced last week by Defence Secretary Tom King.

He said the message to Iraqi leader Saddam Hussein was that while a peaceful settlement was preferable, the military option not only existed but was "credible".

Experts said the resignation of Prime Minister Margaret Thatcher was unlikely to affect the hardline adopted by Britain against Iraq.

AUCKLAND, NEW ZEALAND (NOV. 26) - Air New Zealand said Monday it had posted an unaudited bottom line loss of 26.7 million New Zealand dollars (16.3 million U.S.) for April through September this year.

In a statement to the New Zealand Stock Exchange, the airline said the figure compared with a 19 million dollar (11.7 million U.S.) profit for the same period last year.

Brierley Investments Ltd. are the biggest shareholders of the company with Qantas and Japan Air Lines also holding sizeable blocks of shares.

Chairman Bob Matthew said the company's final result "will at best break even."

A major factor in the loss was redundancy payments arising from closed domestic routes.

Mr. Matthew said the period had proved a difficult time for the airline and, while noting that most of an airline's profits accrue during the second half of each year, "the loss was nevertheless disappointing."

Dramatic increases in aviation fuel did not come into account materially in the period, he said.

TEHERAN (NOV. 26) - Twelve people were killed when two Iranian helicopters collided near Kharg island in the northern Gulf, Teheran newspapers reported Monday.

The reports did not give a date for the accident, which left no survivors, but said several technicians employed by the Iranian Oil Ministry were among those killed.

The helicopters were used to link Fourouzan oil platform and Kharg island, the papers said.

JAKARTA (NOV. 26) - Iran has offered to sell crude oil to Indonesia to replace imports from Iraq, halted in August under U.N.-mandated economic sanctions, Iranian Trade Minister Abdul Hussein Vahaji said here Monday.

"The Gulf crisis has not yet directly affected Indonesian crude imports from Iran but we are prepared to meet a demand by Indonesia to increase its imports " Mr. Vahaji said after paying a courtesy call on Indonesian President Suharto.

Under a counter-purchase agreement, Indonesia imported 30,000 barrels of oil per day from Iraq for reprocessing into various petrol products at the Cilacap refinery in Central Java.

The imports were halted following Iraq's August 2 invasion and occupation of Kuwait.

Mr. Vahaji said that under a counter-purchase agreement signed by Teheran and Jakarta in 1988, Iran exports 30,000 barrels of crude to Indonesia in return for non-oil Indonesian products.

In the past Indonesia imported a total of 100,000 barrels of crude from Iran, Iraq and Saudi Arabia to use as feedstock for Cilacap, where Indonesian crudes are unsuitable for processing.

#90330d6310 11/26/1990 ~French/German News Agency

Rangoon (NOV. 26) - Nearly 400 million dollars worth of heroin, opium oil, liquid opium and marijuana went up in flames in the Burmese capital Monday as foreign diplomats put the torch to piles of seized narcotics at the third public destruction of drugs staged by the government.

Over 5.6 million small bottles of phensedyl were also crushed into powder by two five-ton rollers.

Held at the police officers' mess in the northern suburbs of Rangoon, the spectacular demonstration was attended by high military and police officials headed by Major-General Khin Nyunt, secretary of the State Law and Order Restoration Council.

Also present were United Nations Development Programme (Undp) and foreign diplomatic officials based in the Burmese capital.

The director of the narcotics police, Colonel Ngwe Soe Tun, said Burma had been taking ''relentless action'' against narcotics. He described as ''unwarranted accusations'' reports by foreign news media that Burma was producing thousands of kilograms of opium.

According to official figures, the narcotics destroyed comprised 165.3 kilos of heroin, 11.5 kilos of opium oil, 85.7 kilograms of liquid opium, 1190.5 kilos of marijuana, and over 5.6 million bottles of phensedyl.

The total U.S. street value of the narcotics was officially put at 398.8 million dollars.

The government had destroyed a total of 460.5 kilos of heroin and varying quantities of other drugs with an officially estimated U.S. street value of 920 million dollars in two previous drugs destruction displays in Rangoon earlier this year.

It had also destroyed narcotics worth over 500 million dollars at a special display last Thursday at Nasai village in Kokang state, northeast Burma.

#90330d6390 11/26/1990 ~French/German News Agency

Beirut (NOV. 26) - An Iraqi opposition group based in Beirut said Monday that Iraqi President Saddam Hussein had ordered the arrest of thousands of students in and around Baghdad who had recently demonstrated against his rule.

The Supreme Council of the Islamic Revolution in Iraq said in a statement released in the Lebanese capital that since the begining of November students had distributed flyers protesting ''the aggressive policy of Hussein which led to the foreign deployment in the Gulf.''

The statement said that around 4,500 of these students and their teachers had been arrested and were now facing execution.

It added that some of the leaflets which had been distributed in schools had been addressed to Iraqi soldiers and had urged them ''to topple their dictator and save the country''.

The opposition group, which is believed linked to Iran, said in the statement that many of the protestors were followers of a Shiite spiritual leader, Mohamad Baker Sader, who had been assassinated in 1980 on orders from Saddam Hussein.

#90330d6440 11/26/1990 ~French/German News Agency

LEVERKUSEN, GERMANY (NOV. 26) - The German Bayer chemicals group on Monday

reported that consolidated pre-tax profits for the first nine months of the year were 17 percent down on the same figure a year earlier at 2.75 billion Deutschemarks (1.83 billion dollars).

Consolidated sales were down 4.3 percent at 31.5 billion marks (21 billion dollars).

The profits figure was down 563 million marks (375 million dollars), of which 117 million marks was attributable to adverse exchange rates.

The holding company saw its pre-tax profits profits during the period fall by 18.7 percent to 1.5 billion marks (one billion dollars).

The group said that year-end results would be "satisfactory but markedly below the level in the record year of 1989".

In the third quarter consolidated pre-tax profits fell by 32.3 percent to 740 million marks, and sales were down 5.6 percent at 9.74 billion marks.

Profits at the holding company were down 35.8 percent at 398 million marks, and consolidated sales were down 2.8 percent at 4.16 billion marks.

#90330d6460 11/26/1990 ~French/German News Agency

MOSCOW (NOV. 26) - Moscow has stocks of powdered milk sufficient to last for only three more days, Deputy Mayor Sergei Stankievich said here Monday.

He disclosed this at a press conference after nine regions bordering Moscow said they intended to halt or severely reduce their milk deliveries to the capital.

Retaining the option of seeking emergency help from abroad, Mr. Styankievich said the regions maintained their decision was for "purely economic reasons".

But he did not rule out the possibility that "political considerations" had played a role since the municipal authority in Moscow has been headed for a few months by leading Soviet liberal, Gavriil Popov.

Observers said that the move could also be in retaliation for a decision by the Moscow authorities a few months ago to reserve access to shops in the capital for residents of Moscow and its outskirts.

Inhabitants of neighbouring regions used to come to Moscow to find supplies.

Mr. Stankievich said suppliers should guarantee deliveries and said that any interruptions meant agreements between the city and its suppliers would be null and void.

Noting that the capital was facing "crisis difficulties", he did not rule out the possibility that Moscow might have to seek "emergency aid" from abroad this winter. But he did not say which products might be needed.

He said Moscow authorities would introduce in the next few days "severe" controls on the movement of food to shops in the capital because up to 20 per cent of products "disappeared" between city depots and sales outlets, he said.

These controls would be carried out by clubs of electors or by elected officials and public associations.

"We do not have any other way out. There are sufficient supplies in Moscow for people to be able to buy what is essential," he said. He condemned the practice, common in the Soviet Union, of diverting food en route from depots to outlets, for sale on the black market.

MELBOURNE, Australia (NOV. 26) - The local subsidiary of Japanese car manufacturer Toyota Motor Corp. has ousted Ford as Australia's leading automaker for the first time.

Figures released Monday by motor car industry statistician PAXUS Corp. Ltd. showed Toyota Motor Corp. Australia sold 12,983 units in October, capturing 23.79 percent of the total car market.

Ford was next with 10,889 units, claiming 19.95 percent.

The figures revealed a strong upturn in the car market with vehicle registrations rising 9.9 percent to 54,575 units compared with 49,655 units in

September.

Toyota's achievement represents the first time a Japanese-based car manufacturer has surpassed either of the local industry stalwarts Ford Australia or General Motors-Holden's Australia.

But a spokesman for Ford said it regarded the month's figures as "an aberration" and the company expected to regain leadership next month.

Ford's vice president in charge of marketing, Bill Hartigan, said Ford's market had been adversely affected recently by a decline in demand for six-cylinder vehicles, traditionally the "mainstay of the fleet market."

#90330d6590 11/26/1990 ~French/German News Agency

Moscow (NOV. 26) - The Soviet Union will receive lines of credit totalling some 20 billion dollars from several Western countries by early next year, it was reported here Monday.

The independent economic newspaper Kommersant, citing Foreign Ministry sources said the credits would mainly be provided by Germany, Italy, France and Japan.

The newspaper said there were ''political reasons'' behind Moscow's borrowing.

''The concentration of hard currency would provide the central authority the only chance to preserve its dwindling power and control over the republics,'' Kommersant said.

The paper also cited Soviet experts as describing Moscow's credit policy as ''extremely dangerous'' since the increase in borrowing was not being covered by government programmes on applying the loans and repaying them.

''The situation is getting worse by the fact that the union government has still not taken any measures towards carrying out its declared aim of a

transition to a market economy,'' the paper said.

Kommersant also noted that the Soviet Union's foreign debts had risen sharply this year, from about 49 billion dollars to some 54 billion dollars.

-30- 1375

#90330d6700 11/26/1990 ~French/German News Agency

DAR ES SALAAM (NOV. 26) - The World Bank has granted Tanzania 1.5 million dollars to build and improve roads, Works Minister Nalaila Kiula announced here Monday.

Tanzania is desperately trying to improve its potholed roads, which are so bad that hundreds of thousands of tons of food and export crops that could earn the impoverished nation sorely needed hard currency are trapped in remote rural areas every year.

Iraq's invasion of Kuwait has deprived Tanzania of a 178-million-dollar loan which the Kuwaiti government had promised for building a 500-kilometre (300-mile) road from the capital, Dar es m, to flood-prone parts of south Tanzania which cannot be reached by road during the long rainy season.

Mr. Kiula said the World Bank money would go towards road-making equipment and training for engineers.

He said foreign and local experts would also be recruited to improve the skills of road maintenance personnel.

#90330d6720 11/26/1990 ~French/German News Agency

BEIJING (NOV. 26) - Vice Foreign Trade Minister Gu Yongjiang has left on a trip to Canada and the United States to boost trade ties, the China Daily said Monday.

The newsaper said Mr. Gu, who left Sunday, will be the first Chinese vice-minister to visit the United States since June 1989, when the army suppressed pro-democracy protests here.

Mr. Gu's delegation, comprising officials from China's main exporters of cereals, foods and technology, will visit Canada for 10 days, the newspaper said, without giving details of their trip to the United States.

According to the latest official figures China's two-way trade with Canada reached 1.58 billion U.S. dollars in the first 10 months of this year, making it the country's eighth largest trade partner after Hong Kong, Japan, the European Economic Community, the United States, the Soviet Union, Singapore and Taiwan.

China Daily also said a delegation of rural sector entreprises will visit the United States next week, on the first such trip of its kind, to explore cooperation with small and medium-sized U.S. businesses.

#90330d6810 11/26/1990 ~French/German News Agency

SINGAPORE (NOV. 26) - The Singapore government on Monday reaffirmed its ban on investment in Vietnam following press reports that two local companies have been involved in hotel projects in the communist Indochinese state.

The Business Times said that Singapore's Kieu My Trading Pte. Ltd. was investing 6.5 million U.S. dollars to build the Phu Tho hotel in Ho Chi Minh City with Vietnam's Union of Import and Export.

The second project, it said, involved another hotel in Vung Tao province worth 3.5 million dollars and was to be built up in partnership with the Vietnamese Vung Tao Tourist Co.

Kieu My sources were not available for comment.

A third Singapore venture concerned the renovation and conversion of an old building into a refurbished hotel. The paper did not give the name of the Singapore company involved or the extent of the investment.

The newspaper, quoting an official of the State Committee of Cooperation and Investment (SCCI), Vietnam's de facto board of investment, said the Singapore firm made its commitments through its Hong Kong arm, Panergo Ltd.

It said other Singapore investors had made commitments in Vietnam that were awaiting SCCI approval.

A foreign ministry spokesman would not discuss the reported investment projects, but said, "The ban against Singaporeans investing in Vietnam or Cambodia remains unchanged."

Singapore has barred its citizens from investing in Vietnam and Cambodia, where it supports a tripartite resistance movement against the government installed by Hanoi's troops in 1979.

It said last month that it would lift the ban as soon as the Supreme National Council, formed by the four warring factions, is represented at the United Nations. But the factions have been embroiled in a dispute over the leadership of the council.

#90330d6940 11/26/1990 ~French/German News Agency

MOSCOW (NOV. 26) - The Soviet Union's budget deficit for 1991 is forecast to top 250 billion rubles (400 billion dollars at the official rate), Finance Minister Valentin Pavlov said Monday.

He said "exceptional measures" would have to be taken to cope with the deficit.

He told Supreme Soviet deputies that in addition to the 1990 deficit of 60 billion rubles there would be a shortfall of 190 billion rubles due to losses within the oil sector, company failures and the spiralling cost of social programmes.

The collapse of Soviet exports, particularly in the oil sector, will cost the state around 45 billion rubles in lost revenues.

-30- 814

#90330d6950 11/26/1990 ~French/German News Agency

TOKYO (NOV. 26) - Japan's seven trust banks announced Monday sharply lower earnings for the six months to September, citing soaring interest rates and plunging stock prices.

Most of the trust banks, which specialise in managing assets such as pension funds, also cut their profit forecasts for the full year.

"We anticipate that the environment will remain difficult with depressed equity prices and continued high interest rates. We also foresee continued growth in fees for managing pension and other trusts," said Takahiko Kiminami, general manager for strategic planning at Yasuda Trust and Banking Corp.

Mitsubishi Trust and Banking Corp., the country's biggest trust bank in terms of assets, said net profit dived 28.9 percent from a year earlier to 29.9 billion yen (217 million dollars) in the six months. Revenue climbed 24.1 per cent to 823 billion yen (six billion dollars).

Net profit for the full year was forecast at 50 billion yen (362 million dollars), down from its original estimate of 54 billion yen (391 million dollars). The bank's revenue estimate of 1,700 billion yen (12.3 billion dollars) was also lower than previously projected.

Sumitomo Trust, ranked second, said net profit dropped 26.5 percent to 29.5 billion yen (214 million dollars) while revenue grew 20.2 percent to 827 billion yen (six billion dollars).

The bank reduced its earnings forecast for the year to March from 55 billion yen (399 million dollars) to 47 billion yen (341 million dollars). Projected revenue was also lower at 1,700 billion yen (12.3 billion dollars).

Mitsui Trust and Banking Corp., the third-biggest trust bank and the country's oldest, said its net profit plunged 41 percent to 19.3 billion yen (140 million dollars). Revenue grew 25.4 percent to 663 billion yen (4.8 billion dollars) in the same period.

Net profit was forecast at 35 billion yen (254 million dollars), down from AN earlier estimate of 45 billion yen (326 million dollars). Its revenue forecast was higher, however, at 1,350 billion yen (9.8 billion dollars).

#90330d6970 11/26/1990 ~French/German News Agency

Jerusalem (NOV. 26) - Rabbis in Jerusalem and the northern town of Tiberias on the Sea of Galilee have started praying for rain to end Israel's unprecedented water crisis, local papers said Monday.

The Sea of Galilee, a lake which constitutes Israel's biggest source of fresh water, was cut off from the nations taps Sunday for the first time since the formation of the state in 1948 as water reserves reached their lowest-ever level because of increases in demand and several dry winters.

According to the papers, rabbis alarmed by the situation have started visiting ancient cemeteries in Tiberias and Jerusalem to pray for rain at the graves of holy mystics buried there. Similar action in previous droughts was followed shortly by down-pours according to rabbis quoted in the mass-circulation Yediot Aharonot, but weathermen forecast the dry spell will continue at least until early December.

The unprecedented decision by the water commisioner to cease pumping from the Sea of Galilee was taken after experts agreed that continued pumping would drain away reserves in two large underground aquifers which supply the rest of Israel's water needs.

#90330d7000 11/26/1990 ~French/German News Agency

TOKYO (NOV. 26) - Japan's leading power companies announced Monday increases in earnings for the six months to September while the country's main gas companies said their profits were mixed.

Tokyo Electric Power Co. Ltd., the country's biggest power generator and the world's largest private electricity concern, said its net profit rose 10.3 percent from a year earlier to 37 billion yen (268 million dollars). Revenue climbed 8.9 percent to 2,213 billion yen (16 billion dollars).

Kansai Electric Power Co. Ltd., the second-biggest, said net profit soared 58 percent to 33 billion yen (239 million dollars). Revenue advanced 10 percent to 1,162 billion yen (8.4 billion dollars).

Tokyo Gas Co. Ltd., the country's biggest gas concern, said its net profit plunged 58.8 percent to 3.2 billion yen (23 million dollars) while revenue grew 2.3 percent to 322 billion yen (2.3 billion dollars).

#90330d7060 11/26/1990 ~French/German News Agency

LONDON (NOV. 26) - Freight rates firmed over the past week on the dry cargo market, supported by fixtures made by the U.S. Military Sealift Command (MSC), brokers said.

The Baltic International Freight Futures Exchange (BIFFEX)'s Baltic Freight Index finished the week up fourteen points at 1,312.

US Military Sealift Command chartering was the dominant activity on the market. Prospects were also improved by the decision of the U.K. Ministry of Defence to increase its presence in the Gulf. Brokers estimate that this may lead to a further thirty charters on top of the 26 made this week.

Support also came from the announcement of an agreement for the sale of 1.1 million tons of wheat and barley from France to the USSR.

Against this, the absence of an anticipated agreement between the United States and the USSR on the supply of U.S. grain to the USSR had a negative influence.

On the physical market, 52,000 ton vessels obtained 23.50 dollars per ton against 23.00 dollars the previous week, for grain trips on the US Gulf to Japan route. Brokers as a result increased the nominal rate for that route to 23.917 dollars per ton from 23.642 at the end of the previous week.

Nominal rates on the US Gulf to Northern Europe grain rate rose from 12.683 dollars per ton to 12.858 dollars, reflecting a fixture made on the physical market at 13.30 dollars per ton against 12.00 dollars two weeks previously, for a trip from the U.S. Gulf to Rotterdam.

Rates in the coal sector also improved. On the Queensland to Rotterdam route nominal rates progressed from 9.992 dollars to 10.292 dollars per ton.

But the ore sector eased slightly, with brokers reducing nominal rates on the Monrovia to Rotterdam route from 5,383 dollars to 5.375 dollars per ton.

Timecharter rates firmed on a round trip between Japan and Western Australia for 50-70,000 ton vessels to 9,000 dollars per day against 8,500 dollars previously.

#90330d7160 11/26/1990 ~French/German News Agency
BAGHDAD (NOV. 26) - Muhammad Ali, the former world heavyweight boxing champion, has backed President Saddam Hussein's call for an overall solution to the Middle East's problems, an Iraqi official newspaper reported Monday.

The president's call, in an initiative announced August 12, was "founded on justice and peace," Ath-Thawra cited Mr. Ali as saying in an interview.

The three-times world champion, who arrived here November 21 on a peace mission, also condemned the trade embargo against Iraq and the multinational troop deployment in the Gulf since the August 2 Iraqi invasion of Kuwait.

Mr. Ali, a convert to Islam in 1964 who was formerly called Cassius Clay, last Thursday spent Thanksgiving Day with U.S. hostages detained in Iraq.

Quoted by the Iraqi News Agency, he has said he was visiting Iraq as an "apostle of peace to mark the solidarity of Moslems in the United States with the Iraqi people, who are the object of a ferocious and aggressive campaign."

#90330d7220 11/26/1990 ~French/German News Agency
BANGKOK (NOV. 26) - Cambodian Prime Minister Hun Sen warned in a speech broadcast Monday that a planned international conference to end Cambodia's civil war would collapse if his adversaries insisted on the dismantling of his government.

But an aide to Prince Norodom Sihanouk urged world powers to ignore the threat which he called a maneuver by Hanoi and its protege Phnom Penh to avoid a confrontation with the five permanent members of the United Nations Security Council, in particular their ally the Soviet Union.

The five -- Britain, China, France, the Soviet Union and the United States -- agreed along with Indonesia at a just-ended meeting in Paris on the final draft of a peace settlement to end Cambodia's 12-year-old war.

The agreement meant the Paris international conference on Cambodia, which broke up in disarray last year with the warring factions quarrelling over power-sharing, could now be reconvened, probably before the end of the year, diplomats in the French capital said.

But, in a forceful speech Saturday broadcast Monday by Phnom Penh radio monitored here, Mr. Hun Sen said the 19-country conference would ''fail 99.99 per cent'' if the guerrilla aliance demanded his government's dismantling.

He also told a rally in the northwestern Cambodian city of Battambang that his government had made its stand clear to conference organisers shortly before

the ''Perm Five'' meeting in Paris.

In a related development, the Khmer Rouge, the most powerful of the three guerrilla armies fighting Phnom Penh, threatened Monday to launch a major offensive if the Paris conference failed to end the war.

Khmer Rouge sources told reporters at Aranyaprathet, on the Thai-Cambodian border, that their 519th division was preparing to attack Cambodia's northern provincial capital of Siem Reap, next to the famed ancient Angkor temple.

#90330d7250 11/26/1990 ~French/German News Agency

ISLAMABAD, (NOV 26) - Libya would support Iraq if a war broke out in the Gulf Tripoli's Ambassador to Pakistan Ibrahim Aljerbi said here Monday.

"All progressive countries should join Iraq against America," Mr. Aljerbi told a press conference.

"We feel that the presence of U.S. forces in the Gulf area has further complicated the Gulf situation," he said, adding: "The Gulf crisis is an Arab problem and can be solved without foreign interference."

He said he was still "still optimistic" of the chances for a peaceful resolution to the nearly four-month-old conflict.

But he said a U.N. Security Council meeting planned this week should be held in Geneva instead of New York and that Arab countries should be allowed to attend.

Mr. Aljerbi also said that if the United Nations authorizes the use of force in the Gulf, as Washington wants, it would constitute a "negation of the U.N charter."

#90330d7410 11/26/1990 ~French/German News Agency

JERUSALEM (NOV. 26) - An attack near Israel's border with Egypt that left four people dead has raised new concerns that Islamic fundamentalism among Israel's Arab neighbours represents a growing threat to its national security.

Prime Minister Yitzhak Shamir blamed "fanatics" for the attack Sunday near the Red Sea port of Eilat, when an Egyptian border guard opened fire on an Israeli civilian bus and four military vehicles.

The Israeli security service later found the inscription Allah, the Arabic word for God, on his cartridge belt.

"In Egypt, Syria and Jordan there is fanatical and extremist propaganda that sows hatred against us and there are people who take it upon themselves to lead this propaganda," the prime minister said.

Foreign Minister David Levy also condemned what he called "fanatics in Egypt whose sole objective is to point their arms at Israelis."

Israeli newspapers Monday echoed the mounting concern over the rise of fundamentalism among Arab countries, especially Egypt which signed a peace treaty with Israel in 1979.

"In south Lebanon, a Moslem, shouting Allah Akbar (God is great) and packed with explosives, rushes at Jewish soldiers to meet her death, while at the same time a fanatic assassinates Israeli soldiers and civilians," Yedioth Aharonoth said.

The military commentator of Haaretz newspaper, Zeev Schiff, said the attack near Eilat proved that "fundamentalists have deeply infiltrated the Egyptian security forces."

"As for the attacks against Israel launched from southern Lebanon and Jordan, they show the growing influence of the fundamentalist elements in the two countries," Mr. Schiff wrote.

Jordanian fundamentalists have twice this month crossed the cease-fire line with Israel and killed two Israeli soldiers.

King Hussein of Jordan "appears to be losing control of his army because of the rise of Islamic elements in his country," according to Israel's Defence Minister Moshe Arens.

In south Lebanon, Israeli forces are poised for an escalation in anti-Israeli attacks following the recent redeployment from Beirut of fighters of the Shiite fundamentalist group Hezbollah.

A Lebanese woman on Sunday blew herself up near an Israeli army patrol in southern Lebanon, wounding two soldiers.

LONDON (NOV. 26) - The North Atlantic Assembly, parliamentary group of the North Atlantic Treaty Organisation (Nato), met in committees here Monday in preparation for the opening on Wednesday of a full session.

On the agenda will be political changes in Europe following the reunification of Germany, the role of Nato in creating new European security structures, and the effects of the Gulf crisis on European security.

For the first time, the assembly is attended by parliamentary deputies from the newly democratic eastern European states, Czechoslovakia, Hungary, Poland and the Soviet Union, in addition to parliamentarians from the 16 Nato countries.

The North Atlantic Assembly, Nato's ''parliamentary branch'', meets twice a year for discussions between North Americans and Europeans on problems confronting the Western alliance.

U.S. Secretary of State James Baker, who had been due to address the conference on Thursday, was prevented by developments in the Gulf crisis from attending.

#90330d7510 11/26/1990 ~French/German News Agency

BERLIN (NOV. 26) - Shell on Monday became the second oil major to announce a large investment programme in the former territory of East Germany, where the auto sector is booming.

Its German subsidiary, Deutsche Shell AG, said it was setting up a unit, Deutsche Shell Tankstellen GmbH, that would build a network of at least 300 petrol (U.S. gas) filling stations in eastern Germany.

On Wednesday, British Petroleum (BP) said it planned to build 250 filling stations in the east over the next five years, with the goal of taking 10 per cent of the local market.

Petrol sales in the former German Democratic Republic are currenty dominated by the former state monopoly, Minol, although the west German firm, Aral, is also expanding rapidly.

East Germans have bought hundreds of thousands of autos since the introduction of the Deutsche mark last July 1. But filling stations are rare outside the main towns, and there is also an ancillary need for accessories shops and car washes.

TOKYO (NOV. 26) - Japanese companies will be allowed to export medicines and medical equipment worth 240 million yen (1.9 million dollars) to Iraq, officials said Monday.

A government decision to this effect has been conveyed to the Iraqi government through the Japanese embassy in Baghdad, they said.

The medicines and equipment will be exported to Iraq "from a humanitarian point of view and on condition that they are not used for military purposes," the officials said.

The export of medical supplies to Iraq for humanitarian purposes is exempted from current United Nations sanctions.

Iraq had requested medical supplies when former Japanese prime minister Yasuhiro Nakasone visited Baghdad earlier this month, the officials said.

CAIRO (NOV. 26) - The Egyptian army has held its second night exercises since the beginning of November, Defense Minister General Youssef Sabri Abu Taleb said in press reports published Monday.

The maneuvers overnight Saturday included a night crossing of the Suez Canal and deployment of the Second Army's armored division in coordination with artillery and air defense units, he said.

The operation was designed to simulate maneuvers under adverse conditions such as air strikes, electronic jamming and the use of chemical weapons.

Gen. Abu Taleb said after the exercises that Egyptian forces had proved they had the means to conduct night maneuvers under all conditions and lauded the "high standard" of the participating units.

On November 4, Egyptian troops conducted important air maneuvers in the Wadi al-Natroun region between Cairo and Alexandria.

Egypt, a key Arab opponent of Iraq in the Gulf crisis, has contributed thousands of troops to the U.S.-led multinational forces in the Gulf since the August 2 invasion of Kuwait.

MANNHEIM, Germany (NOV. 26) - Europe's biggest sugar producer, Suedzucker AG, announced Monday it would take over around a third of the sugar-refining capacity of former East Germany.

An agreement would be signed Friday with the Treuhand, the government agency overseeing the privatisation of state assets, Suedzucker spokesman Rainer Duell said.

He declined to reveal the price, but said a "rationalisation plan" was part of the deal.

Forty-one East German factories produce 650,000 tons of sugar annually.

Suedzucker will take over refineries in Saxony and Thuringia, in the south of the country, the spokesman said.

It which already accounts for 40 percent of sales in former West Germany, the largest sugar market in Europe.

MOSCOW (NOV. 26) - The parliaments of the three Baltic republics which have proclaimed independence from Moscow will hold a special joint session Saturday in Vilnius, the Lithuanian capital, to discuss what they see as Moscow's threat to reassert control, the Baltic News Service reported here Monday.

The special session was called by Lithuania's President Vytautas Landsbergis, Latvia's President Anatolijs Gorbunovs and Estonia's President Arnold Ruutel who met last week near Riga, Latvia, to discuss the special powers being voted by parliament to President Mikhail Gorbachev.

Mr. Gorbachev is now empowered to impose direct presidential rule on any unruly republic.

Kazimieras Motieka, the deputy president of the Lithuanian parliament, told the news agency that the special session would be asked to adopt a number of political and economic documents, and approve the setting up of a common group for direct contacts with the Council of Nordic States, which regroups parliamentarians from Scandinavian countries.

JOHANNESBURG (NOV. 26) - A Bulgarian government delegation arrived here Sunday on a week-long visit to investigate joint ventures and possible trade agreements with South Africa, a spokeswoman for the group said Monday.

The seven-member delegation is headed by Bulgaria's Deputy Trade and Technology Minister Valentin Grosdanov and will hold a series of meetings with South African government officials and representatives of South African industry and commerce.

The spokeswoman for the hosts of the delegation said the Bulgarians were interested in trade agreements in mining, agriculture, computer technology, steel, sporting goods and tourism.

The delegation would also look at local chemical product manufacturing and

investigate potential trade in electrical goods and light industries, the spokeswoman added.

Bulgaria and South Africa tied diplomatic relations on November 22.

HAVANA (NOV. 26) - Cuba's council of state has removed Jose Ramon Fernandez as education minister and assigned him the task of organizing next year's Panamerican Games, the official Cuban news agency AIN reported Monday.

Mr. Fernandez, who will keep a seat in the council of ministers as one of 10 vice presidents, was replaced by Luis Ignacio Gomez, previously a university rector in the province of Las Villas, the news agency said.

AIN, while noting Mr. Fernandez' contributions, attributed his removal to the need "to move to a new stage."

Cuba is to host the Panamerican Games in Havana and Santiago de Cuba in August 1991. Mr. Fernandez is president of the organizing committee.

TOKYO (NOV. 26) - Japan's Ube Industries Ltd. and Marubeni Corp. said here Monday they have set up a company in Britain to produce plastic composites.

The London-based firm, European Technological Composites Ltd., is capitalized at two million pounds (four million dollars) with Ube putting up 70 per cent and Marubeni the rest, company officials said.

Ube is a major maker of chemicals, cement, machinery and industrial plants, while Marubeni is a leading general trading company.

Demand for plastic composites is expected to expand in Europe with more Japanese companies planning to begin operations there, the Ube and Marubeni officials said.

PRAGUE (NOV. 26) - The Czech Jewish community's leader Desider Galsky, 69, died at the weekend after a road accident near here.

He was first chosen to head the community council in 1968 but was a victim of the Soviet crushing of the Prague Spring in Czechoslovakia.

He returned to the post last November with the collapse of the communist regime, and accompanied President Vaclav Havel to Jerusalem in April after the restoration of diplomatic ties with Israel which were broken off in 1967.

The Czech Jewish community is officially registered at 2,700 people, but privately the community estimates there are about 5,000. Before World War II, there were 360,000 Jews in Czechoslovakia. After the Holocaust, there were 40,000.

#90330d7980 11/26/1990 ~French/German News Agency
PARIS (NOV. 26) - French Finance Minister Pierre Beregevoy on Monday repeated his call for an early meeting of the so-called G7 group of seven leading western industrialised countries.

He said: "We must meet so that our co-operation can make the monetary future clear for governments and companies."

He also said that the monetary committee of the International Monetary Fund (IMF) should be associated with the G7 talks.

"We must compare our views and give a signal to the markets," he said.

Mr. Beregevoy said that a G7 meeting was needed to assess the state of the U.S. economy, the situation on the oil market and the outlook for the European economy, given the "immense need for finance in the East".

CAIRO (NOV. 26) - The Egyptian assailant who shot dead four Israelis and wounded 23 in an attack Sunday near the Israeli border town of Eilat was believed to be Ayman Mohammad Hassan, police said.

Mr. Hassan was identified as a 22-year-old conscript to the Central Security, an armed force under the control of the Egyptian Interior Ministry. He comes from the Nile Delta governorate of Zagazig.

The Central Security acts as a civilian police force in charge of surveillance on the border with Israel -- a duty from which the army is barred under the terms of the 1979 Egyptian-Israeli peace treaty.

Police gave no indications on the motive for the attack, after which the assailant fled back into Egypt and was arrested.

#90330d8170 11/26/1990 ~French/German News Agency

BONN (NOV. 26) - More than 10,000 German civilians employed by the armed forces of six NATO countries held a two-hour strike Monday to demand job guarantees after allied troops are pulled out from Germany, their union said.

OeTV trade union, which represents workers in the public and transport sectors said the strikes were mainly called in the south and west of the country in a bid to force the employers to return to negotiations after talks broke down last Friday.

Around 1,400 demonstrated outside the headquarters of the French forces at Baden-Baden and another 1,500 demonstrated at a French base at Grafenwoehr, the union said.

Other protests were held at the U.S. bases of Ramstein and Miesau and at the U.S. military hospital of Landstuhl, it said.

A spokesman for the British Army of the Rhine said there had been a "token" stoppage by civilian personnel at the British base at Duesseldorf.

There were also stoppages at bases operated by the Dutch, Canadian and Belgian forces that are part of the North Atlantic Treaty Organisation's former front line in Germany, OeTV said.

Around 23,000 of the 100,000 civilians employed by the six foreign forces in western Germany face unemployment because of arms reductions, OeTV says.

It wants those facing redundancy to be offered similar employment elsewhere or be given compensation and retraining. It also wants an overall pay increase of nine per cent.

#90330d8210 11/26/1990 ~French/German News Agency

JERUSALEM (NOV. 26) - Israeli Premier Itzhak Shamir Monday said here the Egyptian government was not responsible for a bloody assault along the border with Egypt's Sinai peninsula the day before.

An Egyptian border policeman crossed the border into Israel Sunday and ambushed several civilian and military vehicules, killing three Israeli soldiers and a civilian and wounding 23 people near Israel's Red Sea port of Elat.

Shamir said ''extremist groups'' in Iraq and Jordan were responsible for the attack and had instigated Moslems to carry out such actions.

''Israel will not allow this to happen anymore,'' he added.

The Moslem fundamentalist Jihad (Holy War) group took responsibility for the attack in a statement issued in Jordan.

#90330d8260 11/26/1990 ~French/German News Agency

PARIS (NOV. 26) - France is giving the Kuwaiti government exiled in Saudi Arabia spare parts to make 15 Mirage fighter jets operational, according to an authoritative source who dismissed press reports that missiles were also on their way.

The French-built warplanes, flown out of Kuwait after the Iraqi invasion in August were getting new engines, undercarriage gear, tyres and small-calibre ammmunition, the source said. Deliveries began two weeks ago.

Reports that the French government was also sending Exocet and Hot missiles from Chateauroux in central France were not true, the source said, but added that this option was being considered. The Kuwaiti planes flew out of the emirate without their weapons.

The Nouvelle Republique de Tours newspaper on Monday disclosed that "aircraft engines, spare parts" and "Exocet and Hot missiles" were being flown to Saudi Arabia from Chateauroux aboard Lebanese freighter planes, publishing a photo of a Lebanese Trans Mediterranean Air Cargo System Boeing 707 at the airbase.

"Twenty-two (delivery) flights were counted last week and three times more than that are scheduled by the end of the month," the newspaper said, reporting that it had been tipped off to the operation by an anonymous telephone call on November 6.

The source here said the Kuwaiti planes could potentially be armed with the Mirage F1's usual weapons -- short-range Magic air-to-air missiles and Matra Super 530s with a range of 40 kilometres (25 miles) -- but a reliable source noted that the Saudi authorities had banned the jets from flying with weapons.

French President Francois Mitterrand confirmed on August 21 that exiled Kuwaiti forces had "French material", notably "Mirage F1s which will continue to be maintained".

The 15 jets apart, the Kuwaiti air force is known to have flown 12 Gazelle anti-tank helicopters, six Pumas and four Super-Pumas out of the country. Only the Super Pumas can handle Exocet 39 air-to-sea missiles for use against surface shipping, sources here said.

The newspaper in Tours claimed, citing military sources, that France and the exiled Kuwaiti rulers had done a deal for the delivery of 4,000 Hot anti-tank missiles, as part of a contract worth 180 million dollars.

The Chateauroux-Deols civilian airport, a former U.S. Air Force base which can handle heavy cargo planes, is about 60 kilometres (37 miles) from Bourges, where the Aerospatiale company makes missiles.

#90330d8290 11/26/1990 ~French/German News Agency

PARIS (NOV. 26) - Rebels operating in eastern Chad said Monday they had killed more than 2,000 government troops in weekend battles at Monou and in the Iriba-Tine region and had destroyed or captured a large amount of arms.

A communique issued by the Patriotic Salvation Movement of former army chief Idriss Deby said documents found in one captured vehicle showed that President Hissein Habre had been there personally commanding the government defences.

Rebel and other sources have for some days been reporting that Mr. Habre was in the east, preparing his troops for a major push against the rebels. Mr. Habre says the rebels are actively backed by Libya, which the latter deny, and that they are operating out of Sudan with the complicity of the Khartoum authorities.

Informed sources in the French capital confirmed that fighting was fierce and said the government side's position was worsening after two weeks of attack and counter-attack in the desert terrain of the border region with Sudan.

The rebels said 3,000 soldiers had rallied to their cause.

In Ndjamena, military high command said troops had retaken Iriba and Guereda lying 60 and 40 kilometres (36 and 24 miles) respectively from the Sudanese frontier. It said very heavy fighting was in progress all around Tine, which has reportedly changed hands several times in the past week.

#90330d8320 11/26/1990 ~French/German News Agency

TURIN, ITALY (NOV. 26) - The SNIA BPD group of the Fiat empire has bought the U.S. Nylon Corporation of America (NYCOA) company of New Hampshire which is the world's second biggest manufacturer of nylon-6 polymers, Fiat said here on Monday.

SNIA BPD is the leading European manufacturer of nylon-6.

NYCOA's sales for 1990 were estimated to total 23 million dollars, and SNIA

sales in polymers were expected to exceed 350 billion lire (304 million dollars) this year, Fiat said.

The U.S. market for polymers was estimated to be worth 2.6 billion dollars and to be growing at between five percent and 10 percent per year, Fiat said.

MANILA (NOV. 26) - Communist guerrillas killed 15 soldiers in the southern Philippines and burned down a military radio station in the north of the country, military officials said here Monday.

Meanwhile, Armed Forces chief Renato de Villa said natural calamities, economic crisis and military rebellions might mean the government's promise to crush the communist insurgency by 1992 cannot be kept.

Military sources said 15 troops and one guerrilla of the communist New People's Army (NPA) died in a clash in Bonauan, Agusan del Sur province on Mindinao island on Saturday.

-30- 771

#90330d8530 11/26/1990 ~French/German News Agency

ABIDJAN (NOV 26) - Ivory Coast's ruling Democratic Party (PDCI) won a crushing victory against the fledgling opposition in the country's first multi-party elections, according to results announced Monday by the interior ministry.

However the elections Sunday were marked by a high abstention rate of about 65 percent.

Final results gave the PDCI 163 of the 175 seats in parliament and the opposition 10. Nine of those went to the Ivorian Popular Front (FPI).

The only party to put up candidates in every constituency, the PDCI of newly reelected President Felix Houphouet-Boigny had been expected to sweep the polls against a divided opposition of 19 parties.

But with almost two-thirds of the electorate abstaining, according to provisional figures announced by the interior ministry, turnout appeared down on last month's presidential elections (69.16 percent) and the last general elections in 1985 (45.9 percent).

Observers said voters could have been put off by pre-election violence at the weekend or by the opposition's stinging defeat in the presidential elections.

Leading PDCI figures re-elected included 56-year-old economist Henri Konan

Bedie, speaker in the outgoing parliament and who is tipped to be speaker of the new assembly.

Under the constitution, amended last month, the speaker may step in to complete the president's term if the latter dies, resigns or is unable to fulfil his functions.

But according to the radio, former foreign minister Arsene Usher Assouan and former information minister Laurent Donna Fologo, who ran the president's election campaign, were both beaten. A number of outgoing PDCI MPs reportedly lost to younger candidates in their own party.

#90330d8550 11/26/1990 ~French/German News Agency

BRUSSELS (NOV. 26) - The European Community (EC) is still investigating a dumping complaint against NutraSweet, the U.S. company which produces the low-calorie sweetener aspartame, an EC source confirmed here Monday.

He would not comment on reports that the EC was about to impose stiff anti-dumping duties on the product, which had captured almost 80 per cent of the EC low-calorie sweetener market by 1989.

NutraSweet, subsidiary of the U.S. chemicals multinational Monsanto, has been accused of selling its product in the EC at prices below the cost of production.

Relations between the United States and the EC are particularly sensitive now because of U.S. attacks on EC farm subsidies ahead of next week's General Agreement on Tariffs and Trade (GATT) conference here.

In the latest move of a long-running series of trade disputes, the United States last week threatened to double duties on products including sparkling wines if the EC did not renew special quotas for U.S. grain exports to Spain.

Recently the EC banned most imports of U.S. pork and beef because of allegedly poor hygiene in U.S. abattoirs. Last year the EC banned U.S. beef treated with growth hormones, which sparked immediate U.S. retaliation.

#90330d8560 11/26/1990 ~French/German News Agency

Kathmandu (NOV. 26) - India is willing to buy all the excess hydro-electric power that Nepal can produce, Nepalese Prime Minister Krishna Prasad Bhattarai said here Monday.

He did not say whether New Delhi had dropped its old insistence on holding a share in the control of the project.

Nepal has a vast hydro-electric potential of 84,000 megawatts but less than three per cent has been exploited so far. International agencies had agreed to finance hydro-electric projects provided India agreed to buy excess energy.

Bhattarai conferred in New Delhi on Monday with Indian Premier Chandra Shekhar during a brief visit on his way home from the South Asian Association for Regional Cooperation summit conference in the Maldivian capital of Male.

Bhattarai said India had also agreed to simplify the procedure for the release of a 350-million Indian rupee loan to Nepal agreed during Bhattarai's visit to India last June.

CANBERRA (NOV. 26) - The Australian Labour government Monday said it was willing to join the United States in giving Iraq a deadline for getting out of Kuwait.

Foreign Minister Gareth Evans told parliament here Australia might also support the military option in the Gulf even if the United Nations were to withhold its approval.

Evans made only one condition: no use of nuclear weapons ''under any circumstances whatever''.

The United States is reported to be asking the U.N. Security Council to deliver an ultimatum to Iraq to withdraw from Kuwait by January 1, or face war. The U.S. has asked for a council meeting Thursday.

Three Australian warships with a crew of 650 are in the Gulf helping to maintain the U.N. sanctioned sea blockade of Iraq.

#90330d8630 11/26/1990 ~French/German News Agency

PARIS (NOV. 26) - Prices on the Paris bourse were hit hard on Monday by a sudden jump in oil prices, and the CAC-40 stock price index lost two percent in a depressed trading mood and low volume, operators said.

The index had opened with a good gain of 0.51 percent, but the good mood vanished as North Sea Brent crude oil for January delivery rose from 30.55 dollars a barrel Friday evening to 31.60 dollars early Monday afternoon because of the U.S. desire to give Iraq an ultimatum to leave Kuwait by January 1.

Oil prices went on up after announcement of an expected big drop in Soviet oil exports next year, and Brent went on up to 33.55 dollars a barrel.

The Eurotunnel subscription right plunged by 25.2 percent on the day, while the shares were off by 3.7 percent. Metrologie dropped by more than 10 percent on volume of 19,000 shares, after quotations on the issue were suspended in the morning.

Lafarge Coppee lost 4.1 percent on the day, LVMH 3.8, Havas three percent, and CGE 2.9 percent.

Salomon, Labinal and Nordon went against the tide, jumping by eight percent or more. A rise in gold prices helped mining issues Buffelsfontein, Harmony Gold and Freegold.

#90330d8700 11/26/1990 ~French/German News Agency

DHAHRAN, Saudi Arabia (NOV 26) - Young Kuwaitis in exile who have volunteered to fight Iraq are deeply frustrated at the slowness of moves to send them into battle.

Only 7,000 of up to 400,000 Kuwaitis who fled during and after the August 2 invasion of their country by Iraq have volunteered to join the remnants of the Kuwaiti armed forces.

And to date, only 1,200 have been given basic military training. A second batch of 600 passed out at a ceremony on Monday at the King Fahd military base in the desert near here attended by Kuwaiti defence Minister Sheik Nawaf Alahmed Al-Jaber.

The show was disciplined until he attempted a walk-about at the end of the ceremony.

The young volunteers mobbed the minister, brandishing their rifles, throwing their caps in the air and chanting: "By our life, by our blood, we will sacrifice ourselves for Kuwait."

Ahmed Al-Qabanedi, a 20-year-old first-year student in mechanical engineering at Kuwait University until he fled the country three weeks after the invasion, said: "I want to be in the front line. I will fight with my bare hands if necessary."

Ahmed Al-Dhafeeri, 22, a major in criminology from Marshall University, West Virginia, gave up further studies to volunteer.

He said he was ashamed that U.S. and other foreign soldiers might die in battle to free Kuwait before he was given a chance to fight. "I thank the U.S. people and the mothers and fathers of the casualties", he said.

Kuwaiti officials said they expected the fittest of the volunteers would be sent to join the regular army on the border near Hafer al Baten and the rest would be used in support. The first 600 were trained at a camp in the United Arab Emirates.

BRUSSELS (NOV 26) - The European Economic Community (EEC) and Namibia have agreed on the terms by which the newly-independent southern African nation will join the Lome Convention, the Community announced here Monday.

The convention gives the 68 countries of the African-Caribbean-Pacific group of developing nations a preferential right to export to the EEC. They also receive EEC aid in support of trade, including loans and technical help.

An EEC spokesman said Namibia would be given least-developed country status for at least five years, giving it maximum advantage under the current Lome IV convention.

He said that Namibia would be given a special quota to export 60,000 tons of beef and veal to the Community over the next five years, and that its exports of karakul skins would be included in the convention's price stabilisation scheme.

The details were worked out last week at a meeting between European Commission vice-president Manuel Marin and Trade and Industry Minister Ben Amathila.

#90330d8900 11/26/1990 ~French/German News Agency

KABUL (NOV 26) - Afghan President Najibullah said here Monday he was working on a new peace plan to end the 12-year-old civil war in his country.

Speaking at a press conference, Mr. Najibullah proposed Afghanistan be made a totally demilitarised zone backed with international guarantees and under United Nations supervision.

"If Europe can be moving towards a demilitarised continent, then Afghanistan can do the same," he said.

"All opposition representatives in Geneva agreed that the Afghan conflict must be solved through understanding and dialogues and all agreed to continue the dialogue," he added.

Mr. Najibullah also said he had received a set of proposals from exiled former Afghan king Zahir Shah, but declined to give further details.

Mr. Najibullah went to Geneva last week where he reportedly had talks with a number of Afghan intellectuals believed to be representing the former king, overthrown in 1973.

He also reportedly held talks with moderate leaders from the mujahedeen resistance fighting his Soviet-backed government.

The resistance, divided into several separate factions, is being supported by Pakistan, the United States and Iran.

The president declined to name those he met in Geneva as it could put the Afghan dignitaries involved at risk, he said.

"But if the president of a country himself undertakes such a journey, then the peace process has to be credible," he said.

BAMAKO (NOV 26) - Liberia's main rebel leader Charles Taylor arrived here Monday to attend a summit of West African leaders on Tuesday over ways to end the country's brutal 11-month civil war.

Mr. Taylor, who arrived aboard a Air Burkina jet from Ouagadougou packed with members of his delegation and about 40 armed guerillas, was met at the airport by Malian foreign minister N'Golo Traore.

But the National Patriotic Front of Liberia (NPFL) leader, wearing a suit and tie, was not given the fanfare and red-carpet reception accorded the heads of state who arrived earlier Monday for Tuesday's summit of the 16-nation Economic Community of West African States (ECOWAS).

The Malian honor guard abandoned their weapons, a military band stopped playing and government officials and diplomats gathered since the morning were told to stay away.

The rebel soldiers, some of them women, wore army fatigues and carried Soviet-made AK-47 assault rifles and hand grenades as they surrounded the vehicles carrying their their leaders before boarding three trucks.

Mr. Taylor, a former senior civil servant, told local journalists that he was glad to be in Bamako on the the invitation of "a great son of Africa," Malian President Moussa Traore.

"We hope that this opportunity will give the heads of state of this region the chance for the first time to voice their frank and earnest views about the plight of our people," he said, adding that many lives have been lost "in this unfortunate situation," he said.

Burkina Faso is among ECOWAS members which opposed the sending of a five-nation intervention force to Liberia. The 'ECOMOG' troops have driven Mr. Taylor's rebels out of the capital.

London (NOV. 26) - Two surgeons were stabbed to death Monday at a public hospital in Wakefield in Yorkshire, northwest England, police said.

The bodies of the two were found in adjoining rooms of the hospital's burn clinic.

Police sealed off the large hospital grounds in the middle of town and launched a hunt for the killer. The grounds house several hospitals including a psychiatric clinic.

BELGRADE (NOV. 26) - Nationalist parties appeared to be heading for election victory Monday in the Yugoslavian republic of Macedonia after unofficial results showed them having gained 36 seats.

It was the second time in two weeks that voters had cast their ballots in the republic's first free parliamentary elections since World War Ii.

According to the unofficial results, the communists have so far won 25 seats of the 120 seats. They were regarded as favourites in the contest. The final tally is expected later this week.

During the first ballot, held on November 11, only 13 candidates garnered the absolute majority needed for a seat in parliament. A simple majority suffices in this second round.

Meanwhile, the Socialist government of Yugoslavia's largest province, Serbia, has made concessions to the opposition aimed at persuading it not to boycott free polls planned for December 9.

The opposition will now be allowed to sit on a commission set up to oversee the ballot and is to be given more space in the state-run communist media.

It was not yet clear whether the measures would be enough to avert the boycott. An opposition call for roundtable talks and a postponement of the elections was rejected by the Serbian leadership.

LONDON (NOV. 26) - Base metal prices eased Monday on the London Metal Exchange (LME), with lead falling to a 21-month low, as concerns regarding the impact of the economic slowdown in Western Europe and the United States grew, dealers said.

The announcement Friday that automobile firms General Motors, Ford and Chrysler were to stop production in a further 14 plants in the United States was further evidence of a gathering recession, which is likely to seriously affect base metal demand.

Three-month lead continued its recent downward trend, being quoted at a 21-month low of 346 pounds per ton on the kerb, compared to the afternoon ring close at 350 pounds per ton and the close Friday at 353 per ton.

Nickel recovered slightly on the kerb to 7,950 dollars per ton, against 7,900 dollars at the end of the afternoon ring and 7,975 per ton at the close Friday. The metal had earlier fallen to a nine-month low of 7,810 dollars in the morning ring.

Tin eased on anticipation of an LME stock increase, when the latest data are published Tuesday, being quoted at 6,036 dollars per ton on the kerb against 6,050 dollars per ton on the afternoon ring and 6,090 dollars at the close Friday.

Three-month copper, the only metal to show a slight improvement on the day, was quoted in after-hours kerb trading at 1,318 pounds per ton, marginally up on 1,316 pounds in the afternoon ring and 1,314 pounds at the close Friday.

LUXEMBOURG (NOV 26) - The European Investment Bank, the European Economic Community's bank for project finance, is to lend 45 million pounds (84 million dollars) to improve water in southwest England, the bank said here Monday.

The money will go to ensure the safety of drinking water and improve the quality of bathing water and rivers, mainly along coastal areas.

The bank said this was part of a programme to improve water and sewage facilities, and sludge treatment to end dumping sludge at sea.

It has so far lent 385 million pounds (755 million dollars) for British water projects this year.

PARIS (NOV 26) - Chances have improved for settlement of a strike at Nice Airport that has paralyzed it for 11 days, union and employer sources said here on Monday.

They said this was a result of the signature of delegates from the Force Ouvriere and CFDT unions of an agreement with national carrier Air France to ask employees at Nice Airport to resume work on Tuesday, they said.

The CGT union, which also took part in the negotiating meeting at Air France's Paris headquarters, refused to sign the agreement.

The fate of the work stoppage depends on a general meeting of all Air France staff assigned to Nice called for Tuesday morning to approve or reject Monday's agreement. Air France said that in the meantime, it was maintaining its cancellation of all Nice flights until Tuesday noon. The content of the agreement was not revealed.

The conflict arose due to fears about employment at the announcement of the abolition of seven routes between Nice and foreign cities and of a re-organization of connections with Paris involving the Air Inter domestic airline.

The union delegates from Nice attending the Paris meeting on Monday had come up to the capital by train.

PANAMA CITY (NOV. 26) - The U.S. Army announced Monday it would pull all its military police staff assigned to joint patrols with Panamanian authorities before the end of December.

The withdrawal comes as a result of an agreement with Panamanian President Guillermo Endara, said Colonel James Steele, Chief of the U.S. Military Support Group here. The group was created after the December 20, 1989 military invasion by U.S. troops.

The U.S. Southern Command based here refused to reveal the number of U.S. military police still on duty in Panama.

Some 26,000 U.S. troops were involved in last December's invasion of Panama leading to the toppling of the regime of General Manuel Antonio Noriega whose regime was replaced by the coalition led by Mr. Endara.

The United States maintains 14 military bases and about 12,000 troops in Panama's Canal zone, which is set to revert to Panamanian sovereignty at the turn of the century.

Domestic opposition groups raised concerns recently about some 25 U.S. military specialists now working on intelligence matters and with Panamanian police.

LONDON (NOV 26) - British writer Salman Rushdie travelled to a North London television studio to be interviewed Monday in his first outing since going into hiding more than 18 months ago.

Rushdie wanted to appear personally and turned down the opportunity to record the interview at a secure location, said a spokesman for the British Broadcasting Corporation Bbc.

The Indian-born author, whose life is still threatened by radical Moslems outraged at his allegedly-blasphemous 1989 novel The Satanic Verses, told viewers Monday evening: ''I want to slowly begin to pinch back bits of my life.''

Rushdie said it was time to cool the heated discussion over The Satanic Verses adding: ''That involves talking to Moslem leaders to try and find common ground and it seems to me that there is a lot of common ground but the point is to make it more solid.''

''Far from an incitement to religious hatred it is a religious book and it is engaged with religion,'' said Rushdie who was ''sentenced to death'' by the late Iranian revolutionary leader Ayatollah Ruhollah Khomeini in 1989 following the publication of the novel.

#90330e0002 11/26/1990 ~Latin America New Agency

BUENOS AIRES (NOV. 26) EFE - Argentine President Carlos Menem Monday is to sign a decree slashing 122,000 jobs from the country's bloated public sector over the next three years.

Economy Minister Antonio Erman Gonzalez and Education Minister Antonio Salonia said the drastic cuts would help transform inefficient state agencies and save dlrs 1.4 billion.

Government officials said they were confident the unemployed would be quickly absorbed into the private sector, and Erman Gonzalez said workers left jobless would be given several options to remedy their situation.

He said they may receive indemnization payments for 10 or 12 months while looking for another job, transfer to other state enterprises or retire.

Presidential aide Raul Granillo Ocampo said the government would prevent people from holding more than one state job by setting the same working hours for all state agencies.

But the head of the Confederation of Education Workers, Mary Sanchez, said job losses in her sector "would mean neglecting the educational system".

Salonia said the government would likely set a percentage of reductions for administrative personnel, professors and teachers.

MANILA (NOV. 26) EFE - Philippine authorities put many areas of the country on maximum alert Monday as southern and central islands were threatened by another major typhoon.

Weather forecasters said Typhoon Page was fast approaching the island archipelago where hundreds of people were killed two weeks ago by Typhoon Mike.

The capital, Manila, is among the regions where warnings have gone out to citizens to prepare for 205 kph winds in the next two days.

Civil Defense forces Monday said the official death toll from Typhoon Mike was now 436 while another 141 were still missing, presumed dead.

With more than 600,000 homes destroyed or damaged by Typhoon Mike's 250 kph winds and torrential rains, repair costs have been estimated at dlrs 328 million.

#90330e0026 11/26/1990 ~Latin America New Agency

Madrid (NOV. 26) EFE - As foreign investment climbed during October, Spain's current account deficit was 22 percent down on the same month last year, despite renewed growth in the trade deficit, the Bank of Spain reported Monday.

The current account deficit for October was 141 billion pesetas (dlrs 1.4 billion).

Foreign investment for the month was up 35 percent on October 1989, reaching dlrs 1.97 billion.

The trade deficit in October 1990 reached dlrs 3.35 billion, seven per cent higher than in October 1989, and halting a downward trend of recent months.

In January to October 1990, Spain posted a trade deficit of dlrs 24 billion,

three per cent higher than during the same period last year.

Net tourism income for the first 10 months of 1990 was dlrs 11.9 billion, a rise of 16 percent over the same period in 1989.

Despite an October increase, foreign investment of dlrs 15.2 billion for the first 10 months of the year was down some nine per cent on the same period last year, during which Spain received dlrs 16.7 billion.

The surplus in long-term capital flows during October was roughly equal at dlrs 1.82 billionto levels during the same month last year.

But during the first 10 months of 1990, the surplus was down 19 percent on the same period last year.

The decline was the result of an increase in Spanish investment and lending abroad, the bank said.

Spanish Customs figures also released Monday show October imports up 8.6 percent on the same month last year, with the month's exports down 8.8 percent on October 1989.

SKOPJE, YUGOSLAVIA (NOV. 27) - Nationalists in the Yugoslav republic of Macedonia were ahead of the ruling Communist party following the weekend's second round of parliamentary elections, partial official results showed.

The nationalist Macedonian Revolutionary Organization of the Interior (VMRO) have gained 31 seats out of the 81 seats ajudicated so far for the 120-member regional parliament, according to official results Monday.

The results showed the Communists have gained 21.

The mainly ethnic-Albanian Party of Prosperity was running third with 13 seats followed by the Union of Reformist Forces of Prime Minister Ante Markovic which won eight seats in the second ballot Sunday.

Eight seats went to minority parties.

Results for six of the 39 seats still to be decided are expected to be known

Tuesday while a second round of voting is to be held in the remaining 33 constituencies where the first ballot on November 11 was anulled because of voting irregularities.

VMRO leader Ljupco Georgievski has called for the union of Macedonians in Yugoslav with those of Bulgaria and northern Greece.

The VMRO has also called for the banning of the Party of Prosperity claiming it is an organization composed of ethnic Albanians who previously invaded Macedonia.

Yugoslavia's uneasy transition to democracy after more than 40 years of one-party rule under the Communists has unleashed nationalist tensions that threaten to tear the six-republic federation apart.

Communists were swept from power in recent polls in the republics of Croatia, Slovenia and Bosnia.

Serbia, the largest and populous of the six republics, and Montenegro, have yet to go to the polls.

TOKYO (NOV. 26) XINHUA - JAPAN'S NATIONAL POLICE AGENCY (NPA) IS STUDYING NEW LAWS AT CRACKING DOWN ON GROWING UNDERGROUND CRIME SYNDICATES IN THE COUNTRY, ACCORDING TO A LOCAL NEWSPAPER REPORT.

THE NPA HOPES TO CREATE THE NEW LEGISLATION IN TWO TO THREE YEARS. IT WILL FORMALLY SET UP A TEAM OF LEGAL EXPERTS ON THURSDAY AS PART OF EFFORTS FOR THE LEGISLATION, POLICE OFFICIALS WERE QUOTED AS SAYING.

THE NEW LAWS WILL CUT SYNDICATES' SOURCES OF MONEY AND STRENGTHEN GUN CONTROL.

AN ESTIMATED 1.3 TRILLION YEN WAS GAINED BY THE NATION'S 87,000 GANGSTERS LAST YEAR, THE OFFICIALS SAID, ADDING THAT ABOUT 80 PERCENT WAS MADE IN ILLEGAL ACTIVITIES LIKE SALES OF STIMULANT DRUGS.

THE NEW LEGISLATION WOULD SPECIFICALLY ADDRESS THE CONTROL OF REMAINING INCOME. IT WOULD ALSO MAKE IT EASIER TO BAN THE USE OF SYNDICATES' OFFICES AND TO CONFISCATE HANDGUNS SO AS TO PREVENT RIVALRY STRUGGLES, THE OFFICIALS SAID.

STRUGGLES BETWEEN RIVAL GANGS HAVE RESULTED IN A SERIES OF SHOOTING INCIDENTS IN OKINAWA AND OTHER PREFECTURES RECENTLY.

IN OKINAWA ONLY, SIX PEOPLE, INCLUDING TWO POLICEMEN HAVE BEEN SHOT DEAD IN 29 SHOOTING INCIDENTS SINCE SEPTEMBER. ENDITEM 26/11/90 13:49 GMT

MANILA (NOV. 26) XINHUA - THE PHILIPPINES' CRUDE OIL IMPORT BILL SHOT UP TO 1.24 BILLION U.S. DOLLARS IN THE FIRST NINE MONTHS OF THIS YEAR, UP 27 PERCENT ON THE FIGURE FOR THE SAME 1989 PERIOD, ACCORDING TO A REPORT RELEASED BY THE OFFICE OF ENERGY AFFAIRS (OEA) HERE TODAY.

THE RISE WAS DUE TO "THE TREMENDOUS INCREASE IN CRUDE OIL PRICES IN THE WORLD MARKET AS A RESULT OF THE MOUNTING TENSION IN THE PERSIAN GULF," THE OEA REPORT SAID.

THE BILL, HOWEVER, EXCLUDED THE SALES TO THE U.S. MILITARY BASES WHICH AMOUNTED TO 3.4 MILLION U.S. DOLLARS.

THE OEA NOTED THAT IN SEPTEMBER THIS YEAR ALONE, THE AVERAGE PRICE OF IMPORTED CRUDE OIL SHOT UP TO 28.69 U.S. DOLLARS A BARREL, 9.05 U.S. DOLLARS MORE THAN IN AUGUST THIS YEAR, AND 12.67 U.S. DOLLARS MORE THAN IN SEPTEMBER 1989.

THE PHILIPPINES NOW CONSUMES A DAILY AVERAGE OF 24,000 BARRELS, COSTING SOME 225 MILLION U.S. DOLLARS A MONTH, ACCORDING TO THE COUNTRY'S CENTRAL BANK GOVERNOR JOEY CUISIA.

THE COUNTRY STILL HAS A GROSS FOREIGN EXCHANGE RESERVE OF 1.9 BILLION U.S. DOLLARS, THE GOVERNOR SAID YESTERDAY.

MEXICO CITY (NOV. 26) XINHUA - A GOVERNMENT DELEGATION OF AGRICULTURE FROM CHINA, HEADED BY STATE CONSELLOR CHEN JUNSHENG ARRIVED HERE SUNDAY FOR A FIVE-DAY OFFICIAL VISIT.

UPON HIS ARRIVAL IN MEXICO CITY, CHEN, WHO IS IN CHARGE OF AGRICULTURAL, LIVESTOCK AND FISHING AFFAIRS, HELD A BRIEF PRESS CONFERENCE IN THE AIRPORT'S VIPS SALON.

ASKED ABOUT THE GOALS OF HIS VISIT, CHEN ANSWERED THAT THE CHINESE DELEGATION WANTED TO SURVEY THE POSSIBILITY OF ESTA- BLISHING BILATERAL COOPERATION IN THE FIELDS OF AGRICULTURE, LIVESTOCK AND FISHING AND TO STRENGTHEN EXISTING COOPERATION TIES BETWEEN CHINA AND MEXICO.

HE ADDED THAT THE GOOD AND FRIENDLY RELATIONS BETWEEN THE TWO COUNTRIES WERE ENHANCED BY CHINESE PRESIDENT YANG SHANGKUN'S VISIT TO MEXICO IN MAY AND DURING THE MEETING HE HELD WITH PRESIDENT CARLOS SALINAS DE GORTARI.

HE STRESSED THAT YANG'S VISIT OPENED A NEW ERA IN THE HISTORY OF CHINESE-MEXICAN RELATIONS AND THAT HIS VISIT WOULD FURTHER IMPROVE THEM.

CHEN ALSO SAID THAT THERE ARE MANY FIELDS OF COOPERATION BETWEEN THE TWO COUNTRIES WHICH WILL BE STUDIED DURING THE TALKS HE WILL HOLD WITH HIS MEXICAN COUNTERPARTS.

DURING ITS STAY IN MEXICO, THE DELEGATION WILL HOLD MEETINGS WITH AGRICULTURE SPECIALISTS AND THEY WILL VISIT THE INTER- NATIONAL CENTER FOR THE IMPROVEMENT OF CORN AND WHEAT, AMONG OTHERS.

THE MEXICAN FOREIGN AFFAIRS MINISTRY SAID IN A COMMUNIQUE THAT THIS WAS THE HIGHEST LEVEL VISIT SINCE THE CHINESE PRESIDENT'S TRIP TO MEXICO LAST MAY, STRESSING THE EXCELLENT STATE OF THE MEXICO-CHINA RELATIONS WHICH WERE ESTABLISHED IN 1972.

BUENOS AIRES (NOV. 26) XINHUA - ARGENTINIAN FOREIGN MINISTER DOMINGO CAVALLO SAID TODAY THAT THE FISHING ACCORD BETWEEN HIS COUNTRY AND BRITAIN WILL BE RELEASED.

THE STATEMENTS WERE MADE BY CAVALLO THIS MORNING AFTER HE INAUGURATED THE FIRST MEETING ON A REGIONAL COMMON MARKET IN THE PREMISES OF THE NATIONAL BANK.

ARGENTINA AND GREAT BRITAIN HAVE REACHED "A PRELIMINARY ACCORD" ON FISHING IN THE SOUTH ATLANTIC THAT WILL END THE MOST SERIOUS CONTROVERSY BETWEEN THE TWO COUNTRIES SINCE THEY RENEWED THEIR DIPLOMATIC TIES AT THE BEGINNING OF THE YEAR.

THE TWO COUNTRIES ENDED THEIR THIRD ROUND OF BILATERAL RE- LATIONS ON FISHING LAST SATURDAY IN MADRID.

AUTHORIZED SOURCES REPORTED THAT IN THE LAST TWO-DAY NEGOTIATIONS IN MADRID, ARGENTINA AND GREAT BRITAIN HAD AGREED TO PROHIBIT FISHING WITHIN A 50-MILE AREA AROUND THE MALVINAS ISLANDS CONSERVATION AND MANAGEMENT ZONE THAT HAD BEEN UNI- LATERALLY SET AT 150 MILES IN 1986 BY GREAT BRITAIN.

THE PRELIMINARY FISHING ACCORD IN THE MALVINAS ISLANDS ZONE THAT IS BEING STUDIED BY THE TWO GOVERNMENTS WAS REACHED FOLLOWING INTENSE PRESSURE BY THE LOCAL POPULATION WHO WISHED TO EXTEND THE FISHING PROHIBITION AREA TO 200 MILES.

HONG KONG (NOV. 26) XINHUA - INDONESIA'S CACAO BEAN EXPORTS ARE PROJECTED TO

INCREASE FROM 76,000 TONS LAST YEAR TO ABOUT 100,000 TONS THIS YEAR, THE "JAKARTA POST" REPORTED TODAY, QUOTING AN EXECUTIVE OF THE INDONESIAN CACAO ASSOCIATION.

EXECUTIVE DIRECTOR OF THE ASSOCIATION P.S. SISWOPUTRANTO SAID IN A WRITTEN ADDRESS READ OUT AT A CACAO BEAN EXPORT TRAINING COURSE IN LAMPUNG LATE LAST WEEK THAT EXPORTS OF THE COMMODITY WERE EXPECTED TO CONTINUE INCREASING TO ABOUT 150,000 TONS IN 1995 AND 250,000 TONS IN THE YEAR 2000.

THE TRAINING COURSE, ATTENDED BY 40 PARTICIPANTS, IS AIMED AT SEARCHING FOR A SOLUTION TO THE MARKETING OF THE CACAO BEAN PRODUCTION IN BENGKULU AND LAMPUNG TWO OF THE COUNTRY'S CENTERS FOR THE COMMODITY.

ACCORDING TO DATA FROM THE INDONESIAN AGRICULTURE MINISTRY, CACAO PLANTATIONS IN INDONESIA, WHICH COVERED OVER 150,000 HECTARES IN 1989, WOULD EXPAND TO ABOUT 300,000 HECTARES IN 1994, THE LAST YEAR OF THE CURRENT FIFTH FIVE-YEAR DEVELOPMENT PLAN PERIOD (1990-95).

THE DATA SHOW THAT THE TOTAL CACAO BEAN PRODUCTION IN THE COUNTRY WAS ESTIMATED AT SOME 135,000 TONS IN 1994, UP FROM ONLY 95,000 TONS IN 1989.

THE WORLD'S CACAO BEAN STOCKS WERE CURRENTLY ESTIMATED AT ABOUT 1.4 MILLION TONS, THE PAPER SAID.

CAR ENGINE ASSEMBLY PLANT.

OPEING THE PLANT, MUZENDA SAID ZIMBABWE'S MOTOR INDUSTRY HAD UNDERGONE TRAUMATIC EXPERIENCES SINCE 1982 AND THE SITUATION HAD NOT IMPROVED SO FAR.

HE SAID HIS GOVERNMENT HAD MOUNTED A PROGRAM TO STIMULATE LOCAL MANUFACTURE OF VEHICLES AND COMPONENTS AND ENABLE LOCAL METALLURGICAL INDUSTRIES TO SURVIVE.

THE ASSEMBLY LINE IS A JOINT VENTURE BETWEEN THE VILLOWVALE MOTOR INDUSTRIES, A GOVERNMENT-CONTROLLED LOCAL COMPANY, AND THE MAZDA CORPORATION OF JAPAN.

THE PLANT WILL START THE ASSEMBLY OF PETROL ENGINES FOR MAZDA 323S AND F1300S IN FEBRUARY.

SINGAPORE (NOV. 26) KYODO - EXCEPT FOR THE EUROPEAN COMMUNITY, SINGAPORE'S EXPORTS TO ITS LARGEST MARKETS, THE UNITED STATES, JAPAN AND MALAYSIA, SLUMPED IN SEPTEMBER, ACCORDING TOTHE TRADE DEVELOPMENT BOARD.

NONOIL EXPORTS OF SINGAPORE-MADE GOODS TO THE UNITED STATES DECLINED 10.1

PERCENT TO 1.4 BILLION SINGAPORE DOLLARS (824 MILLION U.S. DOLLARS) COMPARED WITH THE SAME MONTH LAST YEAR.

THE BOARD ATTRIBUTED THIS TO A SLOWDOWN IN THE EXPORTS OF COMPUTERS, RADIOS, VIDEO CASSETTE RECORDERS, WOVEN CLOTHING FOR MEN, AND HOUSEHOLD ELECTRICAL APPLIANCES.

HAMPERED BY SLACKENING DEMAND FOR RADIOS, COMPUTERS, AND FURNITURE, NONOIL DOMESTIC EXPORTS TO JAPAN DIPPED 10.7 PERCENT TO 226 MILLION SINGAPORE DOLLARS.

NONOIL EXPORTS TO MALAYSIA PLUNGED 29.8 PERCENT TO 207 MILLION SINGAPORE DOLLARS BECAUSE OF LESS DEMAND FOR ELECTRONIC VALVES, TELECOMMUNICATION EQUIPMENT, AND ELECTRICAL CIRCUIT APPARATUS.

BUT NONOIL EXPORTS TO THE EUROPEAN COMMUNITY ROSE 15.4 PERCENT TO 869 MILLION SINGAPORE DOLLARS, HELPED BY MORE EXPORTS OF COMPUTERS, VIDEO CASSETTE RECORDERS, AND PARTS FOR OFFICE AND DATA PROCESSING MACHINES.

THE BOARD SAID THE REPUBLIC'S TOTAL EXPORTS FOR SEPTEMBER, INCLUDING OIL AND NONOIL EXPORTS AND REEXPORTS, INCREASED 2.7 PERCENT TO 8 BILLION SINGAPORE DOLLARS.

IMPORTS ALSO INCREASED 3.1 PERCENT TO 8.7 BILLION SINGAPORE DOLLARS, BRINGING TOTAL TRADE TO 16.7 BILLION SINGAPORE DOLLARS.

#90330k0021 11/26/1990 ~Japanese News Agency

JAKARTA (NOV. 26) KYODO - THE BIGGEST AUTOMAKER IN INDONESIA PLANS TO FORM A PARTNERSHIP WITH DAIHATSU MOTOR CO. OF JAPAN TO PRODUCE AND MARKET AUTO VEHICLES IN THE COUNTRY, THE HEAD OF THE INDONESIAN COMPANY SAID MONDAY.

T.P. RACHMAT, CHAIRMAN OF PT NATIONAL ASTRA MOTOR, SAID THE PLANNED TIE-UP WILL HANDLE EVERY PROCESS OF AUTO PRODUCTION AND SALES.

APPARENTLY EYING THE RAPIDLY EXPANDING AUTO MARKET THERE, DAIHATSU HAS BEEN POSITIVE ABOUT THE PROJECT, SAYING THAT SUCH A LINK-UP WILL BE BENEFICIAL TO THE COMPANY AS WELL.

OSAKA-BASED DAIHATSU IN THE TOYOTA MOTOR GROUP HAS SO FAR BEEN IN ALLIANCE WITH ASTRA MOTOR IN PRODUCTION OF AUTO PARTS AND ENGINES BUT HAS ENTRUSTED ASSEMBLING AND SALES JOBS FOR ITS PRODUCTS TO THE INDONESIAN FIRM.

THOUGH THE DETAILS HAVE YET TO BE DECIDED, THE PLANNED JOINT VENTURE WILL BE BASED ON A SIMILAR TIE-UP BETWEEN ASTRA AND TOYOTA MOTOR CORP., INDUSTRY SOURCES SAID.

OSAKA (NOV. 26) KYODO - TSUBAKIMOTO CHAIN CO., A MAJOR MANUFACTURER OF CHAINS AND CONVEYORS, SAID MONDAY IT HAS AGREED TO LICENSE AN ITALIAN COMPANY TO MANUFACTURE AND MARKET ITS INVENTION, THE AUTOTENSIONER.

THE DEVICE, WHICH TSUBAKIMOTO DEVELOPED IN 1985, MAINTAINS CORRECT TENSION ON A BELT CONNECTED TO A CAR'S CAMSHAFT.

THE OSAKA-BASED COMPANY SAID PIRRELLI TRANSMISSIONONI INDUSTRIALI WILL IMPORT THE PRODUCT FROM TSUBAKIMOTO FOR THREE YEARS BEFORE IT LAUNCHES PRODUCTION OF THE AUTOTENSIONER ON ITS OWN IN 1994.

PIRRELLI EXPECTS TO SELL 500,000 OF THE DEVICES IN 1993.

TOKYO (NOV. 26) KYODO - UBE INDUSTRIES LTD. AND MARUBENI CORP. JOINTLY ANNOUNCED MONDAY THAT THEY HAVE ESTABLISHED A FIRM IN BRITAIN THAT WILL MANUFACTURE AND SELL PLASTIC COMPOSITES.

THE NEW LONDON-BASED COMPANY, EUROPEAN TECHNOLOGICAL COMPOSITES LTD., IS CAPITALIZED AT 2 MILLION POUNDS WITH UBE PUTTING UP 70 PERCENT OF THE SUM AND MARUBENI THE REST.

OFFICIALS SAID DEMAND FOR THE MATERIAL IS SEEN TO GROW AS MANY OF ITS USERS, JAPANESE AUTOMAKERS AND OFFICE AUTOMATION EQUIPMENT MANUFACTURERS, ARE INCREASINGLY EXPANDING THEIR OPERATIONS IN EUROPE.

THIS IS THE SECOND SUCH FIRM ESTABLISHED OVERSEAS BY THE TWO COMPANIES FOLLOWING THE ONE SET UP IN THE UNITED STATES IN 1985. THE COMPANY EXPECTS TO COMPLETE CONSTRUCTION OF ITS PLANT AND BEGIN PRODUCTION BY AROUND APRIL 1992.

UBE IS A COMPREHENSIVE JAPANESE MANUFACTURER OF CHEMICALS, CEMENT, MACHINERY, AND INDUSTRIAL PLANTS AND IS NOTED FOR PRODUCTION OF CAPROLACTAM, THE RAW MATERIAL OF NYLON. MARUBENI IS JAPAN'S FOURTH LARGEST TRADING COMPANY.

TOKYO (NOV. 26) KYODO - NISSAN MOTOR CO. ANNOUNCED MONDAY IT HAS ACQUIRED AN EQUITY STAKE IN EACH OF TWO THAI AUTOMAKERS FOR THE EQUIVALENT OF 9 BILLION YEN WITH AN EYE TO EXPANDING BUSINESS OPPORTUNITIES IN THE COUNTRY'S GROWING MOTOR VEHICLE MARKET.

NISSAN BOUGHT 25 PERCENT OF SIAM MOTORS AND NISSAN CO. (SNA) FOR 6.7 BILLION YEN AND AS MUCH OF SIAM AUTOMOTIVE INDUSTRY CO. (SAI) FOR 2.3 BILLION YEN,

OFFICIALS SAID.

BOTH ARE SUBSIDIARIES OF SIAM MOTORS CO. (SMC). SNA PRODUCES NISSAN PASSENGER CARS AND SAI NISSAN COMMERCIAL VEHICLES.

OFFICIALS SAID NISSAN CURRENTLY HAS A 17.2 PERCENT SHARE OF THE THAI AUTOMOBILE MARKET AND PLANS TO INCREASE IT TO 25 PERCENT BY 1995.

SEOUL (NOV. 26) KYODO - JAPAN AND SOUTH KOREA AGREED TO EXPAND COOPERATION IN SCIENCE AND TECHNOLOGY IN TALKS MONDAY, THE FIRST DAY OF THE JAPAN-SOUTH KOREAN MINISTERIAL CONFERENCE, JAPANESE OFFICIALS SAID.

TOMOJI OSHIMA, DIRECTOR GENERAL OF JAPAN'S SCIENCE AND TECHNOLOGY AGENCY, MET WITH SOUTH KOREAN SCIENCE AND TECHNOLOGY MINISTER KIM JIN HYUN. THEY AGREED TO PROMOTE COOPERATION BETWEEN RESEARCH ORGANIZATIONS IN EACH NATION IN AVIATION, SPACE, LIFE SCIENCES, MARINE SCIENCE, AND NEW MATERIALS.

THE JAPAN-SOUTH KOREA NUCLEAR COOPERATION COUNCIL, WHICH HELD ITS FIRST MEETING HERE EARLIER THIS MONTH, WILL SERVE AS THE HUB OF A NUMBER OF JOINT NUCLEAR PROJECTS AGREED UPON BY THE MINISTERS, THE OFFICIALS SAID.

A TOTAL OF 22 JOINT RESEARCH PROJECTS WILL BE INITIATED NEXT YEAR, SOUTH KOREA'S YONHAP NEWS AGENCY REPORTED.

YONHAP ALSO REPORTED THAT A BASIC SCIENCE COOPERATION COMMITTEE, COMPRISED OF SOME 14 LEADING SCIENTISTS FROM EACH NATION, WILL BE SET UP IN DECEMBER TO DECIDE ON PROJECTS, ARRANGE SEMINARS, AND SET UP EXCHANGES OF RESEARCHERS. THE COMMITTEE WILL HAVE ANNUAL MEETINGS, ALTERNATING BETWEEN SEOUL AND TOKYO.

THE TWO MINISTERS AGREED TO CONTINUE THEIR EFFORTS IN PROMOTING SCIENTIFIC COOPERATION AT THE FOURTH JAPAN-SOUTH KOREA SCIENCE AND TECHONOLOGY COOPERATION COMMITTEE MEETING IN TOKYO IN DECEMBER, JAPANESE OFFICIALS SAID.

#90330k0068 11/26/1990 ~Japanese News Agency
BANGKOK (NOV. 26) KYODO - THAI FOREIGN MINISTER SUBIN PINKAYAN SAID MONDAY THAT THAILAND WOULD CHARGE VIETNAM A RENTAL FEE FOR THE LAND ON WHICH ITS EMBASSY IN BANGKOK IS BUILT.

SUBIN SAID THE OFFICIAL LAND DEPARTMENT HAD ALREADY COMPLETED THE NECESSARY LEGAL PROCEDURES IN ORDER TO CHARGE A RENTAL FEE TO THE VIETNAMESE EMBASSY, LOCATED IN A PRIME AREA OF THE THAI CAPITAL.

SUBIN SAID THE DECISION WAS MADE AS A CORRESPONDING MEASURE TO A PREVIOUS REQUEST BY THE VIETNAMESE GOVERNMENT TO CHARGE A MONTHLY RENTAL FEE FOR THE FORMER THAI EMBASSY IN HO CHI MINH CITY, WHICH THE THAI GOVERNMENT WOULD LIKE TO REACTIVATE AS A CONSULATE OFFICE.

THAILAND'S PLAN TO USE THE FORMER EMBASSY WAS DISCUSSED BETWEEN FORMER THAI FOREIGN MINISTER SIDDHI SAVETSILA AND HIS VIETNAMESE COUNTERPART NGUYEN CO THACH.

VIETNAM HAD RECENTLY INFORMED THAILAND THAT IT COULD NOT RECOGNIZE THE RIGHT OF LAND OWNERSHIP BY THE THAI GOVERNMENT TO THE FORMER EMBASSY PREMISES, WHICH THAILAND BOUGHT DURING THE FORMER GOVERNMENT OF SOUTH VIETNAM.

HOWEVER, VIETNAM WELCOMED THAILAND TO OPEN A CONSULATE OFFICE ON THE PREMISES ON CONDITION THAT IT PAY A MAINTENANCE FEE FOR THE PAST 15 YEARS AND A MONTHLY RENTAL FEE.

SUBIN SAID IF VIETNAM COULD RESCIND RECOGNITION OF THE THAI GOVERNMENT'S RIGHT TO THE PREMISES THEN THAILAND COULD NOT RECOGNIZE VIETNAM'S RIGHT TO THE PRESENT VIETNAMESE EMBASSY IN BANGKOK, WHICH WAS BOUGHT BY THE FORMER SOUTH VIETNAM GOVERNMENT.

HOWEVER, HE SAID, THE ISSUE NEEDED TO BE DISCUSSED FURTHER AT THE TECHNICAL LEVEL BETWEEN THE TWO SIDES, AND WOULD NOT RANK AS A POLICY LEVEL MATTER DURING THE COMING VISIT TO THAILAND BY VIETNAMESE PRIME MINISTER DO MUOI NEXT JANUARY.

SEOUL (NOV. 26) KYODO - TEN YEARS AFTER FORMER PRESIDENT CHUN DOO HWAN'S REGIME ABOLISHED SOME MEDIA OUTLETS AND FORCIBLY MERGED OTHERS, THERE HAS BEEN A FLURRY OF LAWSUITS SEEKING DAMAGES.

WITH THE 10-YEAR STATUE OF LIMITATIONS ABOUT TO RUN OUT, 21 LAWSUITS HAD BEEN FILED AS OF MONDAY.

MANY SOUTH KOREAN PUBLICATIONS WERE ABOLISHED OR MERGED WITH OTHERS, AND ALL PRIVATE BROADCASTING STATIONS MERGED INTO STATE-OWNED NETWORKS UNDER THE 1980 MEDIA PURGE LAW, LEAVING KOREA WITH ITS PRESENT TWO TELEVISION NETWORKS AND SINGLE NEWS AGENCY.

THE LAW ALSO LIMITED HOW MANY PAGES NEWSPAPERS COULD HAVE AND BARRED SEOUL PAPERS FROM STATIONING CORRESPONDENTS IN THE PROVINCES.

REPORTERS WHO LOST THEIR JOBS IN THE MEDIA PURGE ARE ALSO SUING THE GOVERNMENT AND MEDIA OUTLETS FOR COMPENSATION.

THE JOONGANG ILBO, AN INFLUENTIAL EVENING NEWSPAPER, FILED SUIT MONDAY AGAINST THE GOVERNMENT AND THE PUBLIC KOREAN BROADCASTING SYSTEM (KBS), DEMANDING 86 BILLION WON (120 MILLION DOLLARS) IN COMPENSATION AND THE RESTORATION OF ITS BROADCASTING AFFILIATE, WHICH WAS MERGED INTO KBS.

OTHER MAJOR MEDIA INSTITUTIONS HAVE ALSO FILED SIMILAR SUITS. DONG-A ILBO, ANOTHER MAJOR EVENING DAILY, IS DEMANDING THE RESTORATION OF ITS AFFILIATE RADIO NETWORK.

HANKOOK ILBO, A MAJOR MORNING DAILY, IS ASKING FOR 10 BILLION WON IN DAMAGES FOR THE CLOSURE OF ITS AFFILIATE SEOUL ECONOMIC DAILY. THE ECONOMIC DAILY RESUMED PUBLICATION IN 1988.

MANY NEWSPAPERS AND MAGAZINES HAVE BEEN SET UP SINCE PRESIDENT ROH TAE WOO CAME TO POWER IN 1988 AND LIFTED MOST PRESS RESTRICTIONS.

THE SOUTH KOREAN GOVERNMENT HAS ALSO GRANTED PERMISSION FOR THE ESTABLISHMENT OF A PRIVATE TELEVISION NETWORK, THE COUNTRY'S FIRST SINCE THE 1980 MEDIA PURGE. THE NETWORK IS EXPECTED TO GO ON THE AIR LATE NEXT YEAR.

MANILA (NOV. 26) KYODO - THE PHILIPPINES POSTED A 3.58 PERCENT GROWTH IN GROSS NATIONAL PRODUCT (GNP) BETWEEM JANUARY AND SEPTEMBER THIS YEAR, DOWN FROM THE 5.44 PERCENT GROWTH DURING THE SAME PERIOD IN 1989, THE COUNTRY'S

NATIONAL STATISTICAL COORDINATION BOARD REPORTED MONDAY.

THE BOARD SAID THE INFLATION RATE FOR THE SAME NINE MONTHS SHOT UP TO 13 PERCENT COMPARED WITH THE 9.17 PERCENT REGISTERED IN THE COMPARABLE PERIOD LAST YEAR.

THE COUNTRY'S GROSS DOMESTIC PRODUCT (GDP) GREW BY ONLY 2.78 PERCENT IN THE PERIOD, DOWN FROM THE 5.64 PERCENT GROWTH IN THE SAME PERIOD LAST YEAR, THE BOARD SAID.

IN THE THIRD QUARTER, GNP GROWTH WAS LOGGED AT 3.44 PERCENT COMPARED WITH THE 5.45 PERCENT IN THE SAME QUARTER LAST YEAR. IN THE SAME PERIOD, GDP MARKED 2.88 PERCENT GROWTH COMPARED WITH 5.39 PERCENT IN 1989.

THE BOARD SAID ALL MAJOR ECONOMIC SECTORS POSTED A SLOWDOWN ''AS A RESULT OF A SERIES OF UNFAVORABLE EVENTS,'' SUCH AS THE DEVASTATING JULY 16 EARTHQUAKE, STRONG TYPHOONS, AND THE MIDDLE EAST CRISIS.

MOSCOW (NOV. 26) KYODO - THE SOVIET UNION'S GROSS NATIONAL PRODUCT (GNP) IN 1991 WILL DECLINE ABOUT 1.3 PERCENT FROM THE PREVIOUS YEAR TO SOME 1.2 TRILLION RUBLES, DUE MAINLY TO A DECLINE IN INDUSTRIAL PRODUCTION AND INVESTMENT, A TOP SOVIET OFFICIAL SAID MONDAY.

THE FORECAST WAS MADE AS SOVIET FIRST DEPUTY PREMIER YURI MASLYUKOV INTRODUCED THE STATE ECONOMIC PLAN AND FORECAST FOR FISCAL 1991 TO THE SUPREME SOVIET, THE NATION'S PARLIAMENT.

SOVIET FINANCE MINISTER VIKTOR PAVLOV ALSO PREDICTED THAT THE SOVIET BUDGET FOR 1991, ALSO SUBMITTED TO THE PARLIAMENT THE SAME DAY, WOULD REGISTER A 13.2

BILLION RUBLE DEFICIT -- THE THIRD CONSECUTIVE FISCAL BUDGET DEFICIT.

HE SAID THAT ESTIMATED REVENUES WILL TOTAL 248 BILLION RUBLES IN THE COMING YEAR, COMPARED WITH 261.2 BILLION RUBLES IN ESTIMATED OUTLAYS.

SOVIET INDUSTRIAL PRODUCTION IN 1991 IS EXPECTED TO TOTAL 1,478 BILLION RUBLES DOWN 1.5 PERCENT FROM THE FORECAST FOR THE CURRENT FISCAL YEAR.

#90330m0001 11/26/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (NOV. 26) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

North Sea crude is up $2.20 this morning to $33.20. ... The Nikkei shrugs off higher oil prices and adds 363 points. ... After opening higher, the FTSE falls, losing 12 points by early afternoon in London. ... U.S. stocks in London are slightly lower. ... The dollar is higher and the yield on the long bond is up to 8.49%. ... The TREASURY DEPARTMENT reports the budget deficit in October was $31.5 billion and, that for all of fiscal 1990, it was $220.4 billion. ... MCA says it has not yet approved a takeover bid from MATSUSHITA ELECTRIC. ... TREFOIL CAPITAL INVESTORS says it will be unable to complete its planned purchase of CNC HOLDING CORP.'s 82% stake in CHILD WORLD INC. ... The ASSOCIATION FOR MANUFACTURING TECHNOLOGY says machine tool orders rose 1.9% in October, thanks to foreign demand.

WHAT'S AHEAD:

PRESIDENT BUSH files to Mexico this morning for two days of talks with MEXICAN PRESIDENT CARLOS SALINAS de GORTARI. ... The NATIONAL ASSOCIATION OF REALTORS reports on existing home sales for October this morning. ... The COMMERCE DEPARTMENT issues third-quarter merchandise trade figures tomorrow and the CONFERENCE BOARD puts out its consumer confidence index for November. ... Third-quarter revised GNP figures are released by COMMERCE on Wednesday, along with third- quarter corporate profits and October durable goods. ... COMMERCE reports on personal income and outlays for October on Thursday and, on Friday,

issues leading indicators for October.

FROM THE BULLS:

"I think we're in a secular bull market and I think the correction we've had has been a cyclical bear market," says JOHN WOSCZYNA of RONEY & CO. "When I look at all the components of the Dow - if I look at their upside potential from a long-term perspective - I can come up with numbers anywhere from 3800 up to 4700." He sees the market accelerating toward that level next year. (CNBC "Market Wrap- Up", 11/23)

FROM THE BEARS:

"What we've had recently is basically an interest rate rally," says JOSEPH BATTIPAGLIA, director of research at GRUNTAL & CO. "That's pretty much complete now and the stock market is looking for something new to hang its hat on. It's got to look at the Christmas season in terms of the economy. It doesn't like what it sees, so it will probably pull back from here. ... I think you will see more easing, but it won't be enough to move the market higher. Most of the expectation has been built into this move we've had, and it's pretty much completed." (CNBC "Market Wrap-Up", 11/23)

KEN SPENCE at SALOMON BROTHERS believes investors buying into the market's rally since October are being fooled by what he sees as a classic bear market rally. He looks for more bad news after the first of the year and advises investors to be prepared for the Dow to fall to 2100 or lower. (WSJ, 11/26)

STOCK MARKET:

The Mideast situation will hurt the market today and throughout the week, says DAVID MARSHALL of MMS in New York. Marshall expects the 2500 area on the Dow to continue to hold. "It seems to have found a bottom around this level," he says. "Although I thought we might go down to 2000, that's not my opinion any longer." He looks for the market to stay down through the rest of the year and into 1991. "There's nothing to bring the market back." (FNN "Business A.M.", 11/26)

HOWARD COLHOUN believes there will be war in the Middle East and that the market will go down sharply for the first two or three days of the conflict. "I think that is a buying opportunity and then you will see ... the pressure coming off and the market will rise," he says. "I would suggest that if that occurs, people buy on that 200 or 250-point decline." ("Wall Street Week", 11/23)

"While stocks are a lot cheaper than they were four months ago, they are not cheap," says GERALD PERROT in "Investment Horizons." He says stock prices would have to drop an additional 15%-25% before reaching undervalued territory. "Market valuation models are telling us that a bottom would be

reached in the 1850-2150 range." He advises investors to increase equity allocations only after the Dow breaks through 2200. (CNBC "World Business", 11/26)

"It's very much a stock picker's kind of market, which is not terribly comforting to a lot of people," says LASZLO BIRINYI of BIRINYI & ASSOCIATES. "But the truth is the market is performing substantially better than the general mood of investors would indicate." (WSJ, 11/26)

MARY FARRELL says the threat of war "does put a cap on the market breaking out of its trading range, but the other two problems the market is grappling with ... are the recession and a very dismal corporate profit picture." Still, she says "we may be much further through this bear market than we think [and] closer to resolution." She thinks the market could bottom in the first or second quarter of next year. ("Wall Street Week", 11/23)

RICHARD FREEMAN at SHEARSON LEHMAN BROTHERS says Friday's market decline "was a case of tradition losing out to oil." He says the increase in short interest is "extraordinary. You've had a lot of amateurs shorting the market and more people are joining in. They're typically late when they do that. Insiders are just not selling. So they, at least, believe that stocks are cheap." ("Investor's Daily", 11/26)

"Against the background of a traditional light day [Friday], the British market could have added a pop," says TRACY HERRICK, an economist at JEFFERIES & CO. in San Francisco. "There was not much to counter a strong thrust. But the carrythrough never went anywhere, as oil moved up a bit, and that clipped the market." (NYT, 11/24)

"The rule of thumb has always been that a new bull market begins halfway into the recession," says ALLEN SINAI, chief economist for the BOSTON CO. "Myself, I think the safer time to invest in stocks is when 1992 is in sight." PETER ELIADES, editor of "Stock Market Cycles" newsletter notes that "all of a sudden we have a lot of bulls coming out of the woodwork. If someone thinks the recession is going to end in the first quarter of next year, you'd want to be buying here." But Eliades believes the recession will be deeper and more severe than any decline since World War II. ("The Washington Post", 11/25)

"Shorting a stock is like telling a parent that their baby is ugly," says JEFFERY MATTHEWS of ROCKER PARTNERS LTD. "You may be factually correct, but you draw an emotional response from the parent." ("Investor's Daily", 11/26)

STOCK TIPS:

"Natural gas stocks are about as appetizing as a bowl of cold chow mein soaked in milk, but that's when you buy them," says ALAN GAINES of GAINES, BERLAND INC. "I see a fast rebound, maybe 10% to 20% in the next one to three months." He tells "USA Today's" DAN DORFMAN his top picks are POGO PRODUCING,

DEVON ENERGY, EDISTO RESOURCES, MESA LIMITED PARTNERS and HALLWOOD ENERGY PARTNERS. ("USA Today", 11/26)

LEUCADIA NATIONAL is featured in "Barron's" this week in an article by ROBERT SCHWERIN of SCHWERIN BOYLE CAPITAL MANAGEMENT in Springfield, Mass. He acknowledges that the company remains largely an "enigma to investors" because its diverse mix of businesses makes for what company management once called "a confusing financial stew." However, Schwerin writes that "those to take the trouble might be rewarded" for looking at Leucadia. He says shares are trading at about 11% below book value and around 50% of true value. ("Barron's", 11/26)

MACEO SLOAN looks for the market to bottom "sometime the first quarter of next year and then it's going back up. It looks like to me a good buying opportunity is going to come along and one that everyone should wait for. ... I think some of those stocks that have been absolutely crushed are going to be some of the same ones that lead the charge back up." He mentions COCA-COLA and PEPSICO as leaders in that category. ("Wall Street Week", 11/23)

TYCO TOYS INC. and its powerful chairman are featured in the Sunday edition of "The New York Times." "If Benson Seizer resigned from the board, I could see Tyco as an $18 to $20 stock," says SEAN McGOWAN, a toy industry analyst with GERARD KLAUER MATTISON & CO. "The fear investors have is they don't know what new shenanigans they'll read about in next year's proxy." The stock is trading over the counter at 9 3/4 a share, or 5.7 times estimated 1990 earnings. "I'm bullish, but it's not a table-pounding idea [to buy Tyco]," says McGowan. "Until things clear up, it will always trade at a discount." (NYT, 11/25)

EXXON is the favorite among the 26 stocks I.W. BURNHAM holds in the $124 million BURNHAM FUND that he manages. He terms it "an outstanding buy, but also a conservative buy." Noting that some analysts criticize Exxon for maintaining a chemical operation that is a drag on earnings, Burnham argues that when oil prices fall, chemicals boom. "That's why it's such a beautiful play, in my opinion," he says. "Either way it goes, they come out ahead. That's why it's such a great stock for virtually anyone - for widows, orphans, people who want some inflation protection, people who want some income." BAUSCH & LOMB and COOPER TIRE & RUBBER are the featured stocks in the "Investment News & Views" section of "Barron's" this week. ("Barron's", 11/26)

"In the retailing industry, you want to look at companies like a LIZ CLAIBORNE " says JOSEPH BATTIPAGLIA at GRUNTAL & CO. He also likes WAL-MART and TOYS R US. (CNBC "Market Wrap-Up", 11/23)

KENNETH HACKEL of SYSTEMATIC FINANCIAL MANAGEMENT INC. says the "publishing industry is an excellent source of companies which are selling at very undervalued free cashflow multiples." He mentions NEW YORK TIMES, MERIDITH CORP. and TIMES MIRROR. ("Wall Street Week", 11/23)

-30- 10262
#90330m0002 11/26/1990 ~Market Consensus Surveys
FALLS CHURCH, VA (NOV. 26) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

MONEY & CREDIT:

"The fundamentals for the dollar remain very negative and they are likely to get more negative as the market focuses on the upcoming economic data, especially jobs data," says ANNE MILLS at SHEARSON LEHMAN BROTHERS. "People are talking about the next Fed ease." PRUDENTIAL-BACHE's BOB PABROKI says, "We know [an easing] is the direction, but the question is the timing. On the one side, there's the idea that the Fed will lower rates one more notch. But on the other side of the coin is the Persian Gulf situation, which is giving the dollar some support." (WSJ, 11/26)

PETER GRANDICH at A-F-M INVESTMENTS says the big jump in platinum on Friday probably was largely the result of overblown reaction to a little bit of news in a very thin market. However, he says trouble in the South African mines does point to higher platinum prices because the only other producer of the metal is the Soviet Union, which has problems of its own. He remains bullish on precious metals in general, looking for gold to top $500. "If you want to believe that you should buy when nobody wants it, then gold is it because the headlines that were around in 1982 on equities now apply to gold," he says. Grandich believes Europeans are buying up gold because the believe the Federal Reserve eventually will "monetize the debt." (CNBC "Market Wrap-Up", 11/23)

"The fact that the bond market has rallied on ... cuts in the [federal] funds rate suggests that the economy is weakening at a faster rate than the Fed is easing," says PAUL KASRIEL at NORTHERN TRUST CO. in Chicago. "The Fed is winning its battle against inflation and its move to ease monetary policy is not over." (NYT, 11/26)

THE ECONOMY:

"When oil prices decline from where they are now ... we will come out of it [an economic downturn] sometime in the middle of next year," says MICHAEL BOSKIN, chairman of the president's COUNCIL OF ECONOMIC ADVISERS. "The overwhelming bulk of forecasters believe the economy will merely skirt a recession, or if we have one, it will be brief and rather mild and we will be out of it sometime within the middle of next year." (CNN, 11/24)

"We may already be in a recession, but it will be a mild and brief one," says EUGENE SHERMAN, chief economist at the FEDERAL HOME LOAN BOARD OF NEW YORK. "Consequently, we don't see interest rates going into a free fall. In fact, we

expect the recession to bottom out in the first quarter of 1991 and the economy to turn upward by late spring. Bond investors who expect the inflation rate to decline below current levels will also be disappointed." (NYT, 11/24)

"Certainly things are looking flat, but they're not recessionary," says PETER CANELO at BEAR STEARNS. "The most likely scenario is that the U.S. and the rest of the world are suffering from an oil shock, not a recession. And since oil is coming down from its peaks, and interest rates around the world are falling, the most widely expected recession in history might not happen." (WSJ, 11/26)

"We have resolved a lot of doubts about the economy, particularly about how fast inflation will come down," says RICHARD BERNER at SALOMON BROTHERS. "We are reversing perceptions that inflation will be staying at extraordinarily high levels." RUDOLF THUNBERG at REID THUNBERG & CO. says, "The rate of inflation is likely to diminish over the next several quarters as the economy sinks into recession." (NYT, 11/26)

VICTOR YU, a trader at PRUDENTIAL BACHE, says he expects January crude oil to test $35 a barrel this week. Looking at the Middle East situation, he says "there's been quite a lot of concern about the Soviet position, but more and more people think a violent resolution is likely and the Soviets may agree to it. ("Investor's Daily", 11/26)

"The rise in new [machine tool] orders indicates that - despite gloomy prospects elsewhere in the economy - the level of business activity in the manufacturing technology industries remains firm," says ALBERT MOORE, president of the ASSOCIATION FOR MANUFACTURING TECHNOLOGY. JAMES PAPER, an analyst with KIRKPATRICK, PETTIS, SMITH INC. in Omaha, agrees that "at the moment, things are looking relatively good. Orders are coming in well from a diverse base of industries and the inquiry rate is strong from potential customers, indicating that the prospects, at least in the short term, are good. The risk is, of course, that the whole economy will go through a downturn and stay down six months to a year or longer." (NYT, 11/26)

IN WASHINGTON:

"If the year continued at October's pace, we'd have a deficit of $270 billion " notes SAMUEL KAHAN, chief economist for FUJI SECURITIES in Chicago. "The bad news is that it's almost certain to be worse instead of better than $270 billion. ... Even if we're lucky enough to avoid recession we won't be able to do much better than achieve a $270 billion deficit." ("Investor's Daily", 11/26)

MIAMI (NOV. 26) PR NEWSWIRE - BHA Aviation, Inc. has withdrawn its all-cash, multi-million dollar offer to acquire Bar Harbor Airlines, the commuter subsidiary of Eastern Airlines. BHA Aviation was formed by several investors to acquire the airline which operates under the name: "Eastern Express."

Jack E. Robinson, a principal of BHA Aviation and, until several weeks ago, president and CEO of Bar Harbor Airlines, announced that, "We agreed with Eastern on price. All our financing is in place. Unfortunately, we have been unable to secure agreement from Eastern on certain key non-price related contractual provisions which a responsible purchaser must have when dealing with a bankruptcy situation."

BHA was selected by Eastern Airlines to negotiate a definitive purchase agreement to acquire Bar Harbour after besting several other bidders with an all-cash bid.

"We remain interested in consummating the transaction," said Robinson. "Bar Harbour is a very attractive property both as a result of the competitive strategy put in place in recent months and as a result of Trustee Martin Shugrue's overall turnaround of Eastern."

Daniel E. Carpenter, a principal of BHA Aviation and also associated with Benefit Concepts of New York, stated that, "We have the financing capabilities for this deal and to do even larger deals. In fact, we are looking at other airline opportunities right now."

Bar Harbour serves 20 cities in Florida and the Bahamas with 184 daily flights. It is the largest commuter airline in Florida with hubs in Miami and Tampa.

CONTACT: Jack Robinson of BHA Aviation, Inc., (212) 724-6275; or Seth Gordon of Seth Gordon Associates, (305) 358-8824, for BHA Aviation, Inc.

#90330p8047 11/26/1990 ~PR Newswire

WEST PALM BEACH, FLA. (NOV. 26) PR NEWSWIRE - Dycom Industries, Inc. (NYSE: DY), today announced the results for its first fiscal quarter ended Oct. 31, 1990. Gross revenues increased 34 percent to $43,321,142 from $32,331,283 for the first quarter last year. Net income of $2,142,995 reflects a 66 percent increase over last year's first quarter net of $1,290,352. Earnings per share were $0.23, up 26 percent compared with last year's $0.18 restated for the 3-for-2 stock split on Aug. 22, 1990. Backlog of uncompleted contracts on hand at Oct. 31, 1990, was $154.5 million compared $50.5 million at this time last year.

Commenting on the operating results, Thomas R. Pledger said, "Our results for the first quarter just ended were significantly improved over not only last

year's figures but also our revenues and pre-tax earnings in the fourth quarter of fiscal 1990. We expect our upcoming second fiscal quarter comparison to prove somewhat more difficult due to the one-time revenues we booked in the second quarter of last year. Dycom prides itself on being capable of providing services to its customers sometimes on extremely short notices and under extenuating circumstances. The NYNEX strike last year and, to a lesser extent, Hurricane Hugo proved to be such cases and we generated business well beyond our planned goals. In the three-month period currently under way we expect to operate under more normal industry conditions and, as such, will face what on the surface will appear to be declining business fundamentals in our year-to-year comparisons. On the contrary, we project our second quarter revenues and profits to increase not only from those reported in the first quarter today but also from those which would have been reported last year without the one-time business and Hurricane Hugo."

Pledger also stated that "the recent announcements of restructurings by both MCI and United Telecommunication's Sprint subsidiary may have raised some questions among shareholders regarding the health of the fiber optic telecommunications line installation business. We continue to work in the long-lines area but have expanded rapidly into the growing local loop market. We feel that Dycom is well-protected from any short-term fluctuations in long-lines business and that our strategy to focus on the fiber-to-the-home market is supported by ongoing industry developments. Corning Inc., a leading manufacturer of fiber optic cable, announced this past quarter that it is increasing its manufacturing capacity for cable by 50 percent to meet rapidly increasing demand. Dycom expects to benefit over the next several years from this increased demand."

Dycom provides fiber optic transmission systems and master contract installation services to the telecommunications industry. The company operates nationwide through wholly owned subsidiaries.

PHILADELPHIA, (NOV. 26) PR NEWSWIRE - Right Associates(R) (NASDAQ: RMCI) announced today it has appointed Peter J. Doris executive vice president for its Canadian region and North American Business Development.

Effective Jan. 1, 1991, Doris will have full line responsibility for all management functions in Canada and be responsible for business development activities in North America.

"To address the requirements of an ever more dynamic organization, we have established the position of executive vice president," said Stanley R. Tilton,

president of Right Associates.

Doris has been a senior vice president for North American Sales and has developed and coordinated business activities for Right's offices in the United States and Canada.

Right Associates is headquartered in Philadelphia and has more than 70 offices across the United States and around the world. It is one of the world's leading organizations specializing in outplacement counseling of executives and managers. Outplacement consulting services are designed to assist employers with termination issues and to help the separated employees develop skills and strategies to find new employment.

TROY, MI (NOV. 26) PR NEWSWIRE - Michael Flora & Associates, a full-service advertising agency, has signed an agreement with Standard Federal Bank (NYSE: SFB) and leasing agent Byron W. Trerice Company to become the newest tenant at the Standard Federal Financial Center. Michael Flora & Associates will occupy approximately 7,500 square feet of space on the fourth floor of the granite-clad office complex.

"The Standard Federal Financial Center is one of the finest buildings I've seen," said Michael Flora, president of Michael Flora & Associates. "It stands out from the crowd both architecturally and technologically." Flora added that tenant amenities and location were also prime motivators in influencing his decision to locate in the Standard Federal building.

Standard Federal Executive Vice President Garry G. Carley welcomed the Flora staff and stated, "We look forward to a long relationship with Michael Flora & Associates and trust that we will service the facilities needs of this fine firm for many years to come." Carley also noted that lease space at the Standard Federal Financial Center is moving well, with four companies having scheduled November 1990 move-in dates.

The Standard Federal Financial Center is situated on Big Beaver Road in the center of Troy's business district. It presides over what is called the city's "Golden Corridor," so termed because of the number of major corporations headquartered there, which include Kmart Corporation, Kelly Services, and Volkswagen of America.

The Standard Federal Financial Center offers tenants full-service dining and conference facilities and upgraded build-outs. The building is located on a 26.6-acre landscaped site and features a six-story atrium, which provides a bright expanse of natural light to the building's interior.

Parties interested in lease space should contact John Gordy or Tom Lasky, representatives for Byron W. Trerice Company, at 313-540-1000 for leasing information.

CONTACT: Garry G. Carley of Standard Federal Bank, (313) 637-2501.

BROOMALL, PA (NOV. 26) PR NEWSWIRE - Scangraphics Inc. (NASDAQ: SCNG), a major supplier of large document and aperture card scanners and software,

announced that it has been awarded U.S. Patent Number 4,972,273 named "High Speed, High Resolution Image Processing System."

The patent involves technology related to image scanning, and describes a process for transforming picture elements from paper, film or similar material into electronic digital signals. Image scanning devices, such as facsimile machines, scan and transmit images as electronic digital signals to another location where the image is printed or stored. Other image scanning devices scan and transmit the signals to a computer where they may be stored, viewed on a terminal, printed or modified.

"We believe the technology covered by this patent, and other pending patents, have application, and are presently being utilized in facsimile products, office copiers and image scanners," stated Tony Trolio, Scangraphics' vice president of engineering. Trolio continued, "Other products which may benefit from the technology are medical X-ray, and other image scanners for paper and microfilm." Scangraphics management is presently evaluating the licensing business opportunities provided to it by the issuance of this patent.

Scangraphics has applied this patented image processing technology in its line of large document scanners called the CF (Continuous Feed) Series. Utilizing this technology, the CF Series scanners produce high quality images from very poor quality source documents.

The imaging market which was $1.2 billion in 1988 is expected to grow to $2.1 billion by 1993, according to a report by Dataquest Inc. This is part of a larger information and image management market which is projected to grow to $12.7 billion in 1993 from $3.35 billion in 1988. These statistics are from a study conducted by the firm of Temple Baker, and Sloane.

Scangraphics is a pioneer and leader in scanning technology for engineering and mapping applications. In addition to large format scanners the company provides aperture card scanners and software systems for drawing revision and conversion. Scangraphics markets its products internationally through Value Added Remarketers, system integrators and distributors.

CYPRESS, CA. (NOV. 26) PR NEWSWIRE - PacifiCare Health Systems Inc. (NASDAQ: PHSY) reported today that revenue, earnings and membership reached record levels in fiscal 1990.

Operating revenue for the fiscal year ended Sept. 30, 1990, increased 50 percent to $975,849,000 compared to revenue of $650,242,000 last year. Earnings for the year were $17,638,000, or $1.48 per share, an increase of 62 percent over the prior fiscal year when the company reported earnings of $10,859,000, or $0.96 per share. Included in the fiscal 1990 results is the gain on the sale of the Austin, Texas, operations of $0.09 per share, which was reported during the first quarter. Total membership increased 22 percent from September 1989 levels to end the year at 673,359.

"Fiscal 1990 was a very successful year for PacifiCare," said Terry Hartshorn, president and chief executive officer. "Increased membership and premium revenue, and a reduction in total health care expenses as a percentage of premium revenue were all contributors to PacifiCare's achievement. Additionally, the fourth quarter of fiscal 1990 marks the 11th consecutive quarter that net income has exceeded the prior year's quarterly net income."

Wayne Lowell, PacifiCare's chief financial officer, cited lower hospital costs due to improved utilization as the primary reason for the reduction in total health care expenses. "Slightly offsetting the reduction in health care expenses was an increase in prescription drug costs," said Lowell. "Additionally, we experienced a moderate increase in marketing, general and administrative expenses as a percentage of operating revenue due to increases in advertising expenses and staffing to serve our expanded membership."

"We are looking forward to continued success during the next year as we take steps toward expanding into new areas including the introduction of our Secure Horizons(R) program to our Oklahoma market," said Hartshorn. "We expect these opportunities will further strengthen our leadership position in the managed care industry and ultimately provide long-term value for our shareholders."

For the fourth quarter of fiscal 1990, operating revenue rose 43 percent to $272,815,000 compared to revenue of $190,579,000 for the comparable quarter last year. Net income increased to $5,916,000 or $0.49 per share for a gain of 45 percent over last year's $4,076,000 or $0.36 per share.

PacifiCare owns and operates HMOs in five states including California, Oklahoma, Oregon, Texas and Washington. The company also markets Secure Horizons(R), the fourth largest Medicare risk program in the nation. Other operations include an insurance subsidiary licensed in 33 states and independent utilization review services.

KING OF PRUSSIA, PA. (NOV. 26) PR NEWSWIRE - International Mobile Machines Corp. (NASDAQ: IMMCC) said today it continues its blistering 400 percent sales and revenue growth which began last year by announcing record fourth quarter Ultraphone(R) orders from two customers.

IMM received purchase orders exceeding $5.2 million from Telefonos de Mexico S.A. de C.V. (TELMEX) in the fourth quarter, exceeding the previous record $1.6 million received earlier this year from TELMEX.

IMM also received a record $1.4 million in new domestic Ultraphone orders from GTE in the fourth quarter. "These new orders, together with orders we received from BellSouth, Citizens Utilities and Pacific Telecom Inc., demonstrate what IMM has been saying for several years, we have the ideal product to provide quality digital telephone service anywhere in the world," said Jim Bracknell, executive vice president.

"In Mexico," according to Bracknell, "we will no longer just be providing telephone service to new resort areas such as Cancun and Cozumel. In the 4th quarter we will ship systems to remote locations in which no electrical power exists, the subscriber units will be powered by solar energy which is another first for IMM. Our first mobile subscriber system goes into operation in west Texas this quarter and we have shipped our newest product, the 24 subscriber cluster, to BellSouth where wireless coin phone is being employed in the Everglades of Florida."

These sales further underscored IMM's ability to bring product to the field in record time. "Cluster was little more than a concept in January of 1990, we will ship over $1 million in cluster subscribers this year," according to Bracknell, "and I see the mobile subscriber units selling well into the hundreds of millions of dollars over the next few years. A single IMM system covering 4,000 square miles (11,000 sq. km.) can offer the United States, Mexico and other countries fixed and mobile digital radiotelephone service at low cost and extraordinary quality years ahead of digital cellular."

IMM provides state-of-the-art digital radio technology to telephone companies.

TORONTO (NOV. 26) PR NEWSWIRE - Canada Packers Inc. (Toronto: CK) today reported sales and earnings for the third quarter and nine months ended Sept. 29, 1990.

In announcing the results, David A. Newton, president and CEO said "During the quarter ended Sept. 29, 1990, Canada Packers moved vigorously to restructure the combined Canada Packers and Maple Leaf Mills businesses and to build a stronger and more profitable company for the future."

The pro forma consolidated statements of income for Canada Packers Inc. reflect the consolidation of the operating results of Canada Packers and Maple Leaf Mills for the quarter and nine-month period.

Also presented are the nine-month consolidated statements of income, included to comply with statutory requirements, following the combination of Canada Packers with Maple Leaf Mills effective June 30, 1990.

During the third quarter, pro forma consolidated sales decreased 3.7 percent to $907.5 million from $941.9 million in the comparable quarter of the earlier year, ended Sept. 23, 1989. The decrease in sales from continuing operations during the quarter was due principally to the closing of the Burlington, Ontario, beef slaughtering facility earlier this year.

Pro forma net income from continuing operations increased 15.6 percent to $12.6 million from $10.9 million in the comparable period, while the pro forma earnings per share rose to $0.19 from $0.17 in the earlier period.

For the nine-month period, pro forma consolidated sales from continuing operations increased 1.8 percent to $2.81 billion compared with $2.76 billion in the earlier period. Pro forma net income from continuing operations rose 10.8 percent, to $26.2 million from $23.7 million in the earlier period, while earnings per share increased to $0.40 from $0.36.

HOPKINS, MINN. (NOV. 26) PR NEWSWIRE - Innovex, Inc. (NASDAQ: INVX) today reported net sales of $34,385,000 for the fiscal year ended Sept. 30, 1990, an increase of 22 percent from $28,160,000 a year ago. Fiscal 1990 earnings rose 53 percent to $1,667,000 or $0.38 per share, from $1,089,000 or $0.25 per share in fiscal 1989.

Write-offs of prior business activities, primarily the FluxaTron product, reduced earnings by $0.04 per share. In the absence of these write-offs, the company's earnings would have been $0.42 per share.

Thomas W. Haley, Innovex's chairman and chief executive officer, attributed the improved 1990 results to strong contributions from the company's two primary businesses serving the disk drive and photo equipment markets. He said these businesses posted record sales and both were strongly profitable.

The Disk Drive Market Group is the world's largest supplier of lead wire assemblies to IBM and other manufacturers of thin-film hard drives, the high-growth segment of the disk drive market. Sales rose 41 percent in fiscal 1990 to $14,740,000, accounting for 43 percent of Innovex's total revenues, up from 37 percent in 1989. The group's operating income increased 97 percent to an all-time high.

The Photo Equipment Market Group is the nation's leading manufacturer of multi-image photo printers and automated systems for professional processing labs. Sales increased 11 percent in 1990 to $18,939,000 and accounted for 55 percent of Innovex's consolidated total, down from 60 percent in 1989. This declining sales mix trend reflects the maturing nature of the photo market and rapid growth of the lead wire business. Operating income rose 30 percent in fiscal 1990 due to strengthened manufacturing efficiencies, improved product designs, and higher systems sales.

A third and far smaller business, the Sensor Market Group, continued to report under-plan results in 1990. Innovex is continuing to evaluate a variety of options for this business.

The company believes fiscal 1991 should be another year of higher sales and earnings. Because of the seasonality of the major businesses, the second half of fiscal 1991 is expected to be substantially stronger than the first six months.

SAN FRANCISCO (NOV. 26) PR NEWSWIRE - Chevron U.S.A. Inc. (CUSA) will discontinue manufacturing thinners and solvents effective Jan. 31, 1991, CUSA President Will Price said today.

"Our decision is based on economic and environmental factors. There is a declining market for these products, as a result of environmental regulations such as the banning of charcoal lighter fluid," Price said. "In addition, to remain a reliable supplier in the thinners and solvents business over the long term would require an investment of at least $10 million, including expenditures to meet more restrictive environmental regulations. We believe we can obtain a higher return for our shareholders if these dollars are spent on other projects.''

Chevron is the largest West Coast manufacturer of thinners, which are used for paints, dry-cleaning, BBQ lighter fluid, concrete curing, food processing and industrial cleaners, among others. In addition, the company will cease selling its ion exchange solvent, which is used in metal extraction.

Currently, thinners and solvents are manufactured at the company's El Segundo and Salt Lake City refineries. Thinners and solvents are byproducts of gasoline and jet fuel manufacturing, but current technology does not require that these products be automatically produced as part of the process.

By leaving these byproducts in the transportation fuels stream, the company will realize operating cost savings without the loss of refinery personnel. All affected employees will be reassigned as necessary within the same refineries.

Chevron U.S.A., the largest subsidiary of San Francisco-based Chevron Corp., is the nation's leading refiner and marketer of petroleum products.

SEATTLE (NOV. 26) PR NEWSWIRE - The main AC electrical power generating system for the newest Boeing jetliner, the 777, will be provided by Sundstrand Corp., Rockford, Ill.

Boeing Commercial Airplane Group today confirmed the signing of a major, multimillion dollar agreement running through the year 2006 that continues a 30-year relationship between Boeing and Sundstrand. The aerospace and industrial component and subsystem supplier has provided electrical power generation equipment on all Boeing commercial jet aircraft since the 1960s.

The Sundstrand equipment will serve as the primary electrical power source during normal airplane operations for such systems as navigation, communication, instruments and lighting and for the galley and lavatory areas.

The AC electrical system consists of two 120 KVA Integrated Drive Generators, one auxiliary power unit generator, three generator control units, one bus power control unit and 11 differential protection current transformer units.

While the systems will be produced in Rockford, Sundstrand employees also will be a part of 777 design/build teams in Seattle. The design/build approach brings together engineering, manufacturing and other disciplines to concurrently define and develop more producible, error-free and service-ready airplane parts and systems.

The Boeing 777 is a medium-to-long range jetliner seating 360 to 390 passengers in a two class configuration. It features an advanced wing design,

the widest fuselage in its class and the latest high-efficiency turbofan engines. First delivery is scheduled for May 1995 to United Airlines.

DETROIT, (NOV. 26) PR NEWSWIRE - The Detroit Edison Company (NYSE: DTE) announced today that on Jan. 15, 1991, it will redeem 200,000 shares of its $2.75 Series B Preference Stock at $25 per share and 60,000 shares of its 9.72 percent Series Preferred Stock at $100 per share.

The redemptions will be through the operation of sinking funds established for both securities at the time of original issuance. In each case, dividends at the rate established for each series accrued to the date of redemption will be paid separately.

On or about Dec. 14, 1990, the company will send information to all holders of the $2.75 Series B Preference Stock and the 9.72 percent Series Preferred Stock who have shares selected for redemption. A determination of the shares which are to be redeemed will be made by random selection of certificates representing shares of each series belonging to shareholders of record at the close of business on Dec. 7, 1990.

Payment for all securities to be redeemed will be made by the company on or after Jan. 15, 1991. The $2.75 Series B Preference shares redeemed will be canceled and will have the status of authorized but unissued shares. Shares of the 9.72 percent Series Preferred Stock redeemed will be canceled and may not be reissued.

BALTIMORE (NOV. 26) PR NEWSWIRE - USF&G Corporation (NYSE: FG) today announced the appointment of Norman P. Blake Jr. to the positions of chairman, president and chief executive officer.

Blake, 49, had been chairman and chief executive officer of Chicago-based Heller International Corporation since 1984. He is assuming responsibilities for offices filled since 1981 by Jack Moseley, who announced his early retirement this month.

"USF&G is an industry leader with a strong national franchise and a proud winning tradition," Blake said. "The insurance sector, like the entire

financial services industry, is entering an era of change that will require energy and creativity to meet competitive challenges. I am joining USF&G because I want to tackle these challenges and I am thrilled to be part of the USF&G team as we move forward serving our customers, communities and shareholders."

At Heller International, a wholly-owned subsidiary of The Fuji Bank, Limited, of Tokyo, Blake led a strong turnaround in profitability. Heller's domestic financial services subsidiary, Heller Financial, Inc., realized a 38 percent compounded growth in earnings over the 1986 to 1989 period, reporting net income of $102 million in 1989. Similarly, its international subsidiary, Heller International Group, achieved a significant improvement in profitability over the same period.

Prior to joining Heller, Blake was with General Electric Credit Corporation, serving as executive vice president financing operations from 1981 to 1984, with responsibility for all operating components comprising a $13 billion asset portfolio.

He joined General Electric in the marketing management program in 1967 and assumed diverse management duties in strategic planning, business development and marketing in many areas of the company including the information systems, silicone products, plastics and broadcasting groups. From 1974 to 1976 he was president of TOP, Inc., a Detroit-based provider of insurance services.

Blake received bachelor's and master's degrees from Purdue University. Married, with three children, Blake was born in New York City.

Baltimore-based USF&G Corporation, with assets of $13.9 billion, is engaged through its subsidiaries in the writing of property/casualty and life insurance and in the sale of financial services. The corporation's principal subsidiary is United States Fidelity and Guaranty Company.

INVER GROVE HEIGHTS, MINN (NOV. 26) PR NEWSWIRE - Surgidyne, Inc. announced today it has signed a license agreement with Baxter Healthcare Corporation's V. Mueller Division under which V. Mueller acquires exclusive rights to market Surgidyne's postoperative orthopedic autotransfusion system worldwide.

The Varidyne Autotransfusion System reduces the need for transfusions of donated banked blood after orthopedic surgery, by reinfusing the patient's own blood, which is collected following surgery. The autotransfusion system consists of a small battery-powered suction pump and disposable components that collect and reinfuse blood.

Approximately 500,000 hip and knee surgeries will be performed in the United States during 1991 and the market for products used in these procedures is growing 12 percent annually, according to Surgidyne. The company estimates that the U.S. market for postoperative orthopedic autotransfusion products will reach $50 million within four years.

Autotransfusion systems have grown in popularity as surgeons and patients increasingly prefer to reduce the risk of viral infection by using the patient's own blood rather than donated blood from blood banks.

Surgidyne designs, develops, manufactures and markets specialty medical and surgical products.

Based in Niles, Ill., Baxter's V. Mueller Division manufactures and markets a complete line of general and specialty surgical instruments, equipment and supplies. Baxter Healthcare Corporation is the principal domestic operating subsidiary of Deerfield, Ill.-based Baxter International Inc. (NYSE: BAX), the world's leading manufacturer and marketer of health-care products and services.

Surgidyne's stock is traded in the local over-the-counter market.

BOULDER, CO (NOV. 26) PR NEWSWIRE - NBI Inc. (NYSE: NBI) announced today that Gary R. Ensminger has been appointed vice president of systems integration.

In making the announcement, Steve Jerritts, president and CEO stated, "The addition of Gary Ensminger to the management team, provides NBI with the hands on knowledge and experience in building a systems integration business." Ensminger will report to Claudio Pela, vice president and general manager, systems and service.

NBI's strategic direction is to become a developer and marketer of software for personal computers and a national systems integrator. As a systems integrator, NBI will provide a migration path for its customer base from their present NBI proprietary hardware systems to local and wide area network systems on open standards.

Ensminger has been in the computer and communications industry for 20 years with such companies as Control Data, AT&T, McDonnell Douglas, University Computing Co. and Micro One. He has held management positions in sales and marketing.

NBI designs and markets advanced word processing software. NBI has been a

leader in the word processing industry for more than a decade and also provides customer service and support to a wide base of system users in domestic and international locations.

ATHLONE, Ireland (NOV. 26) PR NEWSWIRE - Elan Corporation, plc (AMEX: ELN) and Drug Research Corporation, a new company established by Elan, said their transfer agent, The Bank of New York, commenced distribution of Elan/DRC units (AMEX: ELNU) to subscribers and will begin returning $21.2 million in oversubscriptions on Nov. 28.

Elan said holders of rights it issued Oct. 18 remitted a total of $64.3 million to purchase 5,846,766 Elan/DRC units, far in excess of the offering's maximum amount of $43.1 million for 3,926,273 units at $11 each.

Final tabulations completed last Friday showed that 3.3 million units were purchased under the base subscription provision of one unit for every four rights owned. The remaining 608,000 units have been allocated among those who oversubscribed, which was allowable up to three times the base amount. Elan said oversubscribers will receive 24 percent of their oversubscription.

Interest to Nov. 27, 1990, calculated at overnight deposit rates from the date of subscription (approximately 7 percent), will be paid on oversubscription funds returned.

Each unit consists of one callable ordinary share (represented by an American Depository Receipt) of DRC and one five year warrant to acquire one ordinary share (represented by an ADR) of Elan at US$23.075.

The DRC share and Elan warrant will trade as a unit until Nov. 14, 1992 when the share and warrant can be bought or sold separately.

Unit holders will receive a unit certificate plus two attached exhibits describing the components of the security. On Nov. 14, 1992, separately tradable DRC ADRs and Elan warrants will be issued to holders of record on Nov. 13, 1992.

Elan has an option to repurchase all the shares of DRC at $21 in 1993, $28 in 1994 and $36 in 1995.

DRC was formed to develop certain products based upon drug delivery systems incorporating Elan's proprietary ETDAS (Electro Transport Drug Absorption System) technology and IPDAS (Intestinal Protective Drug Absorption System), and to commercialize products based on these technologies. DRC will use the

net proceeds of the offering to make payments to Elan under an agreement to develop these products.

Elan is a leader in the specialized health care field of advanced reformulation and drug delivery, concentrating on improved absorption and utilization. Elan operates research and manufacturing facilities in Athlone, Ireland; Gainesville, Ga.; Enschede, Netherlands; Manila, Philippines; Brea, Calif. and Cambridge, Mass.

CLEVELAND (NOV. 26) PR NEWSWIRE - The National Association of Investors Corporation (NAIC) has awarded American Greetings (NASDAQ: AGREA) one of its top annual report awards for 1990.

The American Greetings 1990 annual report was one of five national award winners selected from nearly 300 judged by the NAIC in its annual Nicholson Award competition.

In presenting the award to John A. Hernandis, Director of Communications for American Greetings, at the Nicholson Awards banquet in San Diego on Nov. 2, 1990, NAIC Chairman Thomas E. O'Hara said: "The report has won the accolades of our judges for the combination of complete, easy to find, easy to use financial information, and a story line that gives the shareholder an excellent appreciation of what the business is all about."

O'Hara added, "One judge remarked that you weren't perfect because he would have like to have had a few more ratios in your financial table, but you were the closest thing to it that he had seen."

The theme of the 1990 annual report was, "Building Retail Partnerships". The report was produced in-house. Design and graphics services were provided by the Graphics Design Resources Department; Corporate Communications produced the editorial copy; and the Financial Department the Management Discussion and Analysis. Bedford Litho, of Bedford, Ohio, was the printer.

ROCHESTER, NY (NOV. 26) PR NEWSWIRE - Rochester Telephone Corp. (NYSE: RTC) announced today that it has completed the acquisition of the Orion Telephone Exchange Association of Orion, Ill. The company announced its intention to purchase the Illinois company last May.

Orion becomes Rochester Tel's 7th operating company in Illinois, and its 19th in the Midwest. Rochester Tel now operates 32 telephone companies in 13 states.

Founded in 1905, Orion serves 1,700 access lines in a territory located about 10 miles north of the Quad Cities (Moline, Davenport, Rock Island and Bettendorf) and within 90 miles of three other Rochester Tel companies in Illinois.

Orion also holds a minority interest in Illinois cellular Rural Service Area No. 3.

Rochester Tel exchanged shares of its common stock for all the outstanding stock of Orion. No purchase price was disclosed.

DALLAS (NOV. 26) PR NEWSWIRE - Royal International Optical Inc. (NASDAQ: RIOC) announced today earnings for the second quarter ended Sept. 30, 1990, of $81,000 or $.01 per share.

This quarter is the first full quarter of the operating results of the company after the completion on June 28, 1990, of the merger of Royal International Optical Corp. and U.S. Vision Inc.

For the six months ended Sept. 30, 1990, the company reported a net loss of $1,764,000 or a loss of $.32 per share. The results of the first quarter ended June 30, 1990, included a number of merger-related charges and were not reflective of normal operating results.

For the three months ended Sept. 30, 1990, the company reported net income before depreciation and amortization of $977,000, an increase of $1,260,000 over the first quarter ended June 30, 1990.

ROYAL INTERNATIONAL OPTICAL INC.
(In thousands, except per-share data)

Sept. 30, 1990	Three months	Six months
Income Statement:		
Sales	$37,904	$75,772
Operating income	2,070	2,249
Net income (loss)	81	(1,764)

#90330p8143 11/26/1990 ~PR Newswire

DOVER, DEL (NOV. 26) PR NEWSWIRE - Insurance Commissioner David N. Levinson announced today that a hearing will be held to determine whether Mellon Bank Delaware has been accepting rebates from insurance companies on premiums paid by consumers for "forced" insurance coverage.

If found in violation, Mellon could be fined and ordered to cease and desist this practice. "Forced" insurance is coverage for which a debtor pays to provide his lender with coverage in the event the debtor loses his insurance reason.

When a bank receives notice that a consumer who has financed a vehicle is without insurance coverage, the bank may place collateral protection insurance after appropriate notice to the consumer.

According to Levinson, Mellon has collected more than $1.7 million in premium for "collateral protection" insurance for such persons financing automobiles. The premium was then paid to Transamerica Insurance Co. for a group policy.

It has been alleged that Mellon Bank Delaware then received $350,000 of premium rebates from Transamerica Insurance Co. and retained it. Delaware law prohibits an insured from receiving premium rebates.

Levinson commented, "The practice of an insured under a group policy accepting a financial benefit in exchange for placing insurance with certificate holders violates the Delaware Unfair Trade Practice Act. As the group policyholder in this situation, Mellon has certain obligations to deal in good faith with the members of the group, and to not benefit financially from providing them with insurance under the group policy. In this instance, it appears that Mellon Bank Delaware may have gained substantial monetary benefit as a result of this arrangement over the last four or five years."

A similar complaint was filed against Mellon Bank Pennsylvania by the Pennsylvania Insurance Department. A tentative settlement has been reached in a class action suit filed by Pennsylvania (and a few Delaware) certificate holders in that matter for $6 million, subject to approval of the Pennsylvania Insurance Department.

According to Levinson, "The Delaware Insurance Department will also investigate the possibility that Mellon Bank Delaware may have forced placed more insurance than the consumer was aware of, including features that were not necessary to reasonably protect the bank's collateral."

ROANOKE, VA. (NOV. 26) PR NEWSWIRE - Roanoke Electric Steel Corporation (NASDAQ-NMS: RESC) today announced net earnings for the fiscal year ended October 31, 1990, of $8,353,178, or $1.57 per share of common stock, down 34 percent from the record net earnings of $12,738,520, or $2.39 per share, reported last year. Sales for the 1990 fiscal year were $149,317,213, down 6

percent from the record sales of $159,026,382 reported last year.

Net earnings for the three months ended October 31, 1990, were $2,773,935, or 52 cents per share of common stock, compared to the $3,539,404, or 66 cents per share, reported for the same period last year. Sales for the fourth quarter of 1990 were $36,686,312, compared to the $39,417,320 reported for the same period last year.

Donald G. Smith, Chairman and Chief Executive Officer, stated: "It is gratifying to report that earnings for fiscal year 1990 were the third best in our company's history, being surpased only by the record earnings reported for the last two fiscal years. The decline experienced in sales and earnings this year, compared to last year's record totals, reflected the trend within the industry of lower results, due to excess inventories at most mills, increased competition, and lower selling prices for bar products."

PALO ALTO, CALIF (NOV. 26) PR NEWSWIRE - Syntex Corp. (NYSE:SYN) today reported that earnings per share in the first quarter of the company's 1991 fiscal year increased 20 percent on a 16 percent sales increase.

Earnings per share in the fiscal 1991 first quarter, which ended October 31, 1990, increased to a record $1.12 compared with $.93 in the first quarter a year ago. Sales increased to a record $454.6 million, up from $390.7 in the year ago quarter.

FIRST QUARTER RESULTS
($ in millions, except per-share data)

	1Q FY91	1Q FY90	Percent Change
Net sales	$454.6	$390.7	+16
Operating income	$144.5	$124.1	+16
Net income	$125.2	$103.7	+21
Earnings per share	$1.12	$.93	+20

"Our record sales and earnings in the first quarter are primarily due to increasing sales of our newer human pharmaceutical products and higher sales of naproxen and naproxen sodium," said Paul E. Freiman, chairman and chief executive officer. "We are pleased that the investments we have made to launch our newer products and to increase our market share for Naprosyn(R) in the United States, including the expansion of our sales force, are now returning benefits to the company in the form of higher sales and higher earnings."

TORRANCE, CALIF (NOV. 26) PR NEWSWIRE - In a move aimed at supplying the expanding commercial and industrial markets for electric components in Europe, Hughes Aircraft Co. has established a new subsidiary in Spain.

The company revealed today that it intends to build a manufacturing facility in a new industrial park in the Mediterranean seaport city of Malaga.

The Spanish operation, to be known as Hughes Microelectronics Europa Espana S.A., will be built on nine acres of land in the new Technology Park of Malaga. Hughes will be the first major U.S. company to build a facility in the new industrial park.

The new plant's capabilities initially will include surface mount assembly and advanced Gold Dot connectors. Additional product lines are expected to be added to meet market demand in Europe for other Hughes technologies.

Hughes said that a key factor in the selection of Malaga for its new Spanish facility is the city's announced intention to become a leading technological center. Malaga is located in the Andalusian region in the southern part of Spain known as the Costa Del Sol. Several other electronic companies are already operating there, and the area offers a high level of services, good transportation and communications.

In addition, the University of Malaga has taken this industrial development into consideration, and has expanded its curricula in electronics and telecommunications. Hughes officials indicated that they expect the university to play a major role in ensuring that sufficient trained engineers and other skilled technical personnel will be available to meet the needs of industry.

The company also said that qualified engineers might receive specialized training in various Hughes technologies through special training programs both in the United States and in the Hughes operation in Scotland.

Hughes indicated that the move into Spain will be accompanied by an expansion of the company's marketing efforts in several European cities, and that other new manufacturing facilities are being considered.

STATE COLLEGE, PA (NOV. 26) PR NEWSWIRE - The board of directors of United Federal Bancorp Inc. (NASDAQ-NMS: UFBK) today announced a 22 percent increase in the company's quarterly cash dividend.

The common stock dividend was raised from $0.09 per share to $0.11 per share and is payable Dec. 31, 1990, to stockholders of record Dec. 10, 1990.

In discussing the increase, Charles C. Pearson Jr., president and chief executive officer, stated, "The 22 percent increase in United Federal's dividend confirms our faith in the company's future operating performance and excellent capital position. At a time when many financial institutions are being forced to reduce or eliminate their cash dividend, we are most comfortable in increasing ours."

United Federal Bancorp Inc. is the holding company for United Federal Bank and Founders Federal Bank, both federally chartered savings banks. The company operates from its home office in State College, Pa., and 13 full-service offices located in Centre, Clearfield, Huntingdon, Lycoming and Clinton counties.

#90330p8151 11/26/1990 ~PR Newswire
HOUSTON (NOV. 26) PR NEWSWIRE - Republic Waste Industries Inc. (NASDAQ: RWIN) confirmed today that, while it continues to work with the Ohio Department of Insurance to secure approval of the company's application to acquire Alliance Holding Co. the financial statements in the company's amended preliminary prospectus filed today include the consolidated balance sheet and operating results of Alliance only on a pro-forma, not historic, basis, in order to facilitate the timely completion of the proposed public offering to which the preliminary prospectus relates.

Republic agreed to acquire Alliance in July 1990, subject to regulatory approval, in a transaction to be accounted for as a pooling of interests and issued the shares into escrow. At that time both the company and Alliance anticipated that regulatory approval could and would be achieved by Oct. 31, 1990. Reflecting that expectation, the financial statements of Alliance were presented on an historic basis as part of the company's financial statements included in its original Oct. 19, 1990 preliminary prospectus, as well as in the company's quarterly reports filed for the periods ended June 30 and Sept. 30, 1990. However, the review and negotiation process with the Ohio Department of Insurance continues. As the company currently is unable to estimate when, whether or subject to what conditions its acquisition of Alliance will receive approval, it has decided that in order to pursue

completion of the public offering before receipt of approval it is appropriate to present on a pro-forma rather than historic presentation of the financial condition and operating results of Alliance. If and when the company secures regulatory approval, the company expects to account for the acquisition of Alliance as a "pooling of interests" and therefore to combine its historic financial statments with those of Republic, consistent with the previous presentation.

The presentation in the current preliminary prospectus compares with the previous conditional historic presentation as follows:

Republic Waste Industries is an integrated solid waste company providing collection, disposal and other support services.

LOS ANGELES (NOV. 26) PR NEWSWIRE - Scotti Brothers Entertainment Industries, Inc. ("Scotti Brothers") and All American Television, Inc. ("All American") (NASDAQ: ALLT) today jointly announced that they have extended until Dec. 6, 1990, the date by which definitive merger and related agreements must be executed in order to coordinate completion of all necessary documentation.

The parties previously announced that All American had accepted an offer by Scotti Brothers pursuant to which Scotti Brothers would be merged into a subsidiary to be formed by All American (the "merger"). The parties anticipate that the closing of the merger will occur in late January or early February 1991.

Scotti Brothers is a privately held entertainment corporation based in Los Angeles. Its divisions include a record company, a motion picture production and distribution company, a television production company, and an international sales and distribution organization for motion pictures and video.

All American is a New York-based publicly traded company engaged in the distribution of television programming to domestic and international television stations, cable television networks and home video markets, and the sale of commercial time to advertisers.

CONTACT: Tom Bradshaw, senior vice president of Scotti Brothers Entertainment Industries, 213-450-3193; or Joseph E. Kovacs of All American Television, 212-818-1200.

CHICAGO (NOV. 26) PR NEWSWIRE - A leading international pharmaceutical company has announced that it will donate $1.5 million of pharmaceutical products to the city of Moscow. The firm, Searle, which has its headquarters in Chicago, will donate products from its cardiovascular, gastro-intestinal, anti-infective and female contraceptive product lines.

In announcing the donations, Richard U. De Schutter, executive vice president and chairman & president, international operations, said, "In our meetings with Soviet officials over the past several months we have been further enlightened to the acute health needs of the Soviet people. Medicines for some of the most serious illnesses, including heart disease and gastro-intestinal disorders, as well as safe, reliable birth control, are in critically scarce supply. It is hoped that our donation will help in this great need."

Searle was in the USSR as part of an exchange program between the Chicago Symphony Orchestra and the Leningrad Philharmonic, a program which Searle helped to co-sponsor. "Just as Searle has created a partnership with the Chicago Symphony Orchestra to facilitate the exchange of cultures, we also intend to establish a business partnership with the USSR," said De Schutter. "The donation of Searle products is a demonstration of our good will through provision of quality pharmaceuticals to this nation."

Additional Searle products under clinical development include Maxaquin (R), an anti-infective in the quinolone class for the treatment of a variety of infections, and Aldactone (R), a diruretic used to control hypertension.

Searle is a research-based company that develops, manufactures and markets over-the-counter and prescription pharmaceuticals worldwide. It is a wholly owned subsidiary of Monsanto Co. (NYSE: MTC).

WASHINGTON (NOV. 26) PR NEWSWIRE - Daniel E. O'Sullivan, 61, president and chief executive officer of ULLICO Inc., the Washington-based holding company for The Union Labor Life Insurance Company and other insurance and investment-related companies, suffered a heart attack and died Nov. 25 while attending mass in McLean, Va.

A native of New York City, Mr. O'Sullivan graduated from Fordham University in 1948 at age 19 and went to work for Union Labor Life shortly thereafter. Except for service in the Army in the early 1950s, he spent his entire career with ULLICO, rising through the ranks to the presidency in 1979 and the CEO position in 1984.

A well known figure within the insurance industry, Mr. O'Sullivan was a member of the board of directors of the American Council of Life Insurance and the Health Insurance Association of America and an active supporter of the Employee Benefits Research Institute.

As the leader of a company owned by local and national labor unions and serving union members, Mr. O'Sullivan was also well known within the labor movement and counted many of the nation's labor leaders as personal friends. He was a frequent speaker at union meetings and advised labor leaders and organizations on employee benefit and insurance-related issues.

In addition to his insurance and labor activities, Mr. O'Sullivan was active in many religious and civic organizations. He served as a lector at St. Lukes Catholic Church and supported a wide range of charities inside and outside the Washington area.

He was a member of the board of directors of the Washington area affiliate of the American Diabetes Association, a director of the Fordham Alumni Association of Washington and served as co-chair of the 1990 Annual Brotherhood Citation Dinner of the National Conference of Christians and Jews. He was an active member of the D.C. Friends of Ireland and supported a variety of Irish and Irish-American organizations.

Mr. O'Sullivan oversaw the relocation of Union Labor Life from New York City to Washington in 1983 and the reorganization of the company under ULLICO Inc. in 1987. He was the primary architect of the company's growth and expansion into new lines of business.

In recent years, this has included major undertakings in the group health insurance, fiduciary liability insurance, pension fund investment and benefit administration areas. With assets in excess of $2 billion, the company now employs more than 1,500 in 44 offices across the country.

In lieu of flowers or other expressions of sympathy, the family of Mr.

O'Sullivan has requested that contributions be sent to a special scholarship fund created in his honor. Contributions may be sent to the Daniel E. O'Sullivan Memorial Scholarship Fund, c/o Carole Assante, ULLICO, 111 Massachusetts Ave. N.W., Washington, DC 20001.

TROY, MICH (NOV. 26) PR NEWSWIRE - Standard Federal Bank (NYSE: SFB) was the leading home mortgage lender for the month of September in the four-county area of Wayne, Oakland, Macomb and Washtenaw. According to Lawyers Title Insurance Corporation, Standard Federal recorded 1,242 single-family residential mortgage loans of $250,000 or less for a total of $71,036,258.

"Standard Federal continues to stress home mortgage lending as its No. 1 business priority," noted Thomas R. Ricketts, chairman and president. "And as a result, the bank has consistently been the leading home mortgage lender for the first nine months of this year and for 13 of the past 16 years."

Standard Federal Bank is headquartered in Troy, operates 117 branches throughout Michigan and Indiana, and has current assets of approximately $9.4 billion.

#90330p8167 11/26/1990 ~PR Newswire

CHARLESTON, WV (NOV. 26) PR NEWSWIRE - The board of directors of Key Centurion Bancshares Inc. (NASDAQ: KEYC), West Virginia's largest bank holding company, has declared a quarterly dividend of 16 cents per share.

The dividend, voted at the board's Nov. 26 monthly meeting, will be paid on Jan. 2, 1991, to shareholders of record on Dec. 12, 1990. The new quarterly dividend of 16 cents represents a 6.7 percent increase.

The company, formed in November 1985 from a merger of equals, has raised its cash dividend in each of the subsequent five years through 1990. The dividend rate per share (on a restated basis) has increased 100 percent during that period.

"This growth rate is certainly one indication of the continued financial strength of Key Centurion," M.T. Reynolds, chairman of Key Centurion, said. "We have constantly emphasized safety, soundness and liquidity, believing that

in so doing all our constituencies' interests -- shareholders and regulators among others -- would be best served in both the short and long term. And, by building and preserving almost a fortress balance sheet, our strengths have enabled us to be more aggressive in our dividend policy."

A. Michael Perry, president and CEO, commenting on the board's action said, "In the five years since Key Centurion's inception, the company's net income and equity have virtually doubled. Over the past year, we have taken several steps to add further strength to the company, including boosting the allowance for loan losses, even as our credit quality levels and ratios remained steady. Those ratios are superior to national averages. Moreover," he concluded, "we believe we have been presented with an opportunity to build on our past successes. The resources are in hand to forge new growth over the next five years."

Perry pointed to two previously announced merger agreements which, upon completion, will continue Key Centurion's growth. Definitive merger agreements have been made with Southern Bancshares Inc. and Spectrum Financial Corp. Southern is a $300 million asset, two-bank holding company located in Beckley, Raleigh Co. and Oak Hill in adjacent Fayette County, W. Va. Spectrum is also a two-bank holding company located in Wheeling, Ohio County and New Martinsville, Wetzel County, W.Va., with $264 million in assets. Southern and Spectrum are West Virginia's 12th and 14th largest bank holding companies based on year-end 1989 results.

With the completion of the mergers, Key Centurion -- now at $2.4 billion in assets -- would approach $3 billion in commercial bank assets, $1.3 billion in discretionary trust assets and almost $2 billion in total trust assets, all on a combined pro forma basis.

Key Centurion has banking subsidiaries with 45 offices in West Virginia and Kentucky, operating as: Cardinal State Bank, NA, Beckley; The Central National Bank of Buckhannon, Buckhannon; Charleston National Bank, Charleston; Union National Bank of West Virginia, Clarksburg; The First Huntington National Bank, Huntington; The Lincoln National Bank of Hamlin, Hamlin; The National Bank of Logan, Logan; Boone National Bank, Madison; First National Bank in Philippi, Philippi; Citizens National of Point Pleasant, Point Pleasant; Citizens National Bank of St. Albans, St. Albans; Nicholas County Bank, Summersville; Wayne County Bank, Wayne; The National Bank of Commerce of Williamson, Williamson, all in West Virginia and First National Bank of Pikeville, Pikeville, Ky.; and Reliable Mortgage Co. with six offices in West Virginia, Maryland, and Ohio.

#90330p8168 11/26/1990 ~PR Newswire

HAMILTON, BERMUDA, (NOV. 26) PR NEWSWIRE - Nord Pacific Limited (NASDAQ: NORPF) today announced highlights of the 1989 and 1990 drilling programs on the Sliderock gold exploration property in Granite County, Mont. The work was conducted by Meridian Gold Company, a subsidiary of FMC Gold Company, under a joint venture agreement with Hicor Corporation, a U.S. subsidiary of Nord Pacific Limited, that gives Meridian the right to earn a 60 percent interest in the project through an expenditure of $750,000.

The two drilling programs consisted of 10,072 feet of reverse circulation drilling in 27 holes. Assay results are now available for 26 of these holes. Significant intersections (10 feet greater than or equal to .010 ounces gold/ton) were obtained in 19 holes.

The best hole had several significant intersections, including 80 feet of .061 ounce/ton (130 feet-210 feet) and 235 feet of .027 ounce/ton gold (230 feet-465 feet). Intersections in three other well mineralized holes included 95 feet of .042 ounce/ton, 125 feet of .037 ounce/ton and 20 feet of .113 ounce/ton gold. The mineralization is mixed oxide and sulfide in nature.

The company considers these intercepts to be encouraging, although their economic significance cannot be determined on the basis of current information. The company is awaiting a full report on the past work and an outline of Meridian's plans for future work.

Nord Pacific Limited is incorporated under the laws of Bermuda and is engaged in gold mining in Australia and in exploration for precious metals, base metals and strategic minerals in Australia, Papua New Guinea and North America. At the Kurara Gold mine in Western Australia, Pacific has an open pit mine in operation in which it has a 65 percent interest. In Eastern Australia, Pacific owns 100 percent of a promising copper project (Girilambone) in the final feasibility stage, which is advancing toward anticipated production in 1992. On the Tabar Islands located in Papua New Guinea, drilling and feasibility studies are continuing on several gold deposits, which are 30 percent owned by Pacific. Pacific also owns a 72.35 percent interest in a major deposit of the strategic minerals chromite, cobalt and nickel located near the Ramu River, Papua New Guinea. A U.S. subsidiary company, Hicor Corporation, based in Albuquerque, N.M., conducts North American exploration.

HOUSTON (NOV. 26) PR NEWSWIRE - Continental Express announced today new service from Wilkes-Barre/Scranton to New York's LaGuardia Airport, effective

Dec. 1. The airline will offer four flights daily utilizing the Beechcraft C-99 aircraft in addition to the five daily flights with the 46 passenger ATR-42 aircraft currently offered to Newark Airport.

Richard J. Rushmore, vice president and general manager of Continental Express Eastern Region, said, "Our ability to serve both Newark and LaGuardia is facilitated by the strong community support which Continental Express has received. While we continue to develop connecting traffic over Newark to Continental's worldwide destinations, the addition of non-stop service to LaGuardia creates more travel options for our Wilkes-Barre/Scranton customers."

With Continental Express, customers traveling to LaGuardia or Newark and beyond have access to the many resources of the regional airline's parent company, Continental Airlines. These include advanced seat selection, one time check in, OnePass frequent flier bonus mileage and low through fares. Continental Express flights are timed to provide convenient connections to Contental Airlines in Newark and LaGuardia, with customers experiencing fast on-line connections.

Reservations and further scheduling and fare information may be obtained from local travel agencies or by calling Continental Airlines reservations toll-free at 1-800-525-0280.

#90330p8184 11/26/1990 ~PR Newswire

CARMIEL, ISRAEL, (NOV. 26) PR NEWSWIRE - S.P.I. - Suspension and Parts Industries Ltd. (NASDAQ: SPILF) today announced the results of operations for the third quarter and nine months ended Sept. 30, 1990.

Net sales for the three-month period amounted to $5,110,892, compared with $4,392,674 for the third quarter of 1989. Net sales for the first nine months of 1990 amounted to $13,718,434, compared with net sales of $12,575,075, in the same period last year.

The company incurred a net loss for the quarter in the amount of $61,861, or 2 cents per share, compared with a net loss of $737,040, or 22 cents per share, in the third quarter of 1989. The net loss for the nine months amounted to $490,821, or 14 cents per share, compared with a net loss of $1,985,688, or 58 cents per share, for the comparable period a year ago.

The company recorded a modest operational profit during the quarter. The company stated that actions implemented by management in previouus quarters were beginning to have the desired results: quality control problems have been drastically reduced and delivery schedules have been punctually met. The company continues to focus on reducing inventory.

During this quarter, the company received new orders and releases for its multiyear contract with the U.S. Army and new orders from the Israeli Ministry of Defense and various customers, all of which totalled approximately $9 million with deliveries scheduled for 1991 and 1992.

Efforts are being made to penetrate into markets for commercial products, utilizing technology developed by the company for its military products.

Headquartered in Carmiel, Israel, S.P.I. designs, develops, manufactures and markets components for the suspension systems of a wide variety of military armord vehicles, including steel road wheels and support rollers, sprocket wheels, track components and road wheel arms. The company believes it is currently one of the leading suppliers of steel road wheels used as spare parts by the U.S. armed forces and supplies substantially all the requirements of the Israel Defense Forces for steel road wheels, sprocket wheels, road wheel arms and certain track components.

#90330p8187 11/26/1990 ~PR Newswire

WASHINGTON, (NOV. 26) PR NEWSWIRE - Calgene Inc. (NASDAQ: CGNE) today

announced that it has requested that the U.S. Food and Drug Administration (FDA) issue an Advisory Opinion regarding the use of a selectable marker gene, kan(r), in the production of genetically engineered plants. This is the first submission to the FDA requesting an evaluation of a component of genetically engineered plants to be consumed directly as whole food. The approval of the kan(r) gene by the FDA will expedite and simplify the future approval of genetically engineered food crops. The Calgene submission specifically asks for an assessment of the kan(r) gene when used to produce genetically engineered tomato, cotton and rapeseed plants.

Calgene intends to file future FDA petitions for specific genetically engineered plant food products. The company expects the FDA review of these petitions will be conducted in parallel with the evaluation of the kan(r) gene.

Selectable markers such as the kan(r) gene are important tools for the biotechnology industry and have been commonly used in genetic engineering research laboratories for many years. Kan(r) has been used extensively because of its reliability and safety and has recently been approved for and is being used as a selectable marker in human clinical trials with genetically engineered human cells introduced into humans.

In recognition of the high level of public interest in the federal approval process for genetically engineered foods, Calgene will make its complete kan(r) data submission package directly available to all interested parties and intends to publish an executive summary of the submission. Copies of the data package may be ordered directly from Calgene.

Calgene Inc. is an agribusiness biotechnology company that is developing improved plant varieties and plant products for the seed, food and specialty chemical industries. The company has five operating subsidiaries -- AmeriCan Pedigreed Seed Co., Calgene Chemical, NobleBear Inc., Plant Genetics Inc., and Stoneville Pedigreed Seed Co.

TOLEDO CITY, PHILIPPINES (NOV. 26) PR NEWSWIRE - Ernest O. Pitschel, executive vice president and chief operating officer of Atlas Consolidated Mining & Development Corp. (AMEX: ACM.B), announced that mining operations and related activities were stopped late afternoon on Nov. 12, by a typhoon which was the "strongest and worst in the history of the mine."

Initial estimates of the total damage to the various mine facilities and equipment, including business interruption, indicate that it could exceed 200 million pesos (approximately $7 million). The value of the total damage is

now being assessed by insurance adjusters.

Pitschel further reported that partial ore production at the Lutopan Underground Mine commenced on Nov. 16. The Carmen Concentrator will start partial operation shortly. Biga Pit will commence partial production on Nov. 28. Biga Concentrator will start partial operation on Nov. 29 and will resume full production on Dec. 1, thereby attaining the equivalent of about 40 percent of the total daily milling capacity. Carmen Pit is expected to start partial ore production on Dec. 25 and scheduled to be in full production by Dec. 27 when Carmen Concentrator will be in full operation to reach 100 percent daily milling tonnage.

Atlas' Masbate Gold Operations was spared by the typhoon and operation has been normal.

VERNON HILLS, Ill. (NOV. 26) PR NEWSWIRE - Allscrips Pharmaceuticals, Inc. announced today it has completed the purchase of the drug repackaging business of Redi-Med, Inc., a subsidiary of Home Shopping Network, Inc. (NYSE: HSN). Terms were not disclosed. In addition, Allscrips has signed a fulfillment agreement for the drug repackaging business of Direct Pharmaceutical Corp. (NASDAQ: DPRX), and intends to acquire that business in the near future.

Already the industry leader in supplying highest quality brand name and generic pharmaceuticals in prescription-size packages, Allscrips will have estimated annual sales in excess of $30 million as a result of the merger. The merged companies will all operate under the Allscrips Pharmaceuticals name.

"By providing patients with their prescription medications at the time and place of treatment, physicians can improve patient compliance, and thus clinical outcomes, while sharply controlling costs," said Bruce A. Hazuka, president and chief executive officer of Allscrips. "Allscrips' merger with the repackaging businesses of Direct Pharmaceutical and Redi-Med positions the company favorably to meet the needs of physicians, urgent care clinics, and managed care organizations to provide their patients with high quality, cost effective care in the 1990s."

The pharmaceutical delivery system devised by Allscrips leads to both direct and indirect cost-savings for patients. By receiving their medications at the time of treatment, patients are more inclined to comply with their doctors' instructions, improving the likelihood of a positive therapeutic outcome. Studies have shown that if patients must travel to another site to receive a prescription, 7 to 8 percent will go unfilled. The merger announced today comes two years after Allscrips' acquisition of Mediscript, Inc., a

prescription drug prepackaging company, continuing a trend for consolidation within the industry. Four years ago, there were more than 40 firms; today there are only about a dozen.

"As in other segments of the healthcare industry, it has become clear in our business that one must provide quality care in a cost effective way. Allscrips' acquisition of certain assets of HSN Redi Med and Direct Pharmaceutical Corp. will give us the critical mass to meet the emerging needs of healthcare providers," Hazuka said.

Following a transition period, all administrative, packaging, labeling, and shipping operations of HSN Redi-Med and Direct Pharmaceutical will be transferred to Allscrips' Vernon Hills facility.

Privately held Allscrips Pharmaceuticals, Inc. was formed in April 1986 with equity from a number of leading venture capital firms.

SAN NICOLAS, ARUBA (NOV. 26) PR NEWSWIRE - Coastal Aruba Refining Company, N.V., a subsidiary of The Coastal Corporation (NYSE: CGP), has announced the start-up of the crude unit at its San Nicolas, Aruba refinery.

According to Mike Renfrew, vice president and general refining manager, the initial start-up operations on Nov. 20 went smoothly and the refinery is now producing up to 100,000 barrels a day of refined products including kerosene, diesel fuel, 6 oil, and feedstocks for Coastal's other refineries. As previously announced, production will increase to 150,000 barrels a day early in 1991.

Coastal purchased the refinery in October 1989 and will invest more than $150 million dollars in the rehabilitation of the refinery which had been closed since March 1985.

Renfrew said the start-up of the first phase of the refinery's refurbishing was relatively trouble free. "It's been a long and sometimes difficult road over the past eight months, but today Coastal is making history in Aruba. Everyone, including the local Aruba craftsmen and Turkish contract workers,

can be proud of this achievement," Renfrew said.

The Coastal Corporation is a Houston-based energy holding company. It has consolidated assets of $8 billion and subsidiary operations in natural gas transmission and storage, oil and gas exploration and production, refining and marketing, coal and chemicals, and independent power production.

CHICAGO (NOV. 26) PR NEWSWIRE - Midway Airlines and the Air Line Pilots Association today announced that the Midway pilots' leadership has ratified a new labor agreement.

The 3-year contract provides improvements in compensation, work rules, and pension benefits for the carrier's 750 pilots. The contract is retroactive to Nov. 1, 1990, and has an amendable date of Nov. 30, 1993.

Tentative agreement had been announced last Wednesday. The Midway pilots' Master Executive Council voted yesterday to ratify the contract.

"The new agreement was worked out in a cooperative atmosphere with the company. It is fair to the pilots, but it also positions the company to grow and remain competitive," said Captain Jerome Mugerditchian, chairman of the Midway pilots' Master Executive Council.

Thomas E. Schick, president and chief operating officer of Midway Airlines, said, "This agreement with our pilots is important to stabilize the Company during the present difficulties in the industry and to provide us with cost factors we can plan on in our return to profitability."

NORTH WILKESBORO, NC (NOV. 26) PR NEWSWIRE - Lowe's Companies, Inc. (NYSE: LOW) announced today a third quarter sales increase of 1 percent. Total earnings declined 31 percent compared to the third quarter of 1989. Earnings per share were 38 cents.

Financial Highlights(a)
(In millions, except share data)

Quarter Ended October 31 :	Change(b)	1990	1989
Total Sales	+ 1 pct	$708.12	$702.67
Net Earnings(a)	- 3 1pct	$ 14.08	$ 20.28
Earnings Per Share(a)	- 31 pct	$ .38	$ .54
Average Shares Outstanding	0 pct	37,390,204	37,354,368

Quarterly Sales Analysis

Quarter Ended :	October 31, 1990		October 31, 1989	
	Pct Change	Total Sales (000,000)	Pct of Total	Total Sales (000,000)	Pct of Total
Retail Sales	+ 7	$454.4	64	$424.8	60
Contractor Sales	- 9	$253.7	36	$277.9	40
Total Sales	+ 1	$708.1	100	$702.7	100
Comp. Stores(c)	- 5	$628.3	89	$658.1	94
New Projects(d)	+110	$ 79.3	11	37.7	5
Closed Stores		.5	-	6.9	1
Total Stores	+ 1	$708.1	100	$702.7	100

(a) For details, please see comparative tables attached.
(b) Calculated from unrounded amounts.
(c) 276 average stores open more than one year for the third quarter with comparable square footage. (d) Stores open less than one year and stores which have been retrofitted or relocated during the past twelve months.

Management commented that these disappointing quarterly results stemmed principally from the 5 percent decline in comparable store sales volume. A budgeted increase in these stores' sales did not materialize in the face of a worsening slide in regional housing activity and a slowing rate of gain in retail sales. However, the company's new large stores open one year or more did post a 6 percent increase in comparable store sales.

With this quarter's results, the gross margin in 1990 has been ahead of last year's performance for six months. Aided by no LIFO charge this year, the 1990 third quarter gross margin of 24.68 percent to sales was higher than 1989's third quarter rate of 23.96 percent by 72 basis points. Quarterly expenses were driven upward in percentage by the lower sales volume in comparable stores, and in dollars by the company's continuing commitment to larger store expansion and store remerchandising. Major factors in these resulting higher expenses were sales compensation, depreciation, signs and fixturing, scanning equipment, and certain insurance costs.

The company has previously reported to shareholders that it is a defendant in legal actions filed in Florida and Maryland involving the sale of allegedly defective fire retardant plywood. Since the earlier report, the company, and a number of other vendors and manufacturers of this product, have been named defendants in certain additional actions brought by complainants who employed the product in construction for resale. As previously reported, the company believes it has substantial defenses to alleged liability and does not believe the filing of these additional actions increase its exposure for sale of this product.

Lowe's currently operates 306 stores in 20 states located primarily in the South Atlantic and South Central regions of the United States. Incremental retail sales space for the third quarter exceeded 208,000 square feet, for a company total surpassing 6.7 million.

Lowe's is a specialty retailer of building materials, consumer durables, and home center products for the do-it-yourself and home construction markets. Lowe's shares are listed on the New York, Pacific and London Stock Exchanges under the ticker symbol of LOW.

#90330p8215 11/26/1990 ~PR Newswire

NEW YORK (NOV. 26) PR NEWSWIRE - Merrill Lynch & Co., Inc. (NYSE: MER) announced today the publication of the Altman-Merrill Lynch Index of return performance of defaulted debt securities. The Altman- Merrill Lynch Index, the most comprehensive of its type, is based on the monthly weighted average return on a portfolio of over 130 issues of defaulting companies. The index comprises 50 companies as of October 1990, and will be updated, adding new defaulted issues when relevant, on a monthly basis.

The index was constructed by Dr. Edward I. Altman, the Max L. Heine Professor of Finance at the Leonard N. Stern School of Business of New York University

and an advisor to Merrill Lynch.

"The growth in the number of defaults in the market provide a sizeable number of securities which are involved in corporate reorganizations," according to Martin S. Fridson, managing director of Merrill Lynch and manager of High Yield Research. "An increasing number of investors and institutions specialize in this market and need an appropriate index with which to compare their total return performance," says Fridson. At least 60 financial organizations are specializing in active and passive investing in the public debt, private bank debt and also the trade debt of distressed companies.

Altman, an expert on bankruptcy analysis, believes that there will be other similar indexes as the market grows for specialists in distressed securities. He estimates that the market of defaulted and distressed securities and other debt instruments, both publicly and privately placed, as of October 1990 was at least $330 billion in book value and over $210 billion in market value outstanding.

#90330p8222 11/26/1990 ~PR Newswire

JACKSON, WI (NOV. 26) PR NEWSWIRE - John A. Wundrock, president and CEO of Wisconsin Pharmacal Company, Inc., today reported record sales for the year ending Sept. 30, 1990. Sales for the year were $10,400,670, representing an increase of $3,382,625 or 48 percent over the prior fiscal year. Operating earnings for fiscal 1990 increased 64 percent to $725,873, compared to $441,161 in fiscal 1989. Income before an extraordinary item was $318,275 in fiscal 1990, compared to $14,418 in fiscal 1989. Net income for fiscal 1990 was reduced to $68,275 due to a $250,000 bank debt prepayment fee.

The company's REPEL Insect Repellent line led the revenue growth. The REPEL brand is a complete line of insect repellents in pump sprays, aerosols and lotions in different strengths, as well as the REPEL Bug Lantern.

Sales for the fourth quarter of fiscal 1990 totaled $1,796,754 or a 20 percent gain over the same fiscal 1989 period. Prior to extraordinary items, the company posted a net loss of $64,275 for the fiscal 1990 fourth quarter versus a loss of $148,208 in the same fiscal 1989 period.

Wundrock stated that the company's sales are seasonal with a high proportion of sales and earnings occurring in the second and third quarters of the fiscal year which ends Sept. 30. Revenues are usually lowest in fourth quarter.

Expenses incurred for new product development were $424,930 in fiscal 1990, compared to $661,451 in fiscal 1989. The amounts spent on development of the

"female condom" REALITY, the company's new product, decreased in fiscal 1990 due to the fact that many of the clinical studies have been completed, and one of the key ongoing clinical studies is being funded by the United States Agency for International Development (USAID). The company expenses such amounts as incurred even though revenues from new products will not be recorded until future years.

In June 1990 test results for REALITY were presented as a scientific poster of the 6th International Conference on AIDS in San Francisco. REALITY allows women to protect themselves against sexually transmitted disease, including AIDS, and unwanted pregnancy. The company is currently seeking FDA approval for REALITY, for which it holds the North American license.

In July 1990, the company successfully completed an initial public offering. Gross proceeds were $7,500,000.

Interest expense of approximately $469,000 during 1990 represented an increase of approximately $59,000 over 1989, but that increase was more than offset by interest income of $63,000 earned in fiscal 1990 investing excess funds from the public offering. Since the company has repaid all of its bank debt with proceeds from the public offering, interest expense should be considerably lower in fiscal year 1991.

Wundrock commented that with the completion of the public offering, the company is in excellent financial condition and well prepared for future expansion. The company is focusing its efforts both on improving current operating results and positioning the company for future growth and profitability through additional products.

CLEVELAND (NOV. 26) PR NEWSWIRE - National City Corporation (NYSE: NCC) announced today that Sheila J. Rapp has been elected vice president of the corporation and chief investment officer of National City Trust.

Richard Beeman, head of National City Trust, welcomed Rapp, saying "Sheila adds substantial managerial strengths from her experience as head of the national banking division and nearly a decade of hands-on investment management." National City Trust, with over $18 billion in trust and mutual fund assets under management, ranks as the 22nd largest trust enterprise in the United States.

A graduate of Case Western Reserve University, Rapp joined the bank in 1978 upon completion of her MBA degree from the Weatherhead School of Management. In 1982, she became a Chartered Financial Analyst,

and rose to serve as Director of Research in the bank's Trust Department. She was appointed to the Senior Loan Committee in 1986 and named manager of the National Banking Division. Since July 1987 she has served as head of the Multinational Banking Group.

Rapp is a member of the Cleveland Society of Security Analysts. She serves on the Investment Committee of the Flora Stone Mather Alumni Association and has served as a community advisor to the Junior League of Cleveland. She also serves as a director of the Western Reserve College Alumni Association. In 1987, she received the association's "Distinguished Young Alumnus Award."

#90330p8234 11/26/1990 ~PR Newswire

ANCHORAGE, Alaska (NOV. 26) PR NEWSWIRE - Yukon Pacific Corp. (YPC) President and CEO William V. McHugh has announced the award of a design contract to be performed by Bechtel Corp., Houston, covering the first phase of engineering services for Yukon Pacific's proposed natural gas liquefaction facility and marine terminal at Anderson Bay, Alaska, near Valdez. The facility is planned as part of YPC's Trans-Alaska Gas System (TAGS) project.

In making the announcement McHugh noted that Bechtel has a long history of successful design experience with large liquefied natural gas (LNG) plants, and commands widespread respect for its work in the same Asian markets that YPC is targeting for sales of its LNG. McHugh stressed that the work Bechtel will do is necessary to satisfy regulatory requirements and does not signal official start-up of the massive project. "While we remain confident that TAGS will be built," McHugh said, "we do not want anyone to misinterpret the significance of this event. We are still working diligently in our markets to secure the necessary purchase commitments to finance and build this project.

Until we have them, TAGS remains an exciting prospect in Alaska's future."

According to Yukon Pacific's Senior Vice President for Engineering, Peter DeMay, the scope of Bechtel's work will include evaluation and recommendation of technology selection, as well as preliminary engineering and basic design for the proposed LNG production complex. The Anderson Bay site is located 3 miles west of the existing storage and marine loading facility constructed for shipment of Prudhoe Bay oil. YPC's LNG plant will be the largest of its kind when all phases are completed.

TAGS (Trans-Alaska Gas System) is an LNG (Liquefied Natural Gas) export project sponsored by Yukon Pacific Corp. to transport Alaskan North Slope gas to markets in Japan, South Korea and the Republic of China.

#90330p8235 11/26/1990 ~PR Newswire

SEATTLE, (NOV. 26) PR NEWSWIRE - Advanced Technology Laboratories Inc. (ATL) introduced a set of five new features and enhancements called "Digital Plus" for its Ultramark(R) 9 digital ultrasound system at the annual meeting of the Radiological Society of North America (RSNA) in Chicago, Westmark International Inc. (NASDAQ-NMS: WMRK) announced today. These features include unique, proprietary transponder technology (Biosponder1/8TM3/8) for the visualization of a biopsy needle tip during ultrasound-guided biopsy and aspiration procedures, a proprietary adaptive algorithm that differentiates between motion and low flow blood velocities to eliminate color artifacts and Transcranial Doppler, a major breakthrough in noninvasive vascular diagnosis, which provides a color Doppler display of the brain's vasculature.

The five Digital Plus features are available to ATL's installed base of Ultramark 9 system customers as field upgrades. The company expects to commence delivery of these new features in the first quarter of 1991.

ATL also showed as a works in progress the ability to capture and digitally store live images and color Doppler on optical and floppy disks with its DAASR(TM) Module (Digital Acquisition, Analysis, Storage and Retrieval). The DAASR module links two of the three components of the ATL Digital Ultrasound(TM) Information System, the Ultramark 9 system and a digital workstation. A third component consists of instruments and technology that further enhance ultrasound-derived information. ATL's Biosponder is the first of such instruments.

At the RSNA, ATL showed a prototype of the digital workstation, which extends the capabilities of the Ultramark 9 system to capture, store and retrieve real-time images on optical disks. This technology brings real-time digital color and grayscale loops to the radiologist's reading room for further

analysis or serial studies. Currently, radiologists primarily work from static films or hard copy color prints.

"The strategy for ATL during the 1990s is to continue to improve the quality of diagnostic information provided by our ultrasound systems and to assist the physician in acquiring, analyzing and communicating this information. This is made possible through rapid advancements occurring in our proprietary digital technology," said Allen W. Guisinger, president of ATL.

The Ultramark 9 Digital Plus features are as follows: Biosponder Needle Guidance Module -- Provides an assured method of visualizing the needle tip in ultrasound-guided biopsy/aspiration procedures. As in routine ultrasound-guided biopsy/aspiration procedures, a common Chiba bevel-tip needle (cannula) is advanced through the tissue. ATL's Biosponder needle consists of a cannula containing a stylet with a minute transponder in the tip which transmits a pulse back to the Ultramark 9 system. The needle tip appears on the system screen as a bright dot, and an audible signal verifies that the needle tip is within the plane of the image scan beam.

The exact locational information assists the clinician in improved procedure accuracy, patient safety and visual documentation of site of biopsy. It also facilitates the biopsy of smaller masses, decreases the time required to perform the procedure and is an excellent training tool for those uninitiated to biopsy and aspiration procedures.

Dynamic Motion Differentiation -- Eliminates color artifacts caused by tissue motion. ATL's digital beamforming technology uses a unique, adaptive algorithm -- independent of the system's wall filters -- to minimize motion artifacts caused by respiration, heartbeat, etc. and to increase color Doppler sensitivity over a wide range of flow states.

Multifrequency Capability -- Automatically optimizes imaging and Doppler frequencies independently for greater Doppler sensitivity to blood flow in deep vessels or anywhere that attenuation prevents adequate Doppler sampling.

Transcranial Doppler -- Capitalizes on ATL's digital beamformer capability to detect faint returning Doppler signals. ATL's transcranial Doppler capability provides a color Doppler display of the brain's vessels for the assessment of carotid artery and vertebral disease.

Colorscale(TM) Imaging -- Assigns color hues to selected echo amplitudes in 2D images and spectral Doppler for visualization of subtle tissue and details. For both imaging and spectral information, color may extend the dynamic range that the eye can perceive.

Westmark, with headquarters in Seattle, is a worldwide developer, manufacturer and distributor of diagnostic ultrasound systems and electronic patient monitoring systems through its subsidiaries, Advanced Technology Laboratories

Inc. in Bothell, Wash., and SpaceLabs Inc. in Redmond, Wash.

Westmark's common stock is quoted on the NASDAQ National Market System under the symbol WMRK.

#90330p8239 11/26/1990 ~PR Newswire

BALTIMORE (NOV. 26) PR NEWSWIRE - Baltimore Gas and Electric Co. (NYSE: BGE) reported common stock earnings of $181,275,000 for the 10 months ended Oct. 31 1990, equivalent to $2.21 per common share.

This compares with earnings of $218,744,000, equivalent to $2.74 per share, for the 10 months ended Oct. 31, 1989. For the 12 months ended Oct. 31, 1990, earnings on common stock were $206,441,000, equivalent to $2.52 per share. This compares with $243,928,000, or $3.06 per share, for the 12 months ended Oct. 31, 1989.

Earnings per share for the company's utility business and for its diversified business activities were as follows:

Periods ended	10 months		12 months	
Oct. 31	1990	1989	1990	1989
Utility operations	$2.12(A)	$2.51	$2.41(A)	$2.76
Diversified business activities	.09	.23	.11	.30
Total	$2.21	$2.74	$2.52	$3.06

(A) Includes approximately 33 cents per share attributable to the change in policy for recognizing utility revenues as described below.

In October 1990, the company changed its revenue recognition policy to provide for the accrual of revenue for utility service rendered but not yet billed to customers as of the end of each month. This change increased earnings approximately 33 cents per share for each of the periods ended Oct. 31, 1990. This change conforms with the predominant practice within the utility industry and provides for a better match between revenues and expenses. The total impact of the change on 1990 earnings is estimated to be 40 cents per share.

The decreases in utility earnings for both periods, excluding the impact of the aforementioned change in accounting method, are primarily attributable to the effects of higher operations and maintenance expenses.

Kilowatt-hour sales of electricity for the 10 months ended Oct. 31, 1990, increased less than 1 percent from the comparable period last year. Residential sales increased 1.5 percent, reflecting an increase in the number of customers, while commercial and industrial sales were essentially unchanged.

The total volume of gas sold during the current 10-month period decreased 6.2 percent from the same period last year. The decrease in sales was primarily related to milder winter weather and decreased usage by our commercial and industrial customers.

Earnings from diversified business activities primarily represent the results of operations of Constellation Holdings Inc. and its subsidiaries. During the remainder of 1990, earnings from diversified business activities are expected to improve moderately but are not expected to reach the 24 cents per share earnings contribution achieved during calendar year 1989.

ALBUQUERQUE, N.M. (NOV. 26) PR NEWSWIRE - Summa Medical Corp. (AMEX: SU) today reported the results of operations for its second quarter ended Sept. 30 1990.

The loss before other income/deductions for the six months ended Sept. 30, 1990 was $2,138,254, up 67 percent from the six months ended Sept. 30, 1989. The net loss for the six months ended Sept. 30, 1990 was $3,685,196 (or 23 cents per share) compared to a net loss of $1,651,897 (or 12 cents per share) for the six months ended Sept. 30, 1989.

For the second quarter the net loss was $2,660,657 (or 16 cents per share) compared to a net loss of $530,716 (or 4 cents per share) for the second quarter of the previous fiscal year.

The principal reason for the increase in the losses for 1990 over 1989 is the additional write down of $1,250,000 in the second quarter of the company's investment in Everyday Discount Drugs Inc., as previously announced in the company's letter to shareholders dated Oct. 26, 1990. The company is also incurring additional research and development expenses relative to its HDCD and voice compression projects. The company has a development agreement with Hughes Aircraft Co. for the voice compression technology, and has begun the process of reaching a final licensing agreement with Hughes, as previously announced, the up front licensing fee will range from $5-10 million and royalties will range between 4-8 percent of gross sales. The company has also put into place several financing arrangements to provide funding for its operations.

#90330p8248 11/26/1990 ~PR Newswire

NEW YORK (NOV. 26) PR NEWSWIRE - BFS Bankorp, Inc. (NASDAQ: BFSI), the parent holding company for Bankers Federal Savings FSB, today announced that it experienced a net loss of $869,000 for the year ending Sept. 30, 1990, versus net income of $3,964,000, for the prior year. This resulted in a loss per share of $0.61.

Also, BFS Bankorp had a net loss of $3,178,000 for the fourth quarter ended Sept. 30, 1990, compared with net income of $764,000 in the prior year's fourth quarter. This resulted in a quarterly loss per share of $2.29.

The 1990 results were dramatically impacted by a $3,826,000 addition to general loan loss reserves including $3,396,000 added in the fourth quarter and a $939,000 increase in the reversal of interest income on non-performing

first mortgage loans of which $251,000 occurred in the fourth quarter. As of Sept. 30, 1990, the general loan loss reserves are 1.18 percent of total loans and 20 percent of non-performing loans.

The increase in reserves was recently approved by the bank's board of directors and is in accord with the recommendation of the Office of Thrift Supervision (OTS), as a result of its recently completed examination. Bankers Federal also had one property as "real estate owned" (REO) as of the end of this fiscal year. This has since been sold at a price which recovered all principal, negative escrow, and interest not previously reserved.

James A. Randall, BFS Bankorp's president and chief executive officer, said: "Although Bankers Federal Savings has had no mortgage loan losses in recent years, we continue to believe that a conservative, prudent approach to loan loss provisions is required in today's market. The increase reflects the higher level of non-performing loans and the board's caution regarding the recent rise in New York City real estate taxes and fuel costs."

Randall further commented that "Bankers Federal Savings FSB continues to meet all three fully phased in FIRREA capital requirements. Also, our Tangible Book Value of $15.74 per share demonstrates the continuing health of our institution."

#90330p8251 11/26/1990 ~PR Newswire

NAPERVILLE, IL (NOV. 26) PR NEWSWIRE - Varlen Corp. (NASDAQ-NMS: VRLN) had increased sales but a sharp decline in earnings for its fiscal third quarter and nine-month periods.

Richard L. Wellek, president and chief executive officer, said the decline in earnings was due to softness in Varlen's markets, which he said also points to a reduction in earnings for the fourth quarter.

For the three months ended Oct. 27, 1990, Varlen had net income of $758,000 or 17 cents per share compared with restated earnings from continuing operations of $2,358,000 or 53 cents per share for the year-ago period. Net income in the 1989 fiscal third quarter, which includes a loss from discontinued operations, was $1,776,000 or 39 cents per share.

Third quarter earnings were impacted by an upward adjustment in Varlen's effective tax rate resulting from a significant decline in the company's projected full year earnings.

The higher effective tax rate resulted from lower earnings over which to absorb goodwill and other non-deductible expenses. Current results include an approximate 9 cents per share impact, of which 7 cents is related to the 1990 first half.

Net sales for the 1990 fiscal third quarter were $62,165,000, a 7.8 percent increase over restated sales for the year-ago period of $57,680,000. The

increase reflects Varlen's July 3, 1990, acquisition of Walter Herzog GmbH, Lauda, Germany, and the Heico laboratory group of companies on March 6, 1990.

Wellek said that Means Industries, Varlen's automotive products subsidiary, had improved earnings, primarily due to increased sales from new programs, but the increase was not enough to compensate for a broad based market weakness which impacted Varlen's other operations.

For the first nine months of the 1990 fiscal year, Varlen had net income of $5,031,000 or $1.12 per share compared with earnings from continuing operations of $8,237,000 or $1.84 per share in the comparable year-ago period. Net income for the first nine months of the 1989 fiscal year, which includes results from discontinued operations, was $8,525,000 or $1.90 per share.

Net sales for the first nine months of the 1990 fiscal year were $184,492,000 compared with restated year-ago sales for the period of $173,224,000.

Wellek noted that Varlen was taking aggressive actions to reduce costs and improve cash flow, without hurting long-term opportunities for growth. However results for the fourth quarter are still expected to be well below prior year results due to further softening in the company's markets, he noted.

Wellek said that Varlen's Keystone Railway Equipment Co. is evaluating a change to last-in, first-out (LIFO) inventory methodology. He noted that the change in accounting, while beneficial to the company's cash position, would reduce earnings.

Varlen is a diversified manufacturer of precision industrial products, primarily for the transportation and laboratory equipment markets. The company serves U.S. and foreign markets with operating locations in six states and Germany. Headquarters is in Naperville, Ill.

#90330p8265 11/26/1990 ~PR Newswire

KING OF PRUSSIA, PA (NOV. 26) PR NEWSWIRE - Universal Health Realty Income Trust (NYSE: UHT) refinanced its $50 million bank revolving credit agreement which was scheduled to begin amortizing in September of 1991.

The new $50 million revolving credit agreement includes all three of the trust's original banks and extends the date for principal repayment to September of 1994. Borrowings are available at the trust's option at various spreads, determined by the trust's achievement of certain financial tests, over the CD rate, LIBOR and prime. While pricing under the agreement increased slightly and the financial covenants were relaxed slightly, the terms and conditions of the new bank credit are essentially unchanged from those of the trust's original credit agreement.

Alan B. Miller, chairman of the trust, noted the trust's satisfaction with the refinancing by saying, "In light of the current difficulties in banks and in the credit markets, we are gratified that our banks continue their support of the trust. The new credit agreement extends the maturity date of principal payments and thereby demonstrates the trust's ability to refinance its loans even during adverse market conditions."

Universal Health Realty Income Trust, a real estate investment trust, invests in health care and human service-related facilities including acute care hospitals, psychiatric hospitals, substance abuse recovery centers and rehabilitation hospitals. The trust currently owns 12 hospitals and provides mortgage financing for another hospital.

EDEN PRAIRIE, MINN (NOV. 26) PR NEWSWIRE - Electro-Sensors, Inc. (NASDAQ: ELSE) announced that the sales through the third quarter (overleaf) reflect a continuation of low volume in the Microflame subsidiary, offsetting gains in the Speed Monitoring division and Drive Control Systems.

The profit results reflect the ongoing expenses of the Drive Control Systems group and "Precursor" research and development project. Profits were also effected by the decline in Microflame sales and reduced profits on the sales of securities.

ATLANTA (NOV. 26) PRNEWSWIRE - Georgia Power Co. officials today asked the state Public Service Commission (PSC) to reduce the utility's fuel cost recovery rate.

If approved, the move could save Georgia Power customers approximately $18.2 million during the first five months of 1991.

For an average residential customer who uses 1,000 kilowatt hours per month, the reduction could mean a savings of 85 cents per month from January through May. The PSC could reassess the fuel cost recovery rate after that period.

"The savings are primarily due to the outstanding performance by our nuclear units and lower prices for coal," said Georgia Power President and Chief Executive Officer Bill Dahlberg. "Since the company's fuel costs have been lower than projected, we believe our consumers should benefit from our savings."

CONTACT: Tal Wright of Georgia Power, 404-526-7676, or 800-282-1696.

#90330p8275 11/26/1990 ~PR Newswire

CHICAGO (NOV. 26) PR NEWSWIRE - Oil-Dri Corporation of America (NASDAQ: OILC) today reported record sales of $26,894,000 for the first three months of fiscal 1991 ended Oct. 31. This represents an 11 percent increase over the $24,270,000 reported for the same period a year ago.

Pre-tax income for the quarter was also a record $2,821,000 as compared to

pre-tax income of $2,698,000 for last year. Net income for the quarter was $2,154,000 or $0.31 per share, off slightly from $2,184,000 or $0.31 earned in the comparable period of last year.

The $0.31 earned in the first quarter of fiscal 1990 reflects the company's adoption of SFAS No. 96, "Accounting for Income Taxes," issued by the Financial Accounting Standards Board. The cumulative effect of this accounting change increased net income in the first quarter of last year by $160,000 or $0.02 per share.

Commenting on the first quarter of the current year, Richard M. Jaffee, president of Oil-Dri, stated the following: ''Sales for the quarter were excellent. Increases were driven by Cat's Pride(R) Premium, Pure-Flo(R) Bleaching Clay and the new Oil-Dri Lite(TM) Sorbents. Earnings, as compared to the adjusted records highs of the same quarter of last year, were affected by the reduced contribution from the agricultural section of the company's business.''

"This year the formulating season has been slow to start, reducing demand for our Agsorb(R) Carriers. We are hopeful that we may see a rebound as customers work through existing inventories."

"Cat's Pride(R) Premium and the Consumer Products Division did very well in the quarter. Cat's Pride(R) Premium continues to increase dollar volume at a dramatic rate. In a year-to-year comparison of SAMI (note a) numbers for dollar volume, Cat's Pride(R) Premium is showing a 30 percent increase. Fresh Step (note b) and Control (note b), manufactured for The Clorox Co., are also showing strong sales, while competitive brand names were flat or down."

"Pure-Flo(R) business was excellent in the first quarter. Export shipments were up substantially over last year, due primarily to increased demand from Malaysia. Domestic business was also very strong, up considerably over the same quarter a year ago."

"Oil-Dri's Lite Sorbents performed well for the period, in spite of a sluggish industrial economy. We continue to shift our marketing mix toward our more profitable products and target our new polypropylene business segment with an aggressive sales effort. We are seeing an excellent contribution from this area and expect it to favorably impact the results of the year."

"While earnings were down slightly from the comparable period, we are optimistic about the overall prospects for the year. While we are cautious about the general economy and the potential impact of the international situation, we are anticipating increases in sales and earnings for the rest of the year."

Oil-Dri is a leader in developing, manufacturing and marketing sorbent products and technologies for consumer, agricultural, industrial,

environmental and specialty markets. The corporation is headquartered at 520 N. Michigan Avenue, Chicago, Ill. 60611. (a) SAMI is a grocery industry report service provided by the Arbitron Co. (b) Fresh Step and Control are registered trademarks of The Clorox Co.

TORRANCE, CA (NOV. 26) PR NEWSWIRE - Computer Communications Inc. (NASDAQ: CCMM) today announced operating results for the first quarter ended Sept. 30, 1990.

For the first quarter, revenue increased to $1,729,000 from $1,280,000 in the same period last year and the company reported a net loss of $668,000 or ($.08) per share as compared to a net loss of $860,000 or ($.10) per share in the comparable period last year.

Raymond E. High, president, stated that the company intends to introduce the first standard product of its Data Express (TM) InterOp/7000 product family in December 1990 and that subsequent product announcements are scheduled for the third and fourth fiscal quarters. Availability of this new product for customer shipments is scheduled for March 1991.

High stated that both the special systems division and the customer service division continue to operate profitably with an aggregate customer backlog of approximately $6,000,000. The standard products division, responsible for the development and introduction of the InterOp/7000 product family, however, is the major factor in the company's operating loss and cash drain.

The company does not expect the standard products division to achieve profitability during the remainder of fiscal year 1991 although, as shipments of the new standard products commence and increase, the operational losses and cash drains are expected to improve.

The company, in its 24th year, is a leading independent producer of equipment and systems which are an integral part of high-speed data communications networks serving a broad spectrum of users. Its common stock is traded in the over-the-counter market and is regularly quoted on NASDAQ under the symbol of "CCMM."

COMPUTER COMMUNICATIONS INC. FIRST QUARTER OPERATING RESULTS Nov. 26, 1990

PHILADELPHIA (NOV. 26) PR NEWSWIRE - David M. LeVan has been elected senior vice president-Corporate Systems of Consolidated Rail Corp. (NYSE: CRR), it was announced today by James A. Hagen, Conrail's chairman, president and chief executive officer. In his new position, LeVan will report to Hagen. LeVan previously held the position of vice president-Corporate Strategy.

The new Corporate Systems Department will be responsible for the continuing development of corporate strategies and will also include the Administrative Services Department, the Information Systems Department, and the Resource Development Department.

Allan Schimmel has been promoted to vice president-Administrative Services and corporate secretary. Schimmel previously had been corporate secretary and assistant to the chairman. The appointments were effective today.

LeVan, 44, joined Conrail's Finance Department in 1978 from the accounting firm of Coopers & Lybrand. At Conrail, he also has served as assistant controller-General Accounting, assistant vice president-Auditing, assistant vice president-Treasury, and vice president-Treasurer.

Schimmel, 50, joined Conrail in 1976 from the United States Railway Association, where he was assistant vice president-Congressional Relations. At Conrail, he has also served as director of Federal Relations and executive director-Staff Studies. In the 1960s and early 1970s, Schimmel served in legislative assistant and administrative assistant positions to members of Congress.

Conrail operates a rail-freight transportation network in 14 northeastern and midwestern states, the District of Columbia, and the Province of Quebec.

#90330p8287 11/26/1990 ~PR Newswire

NEW YORK (NOV. 26) PR NEWSWIRE - Manville Corp. (NYSE: MVL) today submitted papers asking U.S. District Judge Jack B. Weinstein and U.S. Bankruptcy Judge Burton R. Lifland to issue orders reaffirming injunctive provisions of the company's plan of reorganization that protect it from all asbestos related suits and require that all such claims be settled and paid by the Manville Personal Injury Settlement Trust.

Manville said it requested the action at this time because of the Trust's widely publicized financial problems and related court activities in which the Trust has asked Judge Weinstein to establish a class action lawsuit for all beneficiaries of the Trust. The publicity, over the past several months, has raised concerns among potential Manville investors, institutions which lend money to Manville, customers, employees and shareholders that the injunction might be questioned.

"Even though there has been no legal challenge to the injunction since it was issued, and Manville believes that it is as solid now as it was then, the widespread media coverage about the Trust has contributed to these concerns," Tom Stephens, Manville chairman, president and CEO said.

Recently, Manville and the Trust agreed on a plan to provide up to $650 million through a series of dividend payments to all shareholders on a pro rata basis over the next seven years. The Trust could receive as much as $520 million additional funding through the plan.

The company anticipates that an initial hearing will be set early in January.

Manville Corp. is an international manufacturing and natural resources company

headquartered in Denver. The company's primary businesses include building and engineered products, fiber glass and industrial insulation products, paper and wood products, packaging, roofing systems and filtration and minerals. Founded in 1858, Manville has more than 18,000 people at more than 50 plants and seven mining interests worldwide. Manville and its subsidiaries have more than $2.5 billion in assets as of Dec. 31, 1989.

VAN NUYS, Calif. (NOV. 26) PR NEWSWIRE - Pinkerton Security & Investigation Services (NASDAQ: PKTN) said today that Michael Arthur & Associates, Santa Monica, with its affiliate Libov/Roth Associates, has been named licensing agent for the Pinkerton name.

Thomas Wathen, Pinkerton chairman and chief executive officer, said he believes association with the company's name and reputation has unique marketing and attention-creating value.

"Pinkerton possesses a real and significant place in American history," he said. "The Pinkerton name is virtually synonymous with security and investigation and is widely known and respected. We believe the name inspires confidence, and with good reason."

According to Peter C. Sawyers, Pinkerton Director of Marketing, the Pinkerton name "offers genuine value to licensees as well as another source of revenue for our company."

"Security and safety-related products would present a natural correlation as would electronic items and work clothing. We would even consider motion picture or television tie-ins and game and toy items," he added.

Sawyers said the company recently commissioned a consumer attitude survey by an independent research firm.

"More than half of American consumers surveyed readily recognized the Pinkerton name, and of that number nine of every 10 expressed a favorable attitude," Sawyers reported.

He added that the survey indicated that one-third of consumers responding favorably assigned "very high marks for image" to the Pinkerton name.

Sawyers said the latest survey also confirmed earlier market research which had shown Pinkerton scoring "significantly higher" in recognition than any other security firm nationwide.

"It could be said that Allan Pinkerton was the real creator both of what became the U.S. Secret Service and of the private security and investigation industry," Wathen stated.

"There is a sense of adventure and romance to the Pinkerton name that makes the name not only part of U.S. history, but also part of American Wild West legend," he added.

Both Pinkerton executives stressed that licensing of the company name would be restricted to products or services offering quality commensurate with Pinkerton's reputation.

"What we will not do," Sawyers said, "is offer a license if we don't agree it will be valuable to the licensee or if we think the proposed use of the name would damage the public's perception of Pinkerton in any way."

Pinkerton Security & Investigation Services is the trade name for Pinkerton's Inc.

HIROSHIMA, JAPAN (NOV. 26) PR NEWSWIRE - Mazda Motor Corp. today announced that all passenger car models sold in the United States would be equipped with both driver and front seat passenger airbags by the 1994 model year.

Norimasa Furuta, president of Mazda Motor Corp., said, "We at Mazda are committed to the safety of our customers, and recognize the value of the airbag as an effective supplement to the three-point seat belt. We have put our maximum effort into widening the range of models which feature airbags. These important safety devices will be standard equipment for both driver and front seat passenger on all of our passenger cars in the U.S. by the 1994 model year."

The company announced that it would make front seat passenger airbags standard on some U.S. models beginning in the 1992 model year. Currently, the company offers a driver's side airbag on U.S. models of the RX-7 Convertible and the MX-5 Miata sports car.

Mazda also announced that it was studying the feasibility of adding airbags to its line of trucks and multi-purpose passenger vehicles, but that no final decision had been reached.

In a related announcement, the company said that it would begin equipping certain models in Japan with driver's side airbags in 1991.

WASHINGTON (NOV. 26) PR NEWSWIRE - Communications Satellite Corporation's Intelsat Satellite Services (ISS) business unit this week said it will begin providing international private-line communication service in support of President Bush's travels throughout Europe, the Middle East, and South America.

COMSAT is providing a total of one hundred twenty-three 64 Kilobits per second (Kbps) equivalent channels of its private-line communications service, known as International Business Service (IBS) to satisfy government and commercial communications requirements during the presidential tour, according to Betty Alewine, vice-president and general manager of COMSAT's ISS business.

Alewine said that COMSAT's ISS business unit is providing point-to- point, duplex service for use by the White House staff and press corps, and for coordination services between CBS and ABC network television field operations traveling with the president and the networks' New York headquarters from now through Dec. 8.

COMSAT's private-line service offers users the flexibility to operate international communication networks using small and transportable earth stations for telephone, data, and video requirements. It does not, however, connect with the public switched telephone network.

COMSAT Corporation (NYSE: CQ) is a publicly traded company based in Washington. Its Intelsat Satellite Services business unit provides satellite capacity and communications services used to transmit television, voice and data communications between the United States and overseas points. COMSAT also is the U.S. participant within INTELSAT, a Washington-based consortium of 119 countries that manages and operates the global communications satellite system.

SHREVEPORT, LA. (NOV. 26) PR NEWSWIRE - Solo Petroleum Inc. (SOLO) announced

the pending acquisition of the Emerald Isle copper mine from Arimetco International Inc. of Tucson, Ariz.

Arimetco is a Toronto Stock Exchange-listed company which owns and operates several significant copper mines.

The Emerald Isle Mine is located northwest of Kingman, Ariz., in a district which contains several currently operating or previously operating mines. The property consists of seven unpatented lode claims and 15 millsites on approximately 200 acres. The mine previously had been purchased from the mining subsidiary of El Paso Natural Gas. There are no royalties or any other residual interests to any third parties. The property is completely permitted for heap or in situ leaching and Solvent Extraction/Electrowinning (SXEW) processing. Previous mining produced some 22,400,000 pounds of copper from some 1,400,000 tons of mined ore. The property contains over 26,700,000 pounds of proven recoverable copper within a currently defined "global resource" of 6,384,000 tons at 0.42 percent copper with a 0.2 percent cut-off. Additional reserve potential exists on the property.

SOLO will acquire a 100 percent interest in Emerald Isle from Arimetco for a cost of US $3,750,000, including the cost of plant construction and start-up, under the following terms:

-- SOLO will pay US $100,000 by Nov. 29 for a firm and irrevocable option to purchase the property, including the existing permits, and certain water rights currently owned by Arimetco;

-- SOLO will pay US $2,000,000 within 120 days from the date of the option payment;

-- Arimetco will finance the balance of US $1,750,000 at 13 percent interest amortized over a three-year period in equal monthly installments until the debt is retired with payments commencing once the project is in production;

-- The plant that Arimetco will construct, staff and commission is an SXEW plant capable of producing 8,000 pounds of copper per day.

A new board of directors will be appointed for the company immediately and it will include the following persons: H.R. Shipes, president of Arimetco International Inc.; E.A. Schiller, Ph.D., P.Geol., consulting geologist; Frank C. Mashburn, chairman and CEO, Louisiana Mining Corp.; and D. Douglas Gillies, president, Skyline Resources Ltd. Gillies will serve as interim president of the company.

SOLO also announced it is cancelling all plans to acquire American Medical Aviation Inc. and Phrobis International Inc. that were announced previously.

Solo Petroleum is traded on the Alberta Stock Exchange. The Alberta Stock

Exchange has neither approved or disapproved the information contained herein.

DALLAS (NOV. 26) PR NEWSWIRE - If the classic 1960s film "The Graduate" were being remade today, a middle-aged man would approach the Dustin Hoffman character and whisper in his ear, "Micro-cellular plastics."

A method for creating microcellular plastic, a new, lighter-weight plastic infused with billions of microscopic bubbles that has wide industrial applications, was announced today at the winter annual meeting of American Society of Mechanical Engineers.

Vipin Kumar, assistant professor of mechanical engineering at the University of Washington (UW), said applications for the material range from aviation and automobile parts to toys. Microcellular plastic, made out of a commonly used plastic called polycarbonate, retains most of the strength of the original material and may be less breakable because it is a foam. The new material is somewhat like styrofoam used in coffee cups, but its bubbles are 10-20 times smaller than those in styrofoam. A one-square inch piece of microcellular plastic that is one-tenth of an inch thick contains approximately five billion bubbles.

"It is only a matter of time until we will see solid plastics replaced by microcellular plastics simply on the basis of reduced weight and the amount of material used," said Kumar, whose research is being funded by the National Science Foundation and the Washington Technology Centers.

Depending on the size and number of bubbles created, microcellular plastic can be made with 10 to 90 percent of the density of the original material. Kumar is most interested in plastic foams that have a 30-40 percent reduction in density because they act and behave similarly to the solid plastic.

The UW researcher created his microcellular plastic by saturating sheets of polycarbonate with carbon dioxide under high pressure. After the saturated plastic is returned to normal pressure, it is heated until it softens and the gas foams or bubbles up, creating billions of tiny bubbles 5-10 micrometers in size. Kumar's method represents a significant enhancement to the original microcellular process invented by Nam P. Suh, professor of mechanical engineering at the Massachusetts Institute of Technology.

#90330p9677 11/26/1990 ~PR Newswire

NEW YORK (NOV. 26) PR NEWSWIRE - Two insurance providers and two information technology companies have joined forces to develop computerized technology that will improve the speed and efficiency of underwriting and rating risks in the property/casualty industry, while reducing costs.

Two subsidiaries of Insurance Services Office, Inc. -- ISO Commercial Risk Services, Inc. (CRS), and ISO Telecommunications, Inc. (ISOTEL) -- have signed a letter of intent with EDS Corp. and Datamap Inc. to develop the new underwriting system that combines high speed telecommunications with computerized hazard and classification information on individual risks.

The Geographic Underwriting System, or GUS(TM) will be jointly developed, tested and marketed over the next 14 months. GUS is an underwriting and rating tool that can instantaneously provide users with hazard and classification information about specific risks.

With GUS, insurance company underwriters can obtain important data to evaluate a specific property merely by entering its address into a computer.

GUS will give underwriters specific property information on-line through ISOTEL. GUS will provide a host of information about the property, including frequency of crime in the area, wind damage, and the site's proximity to fire hydrants and sink-holes.

"Insurance underwriters will benefit from GUS by getting information in seconds that respond to their inquiries," said B. Joseph Shelley, president of CRS. "GUS will eliminate the need to maintain thousands of awkward reference maps and other materials used to address geographic exposures to risk."

Dominick R. Cortellessa, president of ISOTEL, stressed the value of having a single source for instantaneous underwriting information. "Instead of tying up valuable and expensive time researching multiple sources to get essential information, underwriters will be able to access essential individual-risk information through a single source easily and quickly on-line through the ISOTEL network. Those without access to a terminal can call a toll-free 800 number.

EDS has operations in 28 countries, employs 60,000 worldwide and is the leader in providing information technology services. EDS reported revenues of $5.5 billion in 1989.

Datamap, Inc., based in Eden Prairie, Minn., specializes in Digital Geographic Databases, mapping services and related application software.

HONG KONG (NOV. 26) PR NEWSWIRE - Waste Management International, Inc., today announced that its Enviropace Ltd. unit has been awarded a 17-year contract by the government of Hong Kong to design, construct, maintain and operate a comprehensive chemical waste treatment facility here.

The value of the construction contract is estimated by the company to be $125 million. The Hong Kong government estimates the facility's operating revenues will be at least $420 million over the life of the operating contract.

"This project represents a significant technical and financial investment in the future of Hong Kong by Waste Management and its consortium members," said Edwin G. Falkman, president of Waste Management International. "Our agreement goes beyond the year 2000 and demonstrates our commitment to improving the quality of Hong Kong's environment."

Construction of the facility is expected to begin in the second quarter of 1991 and be completed in early 1993. Waste Management International will operate the facility for the 15 years following its construction.

The facility will incorporate state-of-the-art technologies designed to treat all of the chemical waste generated among Hong Kong's industries. These technologies will include incineration; wastewater treatment, including a unique system to treat wastewaters containing both organic wastes and heavy metals; a high-performance chemical fixation/stabilization process; and a series of chemical and biological treatment processes.

In addition to Waste Management International, equity in Enviropace Ltd. is held by China International Trust & Investment Corporation Hong Kong (Holdings) Ltd. and Kin Ching Besser Ltd.

Waste Management International, Inc., is a subsidiary of Waste Management, Inc. (NYSE: WMX), the world's leading environmental services company. Based in Oak Brook, Ill., the company operates through more than 500 subsidiaries and divisions throughout the United States, Canada, Europe, South America, New Zealand and Australia.

BENSALEM, PA (NOV. 26) PR NEWSWIRE - David Wachs, chairman and chief executive officer of Charming Shoppes Inc. (NASDAQ: CHRS), the retail women's apparel chain, today reported its earnings and sales for the third quarter and

for the nine months ended Nov. 3, 1990.

For the three months ended Nov. 3, 1990, earnings increased 21 percent to $8,584,000 or $.17 per share, vs. earnings of $7,105,000 or $.14 per share for the corresponding period in 1989. Third quarter sales were $218,396,000 in 1990 as against sales of $192,542,000 in 1989, a 13 percent increase.

For the nine months ended Nov. 3, 1990, earnings were $25,812,000 or $.51 per share, vs. earnings of $25,753,000 or $.51 per share for the corresponding nine months of 1989. Sales for the nine-month period increased to $629,127,000 in 1990 from $565,917,000 in 1989, an 11 percent increase.

During the period February through October, the company opened 80 new stores, bringing the total number of operating stores to 1,046 at the end of the third quarter. In total, the company said it expects to open 115 stores this year, bringing the projected number of units operating at year end to 1,060.

BOISE, ID (NOV. 26) PR NEWSWIRE - Boise Cascade Corp. (NYSE: BCC) announced today that it expects results for the fourth quarter of 1990 to be close to break-even, compared with the 27 cents per share (fully diluted) that the company reported in the third quarter of 1990.

Among the factors contributing to the expected fourth-quarter results are: weakening market conditions for coated white papers, market pulp, and corrugated containers; continued costs associated with major expansion and modernization projects at company pulp and paper mills in Rumford, Maine, and International Falls, Minn.; and an increase in interest expense, compared with

that of the third quarter of this year.

In addition, the company's building products segment has been operating at a loss during the fourth quarter as a result of high Northwest wood costs, sluggish demand, and weak prices for wood products. The performance of the company's office products business should be relatively unchanged from that of the third quarter.

Boise Cascade Corp. is an integrated forest products company headquartered in Boise, with operations located primarily in the United States and Canada. The company manufactures and distributes paper and paper products, office products and building products and owns and manages timberland to support these operations.

#90330p9695 11/26/1990 ~PR Newswire

CHICAGO (NOV. 26) PR NEWSWIRE - An advanced system for diagnostic image and information management was introduced here today by Eastman Kodak Company (NYSE: EK) and Vortech Data, Inc.

The Kodak Ektascan Imagelink system captures images from computed tomography (CT), magnetic resonance imaging (MRI) and other modalities within a hospital, and sends them electronically down the hall, across town or across the country. This results in better coordination of information, better decision making, improved referring physician relations, reduced administrative loss and reduced patient stays. The system uses laser scanning to acquire the images from film radiographs.

Major benefits include the security and vast storage capacity of optical archiving, and the capability for rapid distribution of quality images between central viewing facilities, decentralized workstations, and off-site locations such as clinics and physicians' offices.

Cost-control provided by the system's modularity is another important benefit. The system allows a customer to begin with a relatively modest investment and add capability as dictated by need and budgetary constraints.

The Kodak Ektascan Imagelink system, the result of a strategic alliance between Kodak and Vortech, is being shown at the annual meeting of the Radiological Society of North America at McCormick Place through Nov. 30.

Images can be stored and retrieved with advanced optical-disk archiving, and manipulated to suit viewing requirements and preferences. They can be displayed with personal computers, high-resolution screens or distributed to

3-D workstations. They can be recorded with full fidelity on film using laser printing, and reproduced on paper with high-quality thermal printing.

The Kodak Ektascan Imagelink system will be marketed jointly by Kodak and Vortech, and fully backed by Kodak worldwide service and support programs. The system is available today.

DEERFIELD BEACH, FL. (NOV. 26) PR NEWSWIRE - CheckRobot Inc. (NASDAQ: CKRB) announced today that it has received an order to install six Automated Checkout Machines (ACM)(R) in the Navy commissary at Imperial Beach, Calif. This order represents the third Navy commissary to be equipped with ACM systems.

The Imperial Beach installation follows installations in Navy commissaries at Pensacola, Fla. and Norfolk, Va. "We are extremely pleased by the Navy's third order," said A.W. Vitale, CheckRobot's chairman of the board. "The Navy has been an ongoing supporter of automated checkout and CheckRobot." The Imperial Beach installation will be CheckRobot's first commissary installation on the West Coast.

CheckRobot markets and manufactures Automated Checkout Machines for supermarkets. The system is designed to enhance customer service and increase front-end productivity for the supermarket industry. Using enhanced laser bar code scanners and a proprietary merchandise security system, the ACM allows shoppers to scan and checkout merchandise before paying centrally located cashiers.

NEW YORK (NOV. 26) PR NEWSWIRE - According to a nationwide telephone survey of 1,205 men and women aged 18 and over, the Gallup organization estimates that the 1990 Great American Smokeout results were as follows:

-- 37.8 percent of the nation's 50 million smokers participated in the Smokeout. The total number is 18.9 million.

-- 14.9 percent of the nation's smokers were able to stay off cigarettes for 24 hours, totalling 7.4 million.

-- 4.9 million were still not smoking 1-3 days later.

-- Of those surveyed, 81 percent had heard of the Smokeout.

The Smokeout had an even greater effect on minority smokers (blacks and Hispanics) than on the general smoker population. Twenty-five percent of minority smokers, compared with 14 percent of white smokers, managed to get through the day of the Smokeout without lighting up.

"This year's advertising and promotion efforts for the Smokeout reached out more aggressively to minority smokers who are especially targeted by tobacco companies -- and our efforts paid off," said Gerald Dodd, M.D., national president of the American Cancer Society. "We are also gratified by the overall results which show that -- even after 14 years of sponsoring the Smokeout -- the level of participation is stronger than ever. Although we only asked people to quit for a day, 4.9 million people were still smoke-free 1-3 days after the Smokeout -- a jump of one million people over last year. The public is getting the dual message that smoking is not only harmful to their health but also socially unacceptable. We congratulate all those who participated in the Smokeout and urge all smokers to give up this addictive habit."

PAMPA, TEXAS (NOV. 26) PR NEWSWIRE - Service Fracturing Co. (NASDAQ: SERF) announced today that it has signed a definitive agreement to acquire the assets of Service Acid, Inc. of Hays, Kansas for approximately $2.2 million.

Jerry H. Guinn, Serfco president, said that closing of the purchase is expected to occur on or prior to Nov. 30, 1990.

Service Acid, Inc. is owned by Mr. and Mrs. Norman Ruder who will retire from the business. The company has operating districts in Great Bend and Colby, Kan. as well as at Hays. It operates only as a firm to stimulate oil and gas well production by acid treatments.

Service Fracturing, on the other hand, provides acidizing, hydraulic fracturing, pumping and chemical cleanup treatments for both newly drilled and existing oil and gas wells.

Guinn said Serfco intends to add its services other than acidizing in Service Acid's districts at Great Bend, Colby and Hays. He pointed out that the acquisition will fill its service to oil and gas fields in central and northwest Kansas. Serfco currently has operating districts at Liberal and Pratt, Kan. and Fort Morgan, Colo.

#90330p9704 11/26/1990 ~PR Newswire

CAMBRIDGE, MA (NOV. 26) PR NEWSWIRE - Siemens Nixdorf Information Systems,

Inc., today announced a major upgrade of its XBUILD tool for building OSF/Motif graphical user interfaces, incorporating new features that let users customize and extend the tool for more productive development of graphically-oriented software applications.

The company also announced today that it will offer a trial version of the product, which will allow users to test XBUILD's features by building limited-size interfaces before they buy the product.

First introduced in July 1990, XBUILD is an open user interface development tool (UIDT) for painlessly developing, testing, and perfecting production-ready graphical user interfaces based on the OSF/Motif standard from the Open Software Foundation.

A major advantage of XBUILD-generated interfaces is that they can run on any computer hardware platform without any special additional software or "runtime" license fees.

Based on an intelligent object library and easy-to-use editor, XBUILD dramatically reduces the cost and complexity of developing UNIX applications that use the OSF/Motif standard, the company said.

"Motif eliminates the awkward user interface that's been an obstacle to more widespread adoption of UNIX. XBUILD takes it a step further by allowing software developers and end-user organizations to more rapidly develop Motif interfaces," said John Paul, executive vice president of research and development for Siemens Nixdorf Information Systems. "With Release 1.1, we've made XBUILD more powerful and flexible, to match customers' aggressive plans for Motif applications."

"As more and more organizations commit to Motif as a GUI standard, we predict that XBUILD will become the standard user interface development tool for Motif " said Paul.

Graphical user interfaces let users work with computers by activating pictures and other graphical elements on their computer screens, instead of typing in complex text commands on a keyboard.

Because they make computers much easier to learn and use, graphical user interfaces are increasingly a requirement for successful applications software. At the same time, graphical user interfaces can account for as much as 60 percent of the "code" in a typical interactive software application, requiring a large amount of programmer resources.

#90330p9705 11/26/1990 ~PR Newswire

AUSTIN, TX (NOV. 26) PR NEWSWIRE - The Microprocessor and Memory Technologies Group of Motorola Inc. (NYSE: MOT) today announced initial volume shipments of the production version of its 68040 (040) microprocessor.

"The 68000 family has inspired revolutionary products like the Apple Macintosh Hewlett-Packard's laser printer and the NeXT Computer," said Murray A. Goldman, senior vice president and general manager of Motorola's Microprocessor and Memory Technologies Group. "With the 040's breakthrough increases in performance and functionality, it will continue to spark a revolution of its own."

More than 100 companies have sampled early versions of the 040. A total of 36 computer system and board manufacturers, including Apple, Hewlett-Packard/Apollo, NCR, NeXT, and Unisys have announced their intention to use the microprocessor to power their future products.

The 68040 embodies a complete redesign of the 68000 family architecture, helping it deliver from three to ten times the performance of the 68030, while remaining 100 percent software compatible with all other 68000 family members.

Executing 20 million instructions per second (MIPS) and 3.5 million floating-point operations per second (MFLOPS) at 25 MHz, the 040 has the highest throughput of any available mainstream microprocessor, performing up to 14 operations simultaneously. It outperforms both complex- and reduced-instruction-set computing (CISC and RISC) microprocessors like the Intel 80486 and Sun Microsystems' SPARC.

The 68040 is the most advanced single-chip microprocessor ever built. It has 1.2 million transistors, almost four times the number in the 68030. Fabricated with Motorola's 0.8-micron high-performance complementary metal-oxide semiconductor (HCMOS) process, the 040 integrates an integer unit, a floating-point unit, two memory-management units, and two 4-kilobyte cache memories - one for data and one for instructions.

The 040's integer unit can process as many as six separate instructions simultaneously because of its high degree of pipelining - parallel processing at the chip level. The 040 is the first CISC microprocessor that uses on-chip hardware to calculate addresses of data to be read from or written to memory, as well as to prefetch, decode and execute instructions.

Following RISC tenets, instructions and addressing modes used most frequently have been microcoded, with the result that the average 68040 instruction executes in just 1.3 clock cycles, compared to 3.4 cycles for the 68030.

MELVILLE, NY (NOV. 26) PR NEWSWIRE - Genovese Drug Stores, Inc. (AMEX: GDXA), a chain of 95 super drug stores with locations in New York, New Jersey and Connecticut, today announced sales and net income for its third quarter (12 weeks) and 40 weeks ended Nov. 9, 1990.

Sales for the quarter increased by 3.6 percent to $93,461,000. Sales for the 40 weeks were $318,905,000, an 8.2 percent increase over the corresponding period a year ago. The sales results for both the third quarter and 40 weeks set new records for the company.

Net income for the quarter was $983,000 or $.15 per share, a 64.1 percent increase over the $599,000 or $.09 per share a year ago. The current quarter's net income reflects record results. For the 40 weeks, net income of $2,832,000 or $.42 per share reflected an increase of 33.9 percent over the $2,115,000 or $.32 per share a year ago.

During the current fiscal year, two new stores were opened, three were sold or closed, two stores were enlarged and 24 were refurbished.

GENOVESE DRUG STORES, INC.

Third quarter ended	11/9/90	11/10/89

#90330p9715 11/26/1990 ~PR Newswire

ROCHESTER, NY (NOV. 26) PR NEWSWIRE - Working with AT&T Network Systems, Rochester Tel has become the first telephone company in the country to test a prototype residential application of Integrated Services Digital Networks (ISDN). ISDN allows for the simultaneous transmission of voice with data or video communications over one telephone line.

As part of the trial, 35 Rochester homes will be equipped with ISDN and an AT&T home network controller. This device will allow the standard ISDN line to be used with existing customer analog devices while still providing the full range of ISDN services. Customers will not have to incur the expense of changing their telephones to be compatible with ISDN technology.

The controller will provide homes an affordable way to convert a single line into multi-line service with multiple directory numbers. One number could be for the family, one for children and one for business use. Through distinctive ringing, everyone will know who is being called. This will allow two totally separate voice conversations and data connection over one wire coming into the home.

In addition, for the first time ever, trial participants will be using PRODIGY(R) services through its ISDN link. PRODIGY(R) is an inter-active personal computer service designed through a joint venture of Sears and IBM. With PRODIGY(R), users can bank and shop from home, view news, weather and sports information, book and movie reviews, play games, order airline tickets and do much more.

The trial begins this month and will continue for the next four months. Employees of Rochester Tel and three other Rochester area companies are participating; selection was based on the serving central office and other technical criteria.

The results of the research will help AT&T determine whether it will continue

development of this product for commercial distribution and, if so, the eventual configuration of the product.

Rochester Tel will have an indication of the local potential for the product as well as some direction for targeting its marketing effort. It will also give Rochester Tel hands-on experience with ISDN in the residential market and with the deployment of ISDN in general.

CONTACT: Carol Schuhart, project manager of Rochester Tel, (716) 777-7337, or Rich Meyer, media relations of AT&T Network Systems, (201) 606-2453.

DETROIT (NOV. 26) PR NEWSWIRE - Nissan Motor Co., Ltd., Tokyo, today announced its plans to offer a driver-side airbag in most of its U.S. passenger car models by 1992. All Nissan and Infiniti passenger cars sold in the U.S. market will be equipped with a driver-side airbag system by 1993. Several Nissan and Infiniti models are already available with a driver-side airbag as a supplementary restraint system in addition to seat belts.

Nissan first offered an optional driver-side airbag in the Pulsar NX model in January 1989, and the Infiniti Q45 and M30 models that were released in the autumn of last year come with a driver-side airbag as standard equipment. Nissan has since expanded its airbag application to the driver-side of the 1991 300ZX model that was introduced in the U.S. market this fall.

Nissan is scheduled to start offering passenger-side airbags at the beginning of 1992 and will steadily expand their availability to all Infiniti model line and nearly all Nissan passenger cars by 1994. Meanwhile, Nissan commercial vehicles will be provided with driver-side and passenger-side airbag systems by mid-1990s.

In parallel with the airbag installation programs, Nissan will continue its vigorous R & D program to develop new and improved technologies to enhance occupant safety.

#90330p9721 11/26/1990 ~PR Newswire

NEW YORK (NOV. 26) PR NEWSWIRE - Hitachi, Ltd. (ADRs NYSE: HIT), today announced the development of a general-purpose neural computer with learning circuits that can carry out up to 2.3 billion operations per second - the highest learning performance ever achieved by such a computer.

The new neural computer was unveiled today at "Hitachi Technology 1991," a technology fair taking place through Wednesday at the Marriott Marquis Hotel. The neurocomputers, and other scientific advances by the company that have garnered more U.S. patents that anyone else in the last five years, will be demonstrated through the duration of the event.

Hitachi's neural computer, which includes 1,152 neurons and measures a mere 12 inches high, 8.3 inches wide and nine inches deep, is a major step toward the

realization of a practical hardware-based neural computer.

Hitachi, also has developed stock price prediction and signature verification applications which can be run on a workstation linked with the neural system. A stock price prediction takes ten seconds, while signature verification takes two. Until now., a very large and costly supercomputer - of which there are only about 300 in the world - would have required for such processing.

A neural computer is an information processing system which uses a neural network modeled on the human brain. The Naumann-type computers in common use today can handle problems amenable to numerical, comparative, and other types of logical processing at very high speeds. These systems, however, are dawdlers when it comes to tasks that require intuition, such as optimization and pattern recognition.

On the other hand, the neural computer - like their human brain that it imitates - is poor at numerical calculations, but adept at solving problems that involve optimization.

Another feature that sets the neural computer apart is its ability to learn. Like the human brain, the neural computer can quickly store huge quantities of information and come up with an optimized solution almost instantaneously.

It is generally accepted that a practical neural computer will need a neural network consisting of at least 1,000 interconnected neurons. It is simply not possible to stimulate the dynamic and parallel processing functions of the human brain with a smaller network.

The problem with existing hardware-based neural computers has either been that they had too few neurons, or that the learning speed was unacceptably slow.

In September 1989, Hitachi announced a neural network LSI with 576 interconnected neurons. This was the largest number of interconnected neurons that had ever been integrated. It opened the way, at the LSI level, to the development of hardware with a sufficient number of neurons.

JACKSON, MI. (NOV. 26) PR NEWSWIRE - Patrick Petroleum Company (NYSE: PPC) today reported it has purchased for approximately $3.2 million additional interest in the Chacahoula Field, Lafourche Parish, La. Since August of this year, Patrick has paid approximately $5 million for total proved reserves of nearly 732,000 equivalent barrels of oil in this field.

In the recent purchase, Patrick Petroleum acquired interests representing total proved reserves of approximately 360,000 barrels of oil and 418,000 Mcf (thousand cubic feet) of gas, effective Oct. 1, 1990. The acquisition includes two undeveloped locations which will be drilled in 1991.

In a separate transaction, Patrick Petroleum has executed a letter of intent to purchase proved reserves totaling 1,233,000 Mcf and 2,600 barrels of oil located in Terrebonne Parish, La. Upon completion of the Terrebonne Parish acquisition, which is anticipated in December, Patrick will have acquired approximately 940,000 equivalent barrels of oil in 1990, which effectively replaces its estimated production for the year.

Patrick Petroleum Company is an independent exploration and production company listed on the New York Stock Exchange since 1976 (symbol-PPC). The company has interests in producing properties and undeveloped acreage in 13 states, including various interests in approximately 549 oil and gas wells located primarily in Michigan, North Dakota, Texas, Oklahoma and Louisiana.

DAYTON, OH (NOV. 26) PR NEWSWIRE - The board of directors of The Duriron Company, Inc. (NASDAQ: DURI) has elected Kevin E. Sheehan as a director of the company, effective Dec. 1, 1990. The 45-year-old native of New Milford, Conn. is presently serving as vice president-Components Group of Cummins Engine Company, Inc., located in Columbus, Ind.

In making the announcement, Duriron's chairman of the board and chief executive officer, John S. Haddick, said, "Mr. Sheehan's expertise in manufacturing operations and technology should be highly beneficial to the company in achieving our Total Quality goals." Over the past several years, Duriron has been moving aggressively into cellular manufacturing and is emphasizing continuous quality improvement throughout its various worldwide production facilities.

A graduate of Williams College (B.A. 1966) and Harvard University (M.B.A. 1971), Sheehan joined Cummins in 1971 as a production line foreman. After serving in a variety of employee relations positions, he became engine plant manager in 1977, vice president-Management Systems in 1980, vice president-Parts in 1983 and vice president-Distribution in 1984. Sheehan has been vice oresident-Components Group since 1986.

Residing in Nashville, Ind., with his wife, Barbara, and two sons, Sheehan has

been active in local mental health programs, religious and social activities.

NEW YORK (NOV. 26) PR NEWSWIRE - Alan H. Fishman, 44, will be joining Adler & Shaykin as a managing partner, it was announced today by Leonard P. Shaykin, co-founder of this leading New York-based leveraged buyout firm.

Fishman is president of the Financial Services Group of American International Group, Inc. From 1969 to 1988, Fishman was at The Chemical Bank of New York where he served in numerous executive capacities including chief financial officer and senior executive vice president in charge of equity investments, merchant banking and real estate.

Shaykin said, "As we move into the nineties a premium will be placed on investment professionals with broad experience, maturity and judgment -- traits which Alan has consistently demonstrated throughout his career. We are all delighted that he is joining us as a managing partner of the firm."

Fishman said, "Over the next three years the investment opportunities available to prudent, private, professionally managed capital will be unprecedented. I am excited by the opportunity of working with the other partners of Adler & Shaykin in building the firm and its leveraged investment portfolio."

Fishman graduated from Brown University in 1967 with a B.A. in economics. He received his M.B.A. degree from Columbia University Graduate School of Business in 1969. Fishman resides in Brooklyn Heights, N.Y., with his wife, Judith, and their two children.

ST. PAUL, MN (NOV. 26) PR NEWSWIRE - Northwest Airlines today announced that Hertz car rental and Holiday Inn hotels will become partners in the airline's WorldPerks free travel program Jan. 1.

Northwest WorldPerks members will earn 500 frequent flier miles toward free tickets on Northwest each time they rent from Hertz or stay at a Holiday Inn in connection with a Northwest flight. Hertz and Holiday Inn also will provide special offers to Northwest WorldPerks members.

Hertz is the world's largest car rental company with 5,000 locations in more than 120 countries and a fleet of 400,000 vehicles. In the United States, Hertz serves more than 1,500 locations, including 500 airports.

"We're proud to be associated with a great airline like Northwest and are looking forward to serving more of its frequent fliers," said Brian Kennedy, Hertz executive vice president, marketing and sales.

Holiday Inn Worldwide is the world's largest hotel chain with nearly 1,600 properties in 51 countries or territories and 316,000 rooms. This is the company's first systemwide affiliation with an airline frequent flier program.

"Our market research shows about 40 percent of the room rentals by business travelers at Holiday Inns involve an airline flight, and 33 percent of our guests rent a car," said Ray Lewis, Holiday Inn Worldwide senior vice president of marketing. "This connection enhances our partnership with Northwest and enables us to build even stronger relationships with our customers."

WorldPerks members receive a free roundtrip ticket after accumulating just 20,000 miles, which can be earned by flying Northwest, using the services of participating car rental companies or hotels, charging with the WorldPerks Visa credit card or calling long distance. Membership in WorldPerks is free.

"We want to provide the highest possible level of opportunity for our frequent fliers to earn extra mileage, and having Hertz and Holiday Inn as members will allow us to accomplish that," said John Temple, Northwest vice president of marketing programs.

Northwest is America's fourth largest airline, and along with its Northwest Airlink partners serves more than 200 cities in North America, Europe and Asia.

SOUTH PLAINFIELD, NJ (NOV. 26) PR NEWSWIRE - Princeton Diagnostic Laboratories of America, Inc. ("PDLA") (AMEX: PDA), today announced that Susie Lucas McClellan has been appointed vice president of sales and marketing.

Carlton Turner, PDLA's president and CEO, stated, "Ms. McClellan's extensive technical knowledge, sales track record and strong management skills are exactly what we need to ensure growth while maintaining our personalized client service and attention."

McClennan joined the Syva Co. in 1981 as a technical sales representative in the drug abuse marketplace for criminal justice and drug treatment programs. She then became one member of the two-person sales and marketing start-up team and played a role in the rapid growth and record sales at CompuChem Laboratories.

Since April of 1988, Ms. McClellan has played a key role in PDLA's growth and has been promoted from a sales representative to national sales manager/director of sales before being promoted to vice president of sales and marketing.

Ms. McClellan's responsibilities will also include the National Consortium for a Drug Free Workplace (NCDFW), a PDLA subsidiary which complements PDLA's NIDA-certified lab with a complete service package including collection services, medical review officer and training.

PDLA is a specialized laboratory providing a full range of biomedical testing services to psychiatric hospitals, clinics and private physicians.

PDLA's certified laboratory is authorized to provide drug testing services to government agencies and businesses regulated by the U.S. Department of Transportation, contractors for the Department of Defense and other industries subject to federal drug testing guidelines.

PDLA's diagnostic drug tests utilize a forensic approach and are used as pre-employment drug screenings by businesses involved in transportation, oil and chemical, nuclear power, finance, security, general manufacturing, media and sports.

MELBOURNE, FLA. (NOV. 26) PR NEWSWIRE - The U.S. Army has awarded Harris Corporation's Government Electronic Systems Division (GESD) a contract valued at $11 million to produce portable tactical communications systems. The Army may also select options increasing the contract value to $59 million.

The two-year contract was awarded by the U.S. Army's Communications-Electronics Command at Fort Monmouth, N.J.

Harris GESD will integrate, test, and deliver the Digital Group Multiplexer Antenna Mast Program (DAMP) systems. The systems will be used in forward communications outposts and include an antenna positioner and a graphite mast adjustable from three to 30 meters in height. The mast can be manually erected in one hour and then easily stowed for transportation to another location.

Harris will deliver 200 mast assemblies and 75 transport pallet assemblies. Under the contract, the Army has the option of ordering up to 1,800 additional masts and 900 transport assemblies.

As prime contractor, Harris will integrate the DAMP systems and design and build the pallet assemblies, which support and protect the ancillary equipment masts, and positioners while they are being stowed and transported.

Government Electronic Systems Division is part of Harris' Electronic Systems Sector, which conducts advanced research studies, develops prototypes and produces a broad range of state-of-the-art systems for government agencies and commercial organizations in the U.S. and overseas.

Harris Corporation (NYSE: HRS), with worldwide sales of more than $3 billion, is focused on four major businesses: Electronic systems, communications, semiconductors and office equipment.

FOUNTAIN VALLEY, CALIF. (NOV. 26) PR NEWSWIRE - Newport Corp. (NASDAQ: NEWP) today reported sales for the first quarter ended Oct. 31, 1990, totaled $14,863,000, an 8 percent increase over the $13,802,000 reported for the previous year.

Net income for the first quarter was $540,000, or 8 cents per share. This

compares with $1,147,000 (14 cents per share) for the corresponding quarter of the 1990 fiscal year.

"International sales," noted Tom Galantowicz, president of Newport, "totaled $4,343,000 for the quarter, up 19 percent over 1990 levels; while domestic sales totaled $10,520,000, a 4 percent increase over 1990 levels."

Galantowicz continued, "Income from operations declined from the prior year level reflecting selective repricing to reposition product lines competitively for improved market share and continued investments in international markets where we are building a strong market presence. In addition, domestic sales were impacted by uncertainties created by the delayed passage of the 1991 federal budget.

"Other income," Galantowicz said, "declined from the prior year level because of unanticipated losses in our marketable securities portfolio related to the sharp drop in the equities markets."

Galantowicz concluded, "We anticipate improved performance for the remainder of this fiscal year because of continued strong international sales, contribution from new products and recently implemented cost containment actions."

Newport Corp. is the leading worldwide manufacturer and marketer of precision laboratory equipment for scientists and engineers who develop and apply technology involving lasers and optics. Customers include Fortune 500 corporations, national research laboratories, government and educational institutions.

#90330p9752 11/26/1990 ~PR Newswire
NEW YORK (NOV. 26) PR NEWSWIRE - Two new flavors and a reduction in the amount needed per dose are among the features of the new Concentrated Phillips' Milk of Magnesia. Concentrated "MOM" began shipping to the trade in August, and is the subject of a major marketing effort, which began in October.

Phillips', a product of Glenbrook Laboratories, the domestic over- the-counter (OTC) medicines division of Sterling Drug Inc., is a leader in the OTC laxative market. This market was estimated at $725 million in 1989.

The amount needed for each dose of Phillips' has also been modified. Instead of two to four tablespoons of the original, the Concentrated Phillips' dosage is one to two tablespoons. The dosage cup has been downsized to reflect this change.

As part of a coordinated marketing effort, Glenbrook will mail 2- ounce samples of Concentrated Phillips' and coupons to users. "We are confident that once users try the new Phillips' with its new flavors, improved taste and reduced amount per dose, they will realize it tastes as good as it works," Gaccione added. Extensive television advertising and couponing, as well as a targeted physicians campaign, are also planned to promote Concentrated Phillips'.

Customer driven Glenbrook Laboratories has introduced a number of product enhancements this year, including BAYER Plus, aspirin plus Stomach Guard, and Stri-Dex Dual Textured Acne Pads. Glenbrook also introduced Dairy Ease, a natural nutritional supplement that is designed to help consumers nutritionally manage lactose intolerance and enjoy dairy foods without discomfort. (Other Glenbrook products include Midol pain relievers, Campho-Phenique antiseptics and Neo-Synephrine decongestants.)

Sterling Drug Inc. is a worldwide producer and marketer of pharmaceutical and consumer health products. Guided by its Strategic Framework management process and Values in Action, Sterling, its companies and employees are a worldwide team committed to creating distinctive solutions for the needs of mankind in pharmaceutical and consumer health products.

CHICAGO (NOV. 26) PR NEWSWIRE - A significant expansion of the business alliance between Navistar International Transportation Corp., the principal operating subsidiary of Navistar International Corp. (NYSE: NAV), and DINA Camiones, a major Mexican truck manufacturer, was announced today by the two companies.

Navistar disclosed it has increased from 5 percent to 17 percent its common stock equity investment in DINA. Second, the two companies have signed an engine supply agreement. The agreement provides that the International DT 466 family of mid-range diesel engines, produced by Navistar, will become the standard power plant for DINA medium trucks beginning in the Spring of 1991. Financial details were not disclosed.

DINA Camiones is a private corporation, and a unit of Consorcio "G," created in 1989 following the denationalization by the Mexican government of key segments of the automotive industry. Navistar, which made its initial investment in DINA Camiones in 1987, had been a supplier for more than 20 years to Diesel Nacional, the former government controlled parent company of the medium and heavy truck manufacturer.

Depending on market conditions in Mexico, the engine supply agreement is expected to add 3-5,000 engines annually to the production schedule at Navistar's Melrose Park, Ill., engine plant. Engines will be shipped from Melrose Park to DINA's truck assembly plant in Sahagun, Mexico.

Today's announcement further strengthens a long-term agreement which the two companies signed in November 1989. Under that agreement, Navistar is providing technical support and counsel to enable DINA to incorporate the aerodynamic and engineering features of selected current models of International brand medium and heavy trucks that are appropriate for the Mexican market.

In addition to the engine supply agreement, truck cab components for DINA trucks are being fabricated at Navistar's Springfield, Ohio Body Plant for export to Mexico. The majority of the other components for the medium and heavy DINA trucks are sourced in Mexico by DINA.

Navistar is the leading manufacturer of medium and heavy trucks in North America and the worldwide leader in the production of mid-range diesel engines.

#90330p9755 11/26/1990 ~PR Newswire

WASHINGTON (NOV. 26) PR NEWSWIRE - Two American economists were honored today by Volvo, the Swedish car maker, for their pioneering work in putting a price tag on air and water pollution.

Professors John V. Krutilla and Allen V. Kneese are the recipients of the first annual Volvo Environment Prize. Kneese could not attend the official awards ceremony Nov. 8 in Gothenburg, Sweden, so a reception was arranged for today at the National Academy of Sciences.

Krutilla and Kneese are senior fellows at Resources for the Future, an independent nonprofit think-tank established in 1952. Their work, begun during the 1950's when there was minimal concern for the environment, led to the cost-benefit analyses contained in environmental impact studies.

Prior to Krutilla's and Kneese's groundbreaking work, economists regarded air and water as free commodities, since they lacked market-pricing mechanisms. Economists studying the consequences of growth previously had not assigned costs to environmental degradation.

In explaining its choice from a field of 40 nominees, the Volvo Environment Prize Selection Committee said that Krutilla and Kneese "were pioneers in developing the theory of environmental economics and in demonstrating how that theory can be applied to inform public policy decisions on various concrete issues. Their work laid the foundation for a growing body of research and knowledge about the complex relationships between the environment and the economy."

Krutilla, 68 years-old, began his work studying the economic consequences of hydroelectric projects on the environment. Krutilla's research made it possible to establish economic values for such diverse ecological elements as endangered species and undisturbed scenic resources.

Kneese, 60 years-old, focused his research on the management problems associated with water resources. In his 1964 book "The Economics of Regional Water Quality Management," Kneese documented for the first time the interaction of economic and physical considerations in managing wastewater discharges into rivers and oceans.

JACKSON, MI (NOV. 26) PR NEWSWIRE - CMS Energy Corporation's (NYSE: CMS) oil and gas exploration unit, Nomeco Oil and Gas Co., today announced it has purchased for $3,150,000 an additional 20.6 percent working interest in the J. B. Levert Land Co. No. 1 well in the Chacahoula Field, LaFourche Parish, La. Also participating in the acquisition is Patrick Petroleum Company (NYSE: PPC) of Jackson.

The interest acquired covers 431,000 net equivalent barrels of proved reserves. Previously, Nomeco announced acquisitions in the well of approximately 294,000 net equivalent barrels of oil.

Today's announced acquisition brings Nomeco's working interest in the well and related properties to 30 percent. The Levert No. 1 well will be operated by Nomeco. Additional drilling and development work is planned for the property.

Nomeco also announced that the Parker No. 1 well in the Indian Village Field in Allen Parish, La., flowed at rates as high as 180 barrels of oil per day, in addition to 300,000 cubic feet of natural gas per day on a short-term test, from a 16-foot zone at 10,100 feet. Now shut in, the well is awaiting hookup to a commercial sales line.

Nomeco and Nicor Inc. each have a 50 percent interest in the well, with Nicor the well operator. The partners plan to drill additional wells to determine the extent of the field.

"Louisiana has been an important focus of our attention this year, and will continue to be in the future," said Richard J. Burgess, president and chief executive officer of Nomeco.

Previously, Nomeco announced it had spent $3 million to purchase working interests in the Bayou Penchant Field in Terrebonne Parish. Additionally, Nomeco earlier this year said it had spent $6 million to acquire a 100 percent interest in three oil wells in Lake Fortuna Field, St. Bernard Parish.

Nomeco also said it had completed and tested for production a well in the Bryceland Field, Bienville Parish. The well, the Davis No. 1, tested at a combined rate of more than four million cubic feet of gas and 15 barrels of condensate per day. Nomeco operates the well and owns a 43.75 percent working interest in it.

Nomeco is among the top 100 oil and gas companies in production and reserves

and is Michigan's largest independent oil and gas producer. It is engaged in exploration and/or production activities in 14 states and seven foreign countries.

CMS Energy Corporation is a $3 billion (sales) diversified energy company with businesses engaged in the distribution of electricity and natural gas, interstate storage and transmission of natural gas, oil and gas exploration and production, independent power generation and utility services.

#90330p9765 11/26/1990 ~PR Newswire

ST. LOUIS (NOV. 26) PR NEWSWIRE - The prime contractor for IBM has chosen Southwestern Bell Telephone Company (SWBT) to build a multimillion-dollar building distribution system (BDS) at an expansion of the company's research and development facility in Austin, Texas.

BDS is a custom-designed communications network for one building or a group of buildings. It also includes network communications devices which tie the buildings to other networks.

Austin Commercial, Inc. awarded the job to SWBT through a competitive bidding process. Terms of the contract were not disclosed but it's SWBT's largest BDS sale.

IBM's system will provide voice and data communications capability for the company's new one-million-square-foot campus across from its North Austin offices on Burnet Road.

The seven-building facility will house the consolidated development groups of IBM's Advanced Workstation Division and the Austin Programming Center, a part of the Entry Systems Division. About 3,400 engineers, programmers and support employees are moving from leased space to the buildings.

"We've done other jobs for IBM, but nothing this large," said Steve Millstein, SWBT's division manager for business marketing. "This is a great opportunity to show customers the value of a planned distribution system and SWBT's expertise in building them."

Installation has begun and the project will be completed in July 1991. SWBT expects that 10 to 20 employees will be involved in the construction of the building distribution system.

"Designing and installing voice, data and video networks is a natural for SWBT. Connectivity has been our business for 100 years," Millstein said.

He noted that SWBT also offers local area networks (LANs) as part of the product group called BDS & LAN. The BDS & LAN product line includes five integration services: consulting, designing, installation, administration, and maintenance. As a systems integrator, SWBT connects a wide variety of hardware software and communications media to develop networking solutions.

Southwestern Bell Telephone Company is a wholly owned subsidiary of Southwestern Bell Corporation (NYSE: SBC) and provides telecommunications service to nearly nine million customers in Kansas, Oklahoma, Arkansas, Texas, and Missouri.

#90330p9774 11/26/1990 ~PR Newswire

JACKSON, MI. (NOV. 26) PR NEWSWIRE - It may surprise you to learn that if you come home to blinking alarm clocks, VCR timers and other appliances, it could be a sign that Consumers Power Company has prevented an extended power outage.

That's the message from Prateep Ghose, manager of T & D operations for Consumers Power. When lightning, heavy storms or ice interfere with electric lines, automatic circuit breakers interrupt power momentarily to clear the lines. These "momentaries" -- sometimes called "blips and dips" in the utility industry -- help prevent extended outages, but can cause appliances with timers to shut down long enough so that the clock blinks.

"We've always had these momentary stoppages, but they weren't apparent to customers until the proliferation of digital clocks and computers," said Ghose. A momentary generally lasts for only a fraction of a second, he said.

An electric system is intentionally designed to turn the power off and back on quickly when there is line trouble. Automatic switches turn the power off and on to prevent the temporary problem from causing a long power outage.

An estimated 80 percent to 90 percent of all electric line problems are temporary and last no more than a few seconds. If a problem is more complex, such as a fallen tree bringing a wire to the ground, the system is designed to isolate the damaged section of the line from the rest of the system. That way fewer customers are inconvenienced by loss of power.

According to company records, even with the momentary interruptions, Consumers Power customers have power over 99 percent of the time. The utility regularly monitors its electric system for areas where upgrading and improvements are needed.

As for the irritating blips and dips, they are becoming less common. Some manufacturers of equipment with digital clocks are building in small batteries

that will "hold" the time until power is restored.

Consumers Power Company, the principal subsidiary of CMS Energy Corporation (NYSE: CMS), is Michigan's largest utility serving almost 6 million of the state's 9 million residents in 67 of the 68 Lower Peninsula counties.

NEWARK, CALIF. (NOV. 26) PR NEWSWIRE - Ross Stores Inc. (NASDAQ: ROST) today reported net earnings for the 13 weeks ended Nov. 3, 1990 of $206,000, or 1 cent per share, as compared to net earnings of $4.2 million, or 18 cents per share, for the prior year's comparable quarter. Current year third quarter sales were $186 million, up 5 percent from the $177 million in sales generated for the 13 weeks ended Oct. 28, 1989. Comparable store sales for the quarter were down 7 percent from the prior year on a day-for-day basis.

For the nine months ended Nov. 3, 1990, net earnings totaled $6.8 million, or 29 cents per share, as compared to net earnings of $14.7 million, or 60 cents per share, for the same period in 1989. Sales during the first nine months of fiscal 1990 increased 7 percent to $551 million, from the $508 million in sales for the prior year's comparable period ended Oct. 28, 1989. Comparable store sales for the nine months were down 4 percent on a day-for-day basis from last year.

In commenting on these results, Norman A. Ferber, President and Chief Executive Officer, stated, "We continue to be dissatisfied with our results to date this year. The combination of disappointing sales during the quarter, especially in our junior sportswear and children's departments, and the increased markdowns that resulted, negatively affected our earnings

performance. We are encouraged, however, by the increase in same store sales in our misses sportswear business during the past three months. We believe this indicates that the steps we are taking to better meet the needs of our core misses customer will strengthen the company over the long term."

Ross Stores Inc. operates a national chain of off-price retail stores offering first quality, in-season, branded apparel and apparel-related merchandise for the entire family. The company had 175 stores in operation at Nov. 3, 1990, compared to 147 stores at the end of the same period last year.

MOSCOW (NOV 26) TASS - A POLITICAL SOLUTION REMAINS TO BE THE CHIEF SOVIET GOAL IN THE GULF CRISIS, GORBACHEV TOLD THE PARLIAMENT.

HE CALLED FOR JOINT EFFORTS WITHIN THE FRAMEWORK OF THE UNITED NATIONS, SAYING THAT ALL ACTIONS SHOULD BE BASED "ON DECISIONS BY THE UNITED NATIONS AND THE SECURITY COUNCIL."

THE SOVIET UNION WILL CONTINUE TO COOPERATE WITH OTHER COUNTRIES TO SHOW SADDAM HUSSEIN THAT THERE IS NO HOPE THAT HE CAN BREAK INTERNATIONAL UNITY, GORBACHEV SAID.

"WE CANNOT ALLOW THIS SINCE WE HAVE JUST STARTED MOVING AWAY FROM THE COLD WAR " HE SAID.

"WE ARE DEVELOPING NEW MECHANISMS TO SEEK POLITICAL SOLUTIONS TO ANY SITUATIONS," HE SAID.

"WE SHOULD PROVE TO OURSELVES AND TO ALL NATIONS THAT WE CAN SOLVE THE MOST ACUTE CONFLICTS BY POLITICAL MEANS CHARACTERISTIC OF THE NEW EPOCH," HE SAID.

AFTER GORBACHEV'S SPEECH, THE PARLIAMENT PASSED A RESOLUTION APPROVING THE WORK OF THE SOVIET DELEGATION AT THE PARIS SUMMIT.

MOSCOW (NOV 26) TASS - PRESIDENT MIKHAIL GORBACHEV MET A DELEGATION OF THE PARLIAMENTARIANS FOR GLOBAL ACTION INTERNATIONAL ORGANISATION TODAY.

THE DELEGATION IS MEETING SOVIET, BRITISH AND U.S. LEADERS IN THE RUN-UP TO A U.N. CONFERENCE ON A COMPLETE BAN OF NUCLEAR TESTS, TO OPEN IN NEW YORK IN THE BEGINNING OF JANUARY.

GORBACHEV PRAISED THE ROLE OF PARLIAMENTS IN THE DISARMAMENT PROCESS. HE SAID CONSIDERABLE PROGRESS HAS BEEN MADE IN AVERTING THE THREAT OF WAR, ESPECIALLY AT THE RECENT PAN-EUROPEAN SUMMIT IN PARIS.

HE ALSO SPOKE ABOUT PROBLEMS PROMPTED BY CONVERSION OF MILITARY INDUSTRIES AND ARMS CUTS.

SPECIAL ATTENTION WAS PAID TO THE GROWING THREAT OF THE PROLIFERATION OF NUCLEAR ARMS, THE ELIMINATION OF WHICH IS DIRECTLY LINKED WITH THE PROBLEM OF ENDING NUCLEAR TESTS, GORBACHEV SAID. THE NEED TO STEP UP VERIFICATION ON THE TREATY ON THE NON-PROLIFERATION OF NUCLEAR WEAPONS AND TO MAKE ALL SIDES JOIN IT WAS STRESSED. DEVELOPMENTS IN THE GULF ARE A SERIOUS SIGN FOR INTERNATIONAL POLITICS IN THIS RESPECT.

PARLIAMENTARIANS RAISED THE QUESTION OF POSSIBLE NEW INITIATIVES THAT COULD BE PRESENTED DURING THE OPENING OF THE NEW YORK CONFERENCE -- IN ORDER TO GIVE AN ADDED IMPETUS TO THE MOVEMENT FOR THE BANNING OF NUCLEAR TESTS, REPRESENTED BY PARLIAMENTARIANS FROM 40 COUNTRIES.

GORBACHEV ASSURED THE VISITORS THAT THE POLICY TOWARDS A NUCLEAR-FREE WORLD, PROCLAIMED BY THE SOVIET LEADERSHIP IN JANUARY 1986, HAS NOT CHANGED.

THE SOVIET UNION IS PREPARED TO STOP ITS TESTS TOMORROW IF OTHER NUCLEAR NATIONS FOLLOW SUIT, GORBACHEV SAID.

BROCKTON, MA (NOV. 26) UPI - A Brockton woman has won freedom for her twin brother being held hostage in Iraq, her husband said Monday.

Dennis Trundy of Brockton said he received a telephone call Monday morning from his wife, Mary, in Baghdad saying that the Iraqi government has agreed to release her twin brother, John Stevenson, 44.

Stevenson, who was in Kuwait as a bank computer analyst, was taken captive by Iraqi forces Oct. 20 after Iraq invaded Kuwait.

''They secured his release,'' Trundy said his wife told him.

Trundy said the agreement came following a meeting Monday between his wife, two other brothers and Iraqi leader Saddam Hussein.

Just when they all will be able to leave Iraq remains a question, however.

''What they're trying to do now is trying to secure his passport to get out, and then a flight. I don't think they're going to get out today because the flight looks like it's booked. They will probably be leaving Baghdad within the next couple of days,'' Trundy said.

Mary Trundy and two other brothers from Florida - William and James Stevenson - went to Baghdad to visit their hostage sibling over Thanksgiving at the invitation of the Iraqi government, despite warnings against doing so by the U.S. State Department.

Stevenson was being held in a Baghdad hotel where his sister and two brothers were able to visit with him during their stay.

''John is in the same hotel as Mary and her brothers. They have seen him every day since last Tuesday,'' Trundy said earlier.

''John is in good spirits, but he cannot go outside the hotel. He must stay in the courtyard and on the grounds.''

#90330u0084 11/26/1990 ~United Press International

(NOV. 26) UPI - Even after Ron Hextall and Ken Wregget get healthy, the Philadelphia golatenders may find themselves watching the Flyers from the bench.

Pete Peeters, picked up by the Flyers when injuries sidelined the two goalies expected to anchor the team, stopped 25 shots Sunday night to lead Philadelphia to a 4-1 victory from the New York Islanders.

Peeters, making his 11th straight start, improved to 6-3-1 and lowered his goals-against average to 2.21, third-best in the league.

''Everybody feels comfortable and confident in him,'' Philadelphia Coach Paul

Holmgren said. ''He's stood tall and made some big saves in the second period. He's played extremely well.''

The victory left the Flyers four points behind the first-place New York Rangers but Philadelphia is 4-7-1 against other teams in the Patrick Division, worst among the six teams in the division.

''We know we've been doing poorly against Patrick Division foes and we'll be playing a lot of division teams,'' Peeters said. ''We know we have to assert ourselves, otherwise we could drop sharply in the standings.''

Sunday night's game was the first of four straight intra-division contests, with games on tap this week against the Islanders, New Jersey and the Rangers.

''(Our division record) is still poor,'' Holmgren said. ''We've got a lot of games left against division teams. It was a big win tonight with three more coming up in succession.''

The Flyers took a 2-0 lead on their first two shots of the game.

Gord Murphy scored on the power play at 1:28 of the first period and Mike Ricci, a rookie, added his fifth goal of the season at 10:40.

Murphy took a return pass from Pelle Eklund and put his shot inside the right post for his seventh goal of the season.

Ricci took a pass from Rick Tocchet and fired a shot past New York goaltender Jeff Hackett for an early two-goal lead.

The Islanders closed within 2-1 on Gary Nylund's second goal of the season at 13:58 of the first period. Brad Dalgarno skated behind the Philadelphia net and passed to Nylund in the left circle. Nylund's shot beat Peeters to the far side.

The Islanders outshot Philadelphia 14-10 in the second period and also had the advantage in scoring opportunities but Peeters made several tough saves to preserve the Flyers' one-goal lead.

Philadelphia picked up the tempo in the third period and Hackett had to make saves on Ron Sutter, Mark Howe and Rick Tocchet to prevent the Flyers from adding to their lead.

Peeters was also tested on several occasions but did not surrender the equalizer.

''Right away they got a power-play goal and then they got another one,'' Islanders Coach Al Arbour said. ''It was really a 2-1 game. Pete Peeters came up big time and again with some key saves and he lifted the team.''

Tocchet scored his 16th goal of the season into the empty net at 19:24 and Murphy added his eighth at 19:48 for the final margin.

-- AROUND THE NHL --

Elsewhere in the NHL Sunday night, Montreal edged Winnipeg 4-3 and Quebec tied Los Angeles 4-4.

CANADIENS 4, JETS 3

At Montreal, Andrew Cassels scored the game-winning goal during a third period scramble, lifting the Canadiens. Cassels fired the puck from the slot through a maze of players blocking Jets goalie Bob Essensa from seeing the shot. Paul MacDermid scored two goals for the Jets and Stephon Lebeau had two for Montreal.

NORDIQUES 4, KINGS 4

At Quebec, Jamie Baker scored his first career goal with 3:48 remaining in the third period, helping the Nordiques overcome a two-goal deficit. Even with the tie, the Nordiques are now winless in a club record 17 games, going 0-15-2 in the span. Wayne Gretzky had a goal, his 15th, and two assists for the Kings.

#90330u0101 11/26/1990 ~United Press International

(NOV. 26) UPI - The San Francisco 49ers and New York Giants, linked in a quest for perfection through 10 games, were joined Sunday in defeat.

Both tumbled to division foes one week before their Monday night meeting in San Francisco. The Los Angeles Rams stunned the 49ers 28-17 in San Francisco, and the Eagles whipped the Giants 31-13 at Philadelphia.

If the 49ers and Giants won, they would have been the first 11-0 teams to face off in NFL history.

They had plenty of company Sunday, when the elite got beat. All five of the division leaders who played, lost. Minnesota clubbed NFC Central- leading Chicago, 41-13; Kansas City shaded the Los Angeles Raiders 27-24 to draw even in the AFC West; and Indianapolis smashed Cincinnati 34-20, costing the Bengals their lead in the AFC Central.

At San Francisco, Cleveland Gary scored three touchdowns to help the Rams prevent the two-time defending Super Bowl champion 49ers from what would have been an NFL record 19th straight victory.

''When you give the ball up a lot, that's the kind of thing you can't do

against a team like the Rams,'' 40ers quarterback Joe Montana said after throwing three interceptions. ''No matter what their record.''

The Rams, 4-7, forced four first-half turnovers to race to a 21-7 halftime lead, and then survived a 10-point San Francisco third quarter. Montana threw a 23-yard TD pass to Harry Sydney on a screen pass and Mike Cofer added a 42-yard field goal but Gary capped a 90-play drive that took 10:37 with a 1-yard run to put the Rams safely in front.

Buford McGee ran for a TD and threw a 22-yard halfback option pass to Gary for another to help the Rams to their halftime lead. The 49ers would have clinched their fifth straight division title with a triumph.

''It feels great to beat the best,'' Rams quarterback Jim Everett said. ''We've been through some hard times this year, but this is exactly what it's all about. I think we match up well against them.''

At Philadelphia, Randall Cunningham passed for two TDs and ran for a third to lift the Eagles, 7-4, to their fifth straight victory.

''I would have preferred to remain in dreamland,'' said Giants quarterback Phil Simms, who threw two interceptions to match his total through the first 10 games.

''Sure, it's disappointing. We would have liked to go undefeated. I don't think we didn't have any spirit out there. We just plain got beat. It was pretty simple.''

Cunningham, who completed 17 of 31 passes for 229 yards and ran for 66 more, threw to Fred Barnett for a 49-yard TD and to Calvin Williams for a 6-yard score and snuck into the end zone from the 1.

''No question, it's a special win for us,'' Philadelphia Coach Buddy Ryan said. ''It's the kind of game you dream about. We played an excellent game.''

The Giants could have clinched the NFC East title with a victory over the second-place Eagles, 7-4, who have topped New York in five of their last six meetings and handed the Giants their last regular-season loss.

At Minneapolis, Rich Gannon threw three TD passes, Herschel Walker scored twice and the Vikings sacked Jim Harbaugh seven times to lift the Vikings, 5-6 to their fourth straight. The Bears, 9-2, had a six-game losing streak snapped.

Minnesota linebacker Mike Merriweather led the defensive charge. He returned one of two fumble recoveries 33 yards for a TD, made eight solo tackles and four assists, registered 1.5 sacks and forced two fumbles.

''Once the truck hit me I didn't bother to get up,'' Chicago Coach Mike Ditka said. ''I just layed there and watched.''

''It wasn't a truck,'' Harbaugh said. ''It was something bigger.''

At Los Angeles, Steve DeBerg threw three TD passes, two to running back Bill Jones in the second half, to give the Chiefs their first season sweep over the Raiders since 1981. The Chiefs and Raiders are tied at 7-4.

DeBerg hit Jones for two 11-yard scores and found Emile Harry for a 19-yard TD to counter a three-touchdown performance by Raiders running back Marcus Allen.

''We're really disappointed; we're a better team than we showed today,'' said Allen, who finished with 76 yards on 15 carries. ''This is my ninth season. The Raiders have never done anything easily.''

At Cincinnati, Eric Dickerson finally broke loose, gaining 143 yards on 22 carries for his first 100-yard game of the season. He also scored once and had gains of 43, 32, 17 and 14 yards.

''I can still run,'' Dickerson said. ''There's no doubt about it. Even if I have lost a step, I can still outrun most defensive backs.

''It's nice to break into the secondary. I hadn't done it for so long. It's the first time I went deep this year.''

Dickerson cracked 100 yards for the 59th time in his career, second to Walter Payton's 77 100-yard games. He also scored his 83rd rushing TD to match Jim Taylor for fifth place on the career list.

The Colts improved to 5-6. The Bengals, who received two TD passes by Boomer Esiason, dropped to 6-5 and into a tie with Pittsburgh in the AFC Central.

At East Rutherford, N.J., the Steelers broke open a close game with fourth-quarter TDs by Merril Hoge and Louis Lipps for a 24-7 victory over the New York Jets.

The Steelers outscored New York 17-0 in the second half to drop the Jets to 4-8 with their third straight loss. Hoge's 1-yard TD run 94 seconds into the fourth quarter was set up by Larry Griffin's 36-yard interception return and gave the Steelers a 17-7 lead. Lipps added a 3- yard TD catch from Bubby Brister with 7:24 left.

In other games Sunday, Miami burned Cleveland 30-13, Green Bay decked Tampa Bay 20-10, New Orleans shaded Atlanta 10-7, and Phoenix clubbed New England 34-14.

In the Sunday game, Seattle edged San Diego 13-10 in overtime. On Monday night

game, AFC East leader Buffalo plays at Houston.

Dolphins 30, Browns 13

At Cleveland, Dan Marino threw for 245 yards and two TDs to pass the 30,000-yard barrier to lift the Dolphins. Marino completed 16 of 29 passes, was not intercepted, and finished the game with 30,099 career yards. By cracking 30,000 yards in 114 games, Marino reached the mark quicker than any quarterback in history.

Packers 20, Buccaneers 10

At Milwaukee, Anthony Dilweg, filling in for injured Don Majkowski, threw two touchdown passes to lead the Packers to their third straight victory. Green Bay, 6-5, moved over .500 for the first time since the first week of the season. The Buccaneers, 4-8, lost their sixth straight.

Saints 10, Falcons 7

At New Orleans, Eric Martin caught a 6-yard TD pass with 2:10 left to lift the Saints. The Falcons had gone ahead 7-3 on their previous drive when Chris Miller found a streaking George Thomas down the sideline for a 51-yard touchdown. The Saints improved to 5-6 and dropped the Falcons to 3-8.

Cardinals 34, Patriots 14

At Phoenix, rookie Anthony Thompson rushed for 136 yards and a TD in his first start and quarterback Timm Rosenbach scored the first two rushing TDs of his career to lift the Cardinals, 3-9. Tommy Hodson threw two TD passes in his first NFL start for the Patriots, 1-10.

Seahawks 13, Chargers 10

At San Diego, Norm Johnson kicked a 40-yard field goal with 11:59 left in overtime two plays after Seattle recovered a fumble. Billy Joe Tolliver completed a pass to Arthur Cox , who fumbled - his second of the game - and Rufus Porter recovered at the Charger 23, setting up Johnson. Seattle raised its record to 5-6 while San Diego dropped to 5-7.

#90330u0105 11/26/1990 ~United Press International

WASHINGTON (NOV. 26) UPI - Astronomers have announced plans to create the most detailed map of the universe ever attempted to help answer fundamental questions about the structure and evolution of the cosmos.

The $14-million, 10-year project will produce a three-dimensional map that should be 100 times more complete than any previous effort, including 1

million galaxies, 100,000 quasars and 30,000 intergalactic gas clouds, they said Sunday.

''Nobody has ever made such an elegant and detailed map of the sky,'' said Bruce Margon, an astronomer from the University of Washington in Seattle who chairs the Astrophysical Research Consortium, which is planning the project.

The map will be created through a methodical sky survey beginning in 1995 using a wide-angle telescope that is being specially built for the project. The telescope, which will have a field of view 36 times the size of a full moon, will be placed on Apacha Point in the Sacramento Mountains of New Mexico.

The telescope will be equipped with a digital camera of unprecedented size composed of 30 digital light sensors called charged-coupled devices, or CCDs, that will record 120 million points of light at a time in the ultraviolet, blue, red and infrared.

In addition, the telescope will be equipped with a robot-controlled light-splitting spectrograph that will be able to measure the color of light from an unprecedented 600 stars, galaxies or quasars at once to enable scientists to create three-dimensional maps.

The Fermi National Accelerator Laboratory outside Chicago will provide computer equipment to store and analyze the data, estimated to be the equivalent of a telephone directory listing 250 billion people.

The map may help explain how galaxies formed and should settle astronomers' debates about whether clusters of galaxies are arranged in sheets, bubbles or other large structures, the scientists said.

Astronomers hope to answer fundamental questions about the universe, such as the nature and distribution of mysterious material known as dark matter, said Richard Kron, an astronomer from the University of Chicago.

The map will also help answer questions about the ''big bang'' theory of creation, which holds that the universe exploded into being some 15 billion years ago.

According to that theory, the density of the universe should be uniform with matter spread evenly everywhere. However, stars are clumped into galaxies and galaxies are grouped into clusters and superclusters.

''I think it's a great idea,'' said Stephen Kent, an astronomer at Harvard University in Cambridge, Mass. ''Instead of trying to get glimpses of what's there we'll be able to measure everything that's there.''

The consortium consists of the University of Chicago, the Institute for Advanced Studies in Princeton, N.J., New Mexico State University, Princeton

University in New Jersey, the University of Washington and Washington State University in Pullman, Wash.

(NOV. 26) UPI - President Bush is becoming perhaps the most well-traveled president in history. Bush goes back on the road again Monday, when he heads to Mexico for talks with his Mexican counterpart on free trade. The president just returned from an eight-day trek to Europe and the Middle East that focused on the Persian Gulf crisis. Bush is to return to Washington late Tuesday... and after a couple of days in the Oval Office, he'll be off again, this time on a seven-day trip to South America.

A raging fire in two giant fuel tanks is disrupting air traffic at Denver's Stapleton Airport. Officials say the fire erupted in two 400- thousand-gallon tanks containing aviation fuel... and at one point threatened even larger nearby tanks at the airport. Fire officials initially decided to let the fire burn itself out, but mounted an all- out assault late Sunday when, after 10 hours, the flames showed no signs of abating.

In New York, a state assemblyman plans a hearing Monday into the violence that has marred the month-long strike at the Daily News. The State Assembly Labor Committee will examine possible links between the hiring of replacement workers at the tabloid newspaper and violence by its striking employees. Police say there have been 196 reports of strike-related violence and 89 arrests.

Police in Tokyo say they believe a bomb blast along a bullet-train line was the work of radical leftists opposed to Japan's emperor system. Police say the blast occurred outside Tokyo just hours before Emperor Akihito and Empress Michiko were to pass by on their way to Japan's most sacred Shinto shrine. Authorities say NO one was injured in the explosion, but the blast showered chunks of a concrete retaining wall onto the tracks.

The U-S Customs Service reportedly is investigating allegations that an Israeli criminal network operating out of Miami trained and helped arm Colombian cocaine traffickers. The Miami Herald says the Israeli government sent 500 automatic weapons to the Caribbean nation of Antigua in a shipment allegedly engineeered by the network. But the paper says the network diverted the arms to the leader of the Medellin drug cartel. It says one of the weapons was used in the assassination of a Colombian presidential candidate.

#90330u0124 11/26/1990 ~United Press International

WASHINGTON (NOV. 26) UPI - The Supreme Court Monday agreed to become involved in a decade-old battle between the federal government and animal rights activists over medical experimentation on a group of monkeys.

The court accepted part of an appeal from the International Primate Protection League and People for the Ethical Treatment of Animals to step into the dispute over the fate of the dwindling numbers of the ''Silver Spring Monkeys.''

The court agreed to decide if the 5th U.S. Circuit Court of Appeals overstepped its legal bounds last March when it ruled that a federal agency - the National Institutes of Health - could remove to federal court a non-federal case brought against it in state court.

The state court in Louisiana had thwarted government efforts to perform fatal brain experiments on three of the monkeys, but the federal court permitted the testing.

The three monkeys were killed this summer at the Delta Regional Primate Research Center at Tulane University as part of an experiment the government said could lead to developments in therapy for people who have suffered brain or spinal cord damage.

Animal rights activists, however, contend it was another in a long line of steps to cover up the cruelty to which the animals had been exposed while under federal government care.

In 1981, police raided a private research facility in Silver Spring, Md., funded by NIH and seized 17 monkeys, later citing the facility for alleged animal cruelty.

The animals were returned to NIH custody, and animal rights groups sought assurances they would not be subjected to further abuse.

In 1986, more than 300 members of Congress unsuccessfully petitioned NIH to turn the monkeys over to an animal sanctuary. Instead, the animals were moved to the Louisiana facility. The government claims the killing of three of the remaining monkeys this summer was painless and an act of mercy for animals that had been kept alive for years despite suffering from nerve-severing and crippling injuries sustained in previous testing.

When the government announced plans to euthanize the three monkeys in December 1988, animal rights groups filed suit in Louisiana state court, seeking to have the monkeys turned over either to themselves or members of Congress.

A state court granted a temporary injunction barring the fatal testing, but

NIH then removed the case to federal court - the U.S. District Court for the Eastern District of Louisiana.

That court in effect stayed the injunction, but the 5th U.S. Circuit Court of Appeals allowed the experiment to be performed.

The court agreed to decide whether NIH, as a federal agency, was within its legal authority in removing the case from state court to federal court jurisdiction.

Five of the 17 original monkeys were released to the San Diego Zoo, but four others are still being kept at the Delta center.

The high court's decision, expected sometime next year, could determine if NIH could take a similar judicial avenue in the future if it desires to perform fatal experimentation on the remaining four macaque monkeys.

#90330u0137 11/26/1990 ~United Press International

(NOV. 26) UPI - A published report says President Bush has won enough support from members of the United Nation's Security Council to push through a resolution authorizing the use of military force against Iraq if necessary.

Officials at Denver's Stapleton Airport say two 400-thousand-gallon tanks containing aviation fuel continue to burn out of control. The fire is causing flight delays on the average of two hours.

President Bush has just about UNpacked his bags from his last trip, and he's on the road again. Bush leaves Monday morning for a two-day meeting with Mexican President Carlos Salinas de Gortari . The talks are expected to center on free trade.

A hearing is scheduled Monday morning in New York to look into possible links between the hiring of replacement workers at the Daily News and violence by its striking employees. Police report 196 cases of strike-related violence and 89 arrests.

There is some improvement reported in the flood situation in western Washington state, but flood watches still are posted for at least nine rivers. High river levels made it difficult for travellers to get home at the end of the holiday weekend.

More than 260-thousand railway workers in the five new eastern German states voted to launch a general strike Monday to demand wage hikes and job security.

A union spokesman said trains transporting essential consumer goods would be exempt from the strike.

The Miami Herald says the U-S Customs Service is investigating allegations that an Israeli criminal network operating out of Miami trained and helped arm Colombian cocaine traffickers.

NEW YORK (NOV. 26) UPI - Latest metal market prices as quoted Monday by the American Metal Market, authoritative metals publication:

Aluminum, New York Merchants, 99.7 percent pure ingots 71.50-72.50 c- lb.

Antimony, domestic, refined in alloy, $2.00 lb.

Copper, electrolytic wirebars, delivered U.S. (Warrenton Refining Co.) 123.62-127.00 c-lb.

Lead, common, U.S. primary producers 37.00-52.00 c-lb.; U.S. non- primary (secondary) producers 45.00-52.00 c-lb.

Magnesium, 99.8 percent, ingot 163.00 c-lb.

Manganese, 99.9 percent, boxed regular 91.00-95.00 c-lb.

Mercury, $205.00-$210.00 76-lb. flask.

Nickel, briquettes delivered to customers, merchant, N.Y., $4.50-4.75 per pound.

Palladium, N.Y. Am. Met. Mkt. dealer $94.00-$96.50 per troy ounce.

Platinum, soft, 99.5 fine, producer - $425.00-$430.00; dealer- approx., $434.00-$450.00 per troy ounce.

Steel, No. 1 heavy melt scrap - Pittsburgh $105.00-$109.00 per gross ton (consumer buying price); Am. Met. Mkt. composite scrap price $105.67 per ton.

Tin, N.Y. Am. Met. Mkt. ex-dock - 294.50 c lb.

Titanium, aircraft quality, 8 1/8 inch round rotating billet, f.o.b. shipping point $7.80-9.59 lbs., domestic sponge 99.3 percent, domestic and imported duty-paid $5.00-5.50 lb.

Tungsten powder (H-Red), 99.9 percent minimum pure $10.00 per lb.

Zinc, prime western, U.S. 80.00 c-lb.

#90330u0161 11/26/1990 ~United Press International

WASHINGTON (NOV. 26) UPI - The Supreme Court Monday let stand a ban on begging in the New York City subway system, despite claims that the policy violates the free speech of the poor by outlawing panhandling even while permitting other forms of solicitation for charity.

Advocates for the homeless claim the court's refusal to review the policy could have a chilling impact on individual rights of the destitute across the nation.

A group of homeless people, in a class-action suit filed with the help of the Legal Action Center for the Homeless, claim the 1989 regulations continuing a ban against panhandling but allowing other forms of solicitation violates their First Amendment right to free speech and their 14th Amendment guarantee to equal protection.

The group argued that if other forms of speech are permitted in the sprawling underground transportation network, a legal ''public forum'' where speech is afforded a higher protection is created that requires that begging also be allowed. It also claimed that while panhandling may be restricted for cause in certain areas of the subway system, a total ban is illegal.

The New York City Transit Authority claimed the ban on begging was necessary to foster safety for the 3.5 million people who use the 468- station subway system on a given workday.

The subway operators point to its own 1988 study that found two- thirds of subway users said they had been intimidated into giving money to beggars, and that it is ''difficult from the police perspective to draw the fine line between panhandling and extortion.''

''That the (transit agency) permits individuals to solicit for charities on the subway system - something which it has never found to have interfered with passenger safety or comfort except in locations such as on trains or escalators - does not require the same system to permit begging which has been found to be inherently intimidating to subway users,'' it argued.

A district court in New York found that the ban on begging was unconstitutionally overbroad and issued a permanent injunction stopping the transit authority from enforcing it.

In May, a divided 2nd U.S. Circuit Court of Appeals reversed the decision and allowed the ban on individual begging.

''While organized charities serve community interests by enhancing communication and disseminating ideas, the conduct of begging and panhandling in the subway amounts to nothing less than a menace to the common good,'' wrote the circuit court majority.

But in a dissenting opinion, Judge Thomas Meskill wrote that begging is ''speech protected by the First Amendment that may be regulated, but not entirely prohibited, to achieve the government interests advanced in this case.''

Meskill said the transit authority had created a public forum by permitting some forms of charitable solicitation, and so cannot indiscriminately decide what is and what is not proper speech.

''I simply fail to see why the (transit authority) should be able to permit organized charities, but not beggars, to rattle a cup full of change as one passes by,'' concluded Meskill.

The National Coalition for the Homeless filed a brief with the court contending that if the regulations are allowed to stand, it would open the way for states and locales to ban begging in a wide range of circumstances and would deny the poor the ''most fundamental of all human rights, the right to survive.''

The National Coalition for the Homeless cited 1989 hearings before the House Select Committee on Hunger in claiming that in New York alone, more than 250,000 adults suffer from chronic hunger and more than 500, 000 are routinely hungry.

''Poor people beg in the subways of New York precisely because there are many people there,'' wrote the group. ''For many people in our society, begging offers the only hope of survival.''

A coalition of New York City neighborhood groups called the Straphangers Campaign, which works for improved transportation, also asked the high court

to overturn the regulations, claiming they ''erroneously suggests that the subway system is not a public forum, thereby laying the foundation for still further restrictions on the availability of information to riders.''

#90330u0163 11/26/1990 ~United Press International

PARIS (NOV. 26) UPI - A Justice Ministry official Monday denounced as a ''horrible publicity stunt'' a contention from a lawyer for Klaus Barbie that the convicted Gestapo war criminal should be released from prison and treated by a Jewish cancer specialist.

Assistant Justice Minister Georges Kiejman added that he did not believe an early release should be considered despite defense lawyer Jacques Verges' disclosure that Barbie has blood cancer.

''Medical pardons are very sparingly distributed,'' Kiejman said. ''The only accepted thing is to allow someone who is dying to be with his family. Based on what I know, I'm not convinced we're in such a situation.''

Barbie, known as the ''Butcher of Lyon,'' was convicted in 1987 and sentenced to life imprisonment for ''crimes against humanity'' for his role in the roundup and deportations of French Jews and resistance members during World War II.

Verges has made no formal request for an early release but said in a newspaper interview that such a decision should be considered because of Barbie's medical condition. Verges also suggested that Barbie be treated by Leon Schwartzenberg, one of France's most reputed cancer specialists. Members of Schwartzenberg's family died in Nazi concentration camps.

Kiejman said of the new campaign by Verges, ''I disapprove of this operation in principle,'' adding that he considered it ''a horrible publicity stunt.''

Schwartzenberg, a professor at Paul Brousse Hospital in suburban Paris, confirmed that Verges had contacted him about Barbie, but maintained that he would have no comment on it until such a request came from judicial authorities.

The Justice Ministry indicated that the choice of a doctor should be decided by the physician currently treating Barbie in Lyon.

Verges, continuing Monday to speak in favor of clemency for Barbie, said that ''a life sentence is not a death sentence by lack of medical care.''

Questioned in Toulouse where he was trying another case, the Paris lawyer said he had no plans ''for the moment'' to file any court motions.

Verges said that Barbie had suffered a stroke and has been undergoing chemotherapy for blood cancer for the last three months in a Lyon hospital.

#90330u0164 11/26/1990 ~United Press International

NEW YORK (NOV. 26) UPI - Robert Kiley, the head of the nation's largest transit system, resigned Monday as the longest-serving chairman of the Metropolitan Transportation Authority,, which carries six million passengers daily.

Kiley, 55, appointed to office by Gov. Mario Cuomo in 1983, said he will become president and chief executive officer of Fischbach Corp., an electrical engineering firm based in New York.

Kiley, in a farewell statement, thanked employes of the MTA and its operating agencies for their efforts during the past seven years. "We have revived mass transit in New York and have restored employee pride and public confidence in the system," he said. "While much has been accomplished, much also remains to be done.

The MTA oversees New York's massive subway and bus system, the Long Island Rail Road, the Metro-North Commuter Railroad, the Triborough Bridge and Tunnel Authority, and the Metropolitan Suburban Bus Authority.

Kiley said that he found the MTA on the verge of collapse, outdated, unreliable, and unsafe. He is credited with having rebuilt the system at a cost of billions of dollars of public funds and dramatically increased fares for users of the metropolitan area's trains, subways, buses, bridges and tunnels.

Following a massive rebuilding plan after he took office, subway ridership increased 8.4 percent between 1982 and 1988, 5.6 percent on the Long Island Rail Road and 19 percent on Metro-North Commuter Railroad. Ridership on subways and the Long Island line have since dipped due to the region's economic downturn but Metro-North ridership continues to rise.

Under Kiley's chairmanship, more than three-fourths of subway cars, nearly 90 percent of the city's buses, and nearly 100 percent of the commuter rail cars have been overhauled or replaced.

A native of Minnesota and graduate of Notre Dame University, Kiley served seven years with the Central Intelligence Agency, where he was executive assistant to the director from 1968 to 1970, before moving on to an executive position with the Police Foundation in Washington, D.C.

He worked briefly for New York Mayor John Lindsay before being recruited in 1972 by Boston Mayor Kevin White to become deputy mayor, a post he held for three years. In 1975, Kiley was appointed chairman of the Massachusetts Bay Transportation Authority but was fired in 1979 by incoming Gov. Edward King.

#90330u0193 11/26/1990 ~United Press International

(NOV. 26) UPI - Around the world... Around the clock... U-P-I has the latest, news.

More than 200 firefighters are battling a spectacular fire raging through four giant fuel tanks at Denver's Stapleton Airport. Officials say the tanks contain up to two-Million gallons of aviation fuel. The tanks erupted in flames Sunday morning, causing airlines to delay flights as they scrambled to find alternate fuel sources.

Colorado authorities say high winds have died down and firefighters have nearly contained a wildfire burning near Boulder. The blaze has blackened more than six-thousand acres and 15 structures. Officials say the fast-moving fire fanned by gale-force winds forced more than 100 people to vacate their homes.

Surging rivers are returning to their banks in western Washington after a weekend of flooding brought on by weeks of rain. Freezing levels near one-thousand feet helped the rivers recede. But weather forecasters say there's a chance of rain Monday east of Seattle, where the worst flooding occurred.

President Bush heads to Mexico Monday for two days of talks with his Mexican counterpart on free trade. Bush is just back from an eight-day trek to Europe and the Middle East that focused on the Persian Gulf crisis. His trip to Mexico comes at a time when relations between the two nations are strong and growing.

Schoolchildren and peasants reportedly are being called up by the Iraqi military. Cairo Radio reports that children under the age of 15 are being drafted to reinforce the regular Iraqi army so that soldiers will be available for combat. The report says peasants, who form part of Iraq's reserves, are being ordered to report to duty by December 15th.

A railway strike gets under way Monday in the five new eastern German states. More than 260-thousand railway workers voted to walk off the job to demand wage hikes and job security. Union officials say the strike would begin affecting passenger and freight services Monday, but they would NOT comment on the total scope of the planned action.

Embattled Soviet Premier Nikolai Ryzhkov indicates he'll stay in his post

until he's forced to resign. Ryzhkov's resignation has been rumored since Soviet President Gorbachev outlined a new plan of government. But Ryzhkov said Sunday on Soviet t-v that his future should be decided by the Congress of People's Deputies.

-30- 2550

#90330u0201 11/26/1990 ~United Press International

WASHINGTON (NOV. 26) UPI - The Supreme Court Monday let stand a decision that Arizona erred when it shut down a day-care center accused of child abuse without first holding a formal hearing on the charges.

The case stems from a decision of the 9th U.S. Circuit Court of Appeals against the Arizona Child Protective Services and individual state workers, who suspended the license of a Tucson day-care facility in 1985 after a complaint that a teacher had sexually molested a student.

The appeals court ruled that the state and its employees violated due process channels by not allowing the day-care center, Chalkboard Inc., to refute the charges at a formal hearing before shutting it down on an emergency basis.

The court also held that ''qualified immunity'' - the principle that executive officials are protected from suit for simply carrying out their jobs in good faith - did not protect officials in this case because ''reasonable officers'' would have known state law required a hearing before the business was forced to shut its doors.

The case was brought to the high court by eight state workers backed by the Arizona government, who claimed the action taken against Chalkboard was necessary to protect children and that it did not clearly violate state statute.

A brief filed with the court by 22 other states and three U.S. territories also urged the justices to accept the case and overturn the 9th Circuit for its ''short shrift given the states' important interest in protecting young children from abuse.'' The brief argued that damage to the premise of qualified immunity would ''inhibit state officials in carrying out their responsibilities under the law and seriously jeopardize public protection.''

But the high court, in an unsigned action, refused to review the 9th Circuit's ruling.

On Oct. 10, 1985, the mother of a girl attending Chalkboard alleged to Tucson police that her daughter had been sexually molested by a teacher. Police notified the Office of Child Protective Services and a social worker there, Susan Brandt, who began an investigation. Two other investigators of the Arizona Department of Health Services were called in.

In interviews over the next several days, investigators uncovered other allegations of sexual molestation by the same teacher and of physical abuse involving other staff members. The center also was found to be over its licensed capacity for the second time in two years.

On Oct. 16, Chalkboard's day-care license was suspended by DHS pending a full administrative hearing scheduled for Oct. 24.

On Oct. 23, the day-care company filed a civil rights action in federal court, seeking monetary damages against the three investigators, their supervisors and others, charging violation of federal due process and equal protection rights.

The state agencies asked the court to throw out the suit on the grounds of qualified immunity, but it refused. The 9th Circuit then issued its ruling, finding that Arizona's own laws require a state judicial proceeding before a day-care license can be suspended in such a situation.

The state contends its law is not so clear and that an emergency status existed justifying its action.

Chalkboard said no emergency existed because the teacher named in the molestation allegations had been suspended.

The state warned if the decision was not reversed, ''it will have an incalculable, chilling impact on (the) state's ability to protect its young children from grevious harms. It signals that case workers, investigators, and other public officials who act reasonably and in good faith to protect public safety in emergency situations may be held personally liable for monetary damages if their judgments are subsequently questioned.''

Operators of Chalkboard claim it was effectively put out of business by the forced closure and publicity surrounding it, even though they had no chance to state their side of the story.

90-270 Susan Brandt, et. al., vs. Chalkboard, Inc., et al.

-30- 4248

#90330u0207 11/26/1990 ~United Press International

(NOV. 26) UPI - It's nearly impossible to achieve absolute perfection in a basketball game, but the Portland Trail Blazers came pretty close in the first quarter of Sunday night's game against the San Antonio Spurs.

After seeing the Blazers outscore his team 49-18 in the opening period, San Antonio coach Larry Brown said Portland could have beaten an all-decade team.

But one quarter hardly makes a game, and Portland had to struggle over the

remaining three quarters to pull out a 117-103 victory.

''That was an awesome first period by Portland,'' Brown said. ''I've never seen anybody have a quarter like that.

''But then when I looked up at halftime on the scoreboard and saw that we were only 14 points down, I thought it was a message from God.''

The Blazers are now 11-0 and are the only undefeated team in the NBA. They have won 15 regular season games in a row dating back to last season.

Portland was paced by three players with 20 or more points. Center Kevin Duckworth led the way with 22 points while Terry Porter had 21 and Clyde Drexler added 20.

San Antonio's David Robinson led all scorers with 26 points.

Without question, the difference in the game was the first quarter. It was even more impressive that the effort came against a team as good as the Spurs, who saw their season record drop to 7-3.

Portland dominated in every aspect of the game in that period. They hit 88 percent of their field goal attempts (22-of-25), and all five of their 3-point attempts on the way to a team-record 49 points.

In the process, Portland also limited the Spurs to 18 points, which was the number of points the Blazers scored in the period off San Antonio turnovers.

The Blazers were able to extend their lead almost every trip down the floor in that quarter, and finally pushed their advantage to 31 when Cliff Robinson hit a 3-pointer with five seconds left.

The period also featured 10 assists by Porter, which is a team record for a quarter; and 15 points and four blocked shots by Drexler. Porter finished with 16 assists and Drexler had 14 rebounds in the game.

''I don't ever remember seeing a better first quarter, not only shooting. We were so aggressive defensively,'' said Portland coach Rick Adelman. ''We seemed to capitalize on everyting. It was amazing, when you do it against a team like San Antonio.''

''I've never seen any team play a better first quarter in my life,'' said David Robinson. ''If they're doing that against other people, it's going to be a scary season for the rest of us.''

-- AROUND THE NBA --

Elsewhere in the NBA Sunday night, Detroit overpowered Sacramento 105-92,

Houston thumped Minnesota 107-91 and the LA Clippers routed Orlando 119-91.

PISTONS 105, KINGS 92

At Auburn Hills, Mich., James Edwards scored a season-high 26 points and Mark Aguirre added 17 to help the Pistons extend their winning streak to seven games. The triumph enabled the Pistons, 10-2, to tie the club's best start in history. Detroit, which had six players in double figures, won 10 of its first 12 games in the 1988-89 season. The Kings dropped their third consecutive game.

ROCKETS 107, TIMBERWOLVES 91

At Minneapolis, Akeem Olajuwon scored 27 points, grabbed 20 rebounds and blocked four shots to lead the Rockets. Houston snapped a two-game losing streak in winning their first game in Minneapolis after going 0-2 in 1989-90. It was only the Rockets second win in seven road games this season.

CLIPPERS 119, MAGIC 91

At Los Angeles, Charles Smith scored 21 points and Benoit Benjamin added 18 and grabbed a season-high 18 rebounds to lead the Clippers, who have won three of their last four games. Terry Catledge led Orlando with 16 points and Sam Vincent added 14 to pace the Magic, 3-10, which suffered its fourth straight loss.

#90330u0209 11/26/1990 ~United Press International

NEW YORK (NOV. 26) UPI - World supplies of crude oil now stand about 70 million barrels higher than a year ago as producers in October more than made up for oil lost from the U.N. embargo of Iraq and Kuwait, it was reported Monday.

The authoritative Petroleum Intelligence Weekly estimated inventories of free-market countries as of Oct. 31 at 5.333 billion barrels compared to 5.264 billion barrels a year earlier.

In its new Stocks & Balances report, the newsletter said world supply in October outpaced demand by 2.2 million barrels a day.

"That's largely because oil demand growth came to an abrupt stop in September and slid in October an estimated two percent below year-earlier levels, or 1.2 million barrels a day," it said. The drop in demand was "predominantly in the industrialized countries," the newsletter added.

It said useable world commercial stocks stood at 14 days of supply, the same level as in July before Iraq's Aug. 2 invasion of Kuwait and the U.N. embargo and Iraqi and Kuwaiti exports that followed.

The embargo took an estimated 4.3 million barrels of crude out of world markets. This, however, has been largely made up by increased production from Saudi Arabia and other members of the Organization of Petroleum Exporting Countries.

The newsletter said 795 million barrels of the Oct. 31 world inventories was made up strategic reserves maintained by larged industrialized countries such as the United States, Germany, and Japan. Strategic reserves were 775 million barrels a year earlier, it said.

The inventory figures also did not include stocks of the Soviet Union, China, or East Europe because they are too difficult to estimate accurately, a spokesman said.

He said about one billion barrels of the 5.333 billion-barrel inventory figure is less precise because it is based on the amount of oil needed to keep the less developed countries going rather than any direct estimate of their stocks. "Estimates are very difficult for developing countries," the spokesman said.

The newsletter estimated that world demand, including the Soviet Union, China, and Eastern Europe, averaged 65.2 million barrels a day from July through September, an increase of about 1.1 million barrels daily, or 1.7 percent. World oil output also averaged the same amount during the period, despite the U.N. embargo, it said.

(NOV. 26) UPI - Shortly before word came of the decision by Saddam, Dennis Trundy of Brockton, Massachusetts, reported that his wife had secured the release of her twin brother. Trundy said his wife and two of her other brothers met Saddam this morning and he told them that their 44-year-old brother, John Stevenson, could leave Iraq. Stevenson had been in Kuwait as a bank computer analyst. He was taken captive by Iraqi forces on October 20th.

The Iraqi foreign minister flew to Moscow today, but he probably didn't like the message he got from his Soviet counterpart. A spokesman says Soviet Foreign Minister Eduard Shevardnadze told Iraqi Foreign Minister Tariq Aziz to honor the U-N Security Council resolutions calling for a withdrawal from Kuwait. The spokesman also said Shevardnadze would fly to New York City on Wednesday. The Security Council is discussing a resolution to authorize the use of force against Iraq.

Prime Minister Hun Sen of the Vietnamese-backed government in Cambodia is backing away from key parts of a United Nations peace plan. He said in a broadcast in Cambodia yesterday that U-N forces will NOT have administrative

powers and would be allowed to carry only pistols for self-defense. He also objected to a disarmament proposal that would store weapons in warehouses.

The fire roaring through aviation fuel storage tanks at Stapleton International Airport in Denver now involves four of the storage facilities. Higher winds helped spread the flames from the first two tanks, and Denver firefighters now say it may be late today or early tomorrow before they bring the flames under control. At least five firefighters have been treated for smoke inhalation and heat exhaustion.

The Los Angeles-based entertainment conglomerate M-C-A is being sold to Japan's Matshushita Electric for six-point-one- BILLION dollars. The 66-dollar-a-share offer finalizes a buy-out that had been rumored for months. It also represents the second time in less than 16 months that the parent of a major Hollywood movie studio has been sold to a Japanese company.

New information from the federal Centers for Disease Control indicates an increase in the number of people over age 50 who have contracted AIDS. The reports indicate that AIDS is showing up far more often in people over 50 than in children under 13. The number of older persons with AIDS apparently had been under- estimated in the past on the assumption that the symptoms were just a sign of aging and NOT an indication of the disease.

#90330u0234 11/26/1990 ~United Press International

COLOMBO, Sri Lanka (NOV. 26) UPI - Tamil militants armed with AK-47 rifles, rocket-propelled grenades and mortars attacked a major army camp in northern Sri Lanka, and as many as 250 soldiers may have been killed, high ranking military sources said Monday.

Military sources said more than 1,500 guerrillas of the Liberation Tigers of Tamil Eelam attacked the army camp at Mankulam, about 150 miles north of Colombo, around 3 a.m. Friday.

The rebels and the Sri Lankan soldiers inside the camp battled for the next 36 hours, as rebels pounded the base with AK-47 rifles, rocket- propelled grenades and mortars that caused heavy damage and inflicted many casualties, military sources said.

''More than 500 soldiers in the camp were taken by surprise,'' a military source said. ''The mortars took the heaviest toll, over 250. The final count may go up to 270. That includes seven soldiers who escaped but were rounded up and shot on Sunday morning by rebels.''

Military sources said 65 rebels were killed during the encounter. Further details of the attack were sketchy, but more information was expected once some 50 soldiers who escaped from the camp reach the nearby military garrison at Vavuniya.

Fighting between security forces and the Tamil Tigers erupted in mid- June after rebels staged four simultaneous attacks on military bases in eastern Sri Lanka. Since then, more than 2,600 soldiers, rebels and civilians have been killed in the fighting.

Tiger rebels are fighting to establish an independent Tamil homeland in the northern and eastern provinces.

They believe that Sri Lanka's minority Tamils, who are mostly Hindu, need a separate nation because of years of alleged discrimination by the predominantly-Buddhist Sinhalese, who control the Colombo government.

The Sri Lankan government battled but failed to defeat several Tamil separatist groups from 1983 until 1987 when, in a bid to end the violence, Colombo signed a peace accord with New Delhi.

Under the terms of the agreement, India sent thousands of soldiers as a peace-keeping force to maintain law and order and to supervise the surrender of weapons by Tamil groups who agreed to disarm in exchange for greater autonomy in Tamil areas.

The only group that refused to participate in the process was the Tamil Tigers who claimed that the peace accord failed to fulfill the aspirations of the Tamil people.

The development triggered a war between the Tamil Tigers and the Indian army. At least 1,100 soldiers and 600 rebels died in the fighting.

India failed to defeat the rebels and finally withdrew its forces last March, leaving behind a fragile cease-fire between Colombo and the guerrillas.

That cease-fire, which many analysts thought might evolve into a lasting peace was shattered last June when the rebels attacked the military bases in eastern Sri Lanka.

WASHINGTON (NOV. 26) UPI - The Supreme Court Monday let stand a decision that the American Medical Association violated federal antitrust laws for years by classifying chiropractors as practitioners of an ''unscientific cult'' and attempting to have their profession outlawed.

The court refused to review a decision of the 7th U.S. Circuit Court of Appeals, which found the AMA violated the Sherman Act from 1967 to 1980 by discouraging its member physicians from associating professionally with chiropractors, making public statements that the practice was unscientific and dangerous, and trying to eliminate the chiropractic profession through legislation.

About half of the nation's 600,000 physicians are members of the influential AMA, a national association of physicians. The 7th Circuit found that by its anti-chiropractic actions that amounted to an ''illegal boycott,'' the AMA hampered free trade and thus helped its own members monopolize the health-care market.

The AMA claims its concerns over the methods of chiropractors, which have been strongly modified in recent years, were legitimate concerns for the health of consumers and the reputation of the medical profession.

Chiropractors specialize in the treatment of musculoskeletal ailments, especially back problems. There are more than 30,000 chiropractors nationwide, and their practices are now licensed in all 50 states and have gained growing acceptance in recent years by consumers and in medical circles.

But in the early 1960s, the AMA became convinced that chiropractic had become ''a unique threat to public health.'' It formed a ''Committee on Quackery'' to investigate chiropractic in 1963, and two years later launched a campaign to

''contain and ultimately eliminate'' the practice, which it classified as an ''unscientific cult.''

''Chiropractic had achieved some form of licensure in all but four states, and chiropractors were passing themselves off as 'family doctors' who could use spinal manipulation to prevent, diagnose, treat, and cure any condition - from polio, to tonsillitis, to heart disease, to diabetes, to high blood pressures, to the common cold,'' the AMA wrote in its brief to the high court.

The AMA said it based most of its longtime objection to the ''basic doctrine'' of chiropractic, which maintains that an ''innate force flowing through nerves in the body assures health and that diseases are caused by slight misalignments in the spinal columns that disrupt the flow of this vital 'nerve energy.'''

In 1977, faced with growing antitrust pressure and the emergence of a ''small group of 'reform' chiropractors that had renounced the traditional tenets of chiropractic and confined themselves to accepted physical therapy treatments '' the AMA reversed its ethical ban against its member physicians professionally associating with chiropractors.

But it continues to advise consumers against treatment from ''traditional chiropractors.''

At the end of 1980, four chiropractors brought suit against the AMA in federal court in Illinois and lost, a decision that was overturned by the 7th Circuit.

A lengthy court process led to a retrial in September 1987, when the trial court held that the AMA violated the Sherman Act. Last February, the 7th Circuit upheld the judgment.

''The AMA knew at an early date that chiropractic was licensed, effective, desired by many millions of consumers, and a competitive threat to medical physicians,'' the chiropractors wrote in their brief to the high court.

The chiropractors were not seeking damages but obtained an injunction against the AMA, upheld by the 7th Circuit, that the AMA be banned from interfering with the right of a ''physician, hospital or other institution to make an individual decision on the question of professional association.''

The injunction also required the AMA to arrange publication of the district court's order in the Journal of the American Medical Association.

The AMA contends the 7th Circuit decision conflicts with antitrust decisions of other federal circuit courts and the Supreme Court.

''Unless reversed, this (decision) will severely inhibit, and likely prevent, professions from continuing their traditional activities that enhance the

quality and reliability of physicians' services and prevent the long term erosion of public trust in the profession,'' the AMA argued.

WASHINGTON (NOV. 26) UPI - A group of 19 House members, most of them members of the House Armed Services Committee, has left for Saudi Arabia to raise questions about Operation Desert Shield, the committee announced Monday.

The group left Sunday night for a week-long visit. The delegation was led by Rep. Nicholas Mavroules, D-Mass., head of the panel's subcommittee on investigations.

Excluding the visit over Thanksgiving by congressional leaders, it was the third delegation of House members to go to Saudi Arabia since Iraq invaded Kuwait Aug. 2. The other two delegations visited in early September.

Mavroules, in a statement announcing that the group had left, said they were armed with more questions now that the size of the deployment has increased.

Questions, he said, would include who will be in charge in the event of war and will the strains on the logistical system that have shown up in the past few months grow with the increase in the size of the U.S. commitment to the region.

Personnel issues, he said, also will be examined.

''In September, House members found that the latrines lacked the required chemicals to maintain sanitary standards, that there were no postage stamps so the troops couldn't write home and that some soldiers weren't being issued ammunition even while they were being put on guard duty and told to watch out for terrorists,'' Mavroules said.

''This time we'll be on the lookout for any similar gaps that could be a blow to morale, not to mention health and safety,'' he said.

The delegation also has asked to meet with military units from other nations that have sent troops to Saudi Arabia. No previous congressional delegation has met with any foreign forces. The troops of Saudi Arabia and other countries comprise slightly less than half the ground troops committed to Saudi Arabia.

Democrats making the trip were Mavroules, Marilyn Lloyd of Tennessee, Mary Rose Oakar of Ohio, Dennis Hertel of Michigan, Soloman Ortiz of Texas, Lane Evans of Illinois, Jerry Costello of Illinois and John Tanner of Tennessee.

Republicans include Larry Hopkins of Kentucky, Robert Lagomarsino of California, Robert Davis of Michigan, Robert Dornan of California, John Kasich of Ohio, Larry Combest of Texas, Curt Weldon of Pennsylvania, Jon Kyl of Arizona, Arthur Ravenal Jr. of South Carolina, Ronald Machtley of Rhode Island and Ileana Ros-Lehtinen of Florida.

#90330u0269 11/26/1990 ~United Press International

CAIRO, EGYPT (NOV. 26) UPI - Iraqi President Saddam Hussein ordered Monday the release of all American hostages whose wives were currently visiting Baghdad, Iraq's official news agency INA reported.

The agency, monitored in Cairo, said Saddam made the announcement during a meeting with wives of U.S. hostages who are being held as human shields at strategic Iraqi sites to ward off Western attack.

The agency did not say how many U.S. hostages would be affected.

''The president ordered Iraqi authorities to allow American families to accompany their relatives currently in Baghdad to travel home on the occasion of their visit to Iraq,'' INA said.

''Starting this moment, you will have an additional right exceeding the rights of Iraqi citizens,'' the agency quoted Saddam as saying, in an apparent reference to the need for Iraqi citizens to secure exit visas before they can travel abroad.

Last week Saddam ordered the release of 10 British husbands after their wives arrived in Baghdad to plead for their freedom.

Saddam was quoted as saying during his meeting with the American families that Iraq wanted peace, because it is in a ''very bad need for such peace,'' INA reported.

The Iraqi leader accused the Bush administration of playing the role of a world policeman carrying ''a heavy stick and twirling its moustache.''

#90330u0272 11/26/1990 ~United Press International

WARSAW, Poland (NOV. 26) UPI - Solidarity leader Lech Walesa led in Poland's first direct presidential election but a businessman who lived abroad for 20 years took second place ahead of Prime Minister Tadeusz Mazowiecki, exit polls showed.

The dramatic developments Sunday made a runoff likely on Dec. 9 between Walesa

and the elusive, wealthy Stanislaw Tyminski, who recently returned to Poland after 21 years abroad with Canadian and Peruvian passports and a Peruvian wife.

Walesa captured 39.3 percent of the vote in the six-way race, short of the 50 percent required to avoid a runoff, the German polling firm INFAS said. Tyminski had 23.2 percent and Mazowiecki had 19.9 percent, INFAS said.

The projections were made with about two-thirds of the results in from exit polling from some 20,000 voters in 409 precincts, INFAS said. The firm said its final figures would be unlikely to change the projected outcome.

The official Polish news agency said that more than 60 percent of the 27 million electorate took part in the voting.

The independent newspaper Gazeta Wyborcza predicted Walesa's win in the second round.

''Tyminski is not going to win with Walesa,'' said Gazeta Wyborcza. ''But he may become a leader of a brand new opposition.''

In a concession statement, Mazowiecki called on his election committees not to disband, but instead to be turned into ''committees for democracy'' that will become an opposition movement to Walesa.

''We shall fight for democracy,'' the prime minister said.

Mazowiecki, whose tough austerity measures stabilized Poland's hyperinflation rate and endeared him to Western creditors, insisted he was not insulted by the results.

''These first results indicate Polish society is going through a crisis,'' he said. ''I am not going to feel offended by the nation and I believe in its maturity - if not now, then in the future.''

INFAS has monitored most elections in Eastern Europe's newly emerging democracies the past two years and its projections have never erred more than 3 percent.

It was the first time Poles elected their own president. Poland's five previous presidents were elected by the Parliament.

About 64 percent of the 27.5 million Poles eligible to vote went to the polls, INFAS said.

Walesa, who masterminded the peaceful handover of power in 1989 by the Communist Party to a Solidarity-led coalition government, directed a drive this summer that is forcing former Communist Party leader Wojciech Jaruzelski to step down only one year into his six-year term.

Walesa was polling ahead in all age groups, followed by Tyminsky in second place among the young and middle-aged, INFAS said. Mazowiecki led among the intelligentsia, while Walesa polled higher among workers and farmers.

Tyminski, whose strong showing in the closing days of the campaign sent shock waves both the Walesa and Mazowiecki camps, refused to talk to reporters when he voted.

A businessman who made his fortune computer and electronics equipment, Tyminski returned to Poland after 21 years overseas to run for president.

He attracted Poles with his promise of quick profits for those who work hard despite a depressed economy that has seen a nearly 40 percent drop in the standard of living this year due to the Solidarity-led government's economic stabilization program.

The candidate of the renamed Communist Party, Wlodzimierz Cimosiewicz, was projected to get 9 percent of the vote. Peasant Party leader Roman Bartoszcze was expected to wind up with 7.5 percent and Leszek Moczulski, head of the right-wing Confederation for an Independent Poland, 2.5 percent.

A total of 22,241 polling stations were set up around the country, plus another 177 stations for Poles abroad and 295 on Polish ships.

Poland's first president was Gabriel Narutowicz, who was assassinated shortly after he took office in 1922. Poland also has had six presidents-in-exile based in London since the start of World War II in 1939, when Poland lost its independence.

The president has the right to nominate prime minister and will be the commander-in-chief of the armed forces.

In Krakow, Pope John Paul II was listed among those eligible to vote at one of the polling stations, under his Polish name Karol Wojtyla.

The pontiff's successor in Krakow, Cardinal Franciszek Macharski, said he prayed as he cast his vote that the Polish nation, ''which used to find strength and unity in protest, will find also strength and unity in joint efforts to build society.''

Under an agreement between Solidarity and the communists, Solidarity took over a coalition government while Jaruzelski, was elected president by parliament.

He agreed to step down several weeks ago amid growing pressure from Poles who do not want a former communist representing their emerging democracy.

#90330u0287 11/26/1990 ~United Press International
WASHINGTON (NOV. 26) UPI - The Supreme Court Monday refused to decide if a Florida county placed white-owned businesses at an illegal disadvantage through regulations meant to increase minority business participation in the construction industry.

The high court's refusal to become involved at this stage of the dispute sends it back to federal district court in Tampa for trial. Depending on its outcome it could be appealed back to the Supreme Court in the future.

Mandatory regulations were passed in Hillsborough County, Fla., in 1984 - after the regulations were tried on a voluntary basis for six years - on the premise that the construction industry, like much of society, discriminated against blacks and other minorities. The regulations were implemented, however without any legal evidence of racial discrimination in construction contracts in the county.

A federal district court in Tampa, in a summary judgment, held that the county's minority businesses enterprise policy was illegal, violating the equal protection clause of the 14th Amendment as it applies to white construction contractors and sub-contractors. It likened the program to one struck down in January 1989 by the Supreme Court in the case of Richmond, Va. vs. J.A. Croson Co.

The high court in that case ruled that the minority set-aside program imposed on the construction industry of Richmond was illegal because it was not based on specific identifiable instances of discrimination. It also held that past societal discrimination alone could not justify such a program.

The 11th U.S. Circuit Court of Appeals in August ruled the Hillsborough County minority preference program could withstand summary judgment, finding that the Florida case differed significantly from the Richmond case.

The 11th Circuit sent the case back to the lower court for a trial for a jury to decide based on the specific issues whether there was reverse discrimination, but the white-owned construction companies then appealed directly to the Supreme Court. The case now goes to trial.

The 11th Circuit ruled that the high court in the Richmond case did not exclude all such minority preference programs, but simply imposed tougher standards that must be met. Those new standards include evidence of actual instances of past discrimination, proof that the plan is needed to remedy discrimination, and a showing that the plan is ''narrowly tailored'' to meet that goal.

''Hillsborough County's ... law is materially different from the Richmond plan mainly because the Hillsborough County law was enacted as a result of

statistics tabulated during the six years that the (voluntary) program was in effect,'' the 11th Circuit wrote.

''The statistics gleaned from these studies provide a prima facie case of discrimination,'' the court held.

In its appeal to the high court, a coalition of nine white-owned construction companies argued ''there was and is no evidence'' that discrimination existed in the industry in Hillsborough County, and claimed the ''entire program was created for an improper purpose .... and was created, implemented, and enforced using arbitrary goals.''

The group claims the county based its regulations on a ''disparity'' in overall public expenditures - not solely the construction industry - and on ''unsubstantiated and undocumented complaints of discrimination.''

Under the plan, a contractor who has agreed to subcontract with ample minority or female-owned businesses and is the low bidder for a public project is granted the contract.

If the contractor is deemed ''non-responsive'' to the minority preference goals, the contract is awarded to the next lowest ''responsive'' bidder, unless the difference in the bids exceed $100,000 or 15 percent of the cost of the project.

The county claims the program in just four years has increased minority and female participation in county contracts from less than 4 percent to 15.6 percent.

''(The Richmond case) provides a vivid example of a minority business program that was enacted without sufficient consideration, and operated in too draconian a manner, to meet 14th Amendment standards,'' the county wrote the high court. ''This case presents an equally vivid example of a program whose legislative foundation is comprehensive and reliable, and whose provisions are well tailored to its goal.''

But the white-owned businesses, led by the Cone Corp., strongly disagreed.

''Programs which apportion public dollars along racial lines in order to insure that all groups get their 'fair share' are, if anything, even more suspect than those which seek to apportion educational resources; they are simply racial pork barrels created by elected officials seeking to curry favor with this or that particular ethnic or racial group. This is an anathema in a free society.''

#90330u0293 11/26/1990 ~United Press International

CLEVELAND (NOV. 26) UPI - The U.S. Navy may soon find itself locked in a fierce battle with an even tougher opponent than Saddam Hussein - the U.S. Air Force.

At stake is the future of a proposed combined finance center to handle military pay functions, a business magazine reported Monday.

The Navy Finance Center in Cleveland employs 1,500 and is credited with pumping $50 million annually into the northeast Ohio's economy. But the Air Force wants a new combined center in Denver - where the Air Force now has its own Finance Center.

Capt. Thomas Nelson, second-in-command at the Navy Finance Center, told Crain's Cleveland Business that he is aware of ongoing Air Force maneuvers inside the Pentagon and in Congress to push an Air Force consolidation plan.

Nelson said he recently spent time in Washington telling top Defense Department officials why the Navy's payroll center should remain in Cleveland.

''Our position is well-known, which is that it makes no sense to move any operations to Denver,'' Nelson said.

Rep. Mary Rose Oakar, D-Ohio, said the Air Force recently tried to get Congress to go on record in favor of the Denver consolidation plan. Oakar, who is from Cleveland, said she helped kill the language in a defense appropriations bill before it reached the House floor.

''The Air Force is trying to pull a fast one,'' Oakar said. ''The Navy hasn't been as zealous as the Air Force, which has been very tencious about this.

''The Navy Finance Center is the best operation of its kind in the system,'' Oakar said. ''It has the highest productivity - and they should be consolidating the system in Cleveland. I will be watching for the Air Force's study results.''

The Air Force earlier this year made a presentation to Pentagon officials on transferring all military pay functions to Denver, and the Air Force has been picked to perform an economic analysis of computer software systems used in processing military pay.

The Army Finance Center is in Indianapolis and the Marine Corps handles its payroll in Kansas City, Mo.

Nelson said the Navy has reserved the right to file a minority report.

Capt. Jeffrey Szalapski, commanding officer of the Navy Finance Center, is

confident.

''We're not vulnerable and I don't feel threatened,'' Szalapski said, adding that decisions regarding consolidations of military payroll operations ''will be made at the highest levels of the Department of Defense.''

#90330u0321 11/26/1990 ~United Press International

MOSCOW (NOV. 26) UPI - Iraqi Foreign Minister Tariq Aziz, visiting the Soviet Union, was told Monday to let all Soviet citizens leave his country or face a tougher stand from Moscow in the Persian Gulf crisis.

Mikhail Gorbachev, speaking at the Supreme Soviet, warned Iraq to abandon any hope it could break Soviet-U.S. unity on getting Baghdad out of Kuwait.

Aziz arrived in Moscow as the U.N. Security Council was readying to formulate a resolution setting a timetable for Iraq to leave Kuwait, which it invaded Aug. 2 and then annexed.

Aziz began immediate discussions with Foreign Minister Eduard Shevardnadze and was told in no uncertain terms to obey the Security Council resolutions on getting out of Kuwait.

Apparently, in even stronger terms, the Soviets accused Iraq of creating obstacles on allowing all Soviet nationals to leave the Middle East nation.

Foreign Ministry spokesman Vitaly Churkin said instead of the 1,000 Soviet citizens scheduled to leave in November, only 350 were able to exit.

The gap, Churkin said, between words and deeds ''was abnormal and inadmissible.''

''If the Iraqi side does not promptly remove all the barriers it artificially erected against the return of Soviet citizens and fails to ensure their unhampered departure from Iraq, it will further complicate relations between the Soviet Union and Iraq and compel us to take a tougher position with regard to the gulf situation,'' Churkin said.

As the former main supplier of arms to Iraq during the Iran-Iraq war, Moscow still maintains great leverage with the regime in Baghdad.

But Gorbachev warned Iraq that Moscow wants U.N. resolutions obeyed.

''The Soviet Union will continue to cooperate with other countries to show Saddam Hussein there is no hope and no grounds to believe that he can break international unity,'' Gorbachev said.

''We cannot allow this since we have just started moving away from the Cold War,'' he said.

Gorbachev, whose administration cut off arms supplies to Iraq a day after the incursion into Kuwait, suggested that supplies of weapons and military technologies be curbed to all Third World countries to prevent wars.

Developments in the Persian Gulf make one take a look at the entire problem in a new light,'' he told parliament. ''Resolving it is in our interests, in the interests of Europe, the United States and the ''States and the

Churkin, the Foreign Ministry spokesman, said Shevardnadze will leave Wednesday for the United Nations, where the resolution tightening the noose on Iraq will be discussed.

The landmark session at the Security Council, to be held Thursday, may be a major turning point on getting an Iraqi pullback or may mark a step toward war.

In the fast-paced diplomacy aimed at averting a Middle East war, Churkin also announced that Saudi Foreign Minister Saud al-Faisal will arrive in Moscow Tuesday. Until this year, the Saudis did not even have diplomatic relations with Moscow.

Churkin, appointed the new ministry spokesman this month replacing Gennady Gerasimov, said Aziz and Shevardnadze had talked for at least four hours.

Churkin said in no uncertain terms Moscow was telling its one-time ally Iraq that it had to obey the resolutions passed by the Security Council.

''From the Soviet side, the negotiations are about the necessity that Iraq carry out the Security Council resolutions,'' Churkin said.

From the beginning, a series of U.N. resolutions, all backed by Moscow, have demanded that Iraq must unconditionally leave the tiny oil state it took over by force.

The Soviet Union has lined up behind the United States in condemning Iraq for the Kuwait invasion from the first day of the incursion.

Less clear, however, is whether the Soviet Union would finally vote with the United States at the U.N Security Council on authorizing military force to make Saddam Hussein give up his Kuwaiti occuaption.

Shevardnadze returned this week from Beijing, where he discussed the upcoming resolution at the Security Council with China, one of the five permanent members of that body. The other four are Britain, France, the United States and the Soviet Union.

#90330u0330 11/26/1990 ~United Press International

WASHINGTON (NOV. 26) UPI - The Supreme Court Monday let stand a decision that military efforts to identify U.S. servicemen killed in action can legally meet less stringent standards than those accepted by most civilian medical examiners.

The court refused to review a decision that the military cannot be sued for erroneously making a ''positive'' identification of remains as those of a specific U.S. serviceman shot down during the Vietnam War, then refusing to return him to missing-in-action status.

The case involves a suit brought by the wife, mother and daughter of Lt. Col. Thomas Hart III, one of 16 crew members shot down Dec. 21, 1972, over Pakse, Laos, while aboard a U.S. Air Force AC130 aircraft.

Two crew members parachuted to safety and a third was declared dead soon after the plane crash, but the 13 others were listed as missing in action.

In 1985, after a joint excavation of the crash site by U.S. and Laotian governments uncovered bone fragments and other materials, the Army Central Identification Laboratory (CILHI) in Hawaii announced it had positively identified all 13 MIAs, and said Hart had been identified based in part on seven of some 50,000 bone fragments recovered at the site.

Hart's wife, Anne Hart, sued to have an expert forensic anthropologist examine the remains. He found that positive identification was impossible based on the evidence.

Anne Hart then objected to the government's classification of her husband as dead based on the remains, and was told that if she did not wish to accept the remains, they would be buried anyway at Arlington National Cemetery with full military honors.

At the same time an independent, civilian inquiry into the operation of CILHI was approved by the secretary of the Air Force, and burial of the disputed remains was postponed.

The civilian panel found that only two of the 13 members of Hart's crew could be positively identified from the remains, and he was not one of them. The government acknowledged that ''some of the Pakse identifications did not appear to be justified according to standard forensic methods and therefore could not withstand scientific scrutiny.''

The government notified the families of the 13 crew members, but refused to return Lt. Col. Hart to ''unaccounted-for'' status.

Anne Hart, her mother-in-law Vera Lee Hart, and her daughter Gillian Hart filed suit in Florida under the Federal Tort Claims Act.

Under the FTCA, the government maintains immunity from suits involving discretionary functions or duties of the government or employees, while it waives governmental immunity from suits for injuries or losses resulting from government negligence.

The discretionary functions exception was designed to avoid having the courts second guess government decisions.

Federal court in Pensacola, Fla., awarded the Harts $632,800 in compensation after a jury found the government guilty of ''intentional infliction of emotional distress.''

But the 11th U.S. Circuit Court of Appeals reversed, finding that government efforts to account for, identify and bury dead U.S. servicemen are based on policy judgments and therefore immune from suit under the discretionary function exception to the FTCA.

''Government efforts to identify deceased personnel are clearly discretionary functions,'' wrote the 11th Circuit, while acknowledging the government employs fair less stringent standards in obtaining a ''positive'' identification than would be done in civilian forensics.

Anne Hart, who claimed to have some reports that her husband may be alive and being held prisoner, argued that labeling him ''accounted for'' without stronger scientific proof could encourage captors to kill him.

The government argued that if its soldier identification program were ''constrained by the dictates of forensic anthropology currently prevailing in the civilian scientific community, CILHI's ongoing identification project would be severely hampered.''

It argued the identification program reflects ''the government's policy that, to the extent possible, remains of American servicemen killed in action should be identified and afforded proper burials. This policy embodies political, moral, and military judgments.''

#90330u0334 11/26/1990 ~United Press International

CHICAGO (NOV. 26) UPI - Concerned about an earthquake? An insurance group suggests you take a look at your house's foundation, your water heater and the trees in your yard.

Taking in a supply of fresh batteries isn't such a bad idea, either, and someone in the family should know first aid, the Illinois Insurance

Information Service said Monday.

''Whether the prediction of a major earthquake occurs or not - and most experts agree it is impossible to predict the exact date of such an occurrence - the IIIS and the Department of Insurance believe now is the time to inform the public and fully as possible,'' IIIS Executive Director Ken Towers said.

The agency recommended:

-A family emergency plan and first-aid training.

-Bolting down water heaters and strapping them to a wall.

-Checking with a builder or architect to be sure frame houses are firmly anchored to foundations.

-Inspecting chimneys and protecting against bricks shaking loose and falling into the house.

-Securing tall furniture, mirrors, picture frames, hanging plants, lamps and the like.

-Securing cabinet doors, perhaps with child-proof latches, to prevent them from swinging open.

-Installing flexible connectors for gas lines.

-Making sure someone knows how to shut off gas, water and electricity.

-Removing trees that are leaning over buildings or are weak and likely to fall.

-Obtaining fresh batteries for radios, flashlights and other emergency equipment.

If a major quake does occur, experts advise staying indoors and seeking safety under a heavy piece of furniture. Avoid windows and basements. After a quake, the IIIS recommended:

-Making first aid the first priority and staying alert for aftershocks.

-Checking utilities and shutting off any that are damaged.

-Collecting food, water, medicine and sleeping materials.

-Cleaning up any dangerous materials that have been spilled.

-Checking to make sure sewer lines are intact before flushing toilets.

-Using the telephone only to deal with emergencies.

-Listing damaged and destroyed property and contacting an insurance agent.

-Avoiding hasty repairs and checking the credentials of anyone offering to work on damaged property.

#90330u0337 11/26/1990 ~United Press International

BAKERSFIELD, Calif. (NOV. 26) UPI - Auto racer Billy Vukovich, the grandson of two-time Indianapolis 500 winner Bill Vukovich, was killed in a practice session accident at the Mesa Marin Raceway in Bakersfield.

Witnesses said Vukovich, 27, of Fresno, was practicing Sunday in an open-wheel sprint car which slammed head-on into a retaining wall at 130 miles per hour on the third turn. He suffered massive head injuries and was pronounced dead on arrival at Kern Medical Center 45 minutes later.

Kern County Coroner's officials scheduled an autopsy for Monday.

Vukovich was named rookie of the year at Indianapolis in 1988, finishing 14th, and had driven in the last two Indy 500 races. He began his racing career in 1981 by driving midgets at dirt tracks around the San Joaquin Valley.

His father, Billy Vukovich Jr., drove in 12 Indy 500 races and finished second in 1973.

Vukovich's grandfather, Bill, won the Indy 500 in 1953 and 1954 and was leading the race in 1955 when he was killed in a crash.

Billy Vukovich Jr., now an employee of the Simpson Safety Equipment Co., was in Indianapolis Sunday.

The owner of the car Vukovich was driving Sunday, Don Berry of Selma, Calif., said he didn't know why Vukovich crashed.

''We don't know what happened,'' Berry said. ''There was nothing, nothing out of the ordinary. Nothing missing. Nothing broke. We just don't know. Billy took that with him.''

Vukovich, who never married, had been practicing for a California Racing Association event. The president of the CRA, Frank Lewis, said he thought the throttle had stuck but race track workers reported seeing the car slow down just before hitting the wall.

The death stunned racing enthusiasts.

''I don't know what to say,'' said Ron Helmelgarn, owner of the cars Vukovicxh drove at Indy in 1989 and 1990. ''Billy was more than just a driver. He was a very good friend. On the track, he was a hard charger who always wanted to win. Off the track, he was well-liked and fun to be around.''

A spokesman at Lyle's Funeral Home in Fresno said funeral arrangements were pending.

#90330u0341 11/26/1990 ~United Press International

(NOV. 26) UPI - The official Iraq News Agency says President Saddam Hussein ordered the release of all American hostages whose wives are currently visiting them in Baghdad. The report said Saddam made the announcement during a meeting with the wives. It did NOT say how many of the Americans still held in Iraq and Kuwait are affected by the decision.

Iraqi Foreign Minister Tariq Aziz got some bad news in Moscow today. Soviet officials told him to allow all Soviet citizens to leave Iraq or face a tougher stance on the Persian Gulf crisis by the Soviet Union. Aziz met for about four hours with Soviet Foreign Minister Eduard Shevardnadze, who also told him that Iraq must obey the U-N resolutions calling for a withdrawal from Kuwait.

Also in Moscow, President Gorbachev warned Iraq in a speech to the Soviet parliament that it must give up hope that it can break the American-Soviet unity on Baghdad getting out of Kuwait. And a Soviet Foreign Ministry spokesman said the Saudi Arabian foreign minister will arrive in Moscow tomorrow. Until this year, the Saudis did NOT even have diplomatic relations with the Soviets.

The U-S Supreme Court today let stand a ban on begging in the New York City subway sytem. Advocates for the homeless immediately charged that the high court decision to allow the ban to stand will have a chilling impact on individual rights of the destitute across the nation. A group of the poorest residents of New York City had filed a class- action suit to overturn the begging ban as a violation of their First and 14th Amendment rights.

NASA and a private contractor are both coming under fire when it comes to problems with the multi-BILLION-dollar Hubble space telescope. Results of the five-month investigation are to be released tomorrow. And published reports say NASA will get part of the blame as will Perkin Elmer, the Connecticut firm that made the faulty telescope mirror. The two reportedly did NOT examine results of key tests that actually found the problem before Hubble was launched.

The communist regime in Serbia will let rival political parties take part in counting ballots from the first multi-party elections in the Yugoslavian

republic in 45 years. The decision follows opposition calls for a boycott of the December 9th elections on fears that communist- dominated election commissions could rig the vote results. There are some 30 opposition parties in Serbia that are exepcted to run against the ruling Socialist Party.

Pleas for a medical pardon for convicted Nazi war criminal Klaus Barbie are being called a ''horrible publicity stunt'' by officials in France. The so-called ''Butcher of Lyon'' reportedly has blood cancer. He was given a life sentence in 1987 on conviction of ''crimes against humanity'' in France.

#90330u0345 11/26/1990 ~United Press International

WASHINGTON (NOV. 26) UPI - Veteran House Republican Carl Pursell of Michigan said Monday he will seek the third-ranking post within the party leadership when Republicans pick their officers next month.

Pursell, a moderate on social questions but more conservative on fiscal questions, will challenge Rep. Jerry Lewis of California for the position of chairman of the House Republican Conference, a service organization that provides members with policy research.

Republians will meet Dec. 3 to pick their leaders.

''Based on my exploratory phone calls and personal contacts with Republican members from all perspectives, I have been encouraged by their support,'' said Pursell. ''They believe I can bring new energy to an important position.''

Pursell has held several lower ranking leadership posts during his 14 years in Congress and is a member of the House Appropriations Committee. He has also served on the House ethics committee, one of the more thankless chores on Capitol Hill.

That race is one of two contested party posts. Rep. Guy Vander Jagt, R-Mich., leader of the National Republican Congressional Committee, a group that assists GOP candidates, is being challenged by Rep. Don Sundquist, R-Tenn.

House Republican leader Robert Michel of Illinois and the assistant leader, Newt Gingrich of Georgia, are unopposed.

JUNEAU, Alaska (NOV. 26) UPI - Ferocious winds and tremendous waves battered a Bering Sea fishing fleet, and the Coast Guard said Monday that three boats were lost and seven others were in trouble but no one died.

One vessel sank and two others were disabled, forcing 16 people into lifeboats

or into frigid waters, but all were rescued in good condition, Coast Guard Petty Officer John Germain said from the rescue coordination center.

Seven other boats were drifting, some without power, and two crewmen injured in the storm were awaiting rescue by a Coast Guard helicopter, Germain said.

A storm Sunday carrying 60 mph winds - with gusts to 90 mph - whipped up 30-foot waves that tore into the crab fishing fleet east of the Pribilof Islands in the Bering Sea, according to the Coast Guard and the National Weather Service.

There were reports of waves that may have been as high as 45 feet breaking over the tops of vessels.

''There's some big waves out there,'' said Reuben Eaton, a meteorologist in Anchorage.

The storm ''wreaked havoc'' in the fishing fleet, said Coast Guard spokeswoman Kathy Yonce.

Five crewmen aboard the 100-foot Winter Hawk of Seattle barely had time to don survival suits, radio for help and jump into the sea before their ship sank, Germain said. Two other fishing boats rushed to pull the five out of the water.

Six crewmen abandoned the 107-foot Shannon Marie of Portland, Ore., when it began taking on water. Five fishermen deserted the 91-foot Pisces of Bellingham, Wash., which caught fire and was in danger of sinking. All 11 managed to get into life rafts and were rescued by other fishing boats.

Some of the remaining seven vessels were drifting; some had lost power and suffered various kinds of damage. None was in immediate danger of sinking, Germain said.

All 10 crab boats were fishing north of Cold Bay on the Alaska Peninsula and east of the Pribilof Islands in the southeastern Bering Sea.

No Coast Guard cutters were nearby but two Coast Guard aircraft responded to the distress calls and an H-3 helicopter waited at the town of Port Heiden for a break in the weather to take two injured crewmen off the fishing vessel Big Blue, Germain said.

The storm hit Sunday morning and winds and waves relented later in the day, but Eaton said a new storm was expected to hit the same fishing grounds late Monday.

#90330u0357 11/26/1990 ~United Press International

NEW YORK (NOV. 26) UPI - A growing number of people over 50 are emerging as victims of AIDS, a disease previously linked only to younger people and children, The New York Times reported Monday.

The number of older AIDS victims has previously been underestimated due to shame, fear or the assumption that the symptoms were merely due to old age, the paper said.

Aquired immune deficiency syndrome is now occuring far more often in people over the age of 50, a classification given by the experts who treat and study AIDS, than it is among children under the age of 13, The Times said.

According to the most recent information from the Federal Centers for Disease Control in Atlanta, there have been 15,696 cases of AIDS reported in people over 50 as against 2,686 cases in children under 13.

Older people account for 10 percent of the more than 150,000 AIDS cases reported to the government, the paper said.

''This topic is one that a year ago no one was talking about, and now it has come of age,'' said Len McNally, of the New York Community Trust, which financies AIDS programs.

Little research has been done on AIDS among older people and experts say that the number of cases raises a number of challenges, medically and socially.

People over 60 who get AIDS are known to survive less than two years, said Dr. William Adler, chief of the National Institute on Aging's immunology section.

''When we compare children with older people, the older people developed infections that moved more swiftly and were more severe,'' said Adler. ''Patients who are over 60 tend to survive less than two years from the time they are infected, whereas children who contract it in utero survive about five years, and those who get it from blood products, from five to seven years.''

The federal statistics show that the majority of cases of infection in people over 50 occur in homosexual or bisexual men who caught the germ during sexual intercouse.

About 17 percent of the victims came in contact with the virus through tainted blood transfusions before routine screening began in 1985, the paper said.

From a medical standpoint, there are signs that the disease progresses through an older body faster and that it causes more severe afflictions.

Socially, there is even more of a stigma.

One social worker said she documented eight cases in Staten Island during her routine evaluations and believed the federal government was overlooking cases of the elderly with AIDS.

In New York City, there has been an increase in sex education discussions at senior citizens centers and in discussion groups for older AIDS patients, The Times said, adding that the pattern had not yet been duplicated nationwide.

#90330u0375 11/26/1990 ~United Press International

LONDON (NOV. 26) UPI - Stock prices closed lower in light trading Monday on the London International Stock Exchange, stymied by renewed fears of an outbreak of war in the Persian Gulf and higher oil prices.

The blue-chip Financial Times 100-stock index, which jumped 42.6 points Friday fell 18.6 points to 2,151.9. The narrower top 30 industrial average lost 13.6 points to 1,698.6.

Volume amounted to around an estimated 346 million shares.

Analysts said stocks fell as the possibility of an imminent conflict in the Middle East unnerved professional investors.

Stocks fell on U.S. pressure in the U.N. Security Council for a resolution backing the use of force after a deadline for Iraqi President Saddam Hussein's retreat from Kuwait, analysts said.

On the trading floor, Mideast jitters helped to boost oil and oil- related stocks. British Petroleum gained 4 cents to $6.40 while Shell gained 8 cents to $8.62.

British Aerospace plunged 28 cents to $9.91 amid speculation that Saudi Arabia may withdraw a Tornado aircraft contract.

Fairline Boats, a luxury yacht builder, climbed 47 cents to $10.50 after announcing a 16 percent profits increase.

Leisure group Brent Walker added 6 cents to $1.84 amid hopes of a takeover bid by Irish conglomerate Jefferson Smurfit Group PLC.

Ratners, a jewelry retail company, gained 8 cents to $3.79 on increased sales of Teenage Mutant Ninja Turtles novelty watches.

Elsewhere, stock prices on the Frankfurt Stock Exchange closed sharply lower in thin trading.

The closely watched German Stock Index lost 40.36 points to 1,443.00.

Traders said stocks fell in part on profit taking following last week's strong advances.

#90330u0377 11/26/1990 ~United Press International

SAGINAW, MI (NOV. 26) UPI - A woman wanted since March on drug and money laundering charges was arrested while bowling after being identified in a ''Bowler of the Week'' newspaper photograph, authorities said Monday.

Amanda Guild, 30, of Saginaw, was indicted with five other people in Jackson, Tenn., on charges of conspiracy, possession with intent to distribute marijuana and cocaine, money laundering, obstruction and perjury.

The U.S. Marshals Service was asked by the Internal Revenue Service to help arrest people in the Tennessee indictments known to live in Michigan.

The others were arrested earlier but Guild's whereabouts remained unknown until the bowling picture appeared in the Saginaw News, providing the league name and location of where she bowled.

At the time of her arrest Sunday afternoon, Guild was in the fourth frame of her first game in the Sunday Afternoon Women's League at Americana Lanes in Buena Vista Township, the Marshals Service said.

She was arrested without incident, authorities said.

WASHINGTON (NOV. 26) UPI - Orders for U.S. made machine tools rose 31 percent in October to $269.3 million from $205 million in the year-earlier period, the Association for Manufacturing Technology said Monday.

Orders in October were about the same as those for the previous months of the year, the group said.

Orders for lathes, machining centers, boring mills, milling machines and other equipment used to shape metal were up 27 percent to $183.6 million, from $144.9 million in the year-earlier period.

Machine tool shipments edged up 1.1 percent last month from year-ago levels to $254.4 million.

CHICAGO (NOV. 26) UPI - Miglin-Beiter Inc. is expanding its horizons and revising some of its expectations as it seeks financing for what it proposes as the new tallest building in the world, a business magazine reported Monday.

Ground was to have been broken in September for the 125-story Miglin- Beitler Tower, to be built within a few blocks of what is currently the world's tallest building, the 110-story, 1,452-foot Sears Tower. A dramatic shrinkage of the investment capital market, however, has stalled the start of construction.

''We have to take a new approach to get this thing financed,'' Miglin-Beitler President J. Paul Beitler said in Monday's edition of Crain's Chicago Business.

Among other steps, the firm plans to expand its money search overseas. While most previous fund-raising efforts were concentrated in the United States, a new push will be made with Dutch and Japanese pension funds.

The firm also is revising some of the economic assumptions built into its investment materials, and has named former Citicorp real estate lender Debra Ann Conrardy to head its fianancing effort.

The firm still believes it is possible to break ground on the needle- like structure by spring, Beitler said, and he remains optimistic the building will be built.

''All the assumptions we are making are quite reasonable,'' he said.

#90330u0393 11/26/1990 ~United Press International

(NOV. 26) UPI - A huge fire is causing delays at Denver's Stapleton international airport. As much as two Million gallons of aviation fuel in four tanks is burning out of control at the airport, and the flames are NOT expected to die down until late tomorrow or Tuesday. Delays of up to three hours are reported at the airport. Stapleton is the seventh- busiest airport in the nation.

News reports from Poland say exit polls show that Solidarity leader Lech Walesa came in first in yesterday's election with 39-point-three percent of the vote. Second place went to Stanislaw Tyminski, an emigree businessman from Canada. He had 23-point-two percent, and will face Walesa in a runoff December 9th. The polls show Prime Minister Tadeusz Mazowiecki in third, out of the running.

Typhoon Page is moving closer to the Philippines with peak winds of 115 miles an hour. Relief officials continue to assess the damage caused by an earlier typhoon that killed more than 400 people. The Manila Weather Bureau located the latest typhoon in the Pacific Ocean, 370 miles southeast of Manila. The

Bureau said on its present course, the storm will strike the southeastern section of the main Luzon island Wednesday and cut through metropolitan Manila.

104 former German hostages arrived in Frankfurt by way of Amman, Jordan, yesterday after their release by Iraq. The Germans were accompanied by one British citizen. Amman Radio reported that the hostages were freed in response to German Chancellor Helmut Kohl's call earlier this month for a peaceful solution to the Persian Gulf crisis.

The 372 Conservative members of Britain's Parliament are preparing to vote this week on who will succeed Margaret Thatcher as prime minister. Public opinion polls show the Conservatives would beat the Labor party in the next general election if Michael Heseltine, a former Defense Secretary, or John Major, the chancellor of the exchequer, led the party.

In Paris, the lawyer for Nazi war criminal Klaus Barbie is launching a campaign for the release of the ailing 76-year-old former Gestapo Chief from prison. Attorney Jacques Verges says Barbie, the so-called ''Butcher of Lyon '' has cancer and has been undergoing chemotherapy at a Lyon hospital.

#90330u0399 11/26/1990 ~United Press International

SOFIA, BULGARIA (NOV. 26) UPI - Bulgarians unhappy with the pace of reforms by the government of Prime Minister Andrei Loukanov joined in a nationwide strike Monday to hamper industry and public transportation and force his resignation.

Strike organizers claimed several hundred thousand Bulgarians joined in the action, including industrial and transportation workers. Government officials, however, said the Eastern European nation was running normally.

President Zhelyu Zhelev called for negotiations between the ruling Bulgarian Socialist Party - the former Communists - and the Union of Democratic Forces - the main opposition party. He asked that they work for a political compromise that could lead the country out of crisis.

''The political tension in this country has reached threatening dimensions and its further escalation is inadmissible,'' Zhelev spokesman Valentin Stoyanov said at a press conference.

The strike was organized by the Podkrepa Labor Confederation, a large trade union that claims several hundred thousand members, and is supported by the UDF. The government maintains the strike is illegal because it has political goals.

Addressing protesters at the rally, the vice president of the Confederation of Independent Syndicates, Svetoslav Stavrev, asked protesters to sign a

declaration calling on Zhelev to form a caretaker government.

The declaration also called for the dissolution of the parliament and new parliamentary elections next February.

Strike organizers appearing at a rally that drew tens of thousands of people Monday afternoon in Sofia said workers in cities across the country were participating in the strike.

The chairman of the Podkrepa National Strike Committee, Krustyu Krustev, told protesters that 50 enterprises in Sofia; 102 enterprises in Plovdiv; workers at a large chemical plant and oil refinery in Burgas; workers in some chemical and metallurgical industries; and bus drivers in Sofia had joined the action.

Members of other unions, including the Confederation of Independent Syndicates the largest union in Bulgaria, also joined in the strike, and it was backed by the Union of Actors and by journalists at official news agency BTA, Bulgarian Radio, and Bulgarian Television.

But the government seemed unaffected by the walkout. In an interview with Bulgarian Radio, the deputy president of Loukanov's Cabinet, Nora Ananieva, said the capital and countryside were relatively calm and that food distribution and transportation were operating normally.

The BTA reported that in Sofia, military buses driven by civilians replaced striking public transportation workers.

In a speech televised Sunday, Loukanov said the strike would jeopardize ''the outer world's confidence in Bulgaria, which is already nearing zero,'' BTA reported. Calling a strike illegal, he threatened the organizers with prosecution for disturbing the public peace.

The strike comes after several weeks of demonstrations by opposition groups led by UDF and a four-week strike by university students, who say Loukanov's Socialist-led government is stalling on reforms.

Polls have showed that the public is also frustrated by the chaos in Bulgaria's parliament, where the Bulgarian Socialist Party holds a slim majority.

Loukanov narrowly defeated a motion of no-confidence brought against him last week by the opposition. Following the vote, opposition parliamentarians walked out of parliament. In an interview with journalists Monday, the spokesman for UDF, Mihail Nedelchev, said the party was trying to decide on conditions for its return.

#90330u0407 11/26/1990 ~United Press International
NEW YORK (NOV. 26) UPI - Matsushita Electric Industrial Co. of Japan announced Monday that it signed an agreement to purchase MCA Inc. for $6.1 billion, the latest in a series of takeovers of Hollywood institutions by foreign buyers.

After the purchase is completed, the present executive officers of the U.S.entertainment giant, including co-founder Lew Wasserman, will remain with the company and continue to manage MCA.

Based on the agreement signed in New York, Matsushita Electric will start a cash tender offer of $66 a share for MCA's common stock by Friday, meaning the Japanese electronics giant will be paying a total of $6.1 billion, Matsushita said in an announcement issued in Tokyo.

Pending completion of the transaction, MCA's acquisition will mark the second time a major U.S. film studio has been taken over by a Japanese company in less than a year and a half and the fourth time a major Hollywood studio hascome under foreign control. Among MCA's holdings is Universal Studios.

Matsushita, whose consumer electronics brands include Panasonic, Quasar and Technics, has yearly revenues of more than $40 million and as much as $15 billion in cash on hand.

The prospective takeover price was estimated at $6.7 billion as recently as Sunday, but the weakening economy and MCA's problems with a new theme park in Florida and its half-interest in Cineplex Odeon Corp., the troubled theater chain operator based in Toronto, may have pushed the price down.

The MCA deal followed the acquisition of Columbia Pictures Entertainment by Japan's Sony Corp. for $4.8 billion in October 1989. Italian financier Giancarlo Parretti recently completed a $1.36 billion buyout of MGM-UA Communications Inc., while Rupert Murdoch's Australia- based News Corp. gained control of Twentieth Century-Fox Film Corp. several years ago.

When MCA and Matsushita first announced their buyout talks nearly two months ago, it seemed that the two MCA assets - WWOR, a Secaucus, N.J., television station, and the Yosemite Park & Curry Co. concession firm - would not be included in any deal.

It was believed that WWOR, which MCA bought for $387 million several years ago might be spun off to shareholders or sold to another media company becausefederal regulations bar foreign ownership of TV stations beyond 20 percent.

MCA's negotiating team was headed by Wasserman, the company's chairman and chief executive officer, and President Sidney Sheinberg. The 77-year-old Wasserman, who founded the company as a talent agency, controlled about 12 percent of the stock, while Sheinberg had about 1.3 million shares.

Creative Artists Agency Chairman Michael Ovitz, one of the most powerful players in Hollywood, had represented Matsushita.

Before the deal closed, MCA management was expected to remain in place for the short term, but many believed that David Geffen would eventually become the new chief. MCA bought Geffen Co., a highly successful record company, for $550 million in April.

MCA's key asset has been its movie studio, whose ''E.T.'' release still holds the record for top-grossing film at $367.7 million.

Other interests include a film library with 3,000 titles, theme parks in Hollywood and Florida, a television group, various record labels and publishers, 420 acres of Hollywood real estate worth $500 million, other real estate holdings and a half interest in the USA Network cable channel.

#90330u0428 11/26/1990 ~United Press International

(NOV. 26) UPI - One of the nation's busiest airports was disrupted during the hectic holiday weekend by a spectacular fire raging through four giant tanks containing up to two Million gallons of aviation fuel. The fire at Denver's Stapleton International Airport started in two tanks yesterday morning, and spread to two other tanks last night. Airlines delayed flights as they scrambled to find alternate fuel sources.

Exit poll results from Poland indicate that there will be a runoff in the presidential race. Solidarity leader Lech Walesa is leading, but businessman Stanislaw Tyminski took second place ahead of Prime Minister Tadeusz Mazowiecki. UNofficial results show Walesa with 39-point-three percent of the vote, Tyminski with 23-point-two and Mazowiecki with 19-point- nine.

President Bush begins the week by traveling to Mexico today for a two-day

meeting with President Carlos Salinas de Gortari. Bush returns to Washington late Tuesday. After a couple of days behind the desk in the Oval Office, he'll be off again. Bush leaves Sunday for a seven-day trip to South America, which will include stops in Brazil, Uruguay, Argentia, Chile and Venezuela.

Police in Tokyo say a bomb exploded today along a bullet-train line outside Tokyo. The blast showered chunks of a concrete retaining wall onto the tracks just hours before Emperor Akihito and Empress Michiko were to pass by on their way to Japan's most sacred Shinto shrine. No one was injured in the blast, which police suspect was the work of radical leftists opposed to Japan's emperor system.

Political violence claimed at least 19 lives in South Africa during the weekend. Police say UNidentifed gunmen ambushed two black taxis in Natal province, killing nine passengers. 10 other people died elsewhere yesterday in scattered incidents of politigcl'violence. Five black men were killed in townships ina4he"Z/he7/8nksfuzg area.

A Chicago man free on bond on charges of kidnapping his ex-girlfriend abducted the Western Illinois University freshman again yesterday after killing her father and injuring her brother and mother. Police say 18- year-old Michael Bell is accused of stabbing the girl's brother, and shooting her mother and father. The father died later at a hospital.

JERUSALEM (NOV. 26) UPI - Israel called on Egypt and Jordan Monday to step up security and prevent a repetition of infiltration attempts from their territories that have led to the deaths of six Israelis in the last month.

A gunman, believed to be an Egyptian border policeman, crossed the Israeli border Sunday and ambushed passing vehicles, killing four Israelis and wounding 23.

''We will take all security measures,'' Prime Minister Yitzhak Shamir told French Jewish leaders. ''But we will also demand from the governments bordering us, Egypt and Jordan, that they take care that things like this do not happen again.''

In Novemeber, two Israeli soldiers were killed by gunmen who attempted to infiltrate from Jordan.

Israeli leaders said they did not blame the Egyptian government for Sunday's incident on what many describe as the ''peace border.'' Shamir, however, said propaganda against Israel in Jordan and Egypt, permitted by the governments, was the cause of the attack near the Israeli resort city of Eilat.

''It is clear these (infiltrators) are the enemies of peace just as (Egyptian) President Mubarak has pointed out,'' Foreign Minister David Levy said. ''But enemies of peace must not be allowed to take action from Egyptian land.''

Egypt, the only Arab nation that has signed a peace treaty with Israel, has expressed regret over the incident and said it would punish those responsible.

The four Israelis killed in Sunday's attack were buried Monday.

JOHANNESBURG, South Africa (NOV. 26) UPI - Unidentified gunmen ambushed two black taxis in strife-torn Natal province, killing nine passengers at the start of a weekend in which at least 19 people died in political violence, police and state-run radio reported Monday.

The attack on the two taxis - a van and a pickup truck - occurred in the area of Harding in Natal province late Friday in what appeared to be a resurgence of faction fighting there. Police said nine people were killed, including a woman and her baby daughter, and six others seriously injured.

Police found 9mm cartridges at the scene but the identity of the gunmen was not known.

Ten other people died elsewhere on Sunday in scattered incidents of political violence, according to an official police announcement. Five black men were killed in townships in the Johannesburg area, two in factional fighting in strife-torn Natal province, two others in a western mining area, and a man of mixed-race was shot to death in a township of the Cape Province.

In a township of the western town of Klerksdorp, 125 miles from Johannesburg, police said ''a group of blacks threw stones at a hostel. Police retaliated with birdshot. Once man was fatally wounded.'' In the same area, police also found the the body of a man stabbed to death.

In the Johannesburg area, police found the bodies of two blacks shot to death in the black township of Tembisa, two more in the township of Dunnottar and a fifth man was found stabbed to death in the tonwship of Katlehong.

The South African Institute of Race Relations reported last week an average 10 people are killed daily in politically related violence in South Africa and that 1990 could be regarded as the most violent of the past six years.

FRANKLIN PARK, Ill. (NOV. 26) UPI - Dean Foods Co. outlined plans Monday to

sell its McCadam Cheese Co. subsidiary to the Valio Finnish Co-Operative Dairies Association of Helsinki, Finland.

The two companies said they have signed a letter of intent for the transaction. The sale, however, is still subject to regulatory review and execution of a definitive agreement. The deal is expected to close in 60 days.

The price was not disclosed.

McCadam, with annual sales of about $50 million, supplies private label cheeses to the grocery and foodservice markets. Valio, Finland's largest dairly cooperative, has worldwide sales in excess of $2 billion.

ORLANDO, Fla. (NOV. 26) UPI - Braniff Inc. and its unsecured creditors have filed a complaint against the bankrupt airline's former management and an adviser, accusing them of illegally draining cash from the financially ailing carrier.

The complaint filed in federal bankruptcy court earlier this month seeks $18.5 million in compensatory and punitive damages, a lawyer representing the unsecured creditors committee said Monday.

The complaint charges that the executives drained more than $6 million from ailing airline, in part by charging inflated fees in a number of aircraft transactions between Braniff and its affiliates, lawyer Richard Levy said.

Defendants named in the suit include Braniff's two major stockholders - Jeffrey Chodorow of Philadelphia and Arthur G. Cohen of New York - former Braniff adviser Scot Spencer, and others, Levy said.

Spencer, who currently heads BN Air Inc. of Dallas, a company formed by Chodorow which bought Braniff's trademark and other property in April for $313,000, did not respond to a request for comment.

''There were transactions under which aircraft were leased by (BIA- COR Holdings Inc.), the entity controlled by Cohen and Chodorow or by other entities, (such as) Core Leasing, which is affiliated,'' Levy said.

''There was then a sublease of those aircraft over to Braniff, with overrides and deposits which were unfair as to Braniff,'' he added.

In one such case, six jets leased by Core Leasing for $78,000 apiece were then transferred to Braniff at a cost of $102,500 each, the complaint charges.

Levy said he was not qualified to comment on whether the transactions pushed

Braniff into bankruptcy. However, the complaint says the transactions either rendered Braniff insolvent, or came during a time of insolvency, he said.

The company filed for Chapter 11 bankruptcy protection in September 1989 and suspended all commercial service in November 1989.

The complaint filed Nov. 15 is separate from a lawsuit filed last summer by creditors accusing former Braniff executives and key stockholders of fraud.

That suit, which seeks $75 million in compensatory damages and $225 million in punitive damages, focuses on the 1988 leverage buyout of Braniff, Levy said. Chodorow, Cohen and Spencer also are named as defendants of that suit.

That action is still pending, Levy said.

SAO PAULO, BRAZIL (NOV. 26) UPI - Opposition candidates scored victories in major gubernatorial elections, handing the 9-month-old government of President Fernando Collor de Mello its first rejection from voters, exit polls showed Monday.

Official results were not expected until at least Wednesday, but polls taken during Sunday's balloting showed Collor-supported candidates were defeated in the key southern states of Sao Paulo, Minas Gerais and Rio Grande do Sul.

An estimated 52 million voters were eligible to cast ballots in the gubernatorial runoff elections in 15 of brazils 27 states.

The most important election by far was in Sao Paulo, Brazil's richest and most populous state. Exit polls showed Luiz Antonio Fleury won by a slim 1 or 2 percent over conservative Paulo Maluf, who was backed by Collor.

About 15 percent of Sao Paulo voters cast blank or null ballots, indicating distaste for either candidate. Voting is mandatory in Brazil.

Fleury claimed victory early Monday and said he would immediately begin planning for his administration.

''We are going to meet with all the political and independent forces in Sao Paulo and find a way out of this recession,'' he said.

There were no reports of violence or problems in the voting. On Friday, federal officials suspended the election in the northeastern state of Alagoas because of accusations of fraud. And approximately 8, 000 soldiers were sent to eight northern and northeastern states to help guard voting areas.

During the first round of elections Oct. 3, which renewed one-third of the Senate and all of the Chamber of Deputies, pro-government candidates won comfortably, giving the Collor government a majority in the 572-member Congress, which begins its new term in February.

But in Sunday's elections, the defeat of Collor-supported candidates was seen as a no-confidence vote against Collor's economic plan.

Collor is now going to have to arm himself against an opposition front, said Sao Paulo's current governor, Orestes Quercia.

Despite early successes in Collor's economic recovery plan, inflation was expected to climb to 17 percent in November. Unemployment has increased, and financial analysts have predicted the economy will register a 3.3 percent decrease for 1990, compared to nearly 3 percent growth in 1989.

This was the eighth time Brazilians have gone to the polls since 1982, when the military government that ruled the country from 1964 to 1985 permitted the first free gubernatorial elections.

KANSAS CITY, MO (NOV. 26) UPI - The 1990 United Press International All-Big Eight Conference football team, listing position, name, school, hometown in parentheses, height, weight and class.

First Team

Offense

Wide receivers - Mike Pritchard, Colorado (Las Vegas, Nev.), 5-11, 180, senior; Linzy Collins, Missouri (St. Louis), 6-2, 182, senior.

Tight end - Johnny Mitchell, Nebraska (Chicago), 6-5, 250, freshman.

Tackles - Mark Vander Poel, Colorado (Chino, Calif.), 6-8, 300, senior; Tom Punt, Nebraska (Sioux Center, Iowa), 6-8, 285, senior.

Guards - Joe Garten, Colorado (Placentia, Calif.), 6-3, 280, senior; Mike Sawatzky, Oklahoma (Weatherford, Okla.), 6-2, 272, senior.

Center - Jay Leeuwenberg, Colorado (Kirkwood, Mo.), 6-3, 265, junior.

Quarterback - Darian Hagan, Colorado (Los Angeles), 5-10, 185, junior.

Running backs - Eric Bieniemy, Colorado (West Covina, Calif.), 5-7, 195, senior; Gerald Hudson, Oklahoma State (Waxahachie, Texas), 5-9, 207, senior.

Kicker - Jeff Shudak, Iowa State (Council Bluffs, Iowa), 5-10, 175, senior.

Defense

Defensive linemen - Kenny Walker, Nebraska (Crane, Texas), 6-4, 240, senior; Joel Steed, Colorado (Denver), 6-2, 280, junior; Garry Howe, Colorado (Spencer, Iowa), 6-0, 265, senior; Stacey Satterwhite, Oklahoma State (Welch, Okla.), 6-6, 268, junior.

Linebackers - Alfred Williams, Colorado (Houston), 6-6, 230, senior; Mike Croel, Nebraska (Sudbury, Mass.), 6-3, 225, senior; Kanavis McGhee, Colorado (Houston), 6-5, 250, senior.

Defensive backs - Reggie Cooper, Nebraska (Slidell, La.), 6-3, 210, senior; Harry Colon, Missouri (Kansas City, Kan.), 6-0, 198, senior; Jason Belser, Oklahoma (Kansas City, Mo.), 5-10, 178, junior; Tim James, Colorado (San Dimas Calif.), 6-3, 215, senior.

Punter - Dan Eichloff, Kansas (Fort Lauderdale, Fla.), 6-1, 210, freshman.

Second Team
Offense

Wide receivers - Michael Smith, Kansas State; Curtis Mayfield, Oklahoma State.

Tight end - Russ Campbell, Kansas State.

Tackles - Gene Williams, Iowa State; Christopher Perez, Kansas.

Guards - Will Shields, Nebraska; Jim Wanek, Nebraska.

Center - Chip Budde, Kansas.

Quarterback - Carl Straw, Kansas State.

Running backs - Leodis Flowers, Nebraska; Blaise Bryant, Iowa State.

Kicker - Dan Eichloff, Kansas.

Defense

Linemen - Scott Evans, Oklahoma; Joe Sims, Nebraska; James Goode, Oklahoma; Pat Englebert, Nebraska.

Linebackers - Pat Tyrance, Nebraska; Chris Wilson, Oklahoma; Joe Bowden, Oklahoma.

Defensive backs - Bruce Pickens, Nebraska; Marcus Robertson, Iowa State; Dave

McCloughan, Colorado; Tyrone Byrd, Nebraska.

Punter - Brad Reddell, Oklahoma.

Honorable Mention

Colorado: Greg Biekert, linebacker; Ariel Solomon, offensive tackle.

Iowa State: Mark DouBrava, defensive back; Chris Pedersen, quarterback; Chris Spencer, wide receiver.

Kansas: Gilbert Brown, defensive line; Chip Hilleary, quarterback; Rob Licursi wide receiver; Keith Loneker, offensive tackle; Pat Rogan, linebacker; Dana Stubblefield, defensive line.

Kansas State: Brooks Barta, linebacker; Rogerick Green, defensive back; Frank Hernandez, wide receiver; Jaime Mendez, defensive back.

Missouri: Mike Bedosky, guard; Tim Bruton, tight end; Kent Kiefer, quarterback; Rick Lyle, defensive line; Damon Mays, wide receiver; Russ McCullough, offensive tackle.

Nebraska: Scott Baldwin, running back; Tyrone Hughes, running back; Mike Petko linebacker.

Oklahoma: Reggie Barnes, defensive line; Dewell Brewer, running back; Adrian Cooper, tight end; Greg DeQuasie, defensive back; Cale Gundy, quarterback; Charles Franks, defensive back; Terran Manning, guard; Mike McKinley, running back; Larry Medice, guard; Jeff Miller, offensive tackle; Otis Taylor, wide receiver; Terry Ray, defensive back.

Oklahoma State: Cary Blanchard, kicker; Mike Clark, defensive back; Jason Gildon, defensive line; Joe King, defensive back; Scott Webb, guard; Cecil Wilson, running back.

#90330u0508 11/26/1990 ~United Press International

WASHINGTON (NOV. 27) UPI - Three-quarters of the 51 economic forecasters surveyed by the National Association of Business Economists believe the U.S. economy already is slogging through a recession, the association said Tuesday.

Two-thirds of the economists also said the recession is expected to last two quarters or less and should be mild in historical terms.

Assuming that the current economic expansion ended at 93 months, it ''lived a long and prosperous life'' and fell short of the postwar record expansion of 1961 to 1969, the report said.

The report is the latest in a series of reports indicating a recession could be under way. Although the Bush Administration has insisted the economy is not in recession, President Bush recently conceded the economy has suffered a downturn. Private economists have not been as optimistic.

The NABE report forecast growth in the current quarter and the first quarter of next year will be negative but will improve by the fourth quarter of next year.

The nation's economy is expected to grow at an overall rate of 1.1 percent next year after growing 0.7 percent this year, the report said.

Unemployment, though, is anticipated to increase from the steady 5.5 percent of most of this year to 6.1 percent next year.

Corporate profits, already expected to be down 4 percent this year, are forecast to slip 1.3 percent next year.

Amid this gloomy scenario, interest rates are expected to decline but by less than 50 basis points from current levels, the report said.

Three out of four of the association's economists said a recession has already begun and almost all said the downturn began during either the current or previous quarter.

Of the 25 percent who said a recession is not already gripping the economy, most said the probability of a recession has increased since August. Only 15 percent of the economists said a recession is not in the economic horizon.

The majority of economists said the economic growth should pick up toward the end of next year while inflation cools.

Gross national product, when adjusted for inflation, is projected to increase 1.1 percent by the fourth quarter of next year while inflation at the consumer level slows to 4.5 percent from 6.4 percent, the report said.

#90330u0516 11/26/1990 ~United Press International

(NOV. 26) UPI - Saddam Hussein told the visiting wives of U.S. hostages in Iraq Monday that they were free to take their husbands with them when they return home, the nation's official INA news agency reported.

And a government-supervised Iraqi newspaper in Baghdad rejected in advance Monday any U.N. Security Council resolution endorsing military sanctions imposed against Iraq over its Aug. 2 invasion of Kuwait.

Soviet Foreign Minister Eduard Shevardnadze told visiting Iraqi Foreign Minister Tariq Aziz in Moscow that Baghdad must withdraw from Kuwait and give all Soviet nationals the right to leave Iraq, Amman Radio reported.

The United States, meanwhile, wants a Jan. 1 deadline for the withdrawal of Iraqi troops from the oil-rich emirate, and has lined up enough support in the U.N. Security Council for a resolution authorizing the use of force to oust Iraqi troops if such a deadline is not met, The New York Times said Monday.

Permanent Security Council members Britain, France and the Soviet Union have joined the United States in supporting a resolution, while China has indicated it will not veto the measure, the newspaper said. Six of the 10 rotating members have indicated they would pass a resolution, the report said.

Oil prices rose $2 a barrel by mid-Monday as reports regarding a military force resolution swirled. On the New York Mercantile Exchange, the benchmark West Texas Intermediate crude for January delivery climbed to $33.90 a barrel at midday. It had traded as high as $34.25 a barrel at one point.

''That's it. It seems the war drums are beating again and the market's getting nervous,'' said Tom Bentz, director of trading at United Energy Inc. in New York.

''Fear of the U.N. resolution being passed is lending strength to the market ''agreed Tom Blakeslee of the Pegasus Econometrics Group in Hoboken, N.J.

Asked whether he was confident the U.N. Security Council would approve a resolution, White House press secretary Marlin Fitzwater said, ''We're very optimistic.''

He said Secretary of State James Baker had met with each of the 15 Council members and will go to New York to chair a Council meeting that was set for Thursday to discuss and possibly vote on the resolution.

Diplomats at the United Nations confirmed the United States has asked the Council to agree on a date by which the U.S.-led multinational force would be allowed to take military action. Fitzwater, however, refused to comment on the reports of a Jan. 1 deadline, and indeed refused to say whether any deadlines were included in the proposed resolution.

The hostage release announcement was made by Saddam during a meeting with wives of U.S. hostages held in Iraq as human shields to ward off Western attack, said the Iraqi news agency, monitored in Cairo.

''The president ordered Iraqi authorities to allow American families to accompany their relatives currently in Baghdad to travel home on the occasion of their visit to Iraq,'' INA said.

''Starting this moment, you will have an additional right exceeding the rights of Iraqi citizens,'' the agency quoted Saddam as saying, in an apparent reference to the need for Iraqi citizens to secure exit visas before they can travel abroad.

The agency did not say how many U.S. hostages would be affected.

Last week Saddam ordered the release of 10 British husbands after their wives arrived in Baghdad to plead for their freedom.

Saddam was quoted as saying during his meeting with the American families that Iraq wanted peace, because it is in a ''very bad need for such peace,'' INA reported.

The Iraqi leader accused the Bush administration of playing the role of a world policeman carrying ''a heavy stick and twirling its moustache.''

WASHINGTON (NOV. 26) UPI - Yields fell on 13-week and 26-week T-bills Monday at the government's weekly auction.

The Treasury Department auctioned $10.03 billion of 13-week bills at an average discount of 7.02 percent, down from 7.08 percent last week and the lowest since Aug. 8, 1988, when the auction yielded 6.94 percent.

The Treasury also sold $10.08 billion of 26-week bills at an average of 6.96 percent, down from 7.05 percent last week and the lowest since July 5, 1988, when the yield stood at 6.71 percent.

The investment rate was 7.24 percent on the 13-week bills at an average price of $9,822.60 per $10,000 face value. The rate on the 26- week bill was 7.31 percent at $9,648.10.

#90330u0519 11/26/1990 ~United Press International

DALLAS (NOV. 26) UPI - LTV Corp. said Monday that Richard J. Boyle, a veteran of 25 years in the aerospace and defense business, has been appointed president and chief executive officer of its LTV Aerospace and Defense Co.

Boyle, 56, leaves the position of corporate vice president of marketing and business development of Honeywell Inc. of Minneapolis, a position he has held for the past three years. At LTV, he fills a position previously held by Raymond A. Hay in his dual capacity as both chairman and chief executive officer of LTV Corp.

"LTV Aerospace and Defense is an LTV unit we expect to grow, and Dick Boyle brings unique understanding and background in aeronautics and defense systems " Hay said. "He has an exceptionally strong background as a manager and in international business."

Reporting to Boyle will be the company's Missiles and Electronics Group and Aircraft Products Group, currently engaged in several major military programs, including the Multiple Launch Rocket System, the Army Tactical Missile System and the Hummer high mobility vehicle.

Programs in the Aircraft Products Group include work on the B-2 Stealth bomber and C-17 military cargo plane. A major segment of the Aircraft Products Group business is subcontract work for the Boeing Co. on three of its major commercial aircraft programs, the 747, 757 and 767.

#90330u0545 11/26/1990 ~United Press International

ABIDJAN, IVORY COAST (NOV. 26) UPI - Ruling party candidates appeared to be sweeping back to power in the Ivory Coast Monday as results from the country's first multi-party National Assembly election arrived.

By early Monday, based on a count of most of the votes, the ruling Ivory Coast Democratic Party (PDCI) of President Felix Houphouet-Boigny had held on to 150 of the 175 seats.

It had automatically held the 175 seats under the old one-party system, which was scrapped in May.

The main opposition party, the Ivorian Popular Front (FPI), had gained nine seats. The FPI leader, Laurent Gbagbo, won the majority of votes in his native village of Ouragahio in the heart of the country's beleagured cocoa belt.

Gbagbo was in political exile in France between 1982 and 1989. He returned with the hope of forcing the government to accept a multi-party system, but his demands were rejected until this year.

In the smart Cocody suburb of the country's main city Abidjan, the Workers' Party (PIT) candidate won the constituency whose voters include President Houphouet-Boigny. The PIT leader, Francis Wodie, a former president of the Ivory Coast branch of the human rights organization Amnesty International, beat off the challenge from six other candidates to take the seat.

Clashes between PDCI and opposition party activists were reported Sunday night in the Abidjan suburb of Adjame. Opposition supporters were said to be angry at the government for allowing all African foreigners the right to vote. The opposition claims the government gave them this right because they knew the foreigners would vote for the party in power for fear of acts of retribution

being carried out against them if they voted any other way.

The PDCI had a 40-seat advantage over the opposition before polling started. Despite the existence of 19 opposition parties, there were not enough candidates to go around the entire country, and in 40 constituencies only PDCI candidates were standing.

Until 1980, each constituency had only one candidate. That year different members of the PDCI party were allowed to stand against each other for the first time. In May of this year, after strikes and demonstrations, the government was forced to accept a multi-party system.

President Felix Houphouet-Boigny has ruled the country for 30 years since independence from France in 1960. On Oct. 31 he won a new five- year term after beating the FPI leader in the country's first multi- party presidential election.

#90330u0549 11/26/1990 ~United Press International

WASHINGTON (NOV. 26) UPI - An aide to Sen. Dennis DeConcini told a Senate panel Monday she strongly warned her boss against attending an 1987 meeting with a key bank regulator that has become a central part of the influence-peddling case against DeConcini and four other senators.

Laurie Sedlmayr, DeConcini's aide specializing in banking and financial issues testified before the ethics committee that she sought in vain to stop DeConcini, D-Ariz., from attending the meeting with Edwin Gray, then the chairman of the Federal Home Loan Bank Board.

The statement came during the fifth day of hearings into whether the so-called Keating Five senators - DeConcini, Alan Cranston, D-Calif., John Glenn, D-Ohio John McCain, R-Ariz., and Donald Riegle, D-Mich., improperly pressured bank regulators to benefit indicted savings and loan operator Charles Keating,

Gray, who was expected to be called as a witness either later Monday or Tuesday morning, has accused DeConcini of using that April 2, 1987, meeting to offer the government a deal on Keating's behalf that would have included dropping an investigation into Keating's Irvine, Calif.-based Lincoln Savings and Loan. Cranston, DeConcini, Glenn and McCain attended the one-hour meeting in DeConcini's office and excluded aides from attending.

Lincoln's 1989 failure is expected to cost the taxpayers about $2 billion and stands as the largest collapse in the nation's savings and loan scandal. Sedlmayr said she believed even attending the meeting would be "a political mistake," pointing to the current hearings as belated evidence.

"I told him I didn't think it was a good idea and later would be

misinterpreted by the press," Sedlmayr testified. "He (DeConcini) thanked me for my suggestion, but said he was going to go ahead anyway." But she stressed she had no problems with the "propriety" of such a meeting, although she said she feared Gray would "misinterpret" its meaning.

Sedlmayr becomes the second Senate staffer to testify members of the Keating Five ignored warnings about attending the April 2 meeting and an April 9 meeting with other bank regulators. Last week, a McCain aide said she also unsuccessfully tried to disuade her boss from attending one of the meetings.

Sedlmayr said she had been wary about Keating, a major contributor to DeConcini who contributed a total of $1.3 million to the five lawmakers' re-election campaigns or other favorite causes.

"I wasn't a fan of his, you could say," Sedlmayr added. She described Keating, who faces rackeeting charges in California stemming from Lincoln's failure, as "something of a zealot ... in personal views as a well as business views."

"You and Mother Teresa apparently didn't think the same way about Mr. Keating " panel special counsel Robert Bennett told Sedlmayr, referring to a comment made by DeConcini that the former Nobel Peace Prize recipient had called Keating a "good friend."

Keating's staff had prepared a memorandum for the senators titled "talking points for meeting with Ed Gray" that included demands that the bank board's investigation of Lincoln "must stop now," saying in exchange Lincoln would withdraw two legal attacks on Gray and the bank board. The alleged proposed agreement also would have shielded Keating from federal regulations against risky investments by savings and loans.

Sedlmayr also contradicted testimony from McCain's aides the two Arizona senators had made an agreement to limit what would be discussed during the Gray meeting.

#90330u0563 11/26/1990 ~United Press International

(NOV. 26) UPI - Recession-conscious shoppers - more concerned with saving than spending - thronged the malls the first weekend of the holiday season, but most were just looking, chagrined retailers said Monday.

"It was a disappointing weekend for us and most retailers," said Ross Richardson, spokesman for Best Products Co., the Richmond, Va.- based discount merchant that operates 230 stores in 28 states. "The customers just weren't out there," he said.

Fearing jitters about the economy and Middle East tensions would dampen consumer spending during the holiday season - when many retailers ring up more

than half their annual receipts - merchants braced for the worst, said Janet Mangano, a retail analyst for Jesup, Josephthal & Co. in New York.

Inventories were in check and widespread price-slashing was in little evidence. "The whole store is not on sale, but selected merchandise categories are being heavily promoted," said Mangano. "It's the old story: What you really want to buy is not on sale."

Furs, leather goods and other big-ticket items spurned by price-wary consumers are being heavily promoted by many stores, analysts said. "The promotional items are those items not associated with practicality, and consumers are bent on practicality this season," said Kurt Barnard, publisher of the newsletter Barnard's Retail Marketing Report.

On New York's 34th Street - home to R.H. Macy & Co. and a slew of specialty merchants - the holiday shopping season was in full swing Monday. Charlotte Garner, a sales representative from Dix Hills, N.Y., said she planned to spend about as much as she did the previous year. "Usually, I do, one way or another " she said, dangling shopping bags from each arm.

Minneapolis-based Dayton Hudson Corp., which operates Target, Mervyn's, and the Dayton, Hudson and Marshall Field's department stores, saw weekend sales increases at Target and Mervyn's - its two lower-end divisions - while the performance of its department stores was relatively flat, said spokeswoman Ann Barkelew. "When consumers are cautious there is a tendency to trade down," said Barkelew.

While the Friday after Thanksgiving has traditionally been one of the busiest shopping days of the year, many retailers say there is change afoot. Over the last few years, shoppers have been waiting longer and longer to do the bulk of their buying - many gambling the items they most covet will go on sale in the few days before Christmas when retailers scramble to clear their shelves.

Nevertheless, Houston-area Christmas shoppers apparently spent more this year on the hectic Friday after Thanksgiving than they did a year ago, and also outspent their counterparts in other large Texas cities.

A sampling of some 500 Houston-area stores indicated sales by check were up 3.8 percent compared to the day after Thanksgiving last year, said Ken Wait, vice chairman of TeleCheck Southwest, a check verification service.

By comparison, sales were up an estimated 3.1 percent in Dallas-Fort Worth and down 1.4 percent in the San Antonio-Austin area. Statewide, a survey of 2,500 stores showed sales up a scant 0.8 percent.

"Normally I would have predicted that Houston would come in at ten or 11 percent above last year," Wait said, blaming the Middle East crisis and talk of a nationwide recession for the spending chill.

At Macy's, which last year suffered its most dismal holiday season in years, representatives declined to give sales figures for the weekend but tried to paint a pleasant picture.

"We're confident that this year Christmas at Macy's will be successful and more typical than last year's holiday period," said a spokeswoman for the retailer that bills itself as the "world's largest department store."

On Monday, lunch-hour shoppers charged in and out the doors of Macy's flagship store and indicated in a sampling their spending spirit was somewhat subdued, but far from grim.

"I'm probably going to spend about the same - maybe a little less," said Joan Trojak, a copywriter at an advertising agency in Manhattan, citing worries about the economy among her reasons.

Craig Allen, 23, said he won't be able to do as much holiday shopping as he did last year. "I will have to budget much better," said Allen, who works in the inventory department at Macy's, noting that, "the economy doesn't look too good." Allen said he planned to cut down on larger purchases such as appliances.

#90330u0588 11/26/1990 ~United Press International

WASHINGTON (NOV. 26) UPI - Education Secretary Lauro Cavazos said Monday colleges and universities must cut expenses so they can reduce steadily rising tuition costs, but he also noted the public has a ''misconception'' that higher education is unaffordable.

Cavazos released three reports about the costs of higher education, including a handbook called ''Tough Choices'' to help colleges examine their priorities and then decide how to control spending.

College tuition has risen much faster than the rate of inflation. Between 1975 and 1987, inflation-adjusted tuition grew 28 percent at public colleges and 44 percent at private colleges, the department said. In the fall of 1990, average

college tuitions rose about 8 percent at most institutions.

And while student financial aid grew faster than inflation during the 1980s, it did not keep pace with tuition increases, it said.

''It is now time for individual colleges and universities to ask hard questions, set strict limits and start making tough choices,'' said Cavazos, who was president of Texas Tech University from 1980-1988.

These choices, he said, could mean dropping an entire department, forgoing recruitment of high-priced researchers or eliminating the athletic program.

''It has to decide what kind of institution it wants to be,'' Cavazos said. ''When there is a university close by that offers duplication, why don't you let someone else do it?'' he said.

But a spokewoman for the American Association of Collegiate Registrars and Admission Officers, said colleges have been reticent about lowering tuition.

''They're pricing themselves out of the market. The concept of cutting tuition has not gotten through to higher education. Universities are going to have to make some changes,'' said Doris Johnson.

Reasons for tuition increases are many, the Education Department said, including faculty salaries, reduced government or endowment subsidies, costs of computers in instruction and administration, and expensive laboratory equipment.

But as Cavazos urged colleges to control costs, he also contended higher education is still affordable - you just have to look for it. He said that while the average tuition at independent four-year institutions is $9,400 per academic year, it is just $1,800 at public- supported collegess.

Cavazos blamed publicity about the most expensive schools for misleading people about college costs.

''Unfortunately, such misconceptions may discourage students and families who are trying to prepare for college. They may think that the situation is hopeless, that they will not be able to afford a college education, Cavazos said.

''The reality is that with a little planning, virtually every family - including those in the low- and middle-income range - can afford college,'' Cavazos said, adding, though, he has seen no reduced enrollment resulting from these ''misconceptions.''

A spokesman for the American Council on Education, which represents public and private colleges and universities, said institutions are already looking for

ways to cut costs.

''Most of what's in the report is based on things already happening. That's not to say, though, that more should not be done,'' said spokesman David Merkowitz, citing a recent decision by Washington University in St. Louis to eliminate its dental and sociology departments.

He also said it is ''quite possible'' that if schools reduce investments in computer or lab equipment, it could lead to inferior education.

Some private universities have started novel recruitment programs to encourage enrollment.

#90330u0599 11/26/1990 ~United Press International

(NOV. 26) UPI - President Bush has won enough support from members of the U.N. Security Council to push through a resolution authorizing the use of military force to oust Iraqi troops from occupied Kuwait if they are not withdrawn by Jan. 1, a published report said Monday.

Permanent Security Council members Britain, France, and the Soviet Union have joined the United States in supporting the resolution, to be introduced Thursday, The New York Times reported. The fifth permanent Council member, China, has said it will not block the resolution but has yet to decide whether to vote in favor or abstain, the newspaper said.

Six of the Council's 10 rotating members - Canada, Finland, Ethiopia, Ivory Coast, Zaire and Romania - have indicated they will vote for the proposed resolution, ensuring it will get at least 10 of the 15 council votes, the Times said.

Canadian Foreign Minister Joe Clark said at a Cairo news conference the possible resolution was not a bluff or scare tactic but would be implemented if passed.

Bush and Secretary of State James Baker have traveled the globe in recent weeks, trying to drum up support for the measure.

The final wording on the resolution was not likely to include the words ''military force,'' but would opt for some other formulation, such as ''necessary means,'' officials told the Times.

A senior U.S. official said the Bush administration would interpret such language as authorizing the use of force, just as it did after the Aug. 25 resolution authorizing the naval blockade of Iraq, the Times said.

The Bush administration is pushing for a Jan. 1 deadline for the withdrawal of

Iraqi troops, but diplomats cautioned that no final decision has been made, saying the Council may end up setting the deadline toward the end of the month to allow more time for last-minute attempts to promote a peaceful settlement.

On Jan. 1, Yemen assumes the chairmanship of the Security Council. Yemen, the only Arab member of the council, has said it does not support military action in the gulf and would do everything possible to block a resolution authorizing the use of force.

Cairo radio said other members of the United Nations wanted to set a later deadline for Iraq to give diplomats time to attempt a peaceful settlement to the crisis, triggered Aug. 2 when Iraq invaded Kuwait.

It was announced Monday the foreign ministers of Egypt, Saudi Arabia and Syria would meet early next week in Cairo, their second such meeting in a month.

Iraqi President Saddam Hussein, meanwhile, has begun drafting children under age 15 to guard vital military and economic installations in the event of war, Cairo radio reported Sunday.

Older Iraqis are already subject to the draft in Iraq, which has faced a manpower shortage since the 1980-88 Iran-Iraq war.

Last week, Iraq said it would send 250,000-plus more troops to Kuwait to maintain Baghdad's numerical superiority over the U.S.-dominated multinational force stationed in the gulf area, principally in Saudi Arabia.

The Iraqi callup appeared to be in response to President Bush's recent announcement he will send 200,000 more U.S. troops to Saudi Arabia to join 230,000 already deployed, by far the largest part of a multinational force that numbers nearly 500,000.

The mobilization of more Iraqi reservists also appeared aimed at combatting any U.N. Security Council vote endorsing military force against Iraq for its invasion of Kuwait. The United Nations has passed several resolutions imposing economic boycotts against Iraq.

Canada's Joe Clark told reporters in Cairo Sunday that he did not expect the multinational force to strike at Iraq before the Thursday U.N. vote.

''The purpose (of the resolution) is not to employ force, but to use force as a means to convince Saddam Hussein and the government of Iraq of the determination of the wide coalition of nations who oppose his invasion that he must move back from Kuwait,'' he said.

Also Sunday, 104 former German hostages arrived in Frankfurt via Amman, Jordan, after their release by Iraq. The Germans, accompanied by one British citizen, were freed in thanks for German Chancellor Helmut Kohl's call earlier this

month for a peaceful solution to the Persian Gulf crisis, Amman Radio reported.

In Rome, a pacifist group said 70 Italian hostages held in Iraq were released by Saddam Hussein. The delegation, which left for Baghdad a week ago, was headed by Archbishop Hilarion Capucci, the Syria-born Greek Melkite Patriarch of Jerusalem, who lives in Rome.

And 10 Greek nationals held hostage in Iraq for nearly four months returned home Sunday after their release by Baghdad. Greek Foreign Ministry officials said three Greek nationals remained in Iraq and there was no word on whether or not they were to be released.

#90330u0603 11/26/1990 ~United Press International
UNITED NATIONS (NOV. 26) UPI - The United States has asked the U.N. Security Council to set a deadline for Iraq to get out of Kuwait before it uses military force to liberate the oil-rich emirate, diplomats said Monday.

They said a U.S. draft resolution was being studied by the other four permanent members of the 15-nation Security Council, giving Iraq a tentative deadline of ''on or before Jan. 1, 1991'' to fully withdraw from Kuwait.

The date was the subject of intense negotiations between the five members - the United States, the Soviet Union, Britain, China and France - each of whom has veto power over the resolution.

White House press secretary Marlin Fitzwater told reporters aboard Air Force One while President was en route to Monterrey, Mexico, that the administration was optimistic the Security Council would approve a resolution authorizing military force against Iraq.

He said that Secretary of State James Baker had met with each of the 15 members of the Security Council and will go to New York Thursday to chair the Security Council meeting.

''We are very hopeful,'' Fitzwater said.

He also said that the U.S. believes ''it would be better to do it by Saturday'' while the U.S. is still chairing the Security Council ''but if we don't we'll just have to work with Yemen,'' which takes over the chairmanship ''and do the best we can.''

Fitzwater decline to comment on whether any deadlines are included in the resolution.

He refused to comment on reports of a Jan. 1 deadline for Iraq to withdraw from Kuwait but he said, ''We think there is some value in having a date.''

''We want Saddam Hussein to know what we're talking about ... how long he has to act ... and to take some of the uncertainty out of the action,'' Fitzwater said.

''We hope that they will put out immediately,'' he said. ''We hope they will recognize that the United Nations and the 26-nation forces are serious and he

faces an imminent challenge.''

Fitzwater said that he also believes the multinational force has the ''tional force has the

''We have forces there to do anything,'' Fitzwater said.

The U.N. diplomats said the council as a whole would have to agree on a period allowing a diplomatic solution to work before ''all necessary means'' would be taken to force Iraq to comply with U.N. resolutions, one of which demanded that President Saddam Hussein withdraw its troops unconditionally from Kuwait.

Iraqi troops invaded and occupied Kuwait Aug. 2.

The ambassadors from the five countries met Sunday and continued Monday their private discussions at the Chinese ambassador's residence.

An American diplomatic source warned, however, that the date is negotiable.

''We should stay away from any particular date,'' the source said.

In Washington, a State Department official said the ''entire text of the resolution is under negotiations, including the proposed dates.''

The official said more discussions by the council's members are needed and ''nothing is settled.''

The American draft resolution asked the Security Council to authorize ''member states cooperating with the government of Kuwait, unless Iraq on or before Jan. 1, 1991, fully implements the foregoing resolutions, to use all necessary means to uphold and implement the Security Council resolutions passedin response to Iraq's invasion and occupation of Kuwait, and to restore international peace and security in the area.''

#90330u0606 11/26/1990 ~United Press International

WASHINGTON (NOV. 26) UPI - Sky watchers are being treated to their best view of Mars until 2001, with the mysterious Red Planet, Earth and the sun scheduled to be positioned in a straight line Tuesday.

Mars currently is about 20 times brighter than it was about a year ago, looking like a yellow-orange star in the northeast sky, said Alan MacRobert, associate editor at Sky and Telescope Magazine in Cambridge, Mass.

''This is a big time for amateur astronomers to get their last good look at Mars this century,'' MacRobert said Monday.

Alignment of Mars, Earth and the sun occurs about every two years, and Mars is closest to Earth around that time. Although the alignment, or ''opposition'' as astronomers call it, will occur about 3:30 p.m. Tuesday, Mars was actually closest to Earth - about 48 million miles away - on Nov. 19.

However, if viewers missed that chance, Mars still remains unusually brilliant. ''Compared to a week ago, the difference in distance and brightness is very small,'' MacRobert said.

Mars rises about sunset, is highest in the sky about midnight and sets at sunrise. ''''Anybody can go out and look at it with the naked eye,'' MacRobert said.

Except for Jupiter, which looks like a white star in the eastern sky, Mars is the brightest object in the night sky because the moon is only a crescent in late November.

MacRobert emphasized the alignment of Mars with Earth and the sun should have no physical impact on Earth. ''People are always asking what is going to happen when planets align. The answer is: nothing,'' he said.

The scientists operating the Hubble Space Telescope plan to take advantage of the closeness of Mars and train their instruments on the planet Dec. 13 and 14 to see if they can spot any dust storms.

Mars was closer - and therefore brighter - during the September 1988 opposition, traveling within 36 million miles of Earth. However, the next opposition on Jan. 7, 1993 will see Mars considerably farther away - about 93 million miles.

The best viewing of Mars expected early next century will be in the alignment that takes place in 2003, when our fascinating neighbor will be just 35 million miles away.

#90330u0612 11/26/1990 ~United Press International

(NOV. 26) UPI - Stock prices on the Tokyo Stock Exchange closed higher Monday in thin trading as a bond rally spilled over into stock market.

The blue-chip Nikkei Average of 225 selected issues, which gained 583.29 points last Thursday, rose 362.58 points - or 1.5 percent - to 23,762.86.

Markets in Tokyo were closed Friday for a national holiday.

The broader-based Tokyo Stock Exchange Price Index of all major shares, which advanced 39.13 points Thursday, added another 19.42 points to 1,747.08.

Advances outpaced declines 672 to 315, while 147 issues remained unchanged.

An estimated 250 million shares changed hands, down from 368 million Thursday.

Elsewhere in Asia, stock prices closed lower in light trading on the Hong Kong Stock Exchange with little news to drive the market.

The benchmark Hang Seng Index dropped 20.54 points, falling below the psychologically significant 3,000 level, closing at 2,995.52.

Among the narrower indexes, utilities dropped 25.04 points, financials fell 1.15, properties lost 18.75 and industrials fell 33.14 points.

Volume amounted to around an estimated 591 million shares.

In Singapore, stock prices slumped in light trading on the Singapore Stock Exchange.

The Straits Times Industrial Index fell 7.69 points to 1,121.22. The broader-based All Singapore Index fell 1.70 points to 312.20.

Volume amounted to around an estimated 13.5 million shares.

Elsewhere around the region, in Bangkok, stock prices tumbled nearly 6 percent in thin trading on the Thailand Stock Exchange in reaction to a sharp rise in local bank interest rates.

The Securities Exchange of Thailand Index dropped 37.10 points to 601.85.

Volume amounted to around an estimated 39 million Thai shares.

Declines overwhelemed advances 101 to only one.

In Australia, stock prices closed lower amid disappointing profit results and growing fears the Australian economy is sliding into a deep recession.

The All Ordinaries index lost 11.2 points to 1,355.4. The All Industrials index fell 20.4 points to 2,047.3 and the All Resources Index lost 6.0 points to 818.1.

Volume amounted to an estimated 61.4 million shares.

#90330u0617 11/26/1990 ~United Press International

CHICAGO (NOV. 26) UPI - The grain market was pressured by profit-taking and closed lower Monday on the Chicago Board of Trade, although soybeans rebounded from the day's lows on short-covering.

Opening prices were steady to firm, but quickly turned lower as buying interest faded. A number of contract lows were established in wheat and oats.

A statement by Agriculture Secretary Clayton Yeutter that the Soviet Union would not receive export credits until it reformed its emigration laws contributed to the weakness across the floor. Soviet grain buyers were in the United States, but Yeutter said there had been no official requests for food aid.

Soybeans rallied on short-covering during the closing minutes, but were lower across the board. Commercials and professionals dominated the selling throughout the day.

Liquidation pressured December oats to a contract low of $1.04 per bushel and March to $1.16.

The weakness in oats carried over to the rest of the grains in moderate trading. Corn and wheat also were pressured by the lack of a food aid package to the Soviet Union.

Higher prices for precious metals and energy futures limited losses across the floor.

The export markets were quiet except for news that Jordan and Ecuador were in the market for 205,000 tons of wheat.

Basis levels were steady to firm.

At the close, corn was off 1 3/4 to 3 3/4, soybeans down 2 to 5 1/2, wheat off 4 to 6 and oats down 3 1/4 to 4.

(NOV. 26) UPI - Denver firefighters are making little headway in their effort to control a huge fire at a jet fuel depot near Stapleton International Airport. Two more storage tanks ruptured last night, adding hundreds of thousands of gallons of fuel to the fire. Four tanks are now burning out of control. Many flights are delayed, canceled or diverted to other airports where fuel is available.

President Bush returned home from his European and Middle East trip late Friday, and took off on another trip today. Bush left this morning for Mexico and two days of talks with President Carlos Salinas de Gortari. Free trade is expected to be the main issue of the discussions. Bush leaves again Sunday for a trip to Brazil, Uruguay, Argentina, Chile and Venezuela.

Canadian Foreign Minister Joe Clark said today in Cairo that a possible U-N Security Council resolution authorizing the use of force against Iraq is NOT a bluff or a scare tactic. Clark says a resolution would be implemented if passed. He said Canada will support the resolution. Clark is visiting Egypt on the third leg of a Mideast tour for talks on the Gulf crisis. He heads next to Israel.

A man who recently returned to Poland after 21 years abroad will face Solidarity leader Lech Walesa in a December 9th runoff to decide who will be the nation's presdident. Exit polls show Walesa and Stanislaw Tyminski coming in first and second in yesterday's voting. Projections show Prime Minister Tadeusz Mazowiecki in third, out of the picture.

Fire crews are mopping up hot spots of a wildfire that destroyed a number of homes in the foothills north of Boulder, Colorado. About 150 people who were evacuated from homes in the Crestview subdivision Saturday night are back home. There were NO injuries in the blaze. Police say a man who allegedly started the fire by dragging a burning mattress out of his home is in jail.

Hundreds of thousands of Bulgarians are taking part in a strike today to force the resignation of Prime Minsiter Andrei Loukanov. In Sofia, bus transporation came to a virtual halt and only emergency rooms were operating in some hospitals. The strike committee chairman says by mid- morning, about 500-thousand people were on strike in cities across the country.

#90330u0660 11/26/1990 ~United Press International
NEW YORK (NOV. 26) UPI - The publisher of the New York Daily News defended the hiring of permanent replacements at the strike-bound paper at a legislative hearing Monday and blamed its nine unions for escalating violence

in the bitter walkout.

"The campaign of unlawful violence and intimidation has been massive and it has been orchestrated by the unions," James Hoge told a hearing by the Joint Senate-Assembly Labor Committee into possible legislation banning strikebreakers and replacement workers.

Since the 2,500 News workers walked out Oct. 25, police say there have been 196 reports of strike-related violence, including arson, firebombings, vandalism, assaults, and brawling.

The hearings got under way with Theodore Kheel, adviser to the Allied Printing Trades Council, calling on the committee to recommend a ban on strikebreakers, "We will identify a thousand points of violence perpetrated or induced by the Daily News," he said.

Under sharp questioning by committee co-chairmen Sen. James Lack, R-Suffolk, and Assemblyman Frank Barbaro, D-Brooklyn, Hoge insisted that offers of help in negotiations by Gov. Mario Cuomo, Mayor David Dinkins, and others had been turned down because federal mediators were doing all that could be done to resolve the strike that began Oct. 25.

Hoge told the committee that there was no need for any further legislation. "No new law is needed to address violence," he said. "State and federal laws are directed at such violence. "Clearly, violence and intimidation are long-standing and premeditated tools of these unions to lawlessly enforce their will," he said.

In his beginning remarks, Barbaro told Hoge, "My experience has been that security guards, goons, and thugs engage in violence and blame it on unions. We will give you an opportunity to respond."

Hoge replied that security personnel hired by the paper had been instructed to avoid violence. He also denied that many permanent replacements were from out of the area. "Ninety-seven percent are residents of the five boroughs of New York," he said.

Barbaro told Hoge that by hiring workers on a permanent basis, "It appears that you are intent on breaking the unions." He said it was the first time in its history the paper had hired permanent replacements. "Use of permanent replacements lead to violence. We all condemn violence," he said.

Responded Hoge, "I do not think a connection can be made between replacement workers and violence. There are laws on the books that will take care of violence."

Earlier, he said to blame the replacement workers for strike violence was to "turn onto its head the whole arguement of right and wrong." "Replacement

workers are not guilty - they are the victims," he said.

He said in order to keep the News, owned by the Tribune Co. of Chicago, printing, "to hire temporary help in this kind of integrated process is not practical. To be fair to replacments, you make them permanent. That is lawful activity."

Barbaro chided Hoge about a local radio commercial placed by the News that likened striking union members to hard-line Communists in Eastern Europe, and told listeners, "some people in Eastern Europe never wanted the Berlin Wall to come down. Some people don't want change at the Daily News." "This is like the Red-baiting in the 30's and 40's," Barbaro said, adding that such tactics "hurt the American people."

#90330u0665 11/26/1990 ~United Press International

WASHINGTON (NOV. 26) UPI - The Justice Department said Monday it pulled in more than a quarter billion dollars in judgments and settlements during the past year from companies that defrauded the government.

The $257 million collected by the government in fiscal 1990 includes 13 cases involving recoveries of $5 million or more, pushing the total past 1989's figure of $225 million.

Fraud directed at the Defense Department made up a large part of the cases, including a $34 million settlement last December in a case brought against a bid-rigging cartel in Japan.

In that case, the military charged that construction costs of a U.S. Navy facility in Yokosuka, Japan, were inflated by 25 percent because of collusive bidding by 140 companies, including some of Japan's largest. The Justice Department has reached settlements with 137 of the 140 companies involved.

"This case sets a precedent for future cases against foreign companies that attempt to defraud the U.S. government," Attorney General Dick Thornburgh said in a statement. "The Civil Division is continuing to follow up on other investigative leads concerning bid-rigging at other U.S. bases in the Far East." Other military fraud cases include:

- General Electric agreed to pay $30 million in fines and civil penalties for overcharging the Army for a battlefield computer.

- The VSI Corp., a subsidiary of Fairchild Industries, agreed to a $14.5 million settlement over charges that VSI's Voi-Shan Aerospace Products Group provided untested nuts, bolts and screws to airplane manufacturers, who then used them on government contracts.

- Five companies - Boeing, RCA, Hughes Aircraft, Grumman and Raytheon agreed to settlements totalling $13.5 million for obtaining classified Defense Department documents that may have given them an edge in winning defense contracts.

Thornburgh said the steady increase over the past four years in fraud recoveries is due in part to 1986 amendments to the False Claims Act that allowed the government to recover triple damages. The amendments also clarified proof requirements in such cases.

The amendments also liberalized the False Claims Act to make it easier for private citizens to bring fraud suits on behalf of the government. Some 280 of the so-called qui tam suits have been filed since October 1986.

The government has intervened in 42 of the suits, settling 28 of them, the Justice Department said. Of the $70 million it has recovered, $9 million went to the individuals who filed the original actions.

HOUSTON (NOV. 26) UPI - Houston Astros owner John McMullen said Monday he will sell the National League team and prefers local ownership for the franchise.

McMullen said in a statement released by the Astros that the Houston Sports Association, the group that owns the club, has notified the baseball commissioner's office of its intent to sell the team. McMullen is the majority owner of HSA.

''Having been so completely involved over 12 years with HSA and the Astros, the time has come for me to devote more of my time and energies to my family and my many other interests,'' said McMullen, who also owns the New Jersey Devils hockey team.

McMullen added that, because of his longstanding commitment to Houston and Harris County, he would prefer that local interests purchase the Astros. He also said that while he has no definite timetable for completing the sale, it would be he objective to find a ''prospective purchaser for the Astros in the near future.''

HSA has engaged Salomon Brothers as its financial advisor.

''I want to thank the Astros' fans for their support through these many years '' McMullen said. ''It is with deep regret that I shall be severing my connection with the Astros baseball team.''

#90330u0724 11/26/1990 ~United Press International

LONDON (NOV. 26) UPI - Margaret Thatcher's handpicked successor, Chancellor John Major, her nemesis Michael Heseltine and Foreign Secretary Douglas Hurd each expressed optimism Monday that he would be the next prime minister of Britain.

Major's camp said it had at least 160 votes - 27 fewer than needed for victory on a second-round poll of ruling Conservative members of Parliament Tuesday. Heseltine said he had more but declined to give a figure. Hurd supporters said he would post a close second, and win on a runoff ballot.

If all of their figures were to be believed, the total far exceeds the 372 MPs who will be voting.

If no candidate tallies 187 votes, a third ballot will be conducted under different rules Thursday.

''The only thing that matters on Tuesday is that 372 members of Parliament express their preference, and on Tuesday or Thursday we will have a result,'' Major said.

Thatcher continued a round of farewells to friends and acquaintances from 15 years as Conservative Party leader and 11 1/2 years as prime minister. She had drinks at the Central Office of Information, visited party headquarters and hosted an event for the Downing Street staff.

''Hip, hip, hooray,'' shouted party workers, whom she led to three consecutive election victories.

Thatcher has received more than 1,000 bouquets of flowers since being pressured into announcing Thursday she would resign as soon as a successor can be found. ''Kew Gardens was eclipsed,'' said an aide, referring to botanical gardens southwest of London. The prime minister also received 12,000 letters by Sunday, plus another five sackfuls Monday.

A close aide blamed Thatcher's ouster on ''disappointed and disaffected men'' who have languished on the backbenches of Parliament.

''Prime ministers, if they do their jobs, they make enemies,'' he said. ''They don't promote people who think they should be, and that is a deep and grievous offense to their vanities,'' he said, adding others become detractors after they are dismissed from posts.

A flagging economy and extreme opposition to a new controversial tax to fund local government also cost Thatcher support, he said.

Thatcher was disappointed that her tenure ended abruptly and with a push, but she has accepted it as the way of politics.

''She did not want to leave on a wave of backbiting and recriminations,'' the aide said, ''she would have rather liked to have gone on.''

Although she has not made a public endorsement, he said Thatcher would like Major to succeed her.

''She regards him as a true man of the people,'' he said. ''She has had her eye on him for quite some time.''

Major earned Thatcher's respect in the early 1980s when he disagreed with her on a policy matter and doggedly argued his case, the aide said.

Because she was impressed that he ''managed to accomplish a great deal without breaking any bones,'' she assisted him in a meteoric rise through government to the post of chancellor of the exchequer after a short stint as foreign secretary.

''He knows what it is to rough it and to be unemployed,'' the aide said. ''He is in touch with ordinary people. She is certainly backing him.''

The youngest of the three candidates for prime minister, bristled at suggestions that he is the standardbearer of Thatcherism.

''I am not running as 'son of Thatcher' - I am running as myself with my own priorities and my own program,'' said Major, 47.

If none of the three candidates secures a simple majority, 187 votes, Tuesday,

the contest goes to a third and final round Thursday.

In a third round, MPs will select first and second preferences. If no candidate has an overall majority, the contender with the fewest first preference votes would be eliminated. The second choice on ballots backing him would be distributed among the two remaining candidates.

BASTIA, CORSICA (NOV. 26) UPI - Hundreds of gun-toting separatist militants held a news conference in remote mountains Monday, fueling fears President Francois Mitterrand's government may have miscalculated badly by giving the island a special status.

Some 400 hooded, armed men belonging to a dissident faction of the outlawed

National Front for the Liberation of Corsica took part in the show of strength in the early hours in the rugged northern region of Borgo.

''To be recognized by the French state does not hinder the Corsican people to exist,'' the militants said in a statement. This was a reference to a new statute for Corsica adopted by the National Assembly Saturday in which the Socialist government for the first time made explicit reference to ''the Corsican People.''

The separatists demanded the government ''engage in a true policy of de-colonization.'' In an apparent threat to step up terrorist activities, the nationalists warned that otherwise they would take ''responsibility in all domains and with all the appropriate means for a struggle of national liberation.''

Observers said the appearance of the militant faction would provide little comfort to conservative opponents of President Mitterrand who voted against the statute. The Rally for the Republic Party and the Union for French Democracy contend that Corsica is not Corsican but French.

The statute was drawn up by Interior Minister Pierre Joxe after he made several visits to Corsica to sound out islanders' opinions. But it only was passed by Parliament over fierce right-wing and Communist opposition because a handful of Corsican conservatives broke party ranks to vote with the government.

Throughout the stormy debate on the special status for the island Joxe contended that its introduction would end 15 years of nationalist violence.

Critics of the bill fear it could have the opposite effect and that the legislation's devolution of powers to sometimes backward local authorities will encourage political or nepotistic distribution of jobs, homes and contracts in the tourism and building industries.

#90330u0801 11/26/1990 ~United Press International

PRAGUE, CZECHOSLOVAKIA (NOV. 26) UPI - Czechoslovakia's once all-powerful Communist Party emerged surprisingly strengthened from local government elections held Friday and Saturday, new returns showed Monday.

The Communists took several percentage points more than their results in last June's parliamentary elections, winning 13.6 percent of the vote in Slovakia and 17.4 percent of the vote in the Czech lands.

Last June, the Communists took just over 13 percent of the vote nationwide.

Civic Forum, the pro-democracy coalition that led last November's

anti-Communist ''Velvet Revolution,'' also emerged strengthened from the elections, gathering 40 percent of the vote and 33 percent of the mandates in the Czech lands.

Nationalist parties suffered the worst defeats, winning no more than 6 percent in the Czech lands of Moravia and Silesia.

Christian Democrats also fared well, leading the vote in Slovakia and placing second in Moravia and Silesia.

Forum officials had been worried that increasingly popular restiveness over the slow pace of economic reform and squabbling between leftist and right-wing factions within Civic Forum could have caused voters to turn elsewhere.

According to projections, the Communists did their best in medium- sized cities of 50,000 to 100,000 population, the main cities of Czechoslovakia's aging industrial and mining ''rust belt.''

The Communists campaigned as the protectors of the working class and the soon-to-be unemployed.

The pro-Communist vote appeared to reflect unhappiness with the government's unfolding free-market economic reforms.

''It was a clear expression of fear of the impact of economic reforms,'' Civic Forum spokesman Vladimir Zelezny said of the high Communist vote in industrial towns.

Inflation was expected to hit 20 percent next year, and more than 1 million people may be unemployed at the end of 1992, according to government figures.

Despite finishing in third place overall in Slovakia, where voters chose mayors directly, Communists won more mayoral posts than any other party.

Communists were elected mayor in over 660 towns, 24.2 percent of Slovakia's total.

The Christian Democratic Movement finished first in Slovakia, with 27.5 percent of the vote and 10,564 local government seats.

Public Against Violence, Civic Forum's Slovak partner, won 20.4 percent of the vote and the Communists won 13.6 percent of the vote. PAV candidates were elected mayor in Slovakia's two largest cities, Bratislava and Kosice.

President Vaclav Havel's press spokesman, Michael Zantovsky, said the Communist showing was ''an unpleasant surprise.'' But he said Havel was ''satisfied'' with the results.

''The Communists' results are not much bigger than the numbers they got in the parliamentary elections,'' Zantovsky said.

But, he added, ''We must consider one thing: the Communist Party has still a very dense network of local organizations and therefore the Communist Party has immense financial and technical means at their disposal.''

A total of 63.75 percent of the 3,661,717 eligible voters went to the polls in Slovakia, and in the Czech lands of Bohemia and Moravia, an estimated 74.8 percent of 7,449,543 eligible voters turned out.

While such turnouts would be considered high in the West, almost 97 percent of voters went to the polls in last June's parliamentary elections, the first free vote in Czechoslovakia since 1946.

Havel, who had encouraged voters to choose personalities and not parties in the local elections, admitted the strategy did not work.

''It's the problem of all big cities. No one has the time to go to all these campaign meetings, therfore I think voters should choose according to their parties,'' Havel said.

#90330u0826 11/26/1990 ~United Press International
AGUALEGUAS, MEXICO (NOV. 26) UPI - President Bush and Mexican President Carlos Salinas de Gortari began a two-day summit Monday highlighted by efforts to promote free trade between the two nations.

The two North American leaders conferred in Salinas's private residence in the small town of Agualeguas after they watched a festive folk dance and a colorful rodeo.

School children tossed red, white, blue and green confetti at the presidential motorade. Both leaders wore open collars as they waved to the crowd.

Bush and Salinas arranged an exchange of remarks at formal welcoming ceremonies later Monday in nearby Monterrey, an industrial city.

In prepared remarks, Salinas said:

''We welcome the arrival of a man sensitive to our traditions and knowledgeable about the culture of Mexicans.''

Salinas also said, ''Our new relationship as neighbors provides more benefits to our people and greater to strength to our nations. We are determined to show that the new currents toward freedom, tolerance and cooperation between Mexico and the United States can be permanently beneficial.''

Fitzwater said that Bush, in his response, will talk about ''a promising moment in our shared history'' and declare that Mexican- American relations ''have never been better.''.

Salinas, a 42-year-old Harvard educated economist, has been in office nearly

two years during which he has moved to bolster the economy and attack corruption. He has sought to be a reformer and believes a key way to upgrade Mexico is to foster improved ties with the United States.

White House press secretary Marlin Fitzwater told reporters en route to Mexico that the Bush-Salinas talks would cover a wide range of issues, from drugs to Mexico's debt to the United States, but would likely concentrate on efforts to develop a landmark free trade agreement between the nations.

Bush and Salinas agreed to seek a free trade agreement during their meeting in Washington last June. Formal negotiations are to begin next year.

The AFL-CIO is poised to defeat any trade agreement, arguing competition from low paid Mexicans would destoy U.S. jobs and reduce wages.

Fitzwater, responding to those concerns, said, ''We want a trade agreement that would create jobs.''

Salinas views removal of tariff and quotas as a way to stimulate his nation's economy with new jobs and investment. But he also says he wants to exempt Mexican oil from any free trade agreement.

''The oil is the property of the Mexican government,'' Salinas said in the current edition of Newsweek Magazine. ''It will stay that way.''

Critics of the Mexican leader, however, are not convinced. They are afraid Salinas will compromise away some oil rights in an effort to become a bigger trading partner with the United States.

Bush, in a recent interview with Mexico's official news agency, said, ''Although I recognize Mexico's determination to control its own resources, I am convinced there are important areas in which we could work together and which could be mutually advantageous for investment and exploration of oil and natural gas.''

The United States already accounts for more than 50 percent of Mexico's petroleum exports. In September, Mexico increased its shipments to the United States by 100,000 barrels a day in response to the shortages caused by the Persian Gulf crisis.

Speaking to reporters aboard Air Force One, Fitzwater said he did not expect oil to be a major topic in the discussions between the two leaders. He also said the United States is encouraged by the progress that has been made thus far in informal talks on the trade pact and said U.S. Trade Ambassador Carla Hills ''thinks it's on track.''

The U.S. Chamber of Commerce predicts that the current $52 billion in annual U.S.-Mexican trade could more than double under a free trade agreement.

Although Mexico has thus far sent no troops to the Persian Gulf, Salinas recently offered to order some of his forces to the region if if the United Nations adopts a resolution authorizing the use of force to drive Iraq out of Kuwait.

Fitzwater said Bush had no plans to press Salinas on this offer.

''We haven't asked anyone to send troops,'' Fitzwater said. ''Anyone who wants to send troops should talk to Saudi Arabia, where many of the multinational forces are based.

#90330u0829 11/26/1990 ~United Press International

WASHINGTON (NOV. 26) UPI - The Supreme Court agreed Monday to decide if the sexual assault conviction of a Michigan man was properly overturned because he was not allowed to testify about past consensual sexual contact with the alleged victim.

The court agreed to review a decision of the Michigan Court of Appeals, which reversed the 1985 conviction of Nolan K. Lucas on two counts of third-degree criminal sexual conduct.

Lucas, who was sentenced to a prison term of 44 to 180 months, was precluded at his trial from introducing some evidence of past sexual relations with the woman solely because his lawyers failed to file a timely notice of their intention to present such evidence.

While the Michigan rape shield statute specifies a notice of such evidence must be given within 10 days of an arraignment, the Michigan Court of Appeals ruled the trial court erred in this case by not even exploring - without the jury present - the extent of the evidence to see if an exception should be made.

The conviction was overturned and the case sent back to the lower court for a new trial, prompting the state's appeal to the Supreme Court.

In this case, Lucas was charged with sexually assaulting a woman who had been his girlfriend for six to seven months before the alleged attack.

The woman claimed Lucas forced her to have sex at knifepoint on Aug. 31, 1984, two weeks after their relationship ended.

Lucas contends the sex was consensual. His lawyers claim the issue now at hand is whether an accused's right to confront charges against him outweigh technical legal deadlines.

The state of Michigan, in asking the high court to take the case, said the motion to admit evidence of past sexual conduct between Lucas and the woman was not made until the first day of the trial, and that despite the ruling against its inclusion much discussion of their relationship was permitted at the trial.

The Michigan Court of Appeals noted that because ''virtually all of the evidence'' at trial consisted of the woman's word against Lucas's, their prior sexual history together ''goes to the issue of credibility.''

Michigan's rape shield statute, like those in most states, was enacted to protect women from having irrelevant past sexual activity exposed at a rape trial and to ensure such testimony is not used to harass or intimidate women.

The high court earlier this term refused a request by a man convicted of sexual assault in Illinois to review the constitutionality of that state's rape shield law.

#90330u0846 11/26/1990 ~United Press International

MOSCOW (NOV. 26) UPI - The government Monday presented an austerity budget to the Parliament that included a freeze on spending by enterprises and major cuts in defense and foreign aid, spelling trouble for such allies as Cuba and Vietnam.

The draft budget, presented by Finance Minister Valentin Pavlov, has a deficit of $21.12 billion.

Pavlov painted a bleak picture, noting that the country is entering the second year in a production slump with the ruble losing its value precipitously.

National income, the Soviet chief money figure for goods produced, was $20.8 billion less than 1990 but wages were $49 billion higher, he said.

The yawning gap between income and wages represents minus productivity in the Soviet economy, an indication of the inflation rate and is a direct cause of the depreciating ruble.

To shore up the ruble, whose black market rate is about 10 cents opposed to the official $1.60, Pavlov said a temporary freeze will be placed on monetary resources that firms and plants do not use before Dec. 1.

Pavlov promised the moratorium will freeze about $80 billion to $96 billion. Because Soviet firms often use much of their money reserves for consumer goods for their workers, the freeze will stop spending.

The minister outlined cuts of up to 30 percent on the administrative bodies and the upkeep of the government - slashes that will constrict the vast bureaucracy centered in Moscow.

The military's $81 billion budget is 10 percent, or $11 billion, less than in

1990.

In what could spell the beginning of the end of aid to Vietnam and Cuba, who each receive $5 billion yearly from Moscow, Pavlov said ''Gratuitous assistance to foreign countries will be cut 75 percent,'' the official Tass news agency said.

He also said credits to foreign countries will be slashed 50 percent from 1990 an indication that nations needing Soviet natural resources and products will have to pay for them in cash.

Because next year the 15 republics will assume greater responsibility for their spending, the budget presented by Pavlov appeared to be half of the budget that was approved last year when the central government was responsible for the entire country.

Pavlov explained that state budget revenues of 1990 will amount to $723 billion and expenses will be $812 billion, leaving a deficit of $89 billion.

But in 1991, the central state revenues will be $396.5 billion with expenditures at $417.9 billion, a deficit of $21.2 billion.

The difference represents the growing portion of expenses the republics will be assuming and the deficit they will take on.

But in view of President Mikhail Gorbachev's expressed desire for a government revamping that will give him control of all ministries, Monday's session in Parliament had an unreal atmosphere.

The budget presented was drawn by Premier Nikolai Ryzhkov, whose political exit has been rumored since Gorbachev presented his government reorganization plan nine days ago.

Ryzhkov said Sunday only the Congress of People's Deputies could force him out of office. That body is to meet Dec. 17.

#90330u0855 11/26/1990 ~United Press International

WASHINGTON (NOV. 26) UPI - Food scientist Mike Gould, wheat farmer Joe Jagger and professor Jimmy Cheek each represent a part of the food and fiber system, an industry that employs 20 million people in a seemingly endless array of jobs.

The new edition of the Yearbook of Agriculture cites their work, along with the endeavors of several dozen others, as examples of the diversity of modern agriculture. The Agriculture Department issued the 1990 yearbook Monday.

President Lincoln, who signed the 1862 law creating the department, called it ''the people's department - closer to the people than any other.''

''And it still is,'' editor Deborah Smith said, with the 1990 yearbook intended to give readers a first-hand idea of the vast variety of jobs involved in food and fiber production.

Gould, for instance, came up with a high-fiber flour that utilizes crop byproducts. Cheek was named as the top teacher at the University of Florida's College of Agriculture for his class that hones the writing and speaking skills of students.

Jagger, 69, is retiring from farming this year on land homesteaded in 1866 in north central Kansas. His story about wheat farming is sandwiched between sketches of Wisconsin dairy farmer Carroll Kepler and apple grower Grady Auvil in Washington state.

The yearbook also salutes the centennial of the 17 historically black land-grant colleges formed under an 1890 law, as well as describing the impact the schools have had. One chapter shows how the Abraham Carpenter family expanded from a three-acre fruit and vegtable farm to a 450-acre operation.

Another chapter traces the rise of Joseph Stewart, a graduate of Southern University who entered the food service industry and now is a senior vice president of the Kellogg Co.

''To the young people reading this book - and to others who enjoy a challenge - I invite you to join the food and agriculture industry,'' Agriculture Secretary Clayton Yeutter, who grew up on a Nebraska farm, wrote in the foreword to the year book. ''Agriculture abounds with good opportunities.''

Along with the profiles of individuals, the yearbook devotes 22 of its 200 pages to describing agricultural output, types of farms, the work force and the structure of food production.

The government began issuing the Yearbook of Agriculture in 1894, but it preceded by annual publications dating back to 1849. For the past couple of decades, each edition has been devoted to a specific topic.

Copies of the yearbook, ''Americans in Agriculture: Portraits of Diversity,'' cost $10 and will be sold at government bookstores and from the Superintendent of Documents. Members of Congress also receive a limited number of the book for free distribution.

CHICAGO (NOV. 26) UPI - A new radiological technique may eliminate the need for invasive coronary angiograms to detect hardening of the arteries, a researcher reported Monday.

Radiologist Jerome Breen of the Mayo Clinic in Rochester, Minn., said ultrafast computed tomography or CT appears able to rule out coronary artery disease in all cases in which angiograms have found no significant calcium deposits in the blood vessels.

The advantage of ultrafast CT is that it is non-invasive, while an angiogram involves injecting dyes and inserting a catheter into a groin artery and threading the catheter into chest arteries, Breen said.

More than 40 million Americans suffer from heart disease and more than 500,000 die of it annually. As many as half of those who suffer sudden cardiac death

have no obvious earlier symptoms.

In a study presented to the Radiological Society of America's annual meeting, Breen's team performed ultrafast CT on 100 patients ages 23 to 59 who had been referred for coronary angiograms after complaining of symptoms like chest pain or chest tightness. In all cases, the result of the ultrafast CT mirrored the result of the angiograms.

''Ultrafast CT appeared to be able to rule out significant coronary artery disease in 100 percent of the cases we studied who did not have coronary disease,'' Breen said.

Ultrafast CT detects calcium deposits in the arteries, and promises to be especially effective in early diagnosis, the researcher added.

Breen said the only other non-invasive technique is the treadmill - or stress - test, but that test will not show positive results until an individual ''has significant disease.''

''CT, however, may be able to pick up coronary artery disease at a very early stage,'' said Breen, noting further research needs to be performed.

#90330u0902 11/26/1990 ~United Press International

EASTERN SAUDI ARABIA (NOV. 26) UPI - Hundreds of exiled Kuwaiti army volunteers swarmed their defense minister Monday after completing military training, chanting, ''Take us to the border,'' and vowing to help liberate their captive country.

About 600 volunteers, a rag-tag collection of refugees of varying ages, completed four weeks of desert training in hand-to-hand combat and firearms use. They were the first class to graduate in Saudi Arabia, although another batch of roughly 600 refugees trained in the United Arab Emirates.

In all, approximately 7,000 Kuwaiti volunteers from around the world signed up to fight. They are being trained 600 at a time in Saudi Arabia by Kuwaiti military officials and are expected to augment the 4,500- strong Kuwaiti army that escaped Iraqi forces after the Aug. 2 invasion.

Many of the graduates may be given support roles in the multinational alliance against Iraq.

During Monday's ceremony Sheikh Nawaf Alahmed Al-Jaber, the defense minister, watched drill formations, mock combat, gave a brief speech and handed out certificates of graduation.

''My brothers, what I see today and what I hear about your faithful training gives me hope for a victorious liberation of our beloved country,'' he said. ''You are setting a marvelous example to unite the people of Kuwait like a building that will not crumble.''

As he was whisked to his motorcade he turned and walked quickly toward the troops across their dusty training grounds. The volunteer soldiers, many middle-aged and plump around the waist, rushed toward Nawaf and encircled him.

The defense minister tried to speak but was drowned out by emotional chants of ''Free Kuwait,'' ''Long live Kuwait'' and ''Take us to the border.''

The impromptu meeting with the volunteers was emotionally charged, and Saudi security forces tried desparately to keep the media and volunteers from

crushing the defense minster.

He did not respond to a shouted question about a deadline for using military force to attempt to dislodge Iraqi President Saddam Hussein's troops from the emirate. But, Kuwaiti Gen. Jaber Al-Khaled Al-Sabah turned and predicted, ''You will get your answer.''

After the dust had settled, literally, Kuwaiti volunteers reflected on the events of the day.

''I feel after this graduation ceremony we have taken the first step to free Kuwait. This is the first step ... and the next step is coming soon,'' said Ahmad Al-Dhafeeri, 22, who was scheduled to begin his junior year at Marshall University in Huntington, W.Va., but after the Iraqi invasion volunteered to fight instead.

''Sometimes you can't sleep at night, just thinking about Kuwait,'' he said.

Other volunteers who studied in the United States shared the desire for a quick resolution to the crisis.

''I'm happy to graduate and I want to go on the frontline,'' said Khalid, a 30-year-old who earned his master's degree in business at Fonbonne College in St. Louis.

Khalid, who asked that his family name not be used because relatives are still in Kuwait, wanted to pursue a doctorate degree from Washington University in St. Louis. Instead, he came to Saudi Arabia to learn how to fight.

Also returning to fight was Mutlaq Al-Azmi, 22, a steward for Kuwaiti Airlines who was working a flight abroad when Iraqi troops stormed southward.

''It's difficult to stay away from your country, and your feeling's you can't concentrate, you can't think, you can't stay alive without your country,'' he said.

For the moment, however, some 400,000 Kuwaitis have fled their country. An estimated 300,000 are refugees in Saudi Arabia. Kuwaiti population estimates before the invasion range from 700,000 to 1.2 million people.

DETROIT (NOV. 26) UPI - The Pontiac division of General Motors Corp. said Monday it has started a program under which it will pay up to half the deductible on insurance claims to help boost sales of its Firebird car.

The program will be tested through Jan. 31 in four Western states - Arizona, California, Nevada and Texas. It may be offered nationally if successful, Pontiac spokesman Reggie Harris said.

Called the Firebird Insurance Reassurance Plan, Pontiac will pay up to half the $1,000 deductible, or $500, on the first insurance claim on new 1990 and 1991 Firebird cars.

"By carrying a higher insurance deductible, buyers' insurance premiums will be lower," Harris explained, adding that the offer is the first of its kind in the auto industry.

Pontiac also is offering buyers a $750 discount on their next Pontiac car to those Firebird owners who never file a claim. That offer extends from six months to five years from the date of purchase, and is in addition to any other rebates or incentives in effect at the time.

Firebird sales have been hampered in part by high insurance rates, although

Harris said a new anti-theft system and the addition of a driver-side air bag have helped contain premiums. Firebird sales so far this year through Nov. 10 are 29.3 percent below year-ago levels.

#90330u0943 11/26/1990 ~United Press International

CAPE CANAVERAL, FL (NOV. 26) UPI - An upgraded Delta 2 rocket thundered toward space Monday to boost a $65 million military ''Navstar'' satellite into orbit, the 10th in a globe-spanning network of navigation beacons.

The 126-foot Delta 2 roared to life at 4:39 p.m. EST - seven minutes late because of last minute technical problems - and swiftly climbed away from the Cape Canaveral Air Force Station adjacent to the Kennedy Space Center.

It was the first Delta 2 to be equipped with more powerful solid-fuel strap-on boosters, allowing the slender rocket to lift payloads weighing up to 4,010 pounds into the preliminary orbits used by communications satellites.

The rocket's payload Monday, however, was a Global Positioning System ''Navstar'' satellite. It is the 10th in a planned network of such spacecraft that ultimately will allow military forces on the ground, at sea and in the air to determine their location and altitude to within 53 feet anywhere in the world.

The flight plan called for GPS No. 10 to be ejected into a preliminary elliptical orbit about 25 minutes after blastoff. On-board rockets were scheduled to fire later to boost the satellite into a circular 12-hour orbit 12,500 miles up.

Prior to Monday, the Delta record stood at 21 successes in a row dating back to May 3, 1986, and a perfect 15 straight for the Delta 2, including five commercial launches.

GPS satellites originally were to be launched from NASA's space shuttle.

But after the 1986 Challenger disaster, which grounded the shuttle program for 32 months, the Pentagon embarked on an unprecedented rocket construction program to guarantee independent access to space.

McDonnell Douglas Space Systems Co. of Huntington Beach, Calif., was awarded a $316.5 million contract Jan. 21, 1987 to build seven Delta 2s for the GPS program. The contract included options, however, for 13 additional vehicles for a total contract value of $669 million.

Under the terms of the contract, McDonnell Douglas receives a $3 million incentive fee for every successful flight. But if any of the first 18 rockets fails for any reason, the company will forfeit future payments and will have

to return the incentive fees paid to that point, with interest.

''We bet $54 million on every launch,'' said one company official.

The Air Force plans to launch 21 upgraded ''block 2'' GPS satellites - one from a shuttle - to join seven older and less sophisticated ''block 1'' spacecraft already in space.

The satellites are built by Rockwell International's Satellite Systems Division in Seal Beach, Calif., under a $1.2 billion contrcct.

Eighteen block 2 satellites are required to complete the global navigation network. Three of the 21 bound for orbit will serve as spares with another seven available on the ground for launch as needed.

Additional satellites are planned and through the end of the century, the GPS program is expected to run some $8.5 billion.

Equipped with sensitive atomic clocks, four such satellites will be ''visible'' at any given time from anywhere on Earth. Military forces on the ground, at sea or in the are will be able to use radio signals from the satellites to pinpoint their locations to within about 53 feet.

#90330u0947 11/26/1990 ~United Press International

RIGA, Latvia, U.S.S.R. (NOV. 26) UPI - Soviet President Mikhail Gorbachev has vowed to do everything in his power to stop the Baltic republics from seceding and warned of repressive measures that could bring bloodshed if they continue to defy Moscow, an influential Latvian deputy said Monday.

Mavriks Vulfsons, chairman of the Latvian Parliament's foreign affairs committee, said that an angry Gorbachev demanded in a personal conversation Friday that the Riga legislature annul its recent decree terminating the supply of goods and services to Soviet armed forces in Latvia.

''Gorbachev said that he is dissatisfied with current developments in Latvia and the Baltics,'' Vulfsons told reporters. ''He said that he will use all means within his constitutional powers to keep the Baltics in the new union. He is preparing to oppose the secession of the Baltic republics.''

The reported threat from Gorbachev was disclosed nine days after the Soviet Parliament gave preliminary approval to his request for sweeping new powers that would place the central government directly under his control and consolidate his hold on law enforcement bodies.

Vulfsons quoted Gorbachev as saying in their private conversation that the three Baltic republics' continued ''attempts to re-establish independence may

lead to the creation of a repressive mechanisms'' and that ''in such a case there could be bloodshed.''

Vulfsons, 74, a widely respected Latvian elder statesman, speculated that Gorbachev chose him to deliver a message to the Baltics republics because he said the two men have enjoyed a good personal relationship since Vulfsons first came to Moscow in 1988 as a newly elected member of the Soviet Parliament.

Vulfsons said he also had heated talks Friday with Marshal Sergei Akhromeyev, former chief of the Soviet military staff and now Gorbachev's personal defense adviser.

In an exchange Vulfsons described as ''more of a scolding than a conversation '' Akhromeyev said he would come to Riga this week ''to participate in acts of discrimination against the Soviet army.''

Romuldas Razukas, head of the Latvian Popular Front that holds a majority in the republic's Parliament, called on Latvians last week to prepare for a civil disobedience campaign in the event of a crackdown ''ampaign in t

Gorbachev imposed a seven-week blockade of Lithuania after its March 11 independence declaration and Soviet Premier Nikolai Ryzhkov threatened similar sanctions against Latvia two weeks ago.

''I don't regard the present situation as a crisis, but it is very tense and could quickly turn into a crisis,'' Latvian Deputy Prime Minister Ilmars Bisers said Monday.

In a rash of recent anti-miltary actions, soldiers in Vilnius fired warning shots and turned water hoses on 3,000 demonstrators outside the Lithuanian capital's garrison, and protesters cut telephone wires leading to an air force training center during a rally of 5,000 near the Latvian city of Saldus.

Latvian officials complain that Moscow refuses even to tell them how many soldiers are based in their republic, a figure they estimated between 100,000 and 200,000.

The Latvian Parliament passed a decree Nov. 14 directing local authorities to ''terminate the provision of social and material goods and services to any unit of the U.S.S.R. armed forces and to Soviet Communist Party organizations in the Republic of Latvia'' until the beginning of talks between Moscow and Riga on the status of Soviet troops in Latvia.

Latvian President Anatolijs Gorbunovs, a moderate and former secretary of the republic's Communist Party, opposed the decree, saying it would only inflame relations with Moscow.

Gorbachev branded the decree ''immoral and said it was directed against women and children in military families,'' according to Vulfsons.

#90330u0951 11/26/1990 ~United Press International

DENVER (NOV. 26) UPI - A ferocious fire in a storage tank filled with nearly 1 million gallons of jet fuel near Stapleton International Airport raged on Monday as crews battled to keep the flames were spreading.

''I wouldn't even want to guesstimate,'' Fire Capt. Steve Sauls said when asked how much longer the fire might burn. ''Hopefully, the water (from firefighters' hoses) will cool the tanks enough so the fire won't torch off any other'' tanks.

The fire broke out Sunday morning, destroying two tanks and snarling holiday traffic.

By Monday, the two giant 400,000-gallon tanks where the flames erupted had been reduced to rubble and lay collapsed, their contents exhausted.

But one larger adjacent tank, holding 800,000 gallons of fuel, was still on fire and a fourth 800,000-gallon tank remained in danger of catching fire.

The fire, erupting on the day many people return home after Thanksgiving, meant delays of up to three hours for passengers in the nation's seventh busiest airport as airlines scrambled to find alternate sources of fuel.

Stapleton is a major hub for United and Continental airlines.

Crews had tried using fire-retardant foam to put out the fire Sunday morning, but were forced to back off when gusty winds spread the 220- foot-high flames late Sunday night.

Sauls said fire crews spent the night deluging the remaining nearby tanks with water to cool them.

On Monday morning, with the fire in the first two tanks essentially out, the firefighters briefly went on the offensive, using foam once again.

''But it didn't work. It didn't put out the fire,'' Sauls said.

Crews then returned to using water, hoping to keep the flames from spreading to any more of the 10 other tanks not yet affected.

No cause for the fire had been determined. The intense heat and smoke, which reduced visibility on nearby Interstate 70 and darkened the sky over metropolitan Denver, prevented investigators from getting close enough to make

any survey, Sauls said.

Airport smokeman Norm Avery said travel was back to normal at the airport by late Sunday night.

At the fire's height, however, fuel lines from the tank farm to the airport terminals were shut down, keeping tanker trucks from reaching the storage tanks to load up with jet fuel to service arriving and departing flights, Avery said.

United was able to provide departing flights with enough fuel to safely reach Colorado Springs 75 miles to the south, where they could take on full loads of fuel.

Continental Airlines suffered ''minimal delays'' because it has its own supply depot at the airport. Other carriers trucked in fuel from outside the airport and were operating normally.

WASHINGTON (NOV. 26) UPI - William Richards, an Ohio farmer and pioneer in conservation tillage, is the new chief of the Soil Conservation Service, Agriculture Secretary Clayton Yeutter announced Monday.

The agency works directly with farmers to help them implement soil conservation practices. It also is the lead federal agency in soil surveys and is in charge of carrying out farm policy rules that require farmers to control soil losses on highly erodible land.

As chief, Richards succeeds Wilson Scaling, a political appointee who left the Agriculture Department shortly after James Moseley was sworn into office as assistant secretary for the environment. Richards also is a political appointee.

Until the Reagan administration, it was traditional for a career civil servant to head the agency. Roy ''Mack'' Gray, a 34-year veteran of the Conservation Service, has served as acting chief since Scaling's departure last July 11.

''Bill has demonstrated leadership and a lifelong commitment to soil conservation, which makes him an ideal choice to manage this very important agency,'' Yeutter said in a statement.

Richards operates a family farm with his wife and three sons near Circleville, Ohio. The operation began with the purchase of 140 acres of neglected river-bottom land in 1954. On it, Richards pioneered the use of minimum tillage and other farm innovations.

He was one of the first farmers in the nation to use conservation tillage on the entire farm. Conservation tillage is any practice that leaves crop residue on at least 30 percent of a field's surface.

In addition, Richards has served on numerous planning and review committees at Ohio State University. He also is a member of several agricultural organizations.

The Soil Conservation Service employs 14,000 people throughout the nation.

(NOV. 26) UPI - The United States is asking the U-N Security Council to set a deadline for the Iraqi withdrawal from Kuwait before ''whatever means necessary'' are used to end the occupation of the oil-rich state. The draft resolution is to be discussed on Thursday, and Secretary of State Baker will be in New York City to chair that session of the Security Council.

In Baghdad today, Saddam Hussein met with the wives of American hostages and told them that their spouses will be allowed to return to the United States with them. The official Iraq News Agency says Saddam also told the women that his nation wants peace in the Persian Gulf region.

The Iraqi foreign minister is in Moscow, where he got some stern warnings today. Soviet Foreign Minister Eduard Shevardnadze told Iraqi Foreign Minister Tariq Aziz that Iraq must honor U-N resolutions calling for a Kuwaiti withdrawal or prepare for the worst. Soviet President Gorbachev said the fate of Iraq is in the hands of Saddam Hussein.

Polish Prime Minister Tadeusz Mazowiecki resigned today. Mazowiecki late today said in a speech to the Council of Ministers meeting in Warsaw that his Solidarity-led government was resigning but would stay on until a new prime minister is named. That will come after a run-off election for president... a contest from which Mazowiecki has been eliminated by virtue of his third-place finish in yesterday's balloting.

An influential Latvian official says Soviet President Gorbachev has vowed to do everything in his power to keep the Baltic republics- Latvia, Estonia and Lithuania- from seceding from the Soviet Union. The Latvian leader says Gorbachev has warned him of repressive measures that could lead to bloodshed unless the three republics stop defying Moscow. He says Gorbachev demanded in a personal telphone conversation on Friday that the Latvian legislature revoke its recent decree cutting off goods and services to Soviet forces in the republic.

The Medellin drug cartel in Colombia today freed one of the seven journalists it held hostage. The hostage release came within hours of the kidnapping of three American petroleum engineers and a Colombian colleague. Police said the group that calls itself the ''Extraditable'' released the 60-year-old journalist because of health problems. The three Americans are believed to have been nabbed by the leftist National Liberation Army.

#90330u1056 11/26/1990 ~United Press International

WARSAW, Poland (NOV. 26) UPI - Prime Minister Tadeusz Mazowiecki, who placed third in a six-way race for president in weekend voting, announced late Monday his resignation and that of his Solidarity-led government.

Mazowiecki, who came to power in August 1989 as the first non- communist premier in the former East Bloc since World War II, said the results of the election Sunday show Poles no longer support his economic austerity plan.

''Since the moment I was entrusted with a mission to lead the government, I was of the problem that the essential problem was support and understanding by the people,'' he said in a resignation speech to the Council of Ministers.

''The painful but indispensible program for Poland of climbing out of an economic catastrophe can be only executed with the understanding of the majority of the people,'' he said.

''For several months I had the feeling that this understanding existed. It gave me added strength and reinforced the government's determination in transforming Poland,'' he said.

''The results of yesterday's election indicate that the situation changed,''

he said. ''The vision of Polish democracy and formation of the foundations of a healthy economy, the goal of my government, was questioned.''

''Society has made its choice. From this choice I drew my own conclusion. I decided to submit the resignation of the government.''

He said his government will stay on until the next president, who will be elected Dec. 9, names a new prime minister.

''The government will still function and fulfill its consitutional duties,'' he said.

With all but one of Poland's 49 electoral districts tabulated, Solidarity leader Lech Walesa led the six-man race as expected with 39.1 percent of the vote followed by Stanislaw Tyminski, an expatriate businessman from Canada, with 24 percent.

Mazowiecki was third with 17.5 percent.

A Catholic intellectual and long-time aide to Walesa, Mazowiecki was the Solidarity leader's hand-picked choice for the job following the failure of the previous communist regime to form a government last summer.

Mazowiecki's government inaugurated an economic stabilization program that tamed hyperinflation and put food and goods back on the shelves, but at the cost of a nearly 40 percent drop in the living standard and more than 1 million unemployed.

Reached at his home in Gdansk, Walesa expressed surprise at the proferred resignation of the entire Cabinet.

''I hope that in this important moment ambitions will not get an upper hand over patriotism, responsibility and the problems of Poland,'' he said.

Sources close to Walesa said he was surprised that Mazowiecki submitted the resignation of the entire government and that he expected only the premier to resign.

Walesa interpreted the move, the sources said, as an opening for members of the Mazowiecki Cabinet to have more freedom in seeking places in a future government.

#90330u1074 11/26/1990 ~United Press International

(NOV. 26) UPI - Despite a late-day selloff, oil prices rose $1 a barrel Monday as the United Nations appeared ready to approve a resolution approving the use of military force to resolve the Persian Gulf crisis.

On the New York Mercantile Exchange, the benchmark West Texas Intermediate crude for January delivery climbed $1.05 over Friday's close to $32.95 a barrel after trading as high as $34.25. Volume was a moderate 85,755 contracts.

Oil also affected trading the New York Stock Exchange, where the Dow Jones industrials average of blue-chip stocks ended the day up 5.94 points at 2533.17. The closely watched Dow was down as much as 25 points earlier, when crude traded more than $2 a barrel higher.

''It seems the war drums are beating again, and the market's getting nervous '' said Tom Bentz, director of trading at United Energy Inc. in New York.

He noted a U.N. resolution appears close to being passed that would set a deadline of Jan. 1 or Jan. 31 for Iraq to get out of Kuwait, occupied since Iraqi forces invaded Aug. 2.

''People are going to wait and see what the U.N. resolution brings,'' the trader said.

''There was one factor only, nothing else,'' influencing Monday's trading, agreed John Lichtblau, president of the Petroleum Indusrtry Research Foundation.

''There's no reason for the rise based in supply and demand. Without the war scare, there's no question the market is in shape for prices in the mid to high $20s (a barrel),'' the analyst said.

WTI sold off sharply at the end of the day, once the market dipped below $33.50 a barrel, Bentz said. ''It was a technical breakdown. ... There was liquidation late in the day,'' the trader said.

''It seems that a lot of people felt the market was getting ahead of itself after the rise Friday and today,'' said Peter Beutel of Pegasus Econometrics Group in Hoboken, N.J. WTI rose $2.27 a barrel Friday on very light trading with many traders taking the day off to extend the Thanksgiving holiday.

Bentz said WTI crude was ''having a tough time holding over $34 a barrel, and there seems to be good support around $33 a barrel.'' The $33 support level may still hold and prices could rebound some Tuesday, he said.

Beutel said he was looking for the weekly industry survey of the American Petroleum Institute to be released late Tuesday to show U.S. crude inventories dropped by 2 million to 4 million barrels last week. This could lend some support to prices, he said.

Home heating oil for December delivery ended Monday on the Merc up 3.72 cents to 92.38 cents a gallon, while December unleaded gasoline rose 1.80 cents to

84.20 cents a gallon.

On the European spot market, Britain's widely traded North Sea Brent ended the day up $2.15 over Friday at $34.80 a barrel.

The United Arab Emirates' Dubai Light - the key OPEC crude from the Middle East shipped mainly to the Far East - climbed 95 cents to $28.15 a barrel.

Sun Co., of Radnor, Pa., and Marathon Oil Co., the Findlay, Ohio, unit of USX Corp., raised the posted price they will pay for crude effective Monday. Sun raised its price by $1.25 to $31.60 a barrel for WTI, while Marathon increased its price by $1 for WTI to $31.75.

In addition, Houston's Conoco Inc. subsidiary of Du Pont and Citgo Petroleum Corp., Tulsa, Okla., said they had raised their posted prices effective last Friday: Conoco by $2 to $30.50 a barrel for WTI and Citgo by $2.25 to a WTI price of $30.75.

#90330u1076 11/26/1990 ~United Press International

MOSCOW (NOV. 26) UPI - Moscow is running short of milk because suppliers outside the capital have stopped deliveries in an emerging ''economic war'' pitting region against region, Deputy Mayor Sergei Stankevich said Monday.

''In the last several days, there have appeared signs of a fresh crisis - milk '' Stankevich told reporters. ''It has been caused by the sudden stoppage of the delivery of dairy products by nine regions.''

Stankevich appealed for foreign assistance to counteract the shortfall in milk the latest in a series of shortages that started most glaringly this year with cigarettes then spread to bread.

''During the winter, Moscow will need urgent foreign assistance in proving the capital with food,'' Stankevich said, adding that foreign firms have started sending food.

In Bonn, the German government began cranking up a massive relief operation with an ''air bridge'' envisioned to send food into the Soviet Union.

But U.S. Agriculture Secretary Clayton Yeutter said in Washignton the Soviet Union would be well advised to pass an Emigration Law for its citizens if it wants food credits.

The milk crisis stems from resentment in outlying regions at decisions this summer to allow only Moscow residents to make purchases in the city's stores.

It also arises from a newfound freedom for dairy farmers to shop around for

better prices in the absence of previous compulsion by the state to fulfill contracts at mandated prices.

''They have violated their contracts, even though Moscow continues to deliver industrial products to them to the full extent,'' Stankevich said.

Stankevich said, however, Moscow would not retaliate in what he termed an ''economic war'' with the regions. ''In the future we will just have to select more reliable partners,'' he said.

To satisfy current demand, imported milk powder is now being sold at state stores, he said.

A city of 9 million, Moscow makes enormous demands on the rest of the nation to keep it supplied with products, but under the Gorbachev reforms, regions outside the capital have started flexing their economic muscles.

Stankevich explained that less milk is now being delivered to the state stores in Moscow by farmers, and that they justify this by having to meet their own demands first and by the lack of processing equipment.

Despite the difficulties in obtaining supplies, Stankevich said Moscow has not decided yet whether to adopt rationing, a move reportedly that the nation's second largest city, Leningrad, is about to take Dec. 1.

#90330u1102 11/26/1990 ~United Press International

WASHINGTON (NOV. 26) UPI - Iraqi President Saddam Hussein's latest move to release a handful of American hostages was described Monday by the State Department as ''cynical manipulation'' that amounts to ''playing with lives.''

The remarks by State Department spokesman Richard Boucher followed a report by Iraq's official news agency, INA, that Saddam had ordered the release of all American hostages whose wives were currently visiting Baghdad.

The agency said Saddam made the announcement during a meeting with wives of U.S. hostages who are being held as human shields at strategic Iraqi sites to ward off an attack by Western forces massed in the Persian Gulf region.

The agency did not say how many U.S. hostages would be released, but other reports indicated that three American men would be allowed to leave. Boucher said three wives of Americans were known to be visiting Iraq.

''We consider Iraq's policy and Saddam Hussein's playing with hostages cynical manipulation and we don't think people should be involved in it. ... It's been clear all along that he's been playing with lives, playing with their relatives and playing with all our sympathies,'' said Boucher.

As many as 2,000 foreigners - including about 900 Americans - are still believed trapped or held against their will in Iraq or Kuwait. Most, if not all, who remain are men, according to the State Department.

The State Department, as a matter of policy it says is necessary to protect the privacy of those being held, has not disclosed the names of American families visiting Iraq at the invitation of Saddam.

However, Dennis Trundy of Brockton, Mass., said he received a telephone call Monday from his wife, Mary, in Baghdad who said the Iraqi government had agreed to release her twin brother, John Stevenson, 44. A bank computer analyst in Kuwait, Stevenson was captured on Oct. 20.

Stevenson was being held in a Baghdad hotel where his sister and two brothers were able to visit with him during their stay.

''They secured his release,'' said Trundy, who said his wife and brother-in-law would probably leave Iraq within the next two days.

Last week Saddam ordered the release of 10 British husbands after their wives traveled to Iraq to plead for their freedom.

Boucher said the State Department continues to discourage travel to Iraq by an American families because of the safety risk and because of the delicate political climate of the Persian Gulf crisis.

''Our view remains unchanged. We discourage travel,'' said Boucher. ''It's risky and we don't think it helps.''

SAN SALVADOR, EL SALVADOR (NOV. 26) UPI - Guerrillas shot down a Salvadoran military helicopter Monday, the second government aircraft hit by rebel fire in the latest surge of fighting.

Officials of the 6th Infantry Brigade, stationed in Usulutan province, said the pilot of the UH-1H Huey helicopter, who made an emergency landing, was wounded in the attack by rebels of the Farabundo Marti National Liberation Front.

The attack occurred in the town of Jiquilisco, 50 miles east of the capital.

Rebels used surface-to-air missiles Friday to down a Salvadoran air force jet, killing one pilot. The other pilot ejected before the A-37 crashed about 60 miles east of San Salvador.

In the past week, rebels have stepped up their military action, attacking army posts around the country.

On Monday, six soldiers were wounded in the capital by explosives thrown from a passing car. Urban guerrillas claimed responsibility for the attack, which they said was in reprisal for President Alfredo Cristiani's efforts to privatize banks.

About 179 people died and 359 were wounded in fighting last week. Ten of the dead and 75 of the wounded were civilians.

The increase in rebel action occurred as peace talks begun last May remained deadlocked over rebel demands for reform within the armed forces. The talks are to resume this month in Mexico.

A major rebel offensive would trigger the automatic release of half of the $85 million in U.S. military aid to El Salvador for 1991 that Congress has retained pending progress in peace talks and the prosecution of members of the armed forces charged with the murders last November of six Jesuit priests.

#90330u1142 11/26/1990 ~United Press International

MANAGUA, NICARAGUA (NOV. 26) UPI - Politicians complained Monday the amount of money earmarked for military spending and national security in 1991 - nearly 16 percent of the budget - is excessive in times of peace.

The first budget worked out by the 6-month-old government of President Violeta Chamorro allots $78 million of $500 million to the Popular Sandinista Army and government security forces.

By the end of the year, the armed forces will have been reduced to 28,000 active members, down from about 96,000 when the Sandinista government was fighting a civil war against U.S.-funded Contra rebels.

Luis Guzman, a legislator of the 14-party coalition that carried Chamorro to victory last February, said defense spending is the largest part of the proposed budget.

''The most visible, exaggerated controversial part at the moment is the defense and security budget,'' Guzman said. ''They are not going to undertake construction of new schools, hospitals or even improve the existing ones.''

Guzman said the government is relying on a supposed influx of $90 million in foreign aid ''and expects to maintain a social discipline that means keeping wages frozen throughout 1991.''

In its first six months, Chamorro's government has been rocked by two strikes by workers dissatisfied with uncontrolled inflation, high unemployment and continual devaluations of the cordoba.

Roger Guevara, president of the Nicaraguan Bar Association, said Nicaraguans will have to pay more taxes to cover the budget, ''but it is not fair to channel the money into the military.''

Despite an end to the 8-year Contra war, the government has had problems with former rebels taking over towns and blocking roads to demand the land, tools, supplies and credit promised when they disarmed last June.

Conservative Party leader Alberto Savorio said if the congress approves the budget, its members ''will have betrayed the hopes of the Nicaraguan people.''

#90330u1161 11/26/1990 ~United Press International

(NOV. 27) UPI - SPORTS DIGEST

BASEBALL

Each member of the champion Cincinnati Reds who was voted a full share for the World Series will receive $112,533.70, while the runnerup Oakland Athletics will have to settle for $68,960.54 apiece. The bonus money for the Reds fell just short of the record set a year earlier when Oakland received a full share of $114,252.11. ... The Toronto Blue Jays signed free agent reliever Ken Dayley, who spent last season with St. Louis. Dayley, a left-hander, signed a four-year contract after finishing 4-4 with a 3.56 ERA and two saves in 58 appearances for the Cardinals last year. The Blue Jays also named former major league pitcher Reggie Cleveland as pitching coach for their Medicine Hat (Rookie) Pioneer League affiliate. Cleveland, 43, pitched 12 years in the majors with St. Louis, Boston, Texas and Milwaukee. ... For the second time in three years, Baseball America has selected the Montreal Expos as its Organization of the Year. Fifteen rookies broke in with the Expos in 1990, with at least one first-year player appearing in each game. Montreal edged Los Angeles and Oakland for the honor.

BASKETBALL

Charles Barkley, who averaged 30.2 points, 10.2 rebounds and 4.7 assists while leading the Philadelphia 76ers to four consecutive victories, was named NBA Player of the Week. Other candidates for the honor were Johnny Newman of Charlotte, Akeem Olajuwon of Houston, Chuck Person of Indiana, Tyrone Corbin of Minnesota, Terry Porter of Portland and Karl Malone of Utah. ... Miami coach Ron Rothstein has been fined $2,000 by the NBA for comments made about the officiating following the Heat's 106-90 loss to Detroit Nov. 20. ... Micheal Ray Richardson was among 17 players and team officials ejected for fighting during an Italian League game Sunday between Richardson's Knorr Bologna club and Ranger Varese. Another former NBA player, Clemon Johnson, also was ejected. The brawl was broken up by riot police, and Knorr Bologna finished the game with three players. Ranger Varese won, 91-73. ... A World Basketball League All-Star team left for Europe, where it will play five games in Italy and Spain. The WBL is for players 6-foot-4 and under. The All-Star team consists of Jamie Waller, Jim Thomas, Barry Mitchell, Perry McDonald, Alfredrick Hughes, Chip Engelland, Fred Cofield, James Blackmon, Johnny Brown and Scooter Barry. Roger Lyons is the coach.

BOXING

Mike Tyson knocked down one sparring partner and sent another out of the ring with sore ribs in training for his Dec. 8 bout against Alex Stewart, Trump Plaza officials in Atlantic City, N.J. said. Tyson decked Eddie Gonzalez with a left uppercut to the head and doubled over Mike Dickson with a right to the ribs in an open sparring session at Trump Plaza. ... Heavyweight champion Evander Holyfield and challenger George Foreman Tuesday will seek a temporary restraining order to prevent the World Boxing Council from stripping Holyfield's title until the dispute can be heard by an arbitrator. Holyfield and Foreman, who will fight April 19 in Atlantic City, will will appear before Judge Amos Saunders in Passaic County (N.J.) Superior Court. The WBC threatens to strip Holyfield for fighting Foreman instead of Tyson. ... Marcos Villasana's scheduled Dec. 5 defense of his WBC featherweight title against Sean Murphy in London was postponed. Promoter Frank Warren said the bout would be rescheduled in January but gave no reason for the postponement.

COLLEGE

Russell Maryland of Miami, Joe Garten of Colorado and Stacy Long of Clemson were named finalists for the Outland Trophy, awarded to the nation's top college lineman. The winner will be announced Dec. 5 in Los Angeles. Maryland is a defensive lineman, Gerten an offensive guard and Long an offensive tackle. ... San Diego State running back T.C. Wright and Colorado State defensive back Sylvester Mabry are the Western Athletic Conference Players of the Week. ... Colgate quarterback Dave Goodwin was named Eastern College Athletic Conference Player of the Year in voting by the ECAC's 30 Div. I-AA head coaches and sports information directors. Dartmouth sophomore quarterback Matt Brzica was named ECAC rookie of the year.

GOLF

Pittsburgh Penguins center Mario Lemieux is not experiencing pain, but rehabilitation of the his injured back will not begin until mid- December, according to his doctor. The all-star center is scheduled to undergo a series of tests Dec. 5. He has not played a game since March 31 and has not skated since September. ... Left wing Michel Picard of the Springfield Indians, with six goals and three assists in four games last week, is the Player of the Week in the American Hockey League. Greg Parks of the Capital District Islanders was second in the voting and Patrick Lebeau of the Fredericton Canadiens was third.

#90330u1187 11/26/1990 ~United Press International
(NOV 26) UPI - United Nations Security Council members Monday studied a U.S. draft resolution setting a Jan. 1 deadline for Iraq to withdraw its troops from Kuwait, while Saddam Hussein reportedly told the visiting wives of U.S. hostages they were free to take their husbands with them when they return home.

The Jan. 1 deadline date was the subject of intense negotiations between the five permanent members of the Council - the United States, the Soviet Union, Britain, China and France - each of whom has veto power over the resolution.

Yemen's U.N. Ambassador Abdalla Saleh Al-Ashtal told reporters Monday afternoon after he had seen the U.S. draft proposal that it was ''unacceptable.''

Al-Ashtal said the resolution would give the ''green light'' to the United States to go to war against Iraq. Yemen and Cuba, both members of the Security Council, had mostly abstained when the council voted to adopt the 10 resolutions since Iraq's Aug. 2 invasion of Kuwait.

Al-Ashtal said non-aligned members in the council were to meet Monday night to discuss the U.S. proposal.

White House press secretary Marlin Fitzwater told reporters aboard Air Force One while President was en route to Monterrey, Mexico, that the administration was optimistic the Security Council would approve the resolution when it comes up for a vote Thursday.

He said that Secretary of State James Baker had met with each of the 15 members of the Security Council and will go to New York Thursday to chair the Security Council meeting.

The hostage release announcement was made by Saddam Monday during a meeting with wives of U.S. hostages held in Iraq as human shields to ward off Western attack, said the Iraqi news agency, monitored in Cairo.

The U.S. State Department said it expected only three American husbands to be released.

''The president ordered Iraqi authorities to allow American families to accompany their relatives currently in Baghdad to travel home on the occasion of their visit to Iraq,'' the official Iraqi news agency INA said.

''Starting this moment, you will have an additional right exceeding the rights of Iraqi citizens,'' the agency quoted Saddam as saying, in an apparent reference to the need for Iraqi citizens to secure exit visas before they can travel abroad.

Last week Saddam ordered the release of 10 British husbands after their wives arrived in Baghdad to plead for their freedom.

Saddam was quoted as saying during his meeting with the American families that Iraq wanted peace, because it is in a ''very bad need for such peace,'' INA reported.

The Iraqi leader accused the Bush administration of playing the role of a world policeman carrying ''a heavy stick and twirling its moustache.''

In Moscow, Soviet Foreign Minister Eduard Shevardnadze told visiting Iraqi Foreign Minister Tariq Aziz Monday that Baghdad must withdraw from the emirate and give all Soviet nationals the right to leave Iraq, Soviet officials said.

Soviet leader Mikhail Gorbachev, who later joined Shevardnadze in the talks, told Aziz that Iraq's fate was in the hands of Saddam and that Baghdad should prepare to face the worst if his country did not leave Kuwait.

''The fate of Iraq is in the hands of its leadership, and time is elapsing,'' said Gorbachev. ''If Iraq actually wants a settlement in the entire region and is seeking to avoid the worst, it must declare right now openly and to show by deeds that it is leaving Kuwait.''

#90330u1190 11/26/1990 ~United Press International

DETROIT (NOV. 26) UPI - Three young women were abducted at knifepoint in the drive-through line of a suburban fast food restaurant but two were freed hours later in Chicago, the FBI said Monday.

A nationwide alert was issued for Jamie Lee, 18, of Detroit, and her two abductors, identified only as ''David'' and ''Ken,'' said Hal N. Helteroff, special agent in charge of Michigan FBI operations.

''Obviously, we're very concerned about the the safety of Jamie Lee,'' Helteroff said.

He said Rebecca Batton, 17, of Mount Clemens, and Angie Bastianon, 16, of Warren, were released unharmed at about 1:30 a.m. Sunday in Chicago, warned not to call police and told that Lee would be free in about two hours.

The kidnapping took place at 8:30 p.m. Saturday at a McDonald's restaurant in Harrison Township near Mount Clemens.

Helteroff said Batton and Bastianon told agents that ''Dave'' approached the driver's side of their car with a knife just after it passed the drive-through window and the other suspect forced his way into the passenger's side.

''They really didn't have any opportunity to resist,'' Helteroff said.

Helteroff said the suspects forced the women into the back seat and then drove to Chicago, stopping once for gasoline and once to use the restroom, but did not give the victims a chance to escape.

Jamie Lee was described as 5-feet-3, 120 pounds with short blond hair. She was wearing a long sleeve peach colored blouse, white cotton pants and a brown leather jacket with a fur collar.

Although the car was moving slowly through the drive-through during a normally busy time, Helteroff said, no witnesses have contacted authorities.

''Hopefully, through this publicity, some one will come forth,'' he said.

He said there has been no ransom demand.

Helteroff said the suspects told the women they had more than $800 on them, and authorties were looking for links to any robberies or burglaries.

''David'' was described as white, about 35, 5-feet-7 to 5-feet-8, 140 to 150 pounds with greenish blue eyes and ''dishwater blond'' shoulder length hair, reddish full beard and a mustache. He wore a Navy blue jacket, torn jeans, spoke with a deep Southern accent and claimed to have lived in Florida for 10 years.

He had rough, greasy hands similar to an an auto mechanic's and brandished a large Bowie type knife, Helteroff said.

Ken could be an American Indian, Helteroff said. He is about 25, the same height as his companion, 150 to 160 pounds, with dark black shoulder length hair and brown eyes. He was wearing a blue polo type jacket, had a quiet demeanor and claimed to have family or friends in the Chicago area.

Helteroff said it is possible Jamie Lee was not freed because the car, a 1990 Blue Toyota Tercel with Michigan license 240-WDM, belonged to her.

The women freed said they were ''not harmed at all,'' Helteroff said, but the abduction is considered a grave offense carrying penalties of up to life in prison.

Helteroff said the suspects kept the women's purses containing their identification and there was concern they might try to harm them later.

Parents of the women, he said, went to Chicago to bring them home.

During the trip, he said, the suspects drank from a bottle ''of some kind of whiskey.''

#90330u1200 11/26/1990 ~United Press International

(NOV. 26) UPI - The Yemeni U-N ambassador says a U-S-proposed resolution to set a deadline for Iraq to get out of Kuwait is ''unacceptable.'' Diplomats say the United States is proposing a January 1st, 1991, deadline before its uses military force to oust the Iraqis from Kuwait. The Yemeni ambassador says the resolution would give what he termed a ''green light'' for the U-S to go to war against Iraq. He says the non-aligned nations on the U-N Security Council are meeting tonight to discuss the situation.

The Soviet Union made it pretty clear to Iraq today that it supports the U-N resolutions calling for a withdrawal from Kuwait. Soviet President Gorbachev told Iraqi Foreign Minister Tariq Aziz that if Iraq really wants peace, it must show openly and by its actions that it is pulling out of Kuwait.

In Baghdad, Iraqi leader Saddam Hussein announced that the husbands of American women currently in the Iraqi capital city could bring their spouses home with them. Saddam announced his decision at a meeting with the wives. He also told them that Iraq wants peace in the Persian Gulf. In Washington, a State Department spokesman called the new hostage release another instance of what he termed ''cynical manipulation'' that amounts to- quoting now- ''playing with lives.'' The spokesman says three wives of American hostages are known to be visiting Iraq.

The U-S Geological Survey reports that a light earthquake shook Anchorage, Alaska, this afternoon. A spokesman says the quake was measured at four-point-six on the open-ended Richter Scale and was centered about 55 miles north of Anchorage. There were NO reports of damage or injuries.

An upgraded, 30-Million-dollar DeltaMillion- dollar ''Navistar'' satellite into orbit today. The satellite is the 10th in a globe-encircling network of navigation beacons. The Delta-2 was launched from the Cape Canaveral Air Force Station next to the Kennedy Space Center. The system of navigation satellites eventually will allow American military forces to determine their location to within 53 feet, anywhere in the world.

Winter snow and plunging temperatures today helped firefighters gain the upper hand in battles against wildfires that erupted over the Thanksgiving weekend in Colorado and Montana. Authorities say snow was falling over central Montana today, enabling crews to contain 90 percent of a blaze that consumed 32-thousand acres over the weekend. In Colorado, a fire that was started by a burning mattress and destroyed 10 high-priced residences in a Boulder suburb was all but out, with only a few hot spots remaining.

#90330u1214 11/26/1990 ~United Press International

WASHINGTON (NOV. 26) UPI - Meetings the so-called ''Keating Five'' senators held with bank regulators in 1987 capped a campaign of ''private threats and public vilification'' aimed at gutting federal oversight of the thrift industry, the nation's chief savings and loan regulator at the time told a Senate panel Monday.

Edwin Gray, former chairman of the Federal Home Loan Bank Board, said Charles Keating Jr. enlisted ''paid apologists'' to combat federal regulators to thwart measures to rope in a thrift industry gone wild in the 1980s.

Gray made his opening statement at the end of the fifth day of Senate hearings into whether the five senators - Dennis DeConcini, D-Ariz.; Alan Cranston, D-Calif.; John Glenn, D-Ohio; John McCain, R-Ariz.; and Donald Riegle, D-Mich. - improperly pressured bank regulators to benefit Keating, a former thrift operator who now faces racketeering charges in California.

Earlier, Laurie Sedlmayr, DeConcini's aide specializing in banking and financial issues, told the committee she strongly warned her boss against attending a 1987 meeting with Gray that has become a central part of influence-peddling allegations.

Gray is a key figure in the case against the five senators.

Without aides present, Cranston, DeConcini, Glenn and McCain attended a one-hour meeting on April 2, 1987, in DeConcini's office.

Gray has accused the senators of offering the government a deal on behalf of Keating that would have included dropping an investigation into Keating's California-based Lincoln Savings and Loan Association in exchange for certain concessions from the thrift.

Gray, in his statement, shied away from specific allegations against the five senators, who received a total of $1.3 million in contributions from Keating. He is slated to be questioned by Robert Bennett, special counsel in the ''Keating Five'' hearing, and lawyers representing the five senators Tuesday.

Lincoln's 1989 failure is expected to cost the taxpayers about $2 billion and stands as the largest collapse to date in the nation's savings and loan scandal.

Referring to the key meeting and one seven days later that the senators held with other bank regulators, Gray told the committee: ''These meetings capped years of private threats and public vilification designed not just to change particular decisions by the bank board but to render us unable to carry out our central responsibilities to protect the financial system and the taxpayers from loss.''

Gray said alleged political pressure tactics ''did not intimidate me or my regulators.''

''We have heard a lot in these hearings about the responsibility of senators to represent constituent interests,'' Gray said, referring to claims by all five senators that any actions taken regarding Keating were legitimate forms of assistance.

''But I have always assumed that we also send out senators to Washington because we think they will have the sense to know when narrow constituent demands must take a back seat to the safety of their constituents as a whole '' Gray added.

None of the five senators was present when Gray spoke.

Gray also said Keating orchestrated an impression that Gray had a ''vendetta'' against him as a tool to fight imposition of any bank board regulations in the future.

DeConcini aide Sedlmayr said she believed attending the meeting with Gray would be ''a political mistake,'' pointing to the current hearings as belated evidence.

''I told him I didn't think it was a good idea and later would be misinterpreted by the press,'' Sedlmayr testified. ''He (DeConcini) thanked me for my suggestion but said he was going to go ahead anyway.''

#90330u1233 11/26/1990 ~United Press International

CHICAGO (NOV. 26) UPI - The Chicago Board of Trade said Monday it will seek permission to trade a diammonium phosphate fertilizer futures contract.

The contract already has been approved by CBOT directors and will be submitted to the Commodity Futures Trading Commission.

DAP is a solid granular product and one of the most commonly used fertilizers. The United States is the world's largest producer and exporter of the fertilizer, accounting for an estimated 50 percent of world DAP production, the CBOT said.

In 1988-89, the market value of U.S. production was $2.2 billion.

The proposed contract is designed to be used as a hedging vehicle by fertilizer producers, wholesalers and retailers of fertilizer products and farmers with large acreages and was developed with input from the Fertilizer Institute.

The CBOT's Product Development committee also is developing an anhydrous ammonia futures contract.

PANAMA CITY, Panama (NOV. 26) UPI - U.S. troops who have worked with Panamanian police since the U.S. invasion last year will be withdrawn in December, U.S. officials said Monday.

''Within the next few weeks we will complete the withdrawal of our police teams,'' said Col. James Steele, commander of the U.S. Military Support Group, which has helped train the Panamanian police force.

Hundreds of U.S. miltary police were stationed throughout Panama following the invasion that ousted military ruler Manuel Noriega. The new Panamanian force was built from Noriega's defeated army and numbers about 12,000.

The Panamanian police have been unable to stop a sharp increase in crime, and although hundreds of officers have been retired, many Panamanians distrust the force and view it as a threat to the U.S.- installed civilian government because of its ties to the Noriega era.

Since January, three police chiefs have been fired. Last month, Col. Eduardo Herrera, who was fired in August, was arrested for allegedly plotting a coup against the Panamanian government. Ebrahim Asvat, a Harvard-educated lawyer, is the current security chief.

The number of U.S. troops working with Panamanian police has dropped from 700 in March to about 150. Steele said both the Panamanian and U.S. governments agreed to end the joint patrols next month.

''We will strictly adhere to our part of the agreement and that means withdrawal by early December,'' said U.S. Ambassador Deane Hinton.

The joint patrols received widespread support, but critics contend the U.S. military presence in Panama City and in outlying provinces violates the country's sovereignty.

About 10,000 U.S. troops are permanently stationed at bases in Panama.

#90330u1263 11/26/1990 ~United Press International

NEW YORK (NOV. 27) UPI - The Texas Longhorns' upward march through the United Press International college football ratings has rekindled some fond memories in Austin.

Texas continued its ascent in the latest balloting by the UPI Board of Coaches tying Brigham Young for fourth place on Sunday.

There once was a time when the Longhorns were a weekly member of the Top 10. Even when they weren't winning the national title, they often were in the running right through the bowl games.

But Longhorn football fell on hard times through the latter part of the 1980s, resulting in a cycle in which Texas actually posted a losing record in three of the last four years. The cycle has returned upward in 1990.

The Longhorns earned their first Cotton Bowl berth in seven years last Saturday with a 23-13 victory over Baylor, stretching their winning streak to eight games in the process.

''Early in the season, I didn't expect us to go this far,'' quarterback Peter Gardere said after the Longhorns clinched their first Southwest Conference crown since 1983. ''I'm glad to be here, though - it's a lot of fun.''

Texas' fourth-place ranking is its highest since the Longhorns were second behind Washington on Nov. 9, 1984. Texas was 6-0-1 at that point, then lost four of its last five games to drop out of the final ratings.

Colorado remained in the top spot in the ratings, as the top three positions remained unchanged.

The Buffaloes received 39 of 50 first-place votes cast by the 59- member Board of Coaches and finished with 731 of a possible 750 points. No. 2 Miami received three first-place votes and 624 points, while No. 3 Georgia Tech was at the top of three ballots and finished with 621 points.

BYU and Texas both finished with 569 points, as Cougars received three first-place votes and the Longhorns two.

No. 6 Notre Dame moved up two places after its 10-6 victory over Southern Cal, keeping alive its slim national-title hopes. No. 7 Washington, its regular season complete, remained unchanged.

No. 8 Florida State and No. 9 Penn State each moved ahead one position, while Tennessee used its 48-24 victory over Kentucky to jump two spots into the Top 10.

No. 11 Clemson moved up two places and No. 12 Michigan improved four spots after its 16-13 victory over rival Ohio State, a game the Wolverines won on a J.D. Carlson field goal on the final play. No. 13 Mississippi also jumped four places after beating Mississippi State.

Nebraska fell eight places to 14th after being trounced 45-10 by Oklahoma, and

No. 15 Iowa dropped four spots after losing to Minnesota. No. 16 Louisville, its regular season complete, moved up three positions.

No. 17 Texas A&M leaped five positions after crushing Texas Christian 56-10 and Southern Cal slipped two spots to 18th. No. 19 Illinois and No. 20 Auburn both moved up one place.

Michigan State improved two places to 21st after beating Wisconsin and Ohio State fell to 22nd.

Virginia, ranked No. 1 just four weeks ago, dropped into a tie for 23rd with newcomer Southern Mississippi after its second straight loss. San Jose State and newcomer Oregon tied for 25th.

The only team dropping out of the ratings this week was Baylor, ranked 25th before losing to Texas.

#90330u1271 11/26/1990 ~United Press International

SEATTLE (NOV. 26) UPI - No one will comment for the record, but it's obvious the off-court shenanigans of guard Dale Ellis are beginning to try the patience of the Seattle SuperSonics.

Ellis, who hasn't played this season because of an inflamed nerve in his right foot, has never been a problem on the court - averaging 25.4 per game during four seasons with the Sonics. But his off-court problems have been numerous.

The latest indiscretion was a bloody fist-fight Wednesday with teammate Xavier McDaniel on the sidewalk in front of the team's offices. The Sonics suspended Ellis for five days ''for disciplinary reasons,'' while McDaniel was not disciplined.

''We talked to the people involved and the people who saw it,'' said Whitsitt, ''and based on the facts we gathered we made what we deemed the appropriate discipinary action. We hope to have Dale back in uniform when he comes off the injured list.''

Sonics public relations director Jim Rupp termed the incident ''a heated punchout'' and witnesses said the two fought for about 10 minutes, ripping clothes and drawing blood. Police were called to the scene, but no arrests were made and no report filed. Neither player was injured.

Earlier in the day, Ellis and McDaniel - never the best of friends - had argued during a practice session, which led to Coach K.C. Jones closing the session early.

Neither player would comment on the subsequent fight or what instigated it,

but Ellis reportedly irritated his teammates by watching the New Jersey game the night before from owner Barry Ackerley's courtside seat rather than from the team bench.

Rupp said the suspension was levied to keep Ellis away from the team's practices, since he is on the injury list and can't play anyway until after Thursday's game against Phoenix.

Neither Whitsitt nor Jones would discuss Ellis's future with the team, but several teammates indicated they were fed up with the 6-foot-7 shooter, who some feel is selfish and has received preferential treatment from team management.

While none would offer anything on the record, one said: ''We're all tired of Ellis. The man needs help. We just want to put this behind us and get on with the future of this team.''

Ellis has four years remaining on his six-year, $7.3 million contract. The contract is guaranteed and the Sonics would have to pay Ellis about $5.15 million to release him.

Ellis, 30, was convicted two months ago of driving while intoxicated and reckless driving - charges stemming from a one-car accident last January. Ellis sustained broken ribs and a collapsed lung in the crash, missing 27 games.

He also was:

- Arrested, fined and put on probation for a year after a 1989 domestic disturbance at his home;

- Sued twice for separate incidents involving vehicles in 1988;

- Jailed with teammate Kevin Williams in Houston during the 1987 playoffs after a scuffle in a bar;

- Ticketed for several speeding and traffic violations since 1987.

#90330u1318 11/26/1990 ~United Press International

ANCHORAGE, Alaska (NOV. 26) UPI - The state of Alaska announced Monday that Exxon cannot consider its oil spill cleanup job finished until the state says so, especially with removable crude oil remaining on hundreds of beaches.

Alaska's 1991 Exxon Valdez oil spill response plan, unveiled Monday, gives the oil giant one more year to complete the cleanup of crude that remains on coastal shores following the nation's worst tanker spill 19 months ago.

Although the Coast Guard directed Exxon during the first two summers of cleanup work and will tell Exxon what, if anything, to do next year, the new state plan positions Alaska to assert a higher standard of cleanup on state beaches.

Alaska's plan also sets the stage for a confrontation with both Exxon and the U.S. Coast Guard, which last summer often sided with Exxon in cleanup disputes.

''We're not looking for disagreement,'' Gov. Steve Cowper said in a statement backing up the state plan and its assertion of authority to call the shots. ''We are merely making it clear that states sometimes have different priorities and that we're ready and willing to step up and make sure those priorities are met.''

''The oil on the shorelines and under the surface is not naturally occurring, and its continued presence degrades the natural resources and their values,'' the state said in a 16-page report that sets Sept. 15, 1991 as the target date for finishing the cleanup triggered by the March 24, 1989 wreck of the Exxon Valdez.

The loaded tanker hit well-marked Bligh Reef and broke open, spewing 11 million gallons of oil into the pristine waters of Prince William Sound and the Gulf of Alaska and onto 1,285 miles of shoreline.

Accompanying the state response plan is a 12-page list of 757 shoreline segments.

The state said 404 shorelines need no more work - either because they have no more oil on them or because nothing more can be done to clean them. Another 353 sites have problems ranging from crude hardened to mousse-like globs to residue and stain and must be reassessed for more work, according to the state analysis.

Exxon, predicting that winter storms will further cleanse the coast, has refused to commit itself to more work until after spring surveys that will be used for Coast Guard decisions on any future cleanup work. The state also will participate in the surveys.

But months before these spring surveys, the state plan lays a legal foundation for requiring more work of Exxon, spelling out priorities for scouring heavily-oiled shores and beaches used for salmon spawning, native subsistence food-gathering, fishing and recreation.

''We're still reviewing the plan,'' Exxon spokesman Karsten Rodvik said.

''I read it but I didn't necessarily agree with what they say,'' said Rear Adm. David Ciancaglini, the Coast Guard federal spill coordinator who was

preparing a formal response to the state. He reiterated that the federal government is in charge of the cleanup.

But the governor said the state will bring the cleanup to a close, adding, ''It's critical that Alaskans be the ones to determine that end point. Alaskans have lived with the spill and its effects on their resources, and their voices must be heard and heeded.''

#90330u1320 11/26/1990 ~United Press International

LOS ANGELES (NOV. 27) UPI - The once-sizzling California housing market, battered by a year-long slump and fears of a recession, rebounded slightly in October as sales of existing homes gained by 2.2 percent from September levels a trade group reported Monday.

The California Association of Realtors said the increase, which followed a 10.7 percent sales decline in September, reflected homesellers lowering their prices and increased sales of smaller houses.

The median price last month fell to $188,060, off 1.2 percent from September's level and 2.9 percent from the year-ago figure. The October median marked the seventh-straight monthly decline in year-to-year prices, but it was still more than 30 percent higher than the October 1987 price of $143,840.

Home prices and sales boomed in 1988 and early 1989 in California, particularly in the coastal urban areas around Los Angeles and San Francisco, then fell into a slump as many buyers were priced out of the market.

''Realistic pricing by motivated sellers is beginning to attract homebuyers who previously had been waiting on the sidelines,'' said Mack Powell, president of the association. ''Would-be buyers who were shut out of the peak housing market of 1989 are resuming their search and finding they can now purchase a home.''

But despite the gain in October, sales were still 22 percent behind the sales pace in October 1989. And the trade group forecast last month that the state's slump would continue next year, with a decline of 14.9 percent expected.

The biggest jump in sales activity came in Los Angeles, where sales soared 26.8 percent during October. But even with that increase, sales were 21.8 percent behind the rate in October 1989.

Santa Barbara also posted a 24.8 percent increase in September-to- October sales, while San Diego gained 5.9 percent.

''October's figures may indicate that homebuyers finally are noticing that affordability has improved in the coastal metropolitan regions during recent

months,'' said Leslie Appleton-Young, the association's economist.

There were also gains in the Central Valley (3.2 peercent), Riverside-San Bernardino (3 percent) and Sacramento (1.3 percent).

But there were also significant declines, with the Northern California wine country falling 19.7 percent and the Palm Springs-lower Mojave Desert region off 18.1 percent. Orange County, which has been caught in a slump partly because developers built too many high-priced homes there in recent years, fell 11.7 percent.

Mild declines were seen in Santa Clara (3.2 percent), the San Francisco Bay area (1.3 percent) and Monterey (1 percent).

#90330u1322 11/26/1990 ~United Press International

(NOV. 26) UPI - The U-N Security Council is considering a U-S draft resolution giving Iraq until January 1st to withdraw its troops from Kuwait. The White House says it's optimistic the Security Council will approve the resolution when it comes up for a vote Thursday. But Yemen's ambassador to the United Nations says the U-S draft proposal is ''unacceptable.'' The ambassador says the resolution would give the ''green light'' to the United States to go to war against Iraq.

Meanwhile, in Baghdad, Iraqi President Saddam Hussein reportedly told the visiting wives of U-S hostages they are free to take their husbands home with them. The State Department in Washington says it expects only three American husbands to be released. The Iraqi News Agency quotes Saddam as saying during the meeting that Iraq wants peace. The Iraqi leader reportedly accused the Bush administration of playing the role of a world policeman carrying ''a heavy stick and twirling its moustache.''

In Moscow, Soviet officials say Soviet Foreign Minister Eduard Shevardnadze told visiting Iraqi Foreign Minister Tariq Aziz today that Baghdad must withdraw from Kuwait and give all Soviet nationals the right to leave Iraq. The officials say Soviet President Gorbachev also told Aziz that Iraq's fate is in the hands of Saddam and that Baghdad should prepare to face the worst if his country does not leave Kuwait.

Firefighting crews continue to battle a spectacular fire in a fuel storage tank near Denver's Stapleton International Airport. The tank is filled with nearly one-Million gallons of jet fuel. The ferocious flames broke out yesterday, destroying two 400-thousand-gallon tanks and snarling holiday traffic. The blaze spread to a larger adjacent tank holding 800-thousand gallons of fuel... and it's still burning and threatening a fourth 800-thousand-gallon tank.

Residents of western Washington state returned to their flooded homes today as rivers swollen by torrential rains began receding. There are NO official damage estimates immediately available, but losses are expected to reach into the tens of Millions of dollars. More than a dozen rivers overflowed their banks and several thousand people were forced to scramble for higher ground over the weekend. The surging waters washed out a major interstate bridge and some dairy farmers lost entire herds.

#90330u1350 11/26/1990 ~United Press International

NEW YORK (NOV. 26) UPI - Arizona parlayed its championship in the Big Apple NIT into the No. 1 rating Monday, jumping past Nevada-Las Vegas in the first regular-season United Press International college basketball ratings.

Nevada-Las Vegas, the defending NCAA champion and preseason No. 1, fell to second place in the latest balloting by the UPI Board of Coaches. The Runnin' Rebels fell 10 points behind Arizona despite having more than twice the number of first-place votes.

''It's real nice. We appreciate it, but we've only played four games, '' Arizona Coach Lute Olson said before the Wildcats' game Monday night against Western Illinois.

Arizona received 11 of 40 first-place votes cast by the 42-member Board of Coaches and finished with 569 of a possible 600 points. UNLV received 27 first-place votes and 559 points.

The Runnin' Rebels, currently appealing NCAA sanctions barring them from postseason play, lost ground when two coaches left Nevada-Las Vegas off their ballots.

The NCAA ordered the postseason ban over the summer for what was said to be violations committed 15 years ago, when the organization ordered Coach Jerry Tarkanian suspended for ''recruiting and organizational violations.''

Tarkanian and UNLV officials have presented compromises that would allow the Rebels to defend their title. The NCAA is considering UNLV's appeal and should determine soon whether the Rebels can defend their title.

Nevada-Las Vegas remains eligible for the UPI ratings until the NCAA rules on the appeal. Should the tournament ban remain in place, the Runnin' Rebels would become ineligible.

Arizona powered through four impressive victories in taking the NIT title, including an 89-77 championship-game victory over Arkansas in which the Wildcats used their superior front line to rally from an eight-point deficit in the second half.

''I think our physical strength down the stretch just started to tell on them '' Olson said. ''Arkansas is extremely quick, but when you have to keep banging on those 240-pounders, it takes its toll.''

Arkansas, 3-1, remained third despite its runner-up finish in the NIT. The Razorbacks were followed by No. 4 North Carolina and No. 5 Michigan State, both unchanged from the preseason ratings. No. 6 Georgetown improved one place after two wins in Hawaii.

No. 7 Syracuse jumped nine places after winning the Maui Invitational, including a 77-74 victory over Indiana. Alabama improved one position to eighth and No. 9 Duke fell three spots after losing to Arkansas in the NIT semifinals.

No. 10 UCLA, which advanced to the final of the Great Alaska Shootout, remained unchanged and Indiana dropped three spots to 11th. No. 12 Ohio State slipped one position and Connecticut remained 13th.

Georgia Tech and Pittsburgh were tied for 14th and there was another deadlock for 16th between Oklahoma and Georgia. No. 18 Virginia, UCLA's opponent in the Great Alaska Shootout final, improved one spot.

Southern Mississippi and Texas tied for 19th and Louisville moved up one position to 21st. No. 22 St. John's entered the ratings after winning the Lapchick Tournament.

No. 23 Louisiana State dropped 10 places after falling to Villanova in the Tip-Off Classic. New Mexico State entered the ratings at 24th and fellow newcomer Houston was 25th.

The Big East placed five teams in the Top 25, while the Atlantic Coast Conference was represented by four teams. The Big Ten, Southeastern Conference and Southwest Conference each had three members in the ratings.

Schools ineligible for consideration in the ratings because of NCAA sanctions are Illinois, Kentucky, Marshall, Maryland, Missouri, Northwest Louisiana and Robert Morris.

JUNEAU, Alaska (NOV. 26) UPI - Sixteen fishermen were plucked from lifeboats or frigid waters and three fishing vessels were lost after a fierce storm battered the Bering Sea crab fleet, the Coast Guard said Monday.

The storm also damaged 11 other boats.

''My God, did they take a beating,'' said Rear Adm. David Ciancaglini, the Coast Guard commander for Alaska.

''I had my fingers crossed,'' he said. ''I didn't know what we were going to do to respond. There were mountains of waves.''

The Sunday storm, packing winds of 60 mph with gusts up to 90 mph, whipped up waves 30 feet high.

It attacked the crab fleet in the eastern Bering Sea before dying down late Sunday. A new, perhaps less vicious, storm was bringing more wind and high seas toward the same region.

On Sunday, no Coast Guard cutters were on hand and there was little the Coast Guard could do to help the foundering boats, Ciancaglini said. A rescue helicopter stood by and the Coast Guard kept in radio contact. Four vessels

reported injured or sick crewmen, but the most seriously injured were taken to the closest ports when the storm subsided.

A Coast Guard C-130 dropped pumps to a ship taking on water, but just hitting the target was a feat in itself, Ciancaglini said.

When the storm hit, 14 fishing vessels sent out distress calls from the southeastern Bering Sea, east of the Pribilof Islands and north of the Alaska Peninsula.

Coast Guard spokesman Ed Moreth said he couldn't recall so many distress calls from one area at one time in Alaska's stormy waters.

Five crewmen aboard the 100-foot Winter Hawk barely had time to don survival suits and call for help before their Seattle-based ship sank, Coast Guard Petty Officer John Germain said. He said all five were in good condition when they were picked up by two nearby fishing boats.

The 107-foot Shannon Marie of Portland, Ore., carrying six crewmen, and the 91-foot Pisces of Bellingham, Wash., with five crewmen aboard, both sank, but all 11 fishermen managed to get into life rafts and were rescued by other fishing boats, Germain said.

Eleven other vessels from Oregon, Washington and Alaska were either disabled or reported storm damage when waves smashed through the vessels' pilot houses.

A Coast Guard long-range communications station in the Pribilof Islands also was damaged but remained in operation.

#90330u1481 11/26/1990 ~United Press International

(NOV. 26) UPI - President Bush and Mexican President Salinas today called for a new era of neighborly cooperation between their two countries. The two leaders were cheered by an enthusiastic crowd of about 50-thousand in Monterrey during formal welcoming ceremonies for Bush.

Earlier, Bush and Salinas kicked off a two-day summit in the Mexican president's small hometown of Agualeguas, 80 miles northeast of Monterrey. The White House described the meeting as productive and said both leaders want to pursue a free trade pact as fast as possible.

A U-S draft resolution is being considered by the U-N Security Council that sets a January 1st deadline for Iraq to withdraw from Kuwait. The action comes as Iraq tells the visiting wives of U-S hostages they can take their husbands back to the United States.

But the State Department says it expects only three American husbands to be

released. Last week Iraqi President Saddam Hussein ordered the release of 10 British husbands after their wives visited Baghdad to plead for their freedom.

The government today responded to a lawsuit filed by 45 House Democrats last week challenging President Bush's authority to send U-S forces to the Persian Gulf without congressional approval. The government said the issue is political and therefore NOT for courts to decide.

Congressional spokesman say President Bush late today signed a disaster declaration for five flood-ravaged counties of western Washington state. The declaration sets federal agencies in motion to begin offering flood aid to residents and businesses hurt by flooding.

A fierce storm, packing winds gusting to 90 miles an hour and whipping up 30-foot high waves, battered the Bering Sea crab fleet. The Coast Guard says the storm destroyed three fishing vessels and damaged 11 others. 16 fishermen were plucked from lifeboats or frigid waters.

Leftist rebels in El Salvador shot down a Salvadoran military helicopter today... wounding the pilot... in the latest surge of fighting. It was the second government aircraft hit by rebel fire since Friday.

Also today, six soldiers were wounded in the capital of San Salvador by explosives thrown from a passing car. Urban guerrillas claimed responsibility for the attack, which they said was in reprisal for the government's efforts to privatize banks.

HARTFORD, CONN. (NOV. 27) UPI - Larry Bird scored 21 points, grabbed 14 rebounds and dished out 11 assists Monday night to lead six Boston players in double figures, carrying the Celtics to a 118-101 victory over the Miami Heat.

Bird, who recorded his 5,000th career assist earlier this season, needs only 12 points to reach the 20,000 mark in career scoring. He will become only the fifth NBA player to reach both those milestones. Kareem Abdul-Jabbar, Oscar Robertson Jerry West and John Havlicek are the others. He will also become the 15th player to reach 20,000 points.

Boston, which won its seventh straight and improved to 11-2 overall, is off to its best start since going 17-2 to begin the 1985-86 season. The Celtics own the league's second-best record behind Portland, which is 11-0.

The Celtics are now 8-0 in the all-time series against the Heat.

Kevin McHale and Kevin Gamble each scored 20 points for Boston, and Brian Shaw and Robert Parish each contributed 14. Reggie Lewis added 13 to round out the

Celtics' double-figure performers.

Rony Seikaly paced Miami with 21 points and Kevin Edwards scored 14.

The Heat, who never led and trailed from the game's third basket, closed to 60-56 on Seikaly's free throw early in the third quarter before Boston went on an 11-0 run in the ensuing 2:44 to break the contest open.

Lewis ignited the run by nailing an 18-footer from the right side and closed the spree with a breakaway dunk.

Boston continued to build its advantage by using its size advantage to control the boards and ignite its fastbreak, pulling to a 87-66 edge with 3:18 left in the third quarter.

The Celtics opened their biggest lead of the game, 112-88, midway through the final period.

Boston, which dominated the offensive glass and grabbed 34 total rebounds to Miami's 18 in the first half, had opened an 18-point lead midway through the second quarter before Miami closed to 58-53 at intermission.

The Celtics relied on a quick, up-tempo pace to open a led 33-22 after one quarter. Boston continued to benefit from easy transition baskets and used a 12-3 quarter-opening run in the second en route to their 18-point bulge before the Heat came charging back.

Trailing 51-36, Miami closed the first half with a 17-5 spurt. Edwards scored 6 and Rice added 4 to key the Heat's spree.

TOKYO (NOV. 27) UPI - Pioneer Electronic Corp. announced Tuesday it has acquired all rights in Japan for the films to be produced by major U.S. film producer Carolco Pictures Inc.

The Tokyo-based leading audio-visual equipment maker said the acquisition is based on an agreement signed last July between Carolco Pictures and Pioneer LDCA, Inc., Pioneer's wholly owned U.S. subsidiary which owns about 10 percent equity in the U.S. firm.

As the initial outcome of the agreement, Pioneer acquired all rights in Japan for seven titles, including ''Terminator 2,'' and ''the Doors,'' directed by Oliver Stone, the company said.

The company said it was granted rights for all films to be produced by Carolco Pictures in the future as well as those which are currently under production.

The company has already obtained worldwide video-gramme rights of Carolco Films on laser discs.

Pioneer said the acquisition of all rights of Carolco films in Japan will help to expand its software business.

The first seven films produced by Carolco will be distributed to theaters in Japan by Toho-Towa Corp., the company said.

#90330u1591 11/26/1990 ~United Press International
(NOV. 26) UPI - Some 250-thousand people cheered President Bush today during a visit to Monterrey, Mexico. The enthusiastic, flag-waving crowd chanted ''Salinas, Bush, solidarity,'' as Mexican President Salinas welcomed Bush for a two-day visit. The two leaders called for a new era of neighborly cooperation between the two countries. Bush praised Salinas as an ''architect of breathtaking economic transformation'' who has raised Mexico to- quote- ''a stronger position among the nations of the world.''

Denver authorities say a two-day inferno in a jet-fuel storage tank near Stapleton International Airport may burn itself out in less than 24 hours. Officials say prospects for saving the remaining tanks also have improved. They say a cold front that moved into the area is helping firefighters in their battle to keep undamaged tanks cool. In addition, officials say winds are blowing the flames away from the other tanks.

In Los Angeles, a federal judget today handed down life prison sentences to two narcotics traffickers who spearheaded a ring that established a major link between South American drug cartels and L-A street gangs. 30-year-old Colombian-born Mario Ernesto Villabona Alvarado and 25-year-old Brian Bennett will be imprisoned without the possibility of parole. They were among six people convicted in May for their roles in a cocaine trafficking ring that smuggled three tons of the drug into the United States from Colombia between 1983 and 1988.

The F-B-I has issued a nationwide alert for two men who kidnapped three young Detroit women at knifepoint in the drive-through line of a suburban McDonald's restaurant Saturday. Hal Helteroff, special agent in charge of Michigan F-B-I operations, says the men freed two of the women unharmed hours later in Chicago. but continue to hold 18-year-old Jamie Lee. Helteroff says the suspects kept the women's purses containing their identification and there's concern they might try to harm them later.

Massachusetts Congressman Barney Frank was released from Boston's Beth Israel Hospital today... nine days after he admitted himself with a mild heart attack suffered during a health club workout. The 50-year-old five-term House Democrat says he'll return to Washington ''for rest and recovery'' until Congress reconvenes in January. But Frank says he plans to attend organizational meetings of the House Democratic Caucus beginning next week.

#90330x1179 11/26/1990 ~Comtex

HOLLYWOOD (NOV. 27) UPI - ''Home Alone'' left its competition far behind over the five-day holiday weekend, ringing up $28.7 million at the box office and holding on as the nation's leading moneymaker.

Starring Macaulay Culkin as a 9-year-old boy forgotten at home while his family jets off for a vacation, leaving him to fend off a pair of bumbling burglars, ''Home Alone'' clearly established itself as a hit with a gross of $48.3 million in its first 10 days.

Twentieth Century-Fox said the comedy, showing at 1,284 screens, is drawing both children and adults.

Although it did well, ''Home Alone'' did not match last year's record-setting $43 million taken in over the Thanksgiving weekend by the much-awaited ''Back to the Future Part II.''

Meanwhile, ''Three Men and a Little Lady,'' Disney's sequel to its hit ''Three Men and a Baby,'' charmed its way into the No. 2 spot with a $19.1 million five-day debut showing at 1,281 screens. The film, boasting the star power of Tom Selleck, Steve Guttenberg and Ted Danson, grossed about $5.1 million more than the original did in its five-day Thanksgiving weekend debut three years ago.

Another sequel, Fox's ''Predator 2,'' also opened strongly, scaring up $13.3 million at 1,950 screens. The action sci-fi flick stars Danny Glover and Gary Busey as opponents of an unstoppable alien.

Orion's American Indian epic ''Dances With Wolves'' trapped $12.7 million at 1,048 screens over the weekend, good enough for fourth place in its first week in wide release. The three-hour film, starring and directed by Kevin Costner, had drawn well in two weeks of limited release, giving it a 17-day gross of $14.3 million.

Sylvester Stallone's ''Rocky V'' stumbled from second to fifth place with just $11.3 million at 2,053 screens, off sharply from its $14.1 million three-day debut. The film, supposedly the last of the series, has grossed $27.3 million in 10 days.

Disney's animated sequel ''The Rescuers Down Under'' posted an adequate $5.3 million second weekend at 1,237 screens, to wind up No. 6. The film, being shown with Mickey Mouse's ''The Prince and the Pauper,'' has taken in $9.2 million in 10 days.

Romance-mystery ''Ghost,'' the year's biggest hit, materialized in the No. 7 spot, grossing $4.6 million at 1,713 screens.

''Ghost'' has grossed $195.4 million in 20 weeks for Paramount and should top the $200 million mark by early next month. It was the first weekend that ''Ghost'' has finished below fifth place since its release.

Coming in at eighth was Universal's ''Child's Play 2,'' the No. 1 flick just two weeks ago, with a $4 million gross at 1,946 screens over the weekend. Its 17-day total was $22.6 million.

Columbia's thriller ''Jacob's Ladder'' continued its descent with a paltry $2.7 million gross at 1,946 screens. The film has taken in $22.4 million in 24 days.

MGM/UA's cowboy flick ''Quigley Down Under'' rounded out the top 10 with a $1.2 million weekend at 835 screens. It has lassoed $17.3 million in six weeks.

Warner's animated ''Nutcracker Prince'' debuted with a weak $1.1 million in a three-day opening at 906 screens.

The top 10, their weekend gross, total gross and weeks in release:

1. ''Home Alone,'' $28.7 million, $48.3 million, 2 weeks.

2. ''Three Men and a Little Lady,'' $19.1 million, 1 week.

3. ''Predator 2,'' $13.3 million, 1 week.

4. ''Dances With Wolves,'' $12.7 million, $14.3 million, 3 weeks.

5. ''Rocky V,'' $11.3 million, $27.3 million, 2 weeks.

6. ''The Rescuers Down Under,'' $5.2 million, $9.2 million, 2 weeks.

7. ''Ghost,'' $4.6 million, $195.4 million, 20 weeks.

8. ''Child's Play 2,'' $4 million, $22.6 million, 3 weeks.

9. ''Jacob's Ladder,'' $2.7 million, $22.4 million, 4 weeks.

10. ''Quigley Down Under,'' $1.2 million, $17.3 million, 6 weeks.

#90330x1372 11/26/1990 ~Comtex

LOS ANGELES (NOV. 27) UPI - In a move that drew mixed reviews from environmentalists, A&M Records said Monday it would distribute pop artist Sting's upcoming release in a more environmentally sound package than the standard ''longbox.''

Instead of the 6-by-12-inch longbox used for most compact discs, Sting's ''The Soul Cages,'' due to be released Jan. 22, will be sold in a paperboard container that folds down to a 5-by-5-inch package for home storage, the record company said. The package will not contain the small plastic ''jewelbox'' that typically houses the CD inside the longbox.

Environmentalists oppose the longbox because it is immediately thrown away after consumers buy a disc, and because they say it uses more material than necessary _ material that winds up as a pollutant. A coalition of artists and small record labels banded together earlier this year under the banner ''Ban the Box'' to seek alternative packaging.

A&M records said it would use an experimental package for Sting's release designed by AGI Inc. of Chicago. The package, a variation of packaging currently used for CD singles and some speciality editions, will be displayed in its unfolded form at stores and secured by two plastic tracks on either side, which will make it difficult for thieves to fold up and steal.

Initial shipments of the disc will be shipped in longboxes, however, because of manufacturing limitations, A&M said. That decision irked Ban- the-Box members.

''There's no question that it's a step in the right direction, but from a Ban-the-Box perspective, we're a little disappointed with the outcome of Sting's commitment and his decision to compromise,'' said Robert Simonds, chief financial officer for Rykodisc Inc, and founder of the coalition.

Simonds praised rock singer Peter Gabriel and his label, Geffen Records, for their decision to ship his upcoming greatest hits disc in nothing but a jewel box, despite fierce opposition from retailers. Retailers vigorously oppose any change in the longbox that would force them to spend money to reconfigure their in-store displays.

The National Association of Recording Merchandisers is currently studying ways to eliminate the longbox and meet retailers' concerns. The trade group is expected to announce a recommended packaging by the end of January.

#90331b0013 11/27/1990 ~Business Wire

DENVER (NOV. 27) BUSINESS WIRE - U.S. Pawn Inc. (NASDAQ: USPN) announced Tuesday that the company reported record revenues of $2,580,200 for the fiscal year ended Sept. 30, 1990, an increase of 17.5 percent over the $2,194,996 reported in fiscal 1989.

For the year, gross profit increased by 32 percent to $1,525,097. For the period, the company reported a reduced net loss of $380,644, or 5 cents per common share, down 9.9 percent from the prior year's loss of $422,442, or 7 cents per share.

U.S. Pawn reported that the company returned to profitability during the fourth quarter of fiscal 1990 after experiencing a period of quarterly losses. Net income for the fourth quarter of 1990 was $21,775. ''We are very proud of our recent financial turnaround,'' said Melvin Wedgle, president of U.S. Pawn Inc.

''We are looking forward to reporting strong profitable results during fiscal 1991. Our turnaround is the result of several factors: the closing of unprofitable stores, stronger financial and operating controls and the

strengthening of our management team.

''These improvements have resulted in the generation of earnings of $33,767 during the first month of fiscal 1991, alone, and dwarf the earnings reported today for the fourth quarter,'' said Wedgle.

Having grown from revenues of barely three quarters of a million dollars in 1985, U.S. Pawn Inc. operates a successful and expanding chain of pawn shops in Colorado.

#90331b0018 11/27/1990 ~Business Wire

SCOTTSDALE, ARIZ. (NOV. 27) BUSINESS WIRE - Kroy Inc., an international manufacturer and distributor of office products, has secured the necessary equity and debt financing to successfully emerge from Chapter 11 bankruptcy.

The Chicago-based Turnaround Investment Division of Heller Equity Capital Corp., and its affiliate Heller Financial Inc., have provided $9.2 million to Kroy. Heller's investment will be combined with $1.8 million in equity and subordinated debt from Red Oak Investment Corp., of Minneapolis, Minn., to implement a plan of reorganization.

Heller and Red Oak purchased $3.15 million of Kroy common stock and have become the major shareholders in Kroy.

In announcing the financing agreement and the company's emergence from bankrupcy, Kroy President and Chief Executive Officer Howard Klemmer thanked the company's some 500 dealers for their loyalty to the company.

''We did everything possible to assure our dealer network that we would again be a viable company, and they stuck with us all the way,'' Klemmer said. ''Their confidence in Kroy allowed us to complete the bankruptcy without any major disruption in services to our customers.''

The Heller financing allows Kroy to move forward as a leader in the manufacture and districution of lettering, labeling and print products and signs.

The transaction was arranged by Heller's Turnaround Investment Division. Edwin A. Marks, managing director for the division, said Kroy represents the type of investment sought by his group.

The agreement culminates a six-month bankruptcy process for Kroy and its European subsidiary.

Kroy was sold in 1986 to a management group and employee stock ownership plan in a highly leveraged transaction. Kroy's inability to repay the $50 million in debt precipitated the bankruptcy. The company filed for Chapter 11 protection May 15, 1990. A plan of reorganization was confirmed by the court on Aug. 10 and became effective Nov. 16.

Kroy employs 270 people. Headquartered in Scottsdale, Ariz., the company also has a manufacturing facility in Osceola, Wis., and international offices in Reading, England.

WASHINGTON (NOV. 27) BUSINESS WIRE - US Sprint Tuesday announced that European-based multinational businesses now have local access to the world's largest value-added public data network, SprintNet(sm), through new access centers in Paris, Frankfurt, Bern and Zurich.

These latest access centers, announced at the Telecommunications Managers Association trade show in Brighton, United Kingdom, continue the global expansion of SprintNet, bringing to nearly 500 the number of access centers installed in the United States and internationally. Earlier this year, Sprint opened access centers in Amsterdam, London, Nagoya, Tokyo and Moscow. Future network expansion plans call for the number of global access centers to reach 1000 by 1995.

SprintNet offers a sophisticated, cost-effective alternative to other public data network service offerings, including IBM protocol support, simplified flat-rate pricing structures, round-the-clock network monitoring, and expert local service and support.

SprintNet customers can obtain the full benefit of accessing nearly 100 countries around the world through a single billing and service contact. Additionally, SprintNet supports a host of value-added services, including multi-protocol communications, electronic data interchange and electronic messaging.

US Sprint is a unit of United Telecommunications Inc., a diversified international telecommunications company with $7.5 billion in revenues. US Sprint provides a comprehensive array of voice, data and video communications products and services on the nation's only all-digital, fiber-optic network.

LENEXA, KAN. (NOV. 27) BUSINESS WIRE - Two of the nation's leading railroads Tuesday announced plans to establish a joint locomotive engineer training center in Lenexa -- with four locomotive ''simulators'' -- by the end of the year.

Southern Pacific and Santa Fe will open the nation's first cooperative railroad training facility at the South Lake Business Park in this Kansas City suburb.

The railroads have signed eight-year leases for the single story, 23,700-square foot center.

Although Santa Fe and Southern Pacific will have separate training operations, including their own simulators, the facility will be jointly administered. Santa Fe will acquire three simulators from IIT Research Institute at Chicago -- one full-scale, full-motion unit and two room-size units -- while SP will move its present full-scale unit, built by Dynamic Services Ltd., at Montreal, to Kansas.

The simulator is a high-tech mockup of a locomotive cab and controls which electronically simulates actual railroad operating conditions through computer assistance that allows both beginning and veteran engineers to develop and refine their train handling techniques.

In 1969, Santa Fe was the first railway to use a full-motion simulator. SP has operated its own simulator at Cerritos, Calif., in the Los Angeles area, since 1970, and has trained locomotive engineers from several railroads, including Santa Fe and the Mexican national railroad (Ferrocarriles Nacionales de Mexico).

Santa Fe expects to move into the new facility this fall and SP plans to relocate its operation early next year, officials said.

SAN JOSE, CALIF. (NOV. 27) BUSINESS WIRE - DSP Group Inc. Tuesday announced the appointment of John T. Lee as director of marketing for consumer products.

In this new position he is responsible for product definition, market development and merchandising of the company's digital signal processing (DSP) chip sets to manufacturers of electronics products such as telephone answering machines and dictation/transcription equipment. He reports to William Nicholson, vice president of marketing and sales worldwide.

Lee will focus on applications for DSP Group's proprietary speech processing technology, which includes voice recognition, speech manipulation and speech compression. In addition, Lee will head up a program to adapt the company's DSP technology to mass storage applications such as digital servo control and data compression.

''John's strong engineering background will be of great value to DSP Group's marketing team as we develop existing and new markets for our DSP technology '' said Nicholson. ''He has also proven himself equally capable in small and large company environments, a real plus in a startup like DSP Group that deals primarily with large consumer product OEMs.''

Prior to joining DSP Group, Lee was market segment manager for National Semiconductor's analog signal processing products. Before that, Lee was marketing manager of Exar Corp.'s line of general purpose standard products. He was co-founder of Finell Systems Inc., where he was executive vice president of engineering and operations. Lee has also worked as a product line manager for Siliconix and Hewlett Packard.

He holds bachelor of science and master of science degrees in electrical engineering from San Jose State University.

Founded in 1984, DSP Group Inc. is a leading worldwide supplier of digital signal processing (DSP) based chip sets. The company combines DSP integrated circuits with proprietary DSP software to create complete application-specific system solutions that improve performance, add features and reduce the cost of high-volume consumer and commercial electronic products.

SAN JOSE, CALIF. (NOV. 27) BUSINESS WIRE - Businessland Inc. (NYSE:BLI) has strengthened its management team by adding Robert W. Wilkins as vice president of distribution operations, Leslie McNeill as vice president of strategic planning and Thomas F. Pelandini as vice president of communications.

Wilkins reports to Douglas C. Johnston, senior vice president of the BL Distribution Division and Mr. McNeill and Pelandini report to David A. Norman, chairman and chief executive officer of the Businessland Group.

Robert Wilkins brings over 20 years experience with a heavy emphasis on distribution and inventory control to his role of vice president of distribution operations. He was previously with the Foxmeyer Corp., a multibillion dollar drug and health care group where he spent a total of three years, first as president of Fox Trading Co.

In this position he directed warehousing, distribution, receivables management credit and collections. Prior to this, he was senior vice president for the Foxmeyer Drug Co. responsible for purchasing, warehousing and inventory management for this $2.5 billion company.

Before joining Foxmeyer, Wilkins was vice president of inventory management for McKesson Corp. from 1983 to 1987. Prior to that he worked as a management consultant for Coopers & Lybrand specializing in the development of automated distribution and procurement and inventory management systems.

His first 11 years in business were as director of corporate systems and later vice president of member services for United Grocers, Ltd. providing warehousing, inventory control and member services support.

Wilkins obtained his B.S. degree in marketing from Chico State and later entered graduate studies in business management, data processing and marketing at the University of California at Berkeley.

Founded in 1982, Businessland Inc. is an international leader in the distribution, integration and support of microcomputer and workstation systems for business. The company integrates products from selected manufacturers to create systems tailored to specific customer needs and provides the high-level service and support to maximize their productivity.

SUNNYVALE, CALIF. (NOV. 27) BUSINESS WIRE - CALIFORNIA MICROWAVE INC. (OTC:CMIC) announced that its subsidiary, Satellite Transmission Systems Inc. (STS), has been awarded a $1 million+ contract from AT&T-Network Systems International, Hilversum, the Netherlands, to supply an INTELSAT Standard ''A'' satellite earth station to the Soviet Union's Ministry of Communications in the Soviet Republic of Armenia.

STS will supply and install a 15-meter diameter antenna and associated electronics equipment to carry telephone traffic from Armenia to the United States and Europe.

The all-digital earth station will significantly improve Armenia's communications infrastructure which was damaged as a result of the 1988 earthquake. This project is STS' first in the Soviet Union and its second major satellite earth station contract to be won in the last two months from an Eastern Bloc country.

It is also the first time the Soviet Union's Ministry of Communications has permitted one of its republics to buy communications equipment from an outside supplier.

STS, located in Hauppauge, N.Y., designs, manufactures and installs communications satellite terminals, equipment and networks for EUTELSAT, INTELSAT and regional satellite applications. STS has built and installed over 600 major earth stations worldwide.

California Microwave Inc. is a leading supplier of microwave and satellite communications systems.

GOLDEN, CO (NOV. 27) BUSINESS WIRE - At the Ninth Annual Great American Beer Festival held recently in Denver, Coors Brewing Co. won three medals for brewing some of America's best beers.

For the second year in a row, Coors Extra Gold won the first place gold medal for the best American Premium Lager, Coors Light won a second place silver medal in American Light Lager category, and Winterfest won a silver medal in the American Amber/Vienna category.

''Coors Extra Gold has set a new gold standard once again,'' said Gary Skovsted, Coors Extra Gold brand manager. ''Extra Gold continues to outperform the competition in taste and color, qualities that our customers have come to expect from all Coors products.''

A record 151 domestic breweries presented more than 500 different beers at the two-day event. An expert panel of 21 professional judges from breweries of all sizes used blind tastings to determine the winners. Awards were given in 31 different beer categories.

Approximately 6,000 people attended the competition, which is the largest such event in the world.

''These awards represent some of the best tasting beer in America,'' said Daniel Bradford, director of the Great American Beer Festival. ''This sanctioned competition is one of the most respected in the beer industry.''

The announcement of the prestigious gold medal award for Coors Extra Gold comes on the heels of the brand's new advertising campaign ''Beer is Back.'' The campaign, currently being tested in 16 markets, demonstrates the color superiority of Extra Gold compared with the competition. Preliminary indications from test market distributors and retailers indicate that the campaign is working.

Extra Gold's ''Beer is Back'' campaign includes television, radio and print advertising, point-of-sale, and in-store merchandising featuring popular split beer mugs that break apart for easy color and taste comparisons.

#90331b0064 11/27/1990 ~Business Wire

CHICAGO (NOV. 27) BUSINESS WIRE - US Sprint has entered the healthcare marketplace with a comprehensive package of telecommunications services for physicians, hospitals, clinics and insurers.

The package, called HANDS(sm) (Healthcare Application Network Delivery System) was announced Tuesday at the Radiology Society of North America convention being held in Chicago's McCormick Place.

''The healthcare market is a very specialized area and US Sprint has established a dedicated group of professionals to develop and market products that will satisfy their needs,'' said Richard Smith, president of National Markets for US Sprint.

''US Sprint's HANDS package provides healthcare professionals with the telecommunications tools that will help them control costs and provide higher quality care. US Sprint's all-digital, fiber-optic network, combined with new delivery capabilities, enables us to take the lead in providing telecommunications solutions to the medical marketplace.''

Based on the ''pin drop'' quality of US Sprint's fiber network, HANDS includes WATS lines, 800 number services, dial-up video transmission and an efficient billing system that allows better control of costs. Customers such as hospitals and clinics can use the HANDS services themselves, as well as provide direct phone services to patients.

One feature of HANDS is dial-up access to the Sprint Meeting Channel's worldwide videoconferencing network, the largest anywhere. Sprint's dial-up videoconferencing enables healthcare professionals to meet face-to-face electronically using standard Sprint voice lines, without leaving their respective cities.

Videoconferencing helps cut the costs of travel, and reduces the amount of unproductive time spent in travel. Videoconferencing can even be implemented within the operating room, to allow surgeons to converse with peers and experts in remote locations.

A unique aspect of Sprint's HANDS package is the near-instantaneous transmission of medical images anywhere in the country. Physicians can transmit diagnostic quality images from CAT scans, Magnetic Resonance Imaging (MRI) equipment, X-ray machines and sonograms in seconds, compared to hours and even days using other methods of electronic transmission or air-express

shipments.

SunHealth and US Sprint have signed a three-year agreement that allows SunHealth alliance member hospitals and other affiliated healthcare organizations access to US Sprint's HANDS package and its long distance services. The SunHealth alliance, the nation's third largest alliance of non-profit hospitals, is the first alliance of its kind to offer US Sprint's HANDS package to members.

The SunHealth alliance is a leading group of hospitals and healthcare organizations in 15 states, ranging from Maryland to Florida to Texas. The member organizations in the alliance operate more than 225 hospitals and healthcare facilities comprising nearly 63,000 inpatient beds. Approximately 363 physicians' groups and 175 extended care programs are associated with SunHealth for a variety of networking services.

The US Sprint long distance services provided by the agreement are PUBLICFON(sm), a pay phone service which will be available to patients in their rooms; VPN(sm) (Virtual Private Network), a software-based service for voice, data, image and video that allows the customer to operate as if they owned and operated their own private network; and a staff benefit program that provides participating employees additional long distance discounts.

The Sprint Meeting Channel will provide systems integration for the videoconferencing applications.

Said Roger Ballard, senior division vice president at SunHealth, ''The additional telecommunications quality and cost controls that SunHealth organizations can now provide to their communities through US Sprint will increase their capability to improve the quality of peoples' lives.

''We are particularly optimistic about the possibilities that teleconferencing holds for bringing our alliance members together on a timely, economic basis. We are optimistic about the medical imaging and remote diagnostics opportunities as well.''

Sprint sees its role in the $2.7 billion healthcare market as that of a telecommunications leader, applying telecommunications solutions to healthcare. Sprint intends to provide the same high-quality, cost-effective voice, video, imaging and data solutions as it does to the residential and business markets.

US Sprint is a unit of United Telecommunications Inc., a diversified international telecommunications company with $7.5 billion in revenues. US Sprint provides a comprehensive array of voice, data and video communications products and services on the nation's only all-digital, fiber-optic network.

BEVERLY HILLS, CA (NOV. 27) BUSINESS WIRE - Litton's Applied Technology division, San Jose, Calif., has received a $9.3 million contract from Loral Systems Manufacturing Co. to start production on the U.S. Air Force's advanced radar warning receiver systems for F-16 tactical aircraft.

Litton has been selected as the Air Force's second production source for all five of the modules that make up the new AN/ALR-56M system.

Litton's initial funding is for 90 shipsets of three of the system's five modular units. Total revenues to Litton over the life of the ALR-56M program could reach several hundred million dollars.

Radar warning receivers are airborne systems that warn pilots they are being tracked by hostile radars.

Litton is a technology-based company providing advanced electronic and defense

systems, resource exploration services and industrial automation systems to U.S. and world markets.

#90331b0074 11/27/1990 ~Business Wire

SOUTH SAN FRANCISCO, CA (NOV. 27) BUSINESS WIRE - Genentech Inc. announced that a human pilot study began last week at Walter Reed Army Institute of Research in Washington to test a recombinant vaccine candidate, gp120, as a potential treatment for infection with the human immunodeficiency virus (HIV).

The small pilot study is being conducted to determine if post-exposure immunization with recombinant gp120 can significantly boost the immune system of persons infected with HIV.

The gp120 being studied is a recombinant form of gp120, which is an exact copy made through biotechnology, of a major protein on the surface of the virus that causes AIDS. This is the first human study to test the gp120 candidate vaccine as a potential immune system booster in HIV positive patients.

The pilot studies are designed to determine safety and whether the vaccine will enhance immunity. Antibody and cellular immune response in patients receiving recombinant gp120 will be compared with their own baseline, as well as with a control group.

It is the first step in determining if a vaccine can sufficiently boost the immune response in otherwise healthy HIV positive patients enough to extend the latency period of the disease and delay the onset of illness.

''Immunotherapy is an intriguing treatment possibility,'' said Arthur J. Ammann, M.D., director of clinical research. ''Since the immune system of an infected individual is able to fight the virus during a long latency period, a vaccine may be able to boost the body's immune system and further delay illness,'' he said.

''This study is the beginning of what could be a very long process with an outcome that is uncertain.''

The initial work will involve 55 volunteer patients and will last about 10 months. The principal investigator is Lt. Col. Robert R. Redfield, M.D., chief of the Department of Retroviral Research at Walter Reed.

Walter Reed is one of the most distinguished research centers in viral diseases and has extensive experience in vaccine development, including the

potential use of AIDS vaccines as immunotherapeutics.

In a paper published in the scientific journal Nature on June 14, Genentech scientists reported that inoculation with recombinant gp120 had protected two chimpanzees from infection with the HIV virus, the first report published in a scientific journal of animals being protected with a subunit vaccine.

A subunit vaccine is a fragment of the HIV virus that is capable of producing protective immunity. The success in protecting the chimpanzees led Genentech to begin work in humans with recombinant gp120.

Genentech is currently evaluating the possibility of a separate human pilot study to test recombinant gp120 as a potential vaccine to protect uninfected individuals against HIV infection.

Genentech Inc. is a leading biotechnology company focusing on the dvelopment, manufacture and marketing of pharmaceuticals produced by recombinant DNA technology.

WILLOUGHBY, OHIO (NOV. 27) BUSINESS WIRE - November 27, 1990 -- Figgie International Inc. has announced the appointment of Joseph J. Skadra as senior vice president-finance and controller. Formerly senior vice president and controller, Mr. Skadra will continue to report to Chairman Harry E. Figgie, Jr.

Mr. Skadra began his Figgie International career in 1970 as assistant controller for the ''Automatic'' Sprinkler division and the following year was promoted to division controller.

In 1976, Mr. Skadra was named group controller at Figgie International. A year later he advanced to special projects controller and took on added duties in 1979 as director of mergers and acquisitions.

Mr. Skadra was named corporate treasurer in 1980, group vice president in 1983 vice president and controller in 1984 and senior vice president and controller in 1990.

Mr. Skadra graduated from Case Western Reserve University, Cleveland in 1964 with a degree in business administration.

Figgie International is a diversified Fortune 500 operating company serving consumer, industrial, technical and service markets worldwide. Sales in 1989

were $1.3 billion.

CHICAGO (NOV. 27) BUSINESS WIRE - The use of Imatron's (NASDAQ:IMAT) Ultrafast CT scanner for detecting and ruling out coronary artery disease was described in several presentations at the 76th Scientific Assembly and Annual Meeting of the Radiology Society of North America.

In a statement released Monday, Dr. Jerome Breen, M.D., of the Mayo Clinic stated: ''Ultrafast CT is exquisitely sensitive at detecting the presence of calcium in the coronary arteries, a sign of atherosclerotic disease.'' Imatron is the developer and sole supplier of Ultrafast CT scanners.

Imatron Inc. designs, manufactures, and markets CT products for medical diagnostic imaging, industrial applications, and baggage screening. Imatron products include the electron-beam Ultrafast scanner, which captures high-speed images of the heart as well as radiological chest and body scans free of motion-induced artifacts.

#90331b0087 11/27/1990 ~Business Wire

OMAHA, NEB. (NOV. 27) BUSINESS WIRE - Data Transmission Network Corp. (NASDAQ:DTLN) announced Tuesday it has entered into an agreement with Koch Refining Co. to provide satellite-delivered communication and price notification services over DTNergysm.

Koch will utilize DTN's newly-developed DTNergy service to provide terminal prices, terminal alerts, electronic funds transfer notifications, electronic invoices, and sales and marketing announcements to its petroleum marketers beginning in March 1991. In addition, DTN will provide each marketer, as a part of the DTNergy service, energy futures and options quotations and financial news. Eighteen other refiners are currently conducting their own tests of DTNergy.

DTNergy brings to the petroleum industry capabilities which provide both the refiner and the petroleum marketer significant advantages and improvements over the printer-only services in use today.

DTN President Roger Brodersen stated that, ''The petroleum industry is another

niche market opportunity that we hope to capture utilizing our dominant position as a low-cost electronic information provider. We expect DTNergy to be an excellent complement to our existing agricultural and financial market information services. Our agreement with Koch, in combination with the previously announced agreement with Phillips 66 Co., should add approximately 2,500 subscribers to DTNergy.''

DTN is one of the industry leaders in low-cost, data broadcast techniques and was the first to implement the large-scale use of Ku-band satellite technology for mass market applications. DTN has over 53,000 subscribers to its agricultural and financial quotes, news and information services.

#90331b0088 11/27/1990 ~Business Wire

CHICAGO (NOV. 27) BUSINESS WIRE - US Sprint has announced the availability of a service that will allow radiologists to transmit medical images from any place in the nation in seconds, for the cost of a long distance phone call.

The application is a breakthrough for both the telecommunications and the healthcare industries and extends the reach of radiology experts into areas where such services may not be readily available. This high-resolution medical imaging capability is available today as a service of US Sprint's HANDS(sm) (Healthcare Application Network Delivery System), a package of telecommunications services targeted toward the healthcare industry.

The HANDS network provides customers a dial-up, high-speed digital connection that allows them to select, and pay for, only the bandwidth they need for each application. By accessing US Sprint's high-quality network, physicians can send diagnostic-quality images to specialists anywhere in the United States for immediate analysis.

In the last decade, medical imaging has grown exponentially. Today's physician can choose from an array of options. Sonograms, thermograms, angiograms, magnetic resonance imaging (MRI), CT and PET scans, all have been added to the diagnostic arsenal. A giant leap from the black and white images of X-rays, these high-tech images show cross sections of the human body in 3-D and full color.

Fetuses move and hearts beat in real time and full motion. Doctors can view images that would have been impossible to obtain without radical surgery a few years ago. With US Sprint's HANDS, the images can now be sent anywhere.

US Sprint is uniquely positioned to offer medical imaging transmission because of its nationwide, all-digital, fiber-optic network. This provides faster and higher quality images than those currently available.

US Sprint has signed SunHealth, a major healthcare alliance of non-profit hospitals with headquarters in North Carolina, as its first major HANDS customer. SunHealth provides more than 63,000 in-patient beds throughout the southeastern United States.

US Sprint is a unit of United Telecommunications Inc., a diversified international telecommunications company with $7.5 billion in revenues. US Sprint provides a comprehensive array of voice, data and video products and services on the nation's only all-digital, fiber-optic network.

SAN JOSE, CALIF. (NOV. 27) BUSINESS WIRE - A new silicon chip design company -- Advanced RISC Machines (ARM), Ltd. -- has been formed in Cambridge, England.

By exploiting the proven reduced instruction-set (RISC) technology designs originally developed by Acorn Computers, it will address and attack the growing market for low-cost, low-power, high-performance 32-bit RISC computer chips.

ARM Ltd. is initially backed by Acorn (now nearly 80 percent owned by Olivetti), VLSI Technology, and Apple Computer. Currently, ARM products are licensed by VLSI Technology and Sanyo Electric Co. Ltd. of Japan.

The goals of the new company will be to expand the ARM product offerings and to promote other sources to support the growing customer base.

The strategy of ARM is to focus on applications where ultra-low power consumption, high-performance and low-cost are critical. Such applications and products include personal and portable computers, telephones, and embedded control uses in consumer and automotive electronics.

Several of these uses already are occurring at the design-in or production stage. More than 130,000 ARM chips have been shipped to date, placing it among the leading processors.

Announcing the launch of ARM Ltd. Tuesday, Sam Wauchope, managing director of Acorn Computer Group plc, said, ''The ARM architecture developed by Acorn has been implemented in several generations of chips over the last five years, using VLSI's design tools and manufacturing expertise.

''This proven technology and product base will be the foundation of ARM Ltd.'s plan to pursue an aggressive product roadmap.''

Larry Tesler, an Apple vice president said, ''There is a need for a new product and standard with ARM's advantages of high-performance, low power consumption and low cost for a variety of applications. We believe that the technology represents an important trend for the 1990s.''

Dr. James R. Fiebiger, president and chief operating officer of VLSI

Technology, said, ''The ARM's features make it uniquely suited to meet the rigorous requirements of embedded control applications, while meeting the market demand for low cost. The processor features the lowest cost per MIP of any product currently available.

#90331b0119 11/27/1990 ~Business Wire

VANCOUVER, BC (NOV. 27) BUSINESS WIRE - Equinox Resources Ltd. announces that mine construction has commenced at its Van Stone Zinc Mine project under a US$6.35 million financing package arranged through a conventional project loan for US$2.35 million supported by a corporate guarantee, and a project investment for US$4 million by a syndicate of European investors.

The syndicate will receive 70 percent and Equinox will receive 30 percent of net mine revenue after the project loan is retired and until payback of the syndicate's $4 million investment. Thereafter, the syndicate will receive 40 percent and Equinox will receive 60 percent of net mine revenue for the life of the mine.

The mine, located in northeast Washington state 25 miles south of Cominco's zinc smelter at Trail, B.C., will be operated by Equinox at a rate of 1100 tons of ore per day for two years as an open pit and thereafter for six years as an underground mine. Mineable open pit/underground reserves are 2,550,000 tons grading 5.7 percent zinc and 1.1 percent lead. Excellent exploration potential exists for extending the mine life.

Existing infrastructure includes a 1,100 ton per day mill, power, water, roads office and other facilities. Construction of a new tailings dam has been completed. A favourable smelter contract has been signed with Cominco Ltd. for smelting at the nearby Trail smelter. A mining contract has been signed with a major mine contractor and pre-stripping has commenced at a rate of approximately 35,000 tons per day.

Start-up is scheduled for February, 1991 with average annual production of 32,900 tons of zinc concentrate and 5,300 tons of lead concentrate. Break-even operating costs are estimated to be below $0.35 per pound zinc for the open pit phase. The mine will be the first base metal mine operating in Washington state in more than 13 years.

The Van Stone Mine will be Equinox's second producing mine and will provide earnings potential from both gold and base metals. The 100 percent owned

Zenda gold property in California is planned to be a third producer upon completion of mine financing. Continuing successful results from the advanced J&L and Rosebud exploration projects held under joint ventures with Cheni Gold Mines and LAC Minerals respectively may yield production decisions in late 1991. Equinox also maintains active exploration joint ventures with Arnax Gold Denison Mines, U.S. Borax and several junior resource companies.

SAN JOSE, CA (NOV. 27) BUSINESS WIRE - Businessland Inc. announced a new company strategy at its annual meeting Tuesday.

The company is restructuring to meet the needs of the rapidly changing computer industry and to focus on the move corporate America is making to client/server computing.

It has developed a new paradigm as a fully integrated computer company rather than a reseller and has structured along the lines of a traditional manufacturer such as IBM or DEC by segmenting into separate business units with specific responsibilities and goals.

The company is now organized in four divisions: General Products, which handles product sales to all customers from the Fortune 1,000 to government, and small and medium-sized businesses, and includes Direct Catalog sales; Network Systems, which offers large scale applications and systems integration solutions for corporate clients with services such as consulting, facilities management, large vertical applications and implementation support;

Service, which will build on its existing services and customer base to be the premier multivendor desktop computing hardware maintenance organization by providing 8-hour turnaround, 85 percent spare parts availability and 85 percent fix on first visit;

Distribution, which is responsible for all warehousing, distribution and purchasing on behalf of the group. It acts as an OEM/manufacturer, purchasing at the best price, providing product availability and delivery on behalf of the sales and service operating units.

''Businessland has four existing strengths that position us ideally for growth in the 90s. Fifty percent of the Fortune 500 are our customers, we have skills in LAN technology and base hardware, multivendor capability, and a

level of purchasing power which delivers highly competitive pricing,'' said David A. Norman, chairman and chief executive officer.

''With the new Network Systems strategy, Businessland has differentiated itself by providing applications for specific vertical markets and the enabling technology that readily facilitates the migration of traditional large systems applications to the client/server hardware platform,'' said Ed Simon, president and chief operating officer of the company.

''This is the major market opportunity in the coming decade, and it is being further stimulated by the whole impetus of 'open systems' which is today translating into applications in these client/server hardware environments,'' he added.

Founded in 1982, Businessland Inc. is an international leader in the distribution, integration and support of microcomputer and workstation systems for business.

The company integrates products from selected manufacturers to create systems tailored to specific customer needs and provides the high-level service and support to maximize their productivity.

Businessland operates centers and branch offices in 50 major U.S. metropolitan areas, five metropolitan markets in Great Britain, two in West Germany, five in Canada and one in Japan. Businessland reported sales of $1.35 billion in fiscal 1990.

LOS ANGELES (NOV. 27) BUSINESS WIRE - Winners Circle Inc. (NASDAQ:WNRS), which does business as High Five Sportswear, Tuesday announced the completion of the company's plans to redirect the orientation of its Team Systems active sportswear subsidiary.

Winners Circle is a manufacturer of garments for the corporate and promotional industry, while its Team Systems subsidiary has manufactured and sold apparel to retail chains and boutiques.

Prior to September of this year, Team Systems primarily produced a line of lycra activewear that was sold to the juniors departments of such retail outlets as Nordstrom's, Saks Fifth Avenue and Marshall Fields & Co.

Faced with a softening retail market, expecially in the juniors area, coupled with the necessity to order and pay for substantial quantities of lycra from

the Far East, Team Systems elected to reduce its financial exposure in this area and to undertake a thorough reassessment of its retail manufacturing operations.

In a series of moves, Team Systems reduced its overhead by suspending its acquisition of raw fabric, eliminating expenses associated with the maintenance of a Los Angeles Apparel Mart showroom and by reducing personnel expenses.

Following a determination by Team Systems' board of directors and Winners Circle's management that pursuit of the junior lycra activewear market posed unacceptable risks in the current economic environment, Adam L. Simon, who served as the subsidiary's president, resigned his position to pursue his own interests.

Since that time, Team Systems' management has conducted an ongoing analysis of the retail marketplace and has determined to pursue the development of a broader based men's sportswear line of apparel. The line, as currently envisioned, will include a full range of sportswear, including shirts, jackets sweatshirts and sweaters and will be created and marketed to address a specific customer profile.

To implement this program, Team Systems has begun assembling a staff of personnel with a demonstrated ability to conceive and activate the full line in a timely and cost-effective manner.

The redirected and newly designed Team Systems line is scheduled to debut at the ''MAGIC'' show in Las Vegas, Nev., in early March 1991 and will be designed by Ugo Capasso, whose work includes garment design work for such well known activewear companies as Fila and Maui & Sons.

Kerry Hirasuna has been retained as Team Systems' creative director. Her responsibilities will include ensuring that the company's line is fully merchandised and coordinated. Hirasuna has come to Team Systems from her position as apparel development manager at Reebok International Ltd.

To assist in the conception of the line, as well as in its marketing, merchandising and organization, Team Systems has entered into a consulting agreement with Paul Sunderland, most recently director of entertainment and sports marketing for Reebok International.

Sunderland was a member of the 1976, 1980 and 1984 U.S. Olympic Volleyball teams and has been an announcer of volleyball and other athletic events on NBC ESPN and Prime Ticket for the past several years. While at Reebok, Sunderland was initially responsible for the development of a volleyball shoe as well as for related items of apparel.

The individual responsible for constructing and maintaining Team Systems'

national representative sales force will be Roy M. Lacey, who joined the company last summer. Like Sunderland and Hirasuna, Lacey is a former employee of Reebok International, having served as the Western regional sales manager for its apparel division.

Lester D. Abrams, Team Systems' newly appointed president, who also serves as president of Winners Circle, noted that: ''With the rethinking and restructuring of Team Systems' line that has occurred in the last few months, and with the addition of Messrs. Capasso, Sunderland and Lacey, as well as Kerry Kirasuna, to our team we have every confidence that our new line will meet both our creative and financial expectations.''

Winners Circle's core business involves the design, manufacture and sale of garments, including jackets, sweatshirts, sweatpants and T-shirts that carry the logo, slogans or other promotional messages of customers, such as Paramount Home Video, the Disney Cos., Wells Fargo Bank, Motown Records, the Los Angeles Lakers, General Rent A Car, Warner Bros., BASF Corp. and a variety of ski companies, who use the company's products to enhance their images, sell their products and increase employee performance and morale.

The company's initial public offering was consummated in late July of 1990.

LINCOLN, NE (NOV. 27) BUSINESS WIRE - Terrano Corp. (NASDAQ:TRNO) announced Tuesday that Moreland Medical Center, a 60-physician multi-specialty clinic headquartered in Waukesha and serving the greater Milwaukee area, has purchased Terrano's ILS-5 Laboratory Information System.

The contract also includes Terrano's Laboratory Management and Advanced Microbiology Modules, plus multiple Instrument and System Interfaces. The systemm will be based on Terrano's Prime Computer Inc. 50-Series hardware platform.

''Continued success in the clinic and clinic/hospital market is a strong indicator that our research and development investment in those areas have firmly placed us in a new market segment that is nearly as large as our primary hospital laboratory market,'' said James A. Terrano, president and chief executive officer of Terrano Corp.

Terrano Corp. develops and markets integrated turn-key computer systems for radiology departments and clinical laboratories. The company is best known for the ILS-5 Clinical Laboratory System which is a comprehensive information management system for both hospital and private laboratories. Terrano Corp. products are based on the IBM AS/400 and Prime Computer Inc. 50-Series family of computer systems.

BEVERLY HILLS, CALIF. (NOV. 27) BUSINESS WIRE - Litton Industries Inc. Tuesday announced preliminary financial results for its 1991 fiscal year first quarter, which ended Oct. 31, 1990.

Net earnings for the first quarter just ended were $39.6 million, or $1.76

primary earnings per share, compared with $43.6 million, or $1.73 primary earnings per share, in the first quarter of fiscal 1990.

Sales for the first quarter ended Oct. 31, 1990, were $1.23 billion, compared with $1.22 billion for the first quarter of fiscal 1990.

Orion L. Hoch, Litton chairman and chief executive officer, said: ''During the first quarter we repurchased an additional 1.4 million Litton common shares. This continuation of our stock buyback program offset the earnings decline and resulted in a net gain for our earnings per share on a quarter-to-quarter basis.''

Litton is a technology-based company providing advanced electronic and defense systems, resource exploration services and industrial automation systems for U.S. and world markets.

PALO ALTO, CA (NOV. 27) BUSINESS WIRE - More than 17,000 employees of Hewlett-Packard Co.'s San Francisco Bay Area entities Tuesday received cash profit-sharing checks totaling $16.7 million.

Companywide, HP distributed $71.5 million to more than 86,000 eligible employees throughout the world.

''We achieved record orders for HP overall this year, and this is especially notable considering industry trends,'' said John A. Young, HP president and chief executive officer.

''While our earnings declined by four percent compared to 1989, our people are

playing a key role in translating order growth into increased profitability. Profit-sharing is one way we recognize the contributions our employees make to HP's performance.''

HP employees are eligible for profit-sharing after six consecutive months of service with the company. Two checks are issued annually -- one in November and one in May. When combined, the checks represent from two to four weeks of extra pay.

HP initiated its current profit-sharing plan in 1962, but the 51- year-old company has been distributing profits to employees in one form or another since its beginning.

Hewlett-Packard Co. is an international manufacturer of measurement and computation products and systems recognized for excellence in quality and support. The company's products and services are used in industry, business, engineering, science, medicine and education in approximately 100 countries. HP has 92,000 employees and had revenue of $13.2 billion in its 1990 fiscal year.

SEAL BEACH, CALIF. (NOV. 27) BUSINESS WIRE - Rockwell International Tuesday announced that the first Navstar GPS Block IIA, an enhanced GPS Satellite, was successfully launched from Cape Canaveral Air Force Station, Florida.

GPS II-10 joins the constellation of 15 other Navstar GPS satellites that have now exceeded 80 cumulative years of successful space operations.

The present constellation consists of six developmental satellites and nine production satellites. Eventually, there will be 24 satellites on orbit. ''GPS II-10 brings the count to 16 operational GPS satellites on orbit, well on the way to 24-hour-a-day, uninterrupted global coverage,'' said Rich Horner GPS program director at the Satellite & Space Electronics Division.

All GPS satellites are assembled at Rockwell's Satellite & Space Electronics Division Seal Beach facility and are then flown by Air Force C-5A to Cape Canaveral Air Force Station, Florida, where they are processed for launch on the Delta II launch vehicle.

The satellite on-orbit operations are controlled from Falcon Air Force Base in Colorado Springs, Colo. Rockwell supports these operations with resident staff at both Florida and Colorado sites.

Rockwell's Satellite and Space Electronics Division produces navigation satellites, space surveillance systems, electro-optic sensors and space electronics.

Rockwell International is a $12 billion multi-industry company applying advanced technology to a wide range of products in its electronics, aerospace, automotive and graphic businesses.

POULSBO, WASH. (NOV. 27) BUSINESS WIRE - Pope Resources, a Delaware limited partnership, Tuesday announced a cash distribution of 90 cents per unit, payable on Dec. 28, 1990, to unitholders of record as of Dec. 7, 1990.

George H. Folquet, chief executive officer, stated that this distribution is due to income realized in 1990 and is intended to defray the unitholders' estimated federal income tax liability attributable to such income.

''The partnership's strategy is to minimize its net income so that there is minimal income tax liability, which will only require a small cash distribution,'' said Folquet. ''It's objectives are to optimize the long-term value of its land and timber assets through reinvestment, net income and distribution.''

Pope Resources, a master limited partnership, owns 71,000 acres of timberland and development property in the Puget Sound area of Washington state.

ALAMEDA, CA (NOV. 27) BUSINESS WIRE - Barneyscan Corp., manufacturer and marketer of the Color Imaging Systems family of products, Tuesday disclosed details of major new funding from both existing and new investors totalling $5.5 million.

Barneyscan further announced the appointment of Robert G. Barrett and Neal Dempsey to its board of directors.

The funding came from existing investors, OSCCO Ventures of Menlo Park, Calif. and Technology Partners of Belvedere, Calif., as well as new money from

Battery Ventures of Boston, Bay Partners of Cupertino, Calif., and Leland Stanford Junior University Trust. The capital will be used to fund company growth and new product development.

''The funding comes at a time when venture capitalists are moving away from supporting the hardware market,'' said Albert E. Sisto, president and chief executive officer of Barneyscan.

''Our ability to acquire the funding proves that our systems approach will carry desktop prepress into the future.''

Barneyscan named Robert G. Barrett, general partner of Battery Ventures, to the board of directors. Barrett's background includes serving as an officer of The First National Bank of Chicago. Prior to joining The First National Bank of Chicago, Barrett was vice president in the corporate finance department of Hayden Stone, where he was responsible for private placements and public offerings of emerging growth-oriented companies.

Barrett received a bachelor of arts from Harvard College and a Masters in Business Administration from the Harvard Business School.

Also appointed to Barneyscan's board of directors was Neal Dempsey, general partner with the venture capital investment firm of Bay Partners. Dempsey brings 20 years of experience managing sales, marketing and entrepreneurial high technology firms.

Dempsey's background includes marketing and sales positions with Memorex Corp. and Electronics Memories. He also served as vice president, sales and marketing for the Information Terminals Group of Harris Corp. and as senior vice president for Zentec Inc. Dempsey is founder and chairman of Microserv Inc. of Bellvue, Wash. He is a graduate of the University of Washington.

''Both Robert and Neal bring a wealth of experience and knowledge in both finance and high technology to Barneyscan's board of directors,'' said Sisto. ''Barneyscan will profit from their combined expertise as the company continues on the cutting edge of desktop prepress technology.''

Color Imaging Systems from Barneyscan Corp. is a family of fully integrated hardware and software products designed to provide the publishing industry, and other strategic markets, with high-quality color prepress system capabilities at desktop prices. Barneyscan Corp., founded in 1986, is an established developer and manufacturer of market-driven system solutions that manage the integration of images into computer applications.

The company is headquartered in Alameda.

SANTA CLARA, CALIF. (NOV. 27) BUSINESS WIRE - Applied Materials, Inc. reported results for its fiscal year ended October 28, 1990, with record net sales of $567.1 million, up 13 percent from fiscal 1989 sales of $501.8 million, and net income of $34.1 million, or $2.00 per share, down from fiscal 1989 net income of $51.5 million, or $3.07 per share.

Backlog at the end of fiscal 1990 increased to $250.4 million, a new record for the company, up from $188.4 million at the end of fiscal 1989 and $227.3 million at the end of the third quarter 1990. The company also announced results for the three months ended October 28, 1990. Net sales were $141.0 million, down slightly from $142.2 million in the fourth quarter of 1989 and net income of $3.0 million, or $0.18 per share, compared to the $11.5 million, or $0.69 per share, reported one year earlier.

''Growth was fueled by the success of new products addressing new markets and by increasing our share in markets already served. Gains in new orders demonstrated our customers' confidence in Applied Materials' leadership technology solutions for their worldwide semiconductor fabrication requirements,'' said James C. Morgan, chairman and chief executive officer. ''However, earnings were below the prior year's record level due to lower than expected revenue and because of strategic investment decisions made to expand our product line and broaden our distribution capabilities: steps which will make us a stronger company in the future.''

Incremental revenues in fiscal 1990 came from the company's newer multi-chamber deposition products: dielectric chemical vapor deposition (CVD), tungsten CVD and physical vapor deposition (PVD). Applied Materials also had record revenue of over $100 million from its after-sales service and support business, up nearly 30 percent from the prior year. In the transition from the Precision Etch 8300 to the Precision 5000 Etch series of products, the company's total etch business was down about 10 percent from the prior year, with the Precision 5000 Etch gaining momentum during the year. Geographically, U.S. sales constituted 45 percent of revenue; Japan 33 percent; Europe 18 percent; and Asia/Pacific 4 percent.

Applied Materials, Inc. is a global growth company and the leading independent producer of wafer fabrication systems for the worldwide semiconductor industry. It is a market leader in chemical vapor deposition (CVD), dry plasma etching and silicon deposition. The company is also a leading manufacturer of ion implantation and physical vapor deposition (PVD) systems. The company's stock is traded on the NASDAQ National Market System under the symbol ''AMAT.''

#90331b0230 11/27/1990 ~Business Wire
NEW YORK (NOV. 27) BUSINESS WIRE - Joseph J. Melone, president of The Equitable Life Assurance Society of the U.S., commenting on a rumor in financial markets, ''strongly denied'' that the company is experiencing financial problems.

''The Equitable is in solid financial condition and is going about business as usual,'' said Melone. ''Any rumor to the contrary is absolutely false and unwarranted.

''The company is a leader in all its markets, has strong cash flow from operations, is highly liquid and has approximately $62 billion in assets. The unfounded accusations are totally wrong, are without merit and do a grave disservice to the company of its customers.''

Various rumors surfaced in financial markets Tuesday morning that the company was planning to file for bankruptcy as well as rumors that the company has missed a bond payment. ''We do not know where or how these rumors started,'' said Melone. ''In any event, they have no basis whatsoever in fact, are outrageous and extremely irresponsible.''

Melone pointed to the fact that The Equitable is regulated by the New York State Department of Insurance and is followed by the major rating agencies. ''These organizations follow the company on an on-going basis and all of their conclusions indicate that The Equitable is in sound financial condition,'' said Melone.

''Equitable's ratings from Standard & Poor's and Moody's indicate that the company has a stong capacity to meet all its obligations and that we are investment grade,'' said Melone. ''Also, the A.M. Best Co. rates The Equitable A+, the highest rating offered.''

The Equitable is the nation's third largest life insurer and, with more than $135 billion in assets under management, is the nation's third largest institutional investor. The Equitable ranks as the fourth largest asset manager in the world.

#90331b0234 11/27/1990 ~Business Wire
SAN FRANCISCO (NOV. 27) BUSINESS WIRE - Sharper Image Corp. (NASDAQ:SHRP) Tuesday reported its results for the third quarter and nine months ended Oct. 31.

For the third quarter ended Oct. 31, The Sharper Image reported total revenues of $36.1 million, a 12.8 percent decrease from total revenues of $41.5 million for the like quarter in the prior year. The company reported a net loss of $1.4 million, or 17 cents loss per share, compared to a net loss of $840,000, or 10 cents loss per share for the like period last year.

For the nine months ended Oct. 31, The Sharper Image reported total revenues of $112 million, a 7.2 percent decrease from total revenues of $120.7 million for the like period in the prior year. Net loss for the nine months ended Oct. 31 was $4.3 million, or 53 cents loss per share, compared to a net loss of $1.9 million, or 23 cents loss per share for the like period in 1989.

''The retail business environment continues to be difficult and our soft sales in the current period reflect the consumer's reluctance to spend,'' said Richard Thalheimer, president and chief executive officer of the company.

Thalheimer further stated that ''the adverse effects of the lower sales volume on the bottom line were to a large extent mitigated by our cost saving efforts. The savings of $2 million achieved in the current third quarter from last year in advertising expenditures, along with savings in personnel costs and other general and administrative expenses of nearly $1 million, contributed significantly to the bottom line.

Thalheimer added that ''we anticipate the expense reduction program to provide additional savings in the fourth quarter.''

During the quarter ended Oct. 31, the company opened two additional new stores in Santa Clara, Calif., and Chicago (at Water Tower), bringing the total number of stores to 72. Three additional new stores are planned to be open before this year's holiday season.

In October, the company entered into two new foreign licensing agreements: one with a licensee in Germany and one with a licensee in Mexico. Both licensees were granted the right to establish operations for retail stores and catalog distribution. These two new licensing agreements provide the potential for future additional royalty income.

The Sharper Image is a specialty retailer of a unique selection of innovative and high quality products that are marketed through its colorful, monthly catalogs and expanding retail network, which now totals 72 stores nationwide and eight internationally through its foreign licensees. The company offers a variety of products, including consumer electronics, communications, health and fitness, recreational and novelty items.

PHOENIX (NOV. 27) BUSINESS WIRE - The Valley National Bank of Arizona (NASDAQ:VNCP) and the Prudential Insurance Co. of America have entered into a letter of intent which would result in Valley Bank's acquisition of Prudential's interest in the Valley Bank Center and the Valley Bank Center parking garage.

The parties will negotiate a definitive agreement and plan to consummate the transaction prior to year-end.

The 40-story Valley Bank Center is the state's tallest building, completed in 1973. Currently, Valley National Bank has an approximate 50 percent interest in the office building and The Prudential owns the remaining portion of the office building and all of the adjoining parking structure.

When the transaction is completed, Valley National Bank will own 100 percent of the assets comprised of the land, office building and related parking garage which encompasses two city blocks between Central Avenue and 2nd Street and Van Buren and Monroe.

No other information regarding this proposed transaction has been released.

#90331b0240 11/27/1990 ~Business Wire
LAS VEGAS (NOV. 27) BUSINESS WIRE - Electronic Data Technologies (NASDAQ:EDAT) (''EDT'' or the ''company''), Tuesday announced a net loss of $3.7 million for the twelve months ended Sept. 30.

The loss resulted from a combination of factors, including increased operating costs, additional inventory and accounts receivable reserves and the write-down of certain capitalized product enhancements to their estimated realizable values. Also, in the fourth quarter sales of gaming systems declined. EDT previously announced a management reorganization and workforce reduction aimed at reducing its selling, general and administrative expenses.

As a result of this loss, EDT is currently in noncompliance with certain of the conditions of its bank credit lines. While EDT is working with its banker to resolve such noncompliance, no assurances can be given that such resolution will occur.

The company reported revenues of $24 million for the fiscal year ended Sept. 30 compared to revenues of $22.5 million for the comparable prior year period. Revenues for the quarter ended Sept. 30 were $4.1 million as compared to $6.5 million for the like quarter last year.

The company incurred a net loss of $3.7 million, or $1 per share, for the year ended Sept. 30 as compared to income from continuing operations of $2.2 million, or 59 cents per share, for the like period last year. Net loss for the quarter ended Sept. 30 was $5.4 million, or $1.43 per share, as compared to net income of $564,000, or 15 cents per share, for the quarter ended Sept. 30, 1989.

The decline in quarterly revenues is attributable primarily to a 59 percent decrease in revenue from the sales of Gaming Management Systems from $3.2 million for the quarter ended Sept. 30, 1989 to $1.3 million in the current quarter. Route Management fees accounted for 52 percent and 35 percent of total revenues for the three and twelve months ended Sept. 30, 1990, respectively.

DALLAS (NOV. 27) BUSINESS WIRE - Lomas Financial Corp. (NYSE:LFC) Tuesday announced it has completed the sale of its life insurance group to an affiliate of Conseco Inc. (NYSE:CNC) for approximately $140 million in cash and $25 million principal amount of junior debt securities.

As previously announced, Lomas will retain approximately $15 million of real estate formerly owned by its life insurance subsidiaries.

The life insurance group includes Jefferson National Life Insurance Co., Indianapolis; Union Life Insurance Co., Little Rock, Ark.; and First Continental Life & Accident Insurance Co., Salt Lake City. In the first nine months of 1990, the group had total revenues and premiums collected of approximately $200 million. Total assets at Sept. 30, 1990, were approximately $1 billion.

Lomas' life insurance companies were not included in its September 1989 Chapter 11 filing. However, the sale was approved by the U.S. Bankruptcy Court.

SAN JOSE, CA (NOV. 28) BUSINESS WIRE - To address growing customer demand for

multimedia capabilities, IBM Tuesday made available specifications developed with Microsoft which are designed to let developers more easily create applications that run on Operating System/2 (OS/2) and DOS with Windows.

Also, IBM announced plans to implement the specifications as extensions to OS/2.

Multimedia technology allows sound, images, animation and video to be combined on computers. The specifications, which IBM is making generally available to the industry, address developers' needs for common multimedia application program interfaces (APIs) and use of data file formats across OS/2 and Windows.

A draft of the specifications is available to developers immediately with plans for the final specifications to be published early in 1991.

The specifications include two components. One, Resource Interchange File Format (RIFF), allows audio, image, animation and other multimedia elements to be stored in a common format. The second, Media Control Interface provides a consistent way to control media devices such as CD-ROMs and video playback units.

In a separate announcement today, Microsoft said the specifications also will be used to provide multimedia extensions to Windows and that it is making available a beta release of its Multimedia Development Kit. The kit complies with the specifications and will include the requirements identified by IBM for image, audio, data formats and file management.

IBM also announced it has signed a licensing agreement with Microsoft under which IBM will license the multimedia extensions it develops for OS/2 to Microsoft. Microsoft also will license its multimedia extensions for Windows to IBM.

''Multimedia brings computing to life,'' said Michael A. Braun, vice president multimedia at IBM. ''For example, the user can select a city from a map and go on a 'video tour' complete with narration, music, economic statistics, diagrams and photos.

IBM is also actively recruiting multimedia developers to its business partner program. These business partners receive development support and assistance as well as access to IBM's marketing and support channels, including the certified multimedia dealer program IBM intends to launch in 1991.

Operating System/2 (OS/2) is a trademark of International Business Machines Corp. Windows is a trademark of Microsoft Corp.

SUNNYVALE, CALIF (NOV. 27) BUSINESS WIRE - Faced with the current downturn in market demand for ICs, product oversupply and the erosion of semiconductor prices, Oki Semiconductor has announced the restructuring of its marketing, sales, engineering and support organizations including the streamlining of its Sunnyvale headquarters and field sales offices.

It is expected that the restructuring will provide Oki Semiconductor with an organization and staff level compatible with current market demands.

The organizational restructuring includes the integration of the previously separate marketing and sales organizations into three newly created business units. The units are: Standard Products headed by Dennis McKenna, Oki Semiconductor's former vice president of sales; ASIC/Logic headed by Joe Baranowski, Oki Semiconductor's former vice president of marketing; and Technology Solutions headed by Gary Hess Oki Semiconductor's former manager of ASICs.

In addition a new function, office of the chief executive officer, has been created. Tatsuo Ishihara, Oki Semiconductor president and Mike Hamper, Oki Semiconductor senior vice president will share its responsibilities and duties.

The move to business units has been under consideration for some time as a more efficient functional concept for quick reactions in demanding markets and better alignment of resources, both in field sales and at the headquarters facility. Oki Semiconductor has implemented the realignment to improve responsiveness to customers, and chose this business downturn as a good time to begin the restructuring.

Oki Semiconductor was founded in 1977 and manufactures a broad line of VLSI devices and board level products for use in computers, telecom systems, automotive and consumer products. In addition to its customer specific IC's, including CMOS gate arrays and standard cells, the company is a leader in CMOS microprocessor, memory and speech synthesis semiconductor devices.

Headquartered in Sunnyvale, Oki Semiconductor provides system level solutions by combining sophisticated packaging technologies with semiconductor and board level integration. Manufacturing facilities are also located in Tualatin (Portland), Ore., and Puerto Rico.

SAN JOSE, CA (NOV. 27) BUSINESS WIRE - Edward R. Simon Jr., president and chief operating officer of Businessland Inc., Tuesday was named to the company's board of directors.

Simon, 51, joined the company earlier this month and is responsible for the day-to-day operations of the international computer company, including the four new operating divisions announced today at the company's annual meeting.

The new operating divisions are: General Products, Network Systems, Service, and Distribution.

Founded in 1982, Businessland Inc. is an international leader in the distribution, integration and support of microcomputer and workstation systems for business. Businessland operates centers and branch offices in 50 major U.S. metropolitan areas, five metropolitan markets in Great Britain, two in Germany, five in Canada and one in Japan.

Businessland reported sales of $1.35 billion in fiscal 1990.

CANOGA PARK, CALIF. (NOV. 28) BUSINESS WIRE - Rockwell International Corp. announced Tuesday that it has agreed to pay $280,000 to settle previously reported alleged violations of hazardous waste control laws and regulations.

The complaint against the Rocketdyne Division's Santa Susana Field Laboratory (SSFL) and main plant in Canoga Park was brought by the California Attorney General's Office on behalf of the State Department of Health Services (DHS).

Rockwell, which believes a number of the allegations in the complaint were without legal merit, made the settlement without admitting liability in order to avoid costly and time-consuming litigation.

The company has implemented corrective actions to rectify alleged violations that were the subject of the DHS' complaint.

According to Rocketdyne President Robert D. Paster: ''We are committed to conducting our business in a safe manner and in complete compliance with all environmental laws and regulations. We'll settle for nothing less.''

Paster added: ''We believe that at no time did Rockwell's activities pose any danger to the health and safety of employees and residents living near the Santa Susana or Canoga Park facilities.''

SANTA ANA, CALIF (NOV. 27) BUSINESS WIRE - Novadyne Computer Systems Inc. Tuesday announced the appointment of Robert A. Garbutt as vice president of sales and marketing.

In making the announcement, President and Chief Executive Officer Bert J. Novak stated Garbutt's responsibilities will include all sales and marketing functions including the expansion of the company's ISO network, as well as build upon Novadyne's renowned field service operations in North America.

Novak indicated that Garbutt's experience and talents will play a vital role in an even more aggressive pursuit of new dealers and VARs, implementing an array of flexible, attractive and creative ISO programs to augment those already in place.

''I am extremely pleased to welcome Robert Garbutt to the Novadyne senior management team,'' Novak said. ''His experience as an executive with over 20 years of proven accomplishments in sales management, marketing and customer service makes him a valuable addition to Novadyne,'' he said.

Garbutt comes to Novadyne from Jonas & Erickson, where he was president and chief executive officer for the $30 million value added reseller organization in the construction, property management, hospitality and distribution markets.

Garbutt received a bachelor's degree in economics from Rutgers University in 1966 and his master's degree in marketing from Fairleigh Dickinson University in 1970.

A native of New Jersey, Garbutt resides with his family in Irvine.

Novadyne Computer Systems' products and services are marketed nationwide to companies in all facets of commerce including aerospace, retailing, transportation, distribution, communications, health care, educational organizations and federal and local government agencies.

During the past year Novadyne assumed all sales and marketing responsibility for McDonnell Douglas Computer Systems in North America.
One of the largest third-party service organizations in the nation, Novadyne has 1000 employees in 125 locations in the United States. Revenues in 1989 exceeded $100 million.

#90331b0616 11/27/1990 ~Business Wire

SACRAMENTO, CALIF. (NOV. 27) BUSINESS WIRE - Unify Corp. and Sybase Inc., two of the leading Unix software vendors, have signed a cooperative sales and support agreement to deliver a high-performance software development environment for a wide variety of client/server and on-line transaction processing needs.

Under terms of the Unify/Sybase pact, both firms will directly sell and support a tailored client/server version of Unify's ACCELL/SQL high-performance 4GL application development toolset.

Unify's new ACCELL/SQL for SQL Server product is an Open Systems 4GL front-end development toolset for improving client/server applications development with the Sybase SQL Server RDBMS.

The Unify/Sybase product and business announcements were part of Sybase's launch of its new Open Tools Program, a program formed to deliver a new level of cross-vendor cooperation. ACCELL/SQL for SQL Server was developed as a result of two years of close technical cooperation between Unify and Sybase, and is among the first packages chosen by Sybase for its program.

''We're truly excited to be able to offer a client/server version of Unify's powerful Open Systems 4GL development technology in conjunction with the popular SYBASE client/server RDBMS,'' said Karan Eriksson, Unify's vice president of marketing.

''This effort combines Unify's expertise in Open Systems and productive 4GL technologies with Sybase's powerful client/server RDBMS. This has resulted in a powerful client/server environment.''

''Unify's ACCELL 4GL is the market share leader in Open Systems Unix applications development tools that offer RDBMS independence,'' said Stewart Schuster, Sybase's vice president of marketing. ''Sybase has selected ACCELL to be among the first Open Tools Program products because of its GUI technology and strong SQL Server integration.''

There are three key 4GL/Open Systems features ACCELL/SQL for SQL Server offers to make development of client/server and OLTP applications quicker, simpler and more powerful. These include:

ACCELL/SQL for SQL Server provides dramatic productivity gains for client/server developers by providing native integration to the SQL Server through the Sybase Open Client Interface. Moreover, ACCELL has been specifically optimized to support many of the SYBASE RDBMS most popular features, including: the SYBASE internal scheduler, stored procedures,

transaction locking and SYBASE triggers.

ACCELL/SQL for SQL Server is available immediately, with prices ranging from $1,770 to $251,625, depending upon hardware configuration and number of users. ACCELL/SQL supports all leading Unix databases and user interfaces, and runs on more than 170 different hardware platforms, making it the most portable client/server development environment available.

ACCELL/SQL for SQL Server is based on Unify's ACCELL/SQL, the Open Systems 4GL development system. ACCELL/SQL is the industry's first application development technology built to support multiple database and user interface options.

Unify Corp. is a leading manufacturer of Unix-based application development software tools. Based in Sacramento, Unify employs 250 people in 18 offices across the United States, Europe, Japan and Australia. Unify's ACCELL/SQL is the foundation software technology for the U.S. Air Force's $1 billion worldwide Unix conversion project -- the Standard Multi-User Small Computer Requirements Contract awarded to AT&T.

#90331b0618 11/27/1990 ~Business Wire

ANNAPOLIS, MD (NOV. 27) BUSINESS WIRE - Sonex Research Inc. (NASDAQ Symbols: SONX, SONXL) Tuesday announced that it has signed a contract with a major Japanese motor vehicle manufacturer to demonstrate the patented Sonex Combustion System (SCS) in one of the manufacturer's vehicular engines.

Dr. Andrew A. Pouring, president, chief executive officer and chief scientist of Sonex, stated, ''This contract, representing our first collaboration with a major Japanese manufacturer, is a further indication of the worldwide interest in the SCS. We are confident that the Sonex modifications, together with technical advances achieved by the manufacturer, will result in significant reductions of particulate emissions and oxides of nitrogen from this engine.

The successful completion of subsequent optimization tests by the manufacturer could lead to the production of Sonex modified engines which would be able to meet stricter impending emissions standards in all of the world's major markets.''

While strict confidentiality provisions preclude disclosure of the terms of the contract, Dr. Pouring did indicate that the testing will be funded by the manufacturer, which sells motor vehicles in the United States, Europe and

Japan.

Sonex Research Inc., a leader in the field of combustion technology, has developed an improved combustion system for engines. The SCS, which is covered by approximately 150 patents issued and pending worldwide, has been shown to reduce emissions, enable the use of alternate fuels, permit an engine to operate on ultra-learn air-fuel ratios and suppress knock in engine tests conducted in the laboratory and in vehicles.

PROVO, UTAH (NOV. 27) BUSINESS WIRE - LARSON-DAVIS INC. (NASDAQ:LDII) Tuesday announced record results for the first quarter ended Sept. 30, 1990.

Revenues were $1,649,480, an increase of 38 percent from $1,195,877 for the same quarter last year. Net income increased 191 percent to $138,005, or 3 cents per share, from $47,490, or 1 cent per share, in the same period last year.

This is the best quarter ever for revenues and net income in LARSON-DAVIS's history. Record net income of $138,005 for the quarter exceeds net earnings for any previous full fiscal year. The record first quarter results follow record revenues and net income achieved in fiscal 1990 which ended June 30, 1990.

Brian G. Larson, president, stated: ''We are very pleased with our record first quarter results. In addition to strong growth in the Instrumentation Systems Group, the Information Systems Group with its recent introduction of our proprietary Electronic Text Retrieval software is beginning to make a contribution to performance.

''With the combination of increasing sales in all sectors, including foreign sales, and the introduction of our Electronic Text Retrieval software, we anticipate that current growth trends will continue.''

Regarding the long-term prospects for the company, Larson observed: ''We are continuing to make a significant investment in the long-term growth of our company through research and development expenditures.''

LARSON-DAVIS INC.
Operating Results

	Three Months Ending	
	Sept. 30 1990	Sept. 30 1989
Revenues	$1,649,480	$1,195,877
Research and development	193,384	219,945
Net income	138,005	47,490
Net income per share	3 cents	1 cent

LARSON-DAVIS INC. develops, manufactures and markets advanced precision acoustical measurement and analysis instrumentation to industry, governments and airports. Customers include Fortune 500 companies, U.S. government agencies and international airports.

LARSON-DAVIS also develops, manufactures and markets a proprietary Electronic Text Retrieval software with application in the publishing industry, university administration, legal and accounting professions and general corporate environments.

A copy of the Sept. 30, 1990, 10 Q is available upon request. LARSON-DAVIS INC. is traded on the NASDAQ system under the symbol LDII.

CHATSWORTH, Calif. (NOV. 27) BUSINESS WIRE - NMB Technologies Inc., the world's leading supplier of ultra high-speed DRAMs, Tuesday announced the availability of its new AAA1M300 series 1-Mbit CMOS DRAM at 60ns.

The high-speed design supports direct access with 16-MHz microprocessors, eliminating the need for cache memory and allowing designers to create true zero wait state systems.

''NMB Technologies is committed to developing the fastest DRAMs on the market '' said Myron Jones, senior vice president. ''We bring a new level of price/performance to the PC marketplace. A direct access memory architecture, with zero weight states, is faster and less expensive than all other memory architectures.''

60ns DRAM Features

Read/Write cycle times as low as 110ns allow designers to create zero wait state systems utilizing 16-MHz microprocessors without resorting to complex interleaving or caching schemes.

The new, high-speed DRAM is available in enhanced-page mode with page mode Read/Write cycle time of 25ns. Operating voltages range from 4.5 to 5.5V and temperatures from 0 to 70 degrees Celsius. Power consumption for the 60ns 1-Mbit DRAM is up to 400 milliwatts with 5.0 volts Vcc.

The high-speed DRAMs are manufactured using six-inch wafers with 1.2-micron line widths in fully automated Class 1 clean room facilities.

''NMB Technologies has been the driving force in developing the market for high-speed memory DRAMs since 1985,'' said Jones. ''Our 60ns product reinforces our goal to provide superior memory products for every segment of the high-speed PC market.'' Price and Availability

The DRAMs are available in plastic DIP, ZIP and SOJ packages with industry standard interfaces and pinouts. One- and two-megabyte modules are also available. The new 60ns DRAM is in full production and is currently being designed into advanced PCs, which will be available in early 1991.

Pricing for the 1-Mbit 60ns DRAM is approximately $5 per unit for quantities of 10,000. For further technical and pricing data, contact Tony Takeshita, NMB Technologies Inc., 9730 Independence Ave., Chatsworth, CA 91311, 818/341-3355.

NMB Technologies Inc. is the world's leading supplier of broad-based products for the computer market. NMB Technologies is the electronics marketing division of NMB (USA) Inc., the North American headquarters of the Minebea Group of companies. Minebea produces a wide variety of electronic components, including DRAMs, keyboards, step motors, sensors, axial fans and audio speakers.

ANAHEIM, CA (NOV. 27) BUSINESS WIRE - Kaempen USA Inc. an Anaheim-based public company, has announced the signing of a joint venture agreement with the Comanche Enterprise and Investment Authority Ltd. of Lawton, Okla.

The venture is to be named Kaempen - Comanche Tank Co. and will manufacture

Kaempen Composite Underground Storage Tanks for distribution in Oklahoma and the Midwest.

Kaempen Underground Tanks were the second Non-Metallic storage tank to receive a U.L. listing. Over 100 Kaempen Tanks were installed in the Western United States during the early 1970's. Not a single Kaempen tank has been reported as leaking since that time.

Kaempen Underground Tanks are manufactured using a patented process and design completely unique to the industry. Kaempen Tanks do not corrode and are five times stronger than similar tanks made from steel.

EAST HANOVER, N.J. (NOV. 27) BUSINESS WIRE - The Ultimate Corp. (NYSE:ULT) has expanded its customer-service capabilities by opening a new Technical Assistance Center (TAC) in Irvine, Calif., Monday, according to an announcement made by Ultimate Chairman, President and Chief Executive Officer Michael J. O'Donnell.

''Our New Jersey TAC has been the heart of our customer-service operation since it was first opened in 1978,'' O'Donnell said at the opening ceremonies. ''We have expanded the TAC concept to California to increase our geographic presence and to provide our large installed base on the West Coast with direct local support.

''The West Coast has traditionally been strongly receptive to systems using Pick- and Pick/UNIX-based software. The TAC expansion also fulfills a basic concept of our business strategy: to offer the finest in software, service and total systems.''

The New Jersey TAC is an operation of Ultimate's $70 million North American Customer Service Division, which employs approximately 150 people and is widely considered one of the best customer-support operations of its kind with a primary objective to maintain the highest customer satisfaction.

Jack Smith, senior vice president of Ultimate's North American Customer Service Division, stated: ''The opening of the West Coast TAC is a continuation of our commitment to provide regional local support to our customers. Earlier this year Ultimate added a staff of regional customer support managers, geographically located across the United States and Canada.

''The Irvine office will provide direct local support for one of the nation's largest installed bases of Pick systems. We expect to see strong growth in our service operations in the West. We also expect our staffing of this new operation to grow steadily as we expand our customer base.''

Insan A. Farooqi, director of technical operations, said: ''The Irvine TAC will be part of Ultimate's sophisticated telecommunications network support system which will soon add the company's Canadian customers. The network makes all TAC's resources available to handle all calls, regardless of location, while providing the customer the ability to receive more local support if necessary.''

O'Donnell added that veteran TAC manager Ken Rotepel will head up the Irvine TAC. All customers will continue to call Ultimate's central service center at 800/827-ULTI for support, and West Coast customers requiring direct local support will then be routed immediately to the Irvine TAC. The Irvine office is located at 1063 McGaw Ave., Irvine, Calif. 92714.

Ultimate provides business solutions to companies of all sizes by integrating system-level software and applications software on hardware platforms from premier computer vendors such as Bull HN, Hewlett-Packard, IBM and Sequoia Systems.

The firm also provides education, training, consulting and field-maintenance services to customers across a wide range of vertical markets. In addition to its North American operations, Ultimate has subsidiaries in the United Kingdom France and Australia.

IRVINE, CALIF. (NOV. 27) BUSINESS WIRE - Chris Tiller & Associates, a security consulting firm located in Ottawa, Canada, recently tested the ID-1 (a fingerprint comparison device).

The results from this test were extremely favorable.

Chris Tiller, president of the firm, is a 31 year veteran of the Royal Canadian Mounted Police. While at the Royal Canadian Mounted Police, Tiller served as chief of the Identification Bureau and is also recognized as a world renowned fingerprint expert.

Tiller was surprised at the results of the test. ''While the system cannot create miracles, if the rules are followed it is amazingly accurate. Indeed in some cases it seemed to be able to ignore poor quality prints and still make the right decision.''

He futhermore estimates that, ''over the next five years the Canadian market would require somewhere in the area of 500 units. You should be able to multiply that number by 10 to gauge the U.S. market.''

Comparator Systems Corp. manufactures a patented fingerprint comparison device used for the verification of a person's identity.

FORT LEE, NJ (NOV. 27) BUSINESS WIRE - On-Line Software International Inc. Tuesday announced the appointment of J. Monty Riffer to the position of vice president, sales.

Riffer brings 12 years of sales management experience to the company.

Prior to joining On-Line Software, Riffer was area director of the Mainframe Division at Pansophic Systems Inc. where he was responsible for a $3 million increase in sales during a period of a year and a half.

Riffer was also director of sales for the Midrange Division and manager of Education Systems at Pansophic. Riffer holds a bachelors and a masters degree from Southern Illinois University and has also held management positions at Polaroid Corp.

Regarding his appointment, Riffer stated, ''My mission at On-Line Software is to direct the sales operation in understanding how best to meet the challenges of software sales in the nineties. On-Line Software will be focusing on increased professionalism and revenue productivity.''

Riffer replaces Robert Fuire who previously headed On-Line Software's telesales operation. Fuire resigned in September to pursue other career opportunities.

On-Line Software International Inc. is a NYSE listed company (OSI) headquartered in Fort Lee. The 21 year-old firm combines consulting and

educational services with CICS, DB2, CASE, and End User DBMS and development software products that enhance the productivity of IBM computer systems users.

As a Charter Vendor Member of the International DB2 Users Group and a Founding Member of R/AD, the International User Group for Repository and AD/Cycle, On-Line Software supports the IBM user community. With 16 domestic and international offices, On-Line Software's distribution network services over 30 countries.

The company is an IBM Business Partner that has products and professional services utilized by all Fortune 100 IBM mainframe sites.

#90331b0634 11/27/1990 ~Business Wire

DENVER (NOV. 27) BUSINESS WIRE - Hallador Petroleum Co. announced a net loss of $236,000 on revenue of $1,767,000 for the third quarter of 1990.

For the corresponding period in 1989, Hallador's predecessor entity posted net income of $355,000 on revenue of $518,000. Although revenue increased substantially in the 1990 quarter, increased expenses associated with previously announced changes in the company's management and with the properties, staff and office facilities acquired in the 1989 merger led to the loss.

The third quarter loss was less than the $512,000 loss reported for the previous quarter, reflecting higher crude oil prices and reduced general and administrative expenses. Revenue and total costs and expenses during the quarter increased by approximately $570,000 and $470,000 respectively, as a result of the South Cuyama acquisition previously disclosed.

In October the company and First Bank National Association of Minneapolis amended the company's credit agreement, thereby waiving existing defaults and requiring the company to pay First Bank $1.5 million on or before Dec. 30, 1990.

Furthermore quarterly principal payments of $250,000 are required during 1991 and three quarterly principal payments of $175,000 are required during 1992. The loan matures on Dec. 31, 1992. The company is currently exploring various alternatives for raising the necessary capital.

The company plans to effect a reverse stock split prior to the end of the year. This action is intended to reduce the total number of shareholders, to achieve a more desireable trading range for the price of the company's stock

and to meet minimum share price levels anticipated to be required by the NASD. A special meeting of shareholders is planned for Dec. 21, 1990, to vote on the matter.

Hallador is an independent oil and gas production company based in Denver. The company's stock trades on the NASDAQ System under the symbol HPET.

WOBURN, MA (NOV. 27) BUSINESS WIRE - Easel Corp. (NASDAQ:EASL) Tuesday announced business partnerships with three European software firms, expanding the company's international distributor network to France, the Netherlands, and Italy.

Easel's new distributors include: Intelligent Systems of Paris; CST Automatisering, of Hoofddorp, Netherlands; and Praxis Calcolo spa of Milan, Italy. Each company will have exclusive rights to market, sell, and support Easel Corp.'s entire product line of EASEL(R) graphical application software development tools in their respective countries.

R. Douglas Kahn, president and chief executive officer of Easel Corp., said, ''Growing our business throughout Europe is an important element of our company's strategy. These three new partnerships, combined with existing distributor relationships in the United Kingdom and Scandinavia, will help us to substantially build our presence in Europe.''

Steve Schlesinger, manager, international operations at Easel, added, ''These three companies are valuable new partners for Easel because of the strong emphasis they place on customer service and satisfaction. We will continue to pursue other similar alliances throughout Europe and anticipate forming business partnerships in Germany and Spain in the near future.''

Intelligent Systems is focused on software product distribution and services and represents several U.S.-based software companies in the French marketplace. The firm was founded in 1986.

CST Automatisering was founded in 1984 and became a wholly owned subsidiary of Bouwfonds Informatica in 1990. The company offers communications software products and consulting services focused on complex communication environments between host computers and workstations.

Praxis Calcolo spa develops, markets and supports mainframe and workstation software products. The company was founded in 1963 and employs approximately 125 people.

Easel Corp. is a leader in the fast-growing market for graphical application software development tools. The company's technology allows programmers to create personal workstation-based applications, which feature graphical user interfaces and integrate with new and existing host-computer resources.

EASEL is a registered trademark of Easel Corp.

#90331b0645 11/27/1990 ~Business Wire

COSTA MESA, CA (NOV. 27) BUSINESS WIRE - Cimco Inc. (NASDAQ/NMS:CIMC) Tuesday announced new highs for second quarter sales and income for the fiscal quarter ended Oct. 31, 1990.

For the three-month period, Cimco's net earnings rose 201 percent to $875,241, or 29 cents per share, from $290,812, or 10 cents per share, in the corresponding year-earlier quarter. Sales for the quarter were $16,356,097, up 13.4 percent, from $14,422,769 a year ago.

For the first half of the current fiscal year, net earnings advanced 477 percent to $1,251,049, or 41 cents per share, from $216,807, or 7 cents per share, in the first half of fiscal 1990. Sales for the six months equaled $30,845,813, a 19.8 percent increase over the $25,753,129 registered in the first half of last fiscal year.

Russell T. Gilbert, president and chief executive officer, attributed the improvement in income to: increased utilization of all six manufacturing plants; profit contributions from both the custom molding plant in Corona, Calif., and the material compounding plant in Charlotte, N.C.; and improvements in manufacturing efficiency and productivity as the company began to realize the benefits of its extensive ''Total Quality Management'' (TQM) training program.

Sales for the quarter were up because of substantial growth in custom molding sales to a prominent Pacific Rim customer and to a large computer manufacturer while sales to Cimco's major customer remained strong.

In addition, the medical molded components division has experienced significant growth, primarily because of the increase in sales to a leading international pharmaceuticals manufacturer and a new customer that is a Fortune 100 healthcare products company.

Gilbert added: ''While we are acutely aware of the current softness in the U.S. economy, we are nevertheless determined to vigorously pursue further sales growth and customer diversification through our expanded and aggressive marketing organizations.

Founded in 1959, Cimco, a major manufacturer of high-precision thermoplastic custom and proprietary products, and supplier of custom polymeric compounds, serves more than 100 original equipment manufacturers in the electronics, computer, transportation, health care and defense industries.

BURBANK, CA. (NOV. 27) BUSINESS WIRE - Matthews Studio Equipment Group (NASDAQ Symbol: MATT) Tuesday announced that it has formed a new subsidiary, Matthews Medical Equipment Inc., to serve the worldwide home health care market.

Formation of the new subsidiary follows a successful eight month feasibility study.

Matthews Medical Equipment Inc., will design, manufacture and distribute a line of portable infusion equipment and accessories. The new subsidiary's first product of many being developed is a foldable Porta-Pole on casters that was exhibited and well received at the National Home Health Care Exposition held recently in Atlanta, the company noted.

Commenting on the formation of the new subsidiary, Matthews chief executive officers, Carlos De Mattos and Edward Phillips stated, ''The company is confident that it has the ability to diversify its research, design, development, fabrication and marketing to establish additional applications for its unique, quality stands and mounting equipment in lucrative new markets such as the medical and industrial fields.''

As Matthews Studio Equipment Group enters its third decade, it is the preeminent provider of services to the worldwide motion picture, television and media production industries by supplying the professional equipment, accessories, supplies and other basic tools of the trade required in film, television, commercials, professional photography and theatrical productions.

These services are provided through Matthews' manufacturing and rental ''one

stop shop'' facilities.

ACTON, MASS. (NOV. 27) BUSINESS WIRE - CML Group Inc. (NYSE:CML), a leading direct marketer of life-style products, Tuesday reported total sales for fiscal 1991's first quarter of $72,257,000, compared to $53,853,000 in the year-ago quarter.

Income before an extraordinary item for the first quarter of fiscal 1991 was $2,911,000, or 43 cents per share, on a fully diluted basis, vs. $2,301,000, or 35 cents per share, in fiscal 1990's opening quarter. Net income reflecting the utilization of tax loss carryforward was $4,560,000, or 67 cents per share on a fully diluted basis, vs. $3,516,000, or 50 cents per share, a year ago.

According to Charles M. Leighton, chairman of the board and chief executive officer, results were better than expected. The results of both Britches of Georgetowne and The Nature Co. were on plan, while NordicTrack's results exceeded expectations.

Leighton said, ''We believe that NordicTrack's better-than-expected sales are the result of an increased use of television in the media mix and the introduction of new products.'' Leighton added that the strong first-quarter results put CML well on its way to achieving a higher second quarter and the $2.40-$2.50 earnings per share previously forecasted for fiscal 1991. That would represent an increase of 20 percent to 25 percent over the prior year's results.

CML Group's products are sold under the tradenames NordicTrack, The Nature Co. and Britches of Georgetowne.

WESTFORD, MA (NOV. 27) BUSINESS WIRE - Concurrent Computer Corporation and Gensym Corporation today announced the availability of Gensym's G2 Real-Time Expert Systems on Concurrent's 6000 series Real-Time UNIX computer systems. The Gensym products, available through Concurrent's Third Party Marketing Program, will be sold by Gensym's sales organization.

Gensym's Real-Time Expert System products include their base product G2, designed for large, real-time applications where thousands of variables are monitored concurrently; G2 Standard Interface Bridges to real-time data from databases, control systems, and other external sources; and GSPAN, a customizable, external simulator interface between G2 and external simulators.

"Concurrent is pleased to have Gensym join our Third Party Marketing Program. The recently completed port of Gensym's G2 products to Concurrent's 6000 series computer systems allows the successful development of expert system applications for one of Concurrent's largest customers, NASA's Johnson Space Center. We look forward to a long-term relationship with Gensym,." said Pam LaBove, third party marketing manager at Concurrent.

"With G2, space shuttle flight controllers are building their own expert systems to monitor space shuttle flights and simulations. These expert systems represent a cost-effective quality improvement in manned space flight operations and an enabling technology for Space Station Freedom," added Troy Heindel, project manager, real time data systems, NASA mission operations directorate.

Founded in 1986 and based in Cambridge, Mass., Gensym Corporation is the leading supplier of real-time expert system products for on-line commercial, industrial and scientific applications.

The company's real-time expert system, G2, is currently installed worldwide at more than 500 customer sites in a range of applications, including process monitoring and control, manufacturing, network management, robotics, and other real-time, on-line tasks.

Concurrent Computer Corporation, headquartered in Tinton Falls, New Jersey, is the leading supplier of high-performance, real-time computer systems worldwide.

The company's products, marketed through the Commercial Markets, Simulation/Training and Real-Time Technical Systems Groups, provide real-time solutions to the financial, communications, public sector, technical, aerospace and simulation markets. Its common stock (CCUR) is traded on the NASDAQ National Market System.

SANTA CLARA, CA (NOV. 27) BUSINESS WIRE - 3Com Corp. and IBM Tuesday announced their jointly developed network management specifications are immediately available for industry-wide review, bolstering industry efforts to provide interoperability among different computing systems.

Interoperability is a key requirement in today's business computing environments, where equipment from different manufacturers must work together and be managed efficiently.

Publication of the IBM-3Com draft Heterogeneous LAN Management specifications follows preliminary evaluation by technical teams of four leading computer software companies: Banyan Systems, Microsoft Corp., Novell Inc. and The Santa Cruz Operation.

The Heterogeneous LAN Management specifications provide the underlying structure for developing management products that function with a variety of network operating systems. They also support several interfaces for communication between the operating system and network adapters, and function regardless of the cabling media used to connect devices on the network.

The draft Heterogeneous LAN Management specifications are available without charge from IBM and 3Com. Interested parties may obtain the specifications by calling 3Com Corp. at 408/764-5161. They are also available by writing 3Com Corp., Attn: Jim Healey, 5400 Bayfront Plaza, Santa Clara, Calif. 95052 or by writing IBM Corp., P.O. Box 12195, Department C13, Building 002, Research Triangle Park, N.C. 27709.

HORSHAM, PA. (NOV. 27) BUSINESS WIRE - Advanta Corp. (NASDAQ:ADVN) announced Tuesday that its board of directors has declared a fourth-quarter 1990 dividend of 3 cents per common share.

The dividend will be payable to stockholders of record at the close of business on Dec. 7 and will be paid on Dec. 18.

Dennis Alter, chairman and chief executive officer, said, ''We recently announced record year-to-date earnings through the third quarter and expect record earnings for the full year as well. Paying regular quarterly dividends is one way we share the benefits of our success with our shareholders while at

the same time showing our confidence in the future.''

Advanta Corp., a financial services boutique, serviced assets in excess of $2.3 billion at Sept. 30. Through its subsidiaries, the company markets credit cards, home equity loans, equipment leases and deposit products to consumers nationwide.

VANCOUVER, BRITISH COLUMBIA (NOV. 27) BUSINESS WIRE - Breakwater Resources Ltd. reports earnings of $6,543,000, or 10 cents per share during the first nine months of 1990, compared with $13,859,000, or 22 cents per share for the like period of 1989.

Revenue for the period was $51,785,000 compared to $61,120,000 in the same period last year. The reduction in earnings is for the most part a reflection of decreasing metal prices and deteriorating world economic conditions.

The Decision to Focus on Zinc

Breakwater's entry into the zinc metal business has been ambitious and aggressive. We have chosen to focus on zinc because of its unique market position, with few well-entrenched producers. The metal has important and growing usage, and there are few inexpensive substitutes for it.

Current worldwide inventories are also at a low level. Strategically it was determined that the company should strive to become an integrated producer of zinc.

The longer term outlook for zinc prices is strong, especially when eastern European and Soviet countries experience economic recovery and begin modernization of their physical plants. In the near term, however, zinc prices have decreased substantially from their previous high levels in response to the widespread economic slowdown.

Strategic Acquisition and Development Plans

On March 15, 1990, when Breakwater acquired the El Mochito Mine by amalgamating with American Pacific Mining Co. Inc., we also acquired a metal trading company and a partially developed feasibility study and financial plan to construct a zinc smelter in a strategic location in the middle east which enjoys low energy costs.

Prior to its amalgamation with American Pacific, the company as part of its

strategic plan was already starting to focus on zinc by bringing the Estrades Mine into production and by managing and investing in the Caribou Mine. In addition, we have, with Corona Corporation, been carrying on discussions with Conroy Petroleum and Natural Resources P.l.c., the holder of a significant zinc deposit in Ireland.

NEW YORK (NOV. 27) BUSINESS WIRE - Stephen E. Dowd has been named assistant controller, corporate accounting, of ASARCO Incorporated, it was announced Tuesday by Ronald J. O'Keefe, controller.

Dowd joins Asarco from the international accounting, tax and consulting firm of Ernst & Young where he began his career in 1976 in New York City. Following his promotion to senior accountant, he transferred in 1980 to the company's White Plains, N.Y., office where he was ultimately promoted to the position of senior audit manager.

A native of New York City, Dowd attended City College of New York and received a Bachelor of Business Administration degree from Baruch College. He is a member of the American Institute of Certified Public Accountants and the New York State Society of Public Accountants and has served on the executive board of the latter group's Westchester Chapter. He also has been a board member of New York University's Management Decision Laboratory.

Dowd is married to the former Maryanne T. Ryan of Bronx, N.Y. They are the parents of a daughter and reside in Pleasantville, N.Y. ASARCO Incorporated, headquartered in New York City, is one of the world's leading integrated producers of nonferrous metals, principally copper, silver, lead, zinc and gold. Asarco also produces specialty chemicals, minerals and other industrial products and provides environmental services. Asarco had 1989 sales of $2.2 billion.

CINCINNATI (NOV. 27) BUSINESS WIRE - Skyline Chili has improved its popular product making it lower in both fat and cholesterol without changing the taste company president William G. Kagler announced Tuesday.

Total fat has been reduced 16 percent and saturated fat has been reduced 57 percent. Cholesterol has been reduced 48 percent.

''Americans are more and more concerned about their health,'' said Kagler. ''We wanted to give Skyline Chili eaters a healthier chili with less fat and cholesterol,'' Kagler said.

In actual numbers, total fat has been reduced from 22 grams per eight ounce serving to 18 grams; saturated fat has been reduced from 12 grams per eight ounce serving to 5 grams; and cholesterol has been reduced from 38 milligrams per eight ounce serving to 20 milligrams. Since there were no changes in the kinds of spices used, the chili still tastes the same, Kagler said. Nonetheless, Skyline tested it to make sure there was no taste change.

''We tested some regular customers and conducted other blind taste tests. No one indicated that the taste was different,'' Kagler said.

Kagler said the specific changes in the chili came in the area of the beef used in its making.

The healthier chili is being served now in Cincinnati-area Skyline Chili parlors. Restaurants in Columbus, Dayton and Indianapolis will receive the chili in mid-December. The improved chili will be available in regional grocery stores probably in mid-January, Kagler said.

PHOENIX (NOV. 27) BUSINESS WIRE - Zila Inc. (NASDAQ:ZILA) Tuesday reported record F.Y. 1991 first quarter (October 31) sales of more than one million dollars and net income exceeding that for the entire prior fiscal year.

Zila also announced the start of its first national consumer advertising campaign.

Zila, marketer of patented non-prescription oral health care products, reported for the quarter ending October 31, net sales of $1,035,961, up from $908,772 the previous year. FY 1991 first quarter net income of $132,343 was 64 percent greater than FY 1990 first quarter net income of $80,589, and was $2,643 greater than net income for all of FY 1990.

Zila has no long term debt and a strong cash position.

Zila President Joseph Hines attributed the company's sales and profit gains to expanding national sales of non-prescription Zilactin, for canker sores, cold sores and fever blisters; ZilaBrace, for cuts and abrasions caused by orthodonture and other dental appliances; ZilaDent, for the painful gum sores caused by dentures; and new liquid Zilactol, for cold sores and fever blisters which began distribution in the final days of the first quarter.

Initial orders for new Zilactol and strong professional interest among dentists, pharmacists and retailers point to widespread consumer appeal and substantial new sales growth.

The new Zilactin ''Handi-Pak'' will go into distribution to convenience and sundries stores in mid-December. Bausch and Lomb Inc., is scheduled to begin marketing Zilactin in Canada the first week in December. Both will contribute revenue in the second quarter.

Zila also announced the start of its first major consumer advertising campaign. The company has contracted the radio personality Larry King for an extended series of nightly ads for Zila products on the popular ''Larry King Show.''

The ads began airing November 19. The ''Larry King Show'' is carried on the Mutual Broadcasting System, Sunday-Friday, and has a nightly audience of more than 3.5 million nationwide.

More than 30 firms make a market in Zila stock. The company has executive offices at 777 East Thomas Road, Phoenix, 85014-5454, 602/957-7887.

NEW YORK (NOV. 27) BUSINESS WIRE - The Dun & Bradstreet Corporation announced Tuesday that it is no longer seeking buyers for Datastream International and Interactive Data, leading providers of historical investment information and related services.

The company said that current conditions in financial markets worldwide were among the reasons for its decision. Datastream International, headquartered in London, England, provides online investment information, research and portfolio accounting services worldwide on international securities.

Interactive Data, headquartered in Lexington, Mass., provides securities-related information, software and systems to the U.S. investment community.

During 1990, Dun & Bradstreet announced that it would attempt to sell Datastream and Interactive Data, as well as Petroleum Information, Neodata Services, Zytron, Donnelley Marketing (excluding Donnelley Marketing Information Services) and the Communications Division of IMS International.

To date, Zytron, Neodata Services and Petroleum Information have been sold. The company is in discussions with potential buyers of Donnelley Marketing and IMS' Communications Division.

In 1989, Datastream and Interactive Data had combined revenue of $155 million. Datastream was acquired by D&B in June 1984 for $102 million. Interactive Data was acquired in March 1988 for $140 million. The Dun & Bradstreet Corporation is the world's largest marketer of business information and related services, with worldwide operating revenue of $4.3 billion in 1989.

NEW YORK (NOV. 27) BUSINESS WIRE - Shorewood Packaging Corp. (NASDAQ:SHOR) Tuesday announced revenues and earnings for the second quarter ended Oct. 27.

Revenues for the second quarter ended Oct. 27, were $35,822,000 as compared to $37,775,000 in the corresponding period for fiscal 1991. Revenues for the 26 week period ended Oct. 27, were $69,116,000 as compared to $70,517,000 in the corresponding prior period.

Net earnings for the current 13 week period amounted to $3,577,000 as compared to net earnings of $5,121,000 for the corresponding period in the previous year. On a per share basis, net earnings for the current quarter was 19 cents as compared to 26 cents for the corresponding prior period. Net earnings for the 26 week period ending Oct. 27, were $6,263,000 (32 cents per share), as compared to net earnings of $9,002,000 (46 cents per share) for the corresponding prior period.

Net earnings for the 13 and 26 week periods ended Oct. 28, 1989 included a $300,000 charge relating to the discontinuation of operations at the company's music packaging subsidiary in the United Kingdom.

''Our revenues and earnings for the company's fiscal 1991 second quarter have been effected by the current economic conditions both in the United States and Canada,'' stated Paul B. Shore, chairman of the board, president and chief executive officer. ''We also believe that the normal seasonal growth in the home entertainment area did not occur in the current fiscal quarter due to the continuing lack of new releases by major recording artists,'' Shore stated.

''It is significant to note that the company's gross margins substantially improved in the second fiscal quarter as compared to the first quarter of fiscal 1991 due to increased operating and production efficiencies which the company was able to implement during the current period. Barring a dramatic change in the current state of the economy, we anticipate this positive trend to continue.''

Shorewood Packaging Corp. and its subsidiaries print and manufacture high quality paperboard packaging for such industries as music, home video, food, tobacco, film, cosmetics and toiletries. The company's executive offices are in New York City, with manufacturing and sales operations in New York, Georgia Alabama, Virginia, Illinois, California, Canada and England.

RESEARCH TRIANGLE PARK, NC (NOV. 27) BUSINESS WIRE - Ericsson GE Mobile Communications Inc. has opened a new Research and Development Center in Research Triangle Park (RTP).

At the new center, American and Swedish engineers will work together to develop digital cellular technology, the latest step in the rapidly expanding mobile telecommunications.

Presently there are over 55 employees at the new center, a figure that will continue to grow over the next several years. In staffing, the center took advantage of the skills available at the joint venture locations in Lynchburg, Va., in Richardson, Texas and in Sweden. However, 85 percent of the newly hired employees came from the industry, including many from the local RTP area.

Dr. Nils Rydbeck is heading the new American Center. He also will continue to run Ericsson's Research and Development Center in Lund, Sweden, a job he has

held for the past nine years.

Rydbeck explained that Ericsson GE joint venture will be able to share resources at the Swedish and American facilities, making for a truly international operation.

''We will have an exchange program between the two Centers, which will give all involved the opportunity to work in an international atmosphere,'' said Dr. Rydbeck. Local employees are slated to go to Sweden for six to eight months to familiarize and contribute to software and system design integration. Swedish technicans are presently working at the RTP Center with more expected to follow.

Ericsson GE Mobile Communications Inc. is a global leader in cellular systems and telephones. To increase customer demand and capture additional market share, its new R&D Center will develop and commercialize digital cellular telephones and base stations for the North American market.

Digital technology improves spectrum utilization and efficiency. Digital systems allow more channels to be used, thus more calls can be made simultaneously than with the current analog technology.

Ericsson GE Mobile Communications Inc., headquartered in Paramus, N.J., is owned 60 percent by Ericsson and 40 percent by GE. It currently has 5,000 employees worldwide and produces cellular telephones, land mobile radio products and systems, and ''Mobitex'' mobile data communications systems for international markets.

Ericsson GE Mobile Communications Inc. also serves the North American market for cellular telephone systems.

BOSTON (NOV. 27) BUSINESS WIRE - As part of its plan of disposition of assets and liquidation, Americana Hotels and Realty Corp. (NYSE--AHR) (''AHRC'') Tuesday announced the payment of a second liquidating distribution of $3.50 per share, payable on Dec. 14, 1990 to stockholders of record Dec. 7, 1990.

George H. Bigelow, president of the corporation, stated that ''the total dividend of $18,623,828 is comprised of net proceeds of approximately $12 million from the sale of the corporation's interest in the Grosvenor Resort in Lake Buena Vista, Fla., which represents a gain of approximately $5 million on the corporation's original investment in the property, together with cash on hand.''

He also noted that ''with this distribution the corporation will have made total distributions of $11.50 per share under the plan of liquidation.'' As with its $8 per share cash distribution in 1989, Bigelow stated that ''for tax purposes, this distribution is also a return of capital.''

The corporation also announced earnings for the third quarter ended Sept. 30, 1990 of $393,000 or 7 cents per share compared to earnings of $184,000 or 3 cents per share for the comparable quarter in 1989. Earnings for the first nine months of 1990 were $1,142,000 or 20 cents per share compared to losses for the first nine months of 1989 or $1,252,000 or 21 cents per share.

As a result of the substantial changes in the corporation's assets under the plan of disposition of assets and liquidation and the settlement of the class action lawsuit in 1989, the more favorable results of operations for 1990 are not directly comparable to 1989.

Bigelow noted that the investment portfolio now consists of equities in three hotel properties and two short-term purchase money mortgages, and that discussions with potential purchasers and for the repayment of the loans are ongoing.

Americana Hotels and Realty Corp. is a real estate investment trust which is currently operating under a Plan of Disposition of Assets and Liquidation approved by Stockholders in June of 1988. Its shares are listed on the New York Stock Exchange.

TOLEDO, OHIO (NOV. 27) BUSINESS WIRE - AP Industries Inc., a debtor-in-possession under Chapter 11 of the U.S. Bankruptcy Code, announced

Tuesday that it filed a proposed Chapter 11 plan of liquidation in the United States Bankruptcy Court for the Southern District New York.

The plan provides, among other things, for a cash distribution to holders of $88 million principal amount of Industries' subordinated debentures of approximately 18-1/2 percent of the principal amount of such debentures. Such distribution is to be made from cash on hand and cash proceeds of a sale pursuant to the plan of substantially all of the assets of Industries to a purchaser group comprised primarily of affiliates of the directors of Industries and a holder of approximately $17 million principal amount of subordinated debentures.

The purchase by such entities is contingent upon confirmation of Industries' plan as well as certain financing and other contingencies. The details of the asset sale and the proposed plan will be set forth in a disclosure statement as approved by the Bankruptcy Court.

WESTBORO, MASS. (NOV. 27) BUSINESS WIRE - Data General Corp. announced Tuesday that it can now offer complete service to customers using Sun Microsystems equipment and peripherals.

The offering is Data General's first move into the business of servicing non-Data General workstations, servers and PCs in multi-vendor network environments.

''Data General has provided service on peripheral equipment it doesn't market, like printers and disk drives, for almost three years,'' commented Norm Hodge, Data General manager of the Compatible Products Business Unit. ''However, our ability to service complete systems such as Sun products is a new differentiator for our sales force, compared to other equipment manufacturers, as Data General aggressively enters the open systems market.''

Data General's Sun Microsystem service offering includes same-day four hour response and next day response options. The service is mainly based on an agreement between Data General and Apex Computer. Located in Redmond, Wash., Apex is the leader in fourth party service for Sun Microsystem's equipment.

The company is training Data General field engineers, providing spare parts inventory repair, and offering additional backup services to Data General technical staff.

Data General is delivering the Sun Microsystems service program in 14 metropolitan areas with plans to expand nationwide in six months. Initial Data

General service centers for Sun support are located in: Atlanta, Boston, Chicago, Dallas, Detroit, Houston, Los Angeles, New York city, Orlando, Philadelphia, St. Louis, San Francisco, Seattle, and Washington, D.C.

Data General service pricing depends on a customer's equipment configuration. For additional information, contact 1-800-DATAGEN.

Data General, a Fortune 500 company based in Westboro, Mass., is a leading supplier of general purpose computer and communication systems worldwide.

#90331b0755 11/27/1990 ~Business Wire

NEW YORK (NOV. 27) BUSINESS WIRE - The High Yield Income Fund Inc. November 1990 Monthly Update.

Distribution Information:

Amount	Payable Date	Record Date	Declaration Date
$.080	Dec. 14, 1990	Nov. 26, 1990	Nov. 15, 1990

Investment Adviser Commentary:

- High Yield bond prices slumped again during October as the threat of a recession and the fear of increasing defaults persist. In addition, high yield mutual funds continue to see net redemptions and the Resolution Trust Corp. continues to liquidate its portfolio. As a result, there are many sellers but few buyers ready to step forward in such an environment.

- As the market drifts downward, yield spreads have climbed to historically high levels. Donaldson Lufkin Jenrette reported that its ''Active Issues Index'' widened to a spread of over 1200 basis points over Treasuries in October, an all-time record.

- On the positive side, many companies' earnings have been reasonably strong in spite of the sluggish economy. Therefore, the Adviser continues to feel that the high yield market has sold off far more sharply than economic fundamentals warrant.

However, as the market absorbs the liquidation of the Resolution Trust portfolio and quantifies the impact of proposed insurance company legislation over the next several quarters, there may be continued volatility. But at today's sharply discounted levels, the high yield market offers an extremely attractive current yield and the possibility of substantial capital gains to patient investors.

The High Yield Income Fund Inc. is a closed-end management investment company

whose primary investment objective is to maximize current income to shareholders.

The Fund will attempt to achieve this objective primarily through investment in a diversified portfolio of high-yield, fixed-income securities. The Fund's Manager is Prudential Mutual Fund Management Inc. and investment advisory services are provided by The Prudential Investment Corp., a wholly-owned subsidiary of the Prudential Insurance Company of America. Additional information on the Fund's assets and performance is contained in the Annual Report for the period ended Aug. 31, 1990.

ATLANTA (NOV. 27) BUSINESS WIRE - Advanced Telecommunications Corp. (NASDAQ/NMS:ATEL), has become the first interexchange carrier to sign a letter of intent with South Central Bell Telephone Co. and Southern Bell Telephone and Telegraph Co. to interconnct with their Line Information Database (LIDB).

The agreement will provide ATC customers with convenience of using their South Central Bell and Southern Bell Calling Cards for operator-assisted and calling card long distance services.

ATC Long Distance, one of the nation's largest regional long distance telephone companies, will interconnect with BellSouth's LIDB service after the appropriate tariffs have been filed and approved. This service will represent the first interconnection of an interexchange carrier to BellSouth's common channel signaling system seven (SS7) architecture for LIDB.

With deployment of common channel signaling in the network, BellSouth will be positioned to offer other advanced services to customers.

In addition, South Central Bell and ATC Long Distance have agreed to provide an intrastate Combined 800 service, as well as an intrastate Combined OutWATS service. Southern Bell and ATC are currently providing a combined WATs service in Florida. South Central Bell and Southern Bell transport the intraLATA calls, and ATC Long Distance will transport the interLATA calls.

The intrastate Combined 800 Service is expected to utilize a database that will allow 800-number portability. Under this arrangement, customers who subscribe to the Combined 800 service will receive a new 800 number that will enable them to change participating long-distance carriers without a change of 800 number.

The provision of this service will begin when South Central Bell has filed and

received approval of appropriate tariffs.

Atlanta-based ATC serves more than 300,000 business and residential customers in eight southern states. ATC operates a nationwide digital fiber optic network providing a full range of telecommunications services including 1 + dialing, WATS, inbound 800 services, international calling, video teleconferencing, operator services, calling card, and private channel services capable of voice, video and data transmission.

ATC also offers voice mail and voice messaging services through ATC MessageCentre. The company's stock is traded on the National Market System under the NASDAQ symbol ATEL.

BellSouth is an Atlanta-based international telecommunications holding company. Its susidiaries offer local telephone service in nine Southeastern states and mobile communications service worldwide, provide advertising and publishing services, and market and maintain stand-alone and fully intergrated communications systems.

ROCKAWAY, NJ (NOV. 27) BUSINESS WIRE - RTI Inc. (NASDAQ: RTII), Tuesday reported net income of $379,000, or 6 cents per share, for the first nine months of fiscal 1990 ended Sept. 30, compared with a net loss of $371,000, or 6 cents per share in the comparable 1989 period.

There were 6,599,519 shares outstanding in both periods.

Revenues for the nine months were up 16 percent to $2,695,000 compared with $2,325,000 in the comparable period.

For the third quarter fiscal 1990, RTI Inc. reported net income of $141,000, or 2 cents per share, compared with a net loss of $83,000, or 1 cent per share for the same period in fiscal 1989.

Revenues for the quarter were down 3 percent to $846,000 compared with $872,000 for the quarter a year earlier.

John N. Scandalios, president and CEO, said, ''We are pleased with our continued progress so far this year and expect to end the year on a positive note. Revenues for the fourth quarter are running ahead of last year which is very positive following a slight decrease in the third quarter of this year.

''Our financial condition is much stronger with working capital of $782,000 on September 30, 1990, as compared wth $431,000 at December 31, 1989. We have generated $244,000 in cash from operating activities as compared to using $172,000 in cash for the same nine month period last year. We also added to our cobalt supply in 1990 to accomodate our increased sales.''

FREMONT, CA (NOV. 27) BUSINESS WIRE - Sigma Designs Inc. (NASDAQ:SIGM), a leading manufacturer and marketer of high-resolution graphics and display system products for personal computers, had lower sales and earnings for its third fiscal quarter ended Oct. 31, 1990 Thinh Tran, president, announced Tuesday.

Net sales for the quarter were $8,386,000, compared with $17,248,000 reported a year ago. Net income was $277,000, compared with $1,999,000 for the same period last year. Earnings per share amounted to 5 cents, compared with 32 cents in the prior year.

Net sales for the nine months ended Oct. 31, 1990 were $27,702,000, a 57 percent decline from the $64,221,000 reported a year ago. Net income decreased 80 percent to $1,529,000 from $7,607,000 in the prior year. Earnings per share were 26 cents compared with $1.23 in the year earlier period.

''The loss of a government contract by one of our major customers and the general slow-down in the PC industry continued to depress our sales both in the U.S. and in Europe during the third quarter,'' Tran said.

Tran indicated that, in an effort to bolster its position in the Apple computer market, the company recently introduced the PageView GS and the L-View Multi-Mode, two advanced, low-emission monochrome display systems for Apple Macintosh personal computers.

During the third quarter, Tran noted, Sigma agreed to form a joint venture on an equal ownership basis with Software Plus, a Swedish distributor. The purpose of the venture is to distribute Sigma's PC products in Scandinavian countries.

According to Tran, during the first nine months of fiscal 1991, the company repurchased a total of 770,352 shares of its common stock pursuant to buy-back programs announced in February and May 1990.

Sigma Designs is a leading manufacturer and marketer of graphics products including industry standard graphics boards, high-resolution display systems, video capture boards, and system enhancement products for IBM, IBM compatible and Apple personal computers.

INGLEWOOD, CA (NOV. 27) BUSINESS WIRE - A committee consisting of a majority of the board of directors of Hollywood Park Operating Co. (NASDAQ:HTRFZ) Tuesday proposed to Hollywood Park Realty Enterprises the sale, in a transaction or series of transactions, of Hollywood Park.

The company stated that the committee has made this proposal to assure stockholders the opportunity to receive the maximum possible value for their shares.

Hollywood Park Race Track is operated by Hollywood Park Operating Co. on land leased on a long-term basis from Hollywood Park Realty Enterprises, a separate corporation whose stock is ''paired'' with the stock of the operating company.

In a letter to the board of directors of Hollywood Park Realty Enterprises, Marjorie L. Everett, chairman of the board and chief executive officer of the operating company, asked that the Realty Company join in commencing the sale process immediately.

She stated, ''We are prepared to join with you in appropriate arrangements to assure... our stockholders that such process will proceed without delay.

''In the Committee's view, the companies' stockholders are entitled to this opportunity to obtain the highest possible value for their shares.'' Mrs. Everett's letter follows.

The Hollywood Park Companies' net income for the third quarter ending Sept. 30 1990 increased to $1,360,000 from a loss of ($567,000) for the same period a year ago.

For the first nine months of 1990, the companies had a combined net income of $4,689,000 as compared with a net loss of ($3,761,000) in the prior year.

Dividends were restored this year, increasing from 12.5 cents for the second and third quarters to 15 cents for the fourth quarter. In addition, the company's debt has declined 55 percent to less than $45 million from a highpoint of $100 million.

HORSHAM, PA (NOV. 27) BUSINESS WIRE - Frankford Trust Co., a subsidiary of The Frankford Corporation, has announced its name is changing to Frankford Bank, effective immediately.

According to bank officials, the reason for the name change is to clarify understanding of the financial institution's product and service offerings. An awareness study done by the bank in 1986 and again in 1989, indicated that there is some confusion among bank customers and the general public as to the difference between a trust company and a full-service bank.

''The name change to Franford Bank more accurately reflects what we've always been, an independent, full-service banking institution,'' said Leon Layton, president of Frnakford Bank.

None of the bank's customer accounts or competitive rates will be affected by the name change. The change, now in effect, will be incorporated gradually into the company's building signage, advertising and other printed materials.

Frankford Bank is a full-service banking institution with 17 branches throughout Philadelphia, Bucks, Delaware and Montgomery counties. The bank has served the Delaware Valley for over 100 years.

ARMONK, NY (NOV. 27) BUSINESS WIRE - International Business Machines Corporation announced Tuesday that it is selling more than $300 million worth of State and Local Government Installment Payment Agreement (IPA) contracts via the IBM 1990-1 Tax-Exempt Grantor Trusts.

These contracts are full-payout loans by IBM and made to various state and local government entities for the purchase of IBM equipment.

IBM Credit Corporation will be the servicer for this offering, and the issue is credit enhanced by a surety bond from the Financial Guaranty Company of IBM Credit Corporation, a wholly-owned subsidiary of IBM Credit. The offering was underwritten by The First Boston Corporation.

This issue is rated AAA/Aaa by Standard & Poor's Corporation and Moody's Investors Service Inc., respectively.

IPA contracts are fixed-rate, one- to five-year installment loans, which allow customers the convenience of monthly, quarterly, semiannual or annual payments.

IBM and its subsidiaries will continue to be the sole servicer on these contracts. There will be no changes to the billing and collection process between IBM and its customers. In addition, IBM will continue to offer competitive financing alternatives to its state and local government customers as it has for more than 25 years.

PLAINVIEW, NY (NOV. 27) BUSINESS WIRE - ARX Inc. (NYSE Symbol: ARX) reported Tuesday that it had reached an interim accord with its lenders under its $50 million revolving credit agreement.

Under the interim agreement, the company received waivers of compliance through Dec. 30, of certain covenants of the revolving credit agreement resulting from the first quarter loss previously reported. The company and the banks presently are negotiating a restructuring of the credit agreement.

The interim agreement reduces the revolving credit agreement to $40 million with future reductions to $33,500,000, and collaterizes such borrowings with certain assets of the company. The interest rate on borrowings under the agreement has been increased to 3/4 percent over the prime interest rate.

ARX Inc. is engaged in the design and manufacture of a wide variety of electronic and magnetic products and mechanical systems with industrial and defense applications as well as providing consulting services for military contractors. The company also owns a controlling interest in VTX Electronics Corp. (ASE:VTX)

#90331b0783 11/27/1990 ~Business Wire

WAYNE, PA (NOV. 27) BUSINESS WIRE - Results of a survey of major electronic mail users, conducted by Soft Switch Inc. indicate that the current economic climate will not have a major negative impact on spending for electronic mail and in some cases will lead to an increase in spending plans.

The survey also points to dramatic increases in the use of ''gateways'' using the industry-standard X.400 protocol for private-to-public electronic mail connection over the next one to two years.

''The Soft-Switch customer base offers a unique vantage point for looking at e-mail market trends,'' said David F. Foster, vice president of marketing, ''since it consists of large organizations -- primarily Fortune 200 level -- in a wide variety of industries and using a wide range of hardware and software, who have committed to enterprise-wide mail networking.'' Soft Switch surveyed its customer base at the 1990 User's Conference in Orlando, Fla. Key results are summarized below: - While 25 percent of the respondents expect ''some reduction'' (10 percent or less) in their E-mail spending plans as a result of the economic climate, this is more than offset by the 69 percent who expect ''increase from previous plan'' or ''no impact.'' Only 6 percent expect a reduction of 10 percent or more. - About half of those surveyed already have an X.400 gateway installed; of the remaining half, 75 percent plan to install a gateway within the next 1 to 2 years. Most of these are targeting installation in the next 12 months. - Establishment of X.400 as a backbone mail protocol will take longer, according to the survey respondents 36 percent are planning X.400 backbones in the next 1 to 2 years; 61 percent will do so in the next 3 to 4 years. - Directory synchronization topped the list of ''immediate high-priority requirements,'' with 65 percent of respondents placing it in this category. It was followed closely by mail network management, nominated by 53 percent. - Slightly lower in priority, but still identified as a ''near-term requirement'' (needed within 2 years) were fax/mail integration (84 pct) and mail-enabled applications (94 pct), followed by EDI (59 pct) and forms routing and approval (53 pct). - EDI and mail strategies are already integrated in only 16 percent of the respondent organizations; however, 74 percent expect them to be integrated withing the next two years. - 88 pct. of the respondents believe that the organizational structure and visibility of their electronic mail groups has increased over the last 12 months.

''One of the most significant findings was the rapid acceptance of X.400 gateways,'' commented Foster. ''These results indicate that 92 percent of the organizations surveyed will have an X.400 gateway installed within three to four years.''

Soft Switch Inc. provides standards-based connectivity, electronic mail network management and mail-enabled applications that add value to customers' expanding electronic mail networks.

A privately held corporation, it is the ackwnowledged leader in supplying

high-performance, open-architecture mail networks to large corporations. The company also licenses its technology to major office systems vendors and public mail network vendors.

In addition to its Wayne headquarters, and its new European operation, Soft Switch has regional headquartes in Chicago, Los Angeles and Washington D.C., and sales and service offices in several other cities. The company also maintains a network of international distributers.

PROVIDENCE, R.I. (NOV. 27) BUSINESS WIRE - The Narragansett Electric Co. Tuesday announced plans to deactivate the South Street Power Station on Jan. 14, 1991.

This action has been required by stagnant demand for electricity in the region the station's age, and its relative inefficiencies versus other power sources. While the station is deactivated, it will be maintained to allow for a future return to service.

At the present, the future of South Street Station is expected to be one of the following: reactivation in its present configuration, being repowered as a modern gas-fired base-loan plant as is planned for Manchester Street Station, or conversion to a modern peaking power plant.

Approximately 80 employees work at South Street Station. Narragansett Electric is committed to finding suitable employment options within the New England Electric System companies for all of those employees and is presently working with Union Leaders, within the collective bargaining process, to this end.

South Street Station was built by Narragansett Electric in 1908 to replace an earlier generating station on the same Providence Harbor site. By 1930, South Street operated with seven steam turbo-generators. Today, the station contains two turbine units, one installed in 1918 and the other installed in 1952. At its peak capacity, the station produces approximately 100 megawatts.

Narragansett Electric serves 314,000 customers in 27 Rhode Island communities and is a subsidiary of New England Electric System.

NEW YORK (NOV. 27) BUSINESS WIRE - ACTV Inc. (NASDAQ:IATV) announced Tuesday that it has been awarded an additional $120,000 contract to expand its unique interactive television training system by the Alexander Proudfoot Co.

The original contract, signed in July, was for $650,000.

The ACTV training program, which went into initial operation in September, utilizes unique patented television technology that permits all trainees to experience television responsiveness, personalized feedback and score keeping. During the television program, the trainees will be asked to make choices or respond to questions using an ACTV answering device. The narrator of the program will then make comments on the choices given and personalize the feedback based on the respondent's input.

The new program will be used to train Proudfoot sales personnel at the company's Productivity College, located at its headquarters in West Palm Beach Fla.

Alexander Proudfoot Co. is a worldwide leader in the field of designing and installing profit, productivity, quality and service improvement programs. Proudfoot, through the installation of its customized productivity systems and the development of a management capacity program, improves a company's productivity, quality, customer service and profitability. It is the 13th largest consulting firm in the world and currently operates in 27 countries on five continents.

''We are gratified that Proudfoot, with its worldwide reputation for excellence, has found that our technology successfully enhances their training techniques and has decided to expand our program with them,'' commented Samuels. ''ACTV's new television technologies have broad applications in cable television, training, hotels and gaming.

ACTV has developed and is marketing new television technologies that allow viewers to personalize what they are watching by responding to choices and questions posed by the programming. The choices viewers make instantly change and customize the programs they are watching. The technology and programming have been introduced to the U.S. cable TV market in Springfield, Mass. and in the Canadian market in Montreal, Canada.

ACTV also has an agreement with the Satellite Movie Co., whose clients include the Trump Taj Mahal in Atlantic City, to introduce the ACTV system into its 150,000 wired hotel rooms.

MUNDELEIN, ILL. (NOV. 27) BUSINESS WIRE - Medline Industries Inc. announced its continued expansion on the east coast with a new 100,000 square foot facility in Allentown, Pa.

Medline is one of the three leading manufacturers/distributors of health care products and the largest supplier in the United States to extended care facilities.

The new Allentown facility provides goods and services to the upper Atlantic States. Medline, having four manufacturing facilities in the United States, an assembly plant in Mexico and a total of fourteen distribution facilities similar to Allentown throughout the nation, prides itself in offering the highest level of service in the medical supply industry. Hospitals may order directly through Medline's order entry computer and can receive goods the next day.

Furthermore, the company's inventory consignment program, registered as ACCESS has enhanced the cash flow of hospitals throughout the United States, which has translated to lower costs to patients.

Jon Mills, Medline's president, said: ''Allentown will be a base to more than fifty sales personnel. All of our in-house staff are dedicated to customer service.''

CARMEL, IND (NOV. 27) BUSINESS WIRE - Conseco Inc. (NYSE:CNC), a financial services company headquartered in Carmel, announced Tuesday that Conseco Capital Partners L.P. (CCP) has completed its previously-announced acquisition of the life insurance group of Lomas Financial Corp. (NYSE:LFC) for $165 million, consisting of $140 million in cash and $25 million in 10-year subordinated notes.

A group of banks led by Continental Bank and First Union Bank provided the senior financing for the transaction.

Lomas Life Group distributes life insurance and annuity products. The lead company in the group is Jefferson National Life Insurance Co. of Indianapolis. The group had total revenues and premiums collected of approximately $200 million in the first nine months of 1990; total assets at Sept. 30 were approximately $1 billion.

Conseco Chairman Stephen C. Hilbert said, ''We're delighted to welcome Jefferson National to the Conseco family of companies. We believe both Jefferson and Conseco will benefit from our efforts to build value by streamlining operations and enhancing profitable products.'' CCP plans to close Jefferson National's office in downtown Indianapolis on Nov. 30, and begin administering Jefferson National's business through Conseco's insurance operations headquarters in Carmel on Dec. 3.

CCP is a Delaware limited partnership to which Conseco and several institutional investors have committed $70 million in equity capital for the purpose of acquiring and operating life insurance companies. Lomas Life Group is CCP's second acquisition; Great American Reserve Insurance Co. was acquired in June 1990. A third partnership acquisition -- Beneficial Standard Life Insurance Co. -- was announced in September 1990 and is expected to be completed during the first quarter of 1991.

VANCOUVER, BC (NOV. 27) BUSINESS WIRE - United Pacific Gold Ltd. (VSE:UPG)

announced Tuesday that it has reached an agreement-in-principle with Eaglerock Mining Corp. of the Philippines to acquire an option to earn up to a 40 percent interest in the Guinoman Gold Prospect in the Philippines.

The terms of the agreement call for a total expenditure of $1.5 million (US) over 15 months from the date of completion of formal documentation. Further, the company has been granted a 20 percent share in the net profits of the operation by serving as operator and providing financing for commercial mining operations of the property.

Initially the company will explore, test and assess the property for a period of 90 days from the date of a final agreement. It is expected the company will expend approximately $63,500 (US) on exploration and assessment work by this period. Upon the expiry of the 90 day period, the company may terminate the agreement or elect to proceed to explore the property.

The property consists of 34 mineral claims with an approximate area of 2,754 hectares. It is within the municipal jurisdiction of Bayug and Diplahan, Province of Zamboanga del Sur, Philippines. Gold mineralization is associated with the altered zones. The breccia appears to be the host rock while pyrite is found to be disseminated in the chloritized breccia.

Based on 28 rock samples, that were fire assayed, the average gold value was 39 grams per metric tonne (1.25 oz/mt) with a high of 869 grams per metric tonne (27.9 oz/mt). The silver values averaged 89 grams per metric tonne (2.8 oz/mt) with a high of 1,511 grams per metric tonne (48.6 oz/mt).

The company also stated it had the right to earn a 40 percent interest in any small scale mining operation on the property by funding such operations in the amount of $80,000 (US). Subject to further confirmation by the company, there exists a possible reserve of approximately 34,000 tons of high grade tailings waiting to be processed.

EL PASO, Texas (NOV. 27) BUSINESS WIRE - Texscan Corp. announced Tuesday that it will supply the active RF distribution electronics and system passives to Seokang Telecommunications Inc. for the construction of the Korean Telecommunications Authority's Pilot Cable Television Project in Seoul, South Korea.

Notification came from Chairman Dae Yoon, Kim of Seokang Telecommunications, Texscan's exclusive distributor and developmental partner in South Korea. Chairman Kim stated, ''The system will be a technological showplace and set new standards for such construction in the Pacific rim.''

The first phase is expected to be completed in April 1991, serving the first 10,000 subscribers and construction of the Government supported project is expected to continue over the next five years until approximately 10 million subscribers are served with an estimated 35,000 plus kilometers of cable plant. Design and supply of the multimillion dollar pilot project is already underway.

George L. Fletcher, senior vice-president of marketing for Texscan Corp. stated that, ''The award of this very prestigious project is the culmination of many months of hard work by Texscan and Seokang. We are proud to be a major part of bringing cable television to the people of South Korea.''

The equipment being supplied by Texscan is its newest Pathmaker Plus+ Opto/RF series products which feature 1 Gigahertz bandwidth capacity and the ability to fully integrate AM fiber optic technology. Fletcher also states, ''The system will also utilize what is probably the most extensive use of status monitoring via Texscan's Vital Signs system management equipment.''

Texscan will offer assistance in design and technical training for Korean personnel in both El Paso and Seoul.

Wm. H. Lambert, Texscan's chairman stated, ''While Texscan has had a long standing presence and consistent growth in the European marketplace, the award of this project is an indication of Texscan's stature in international commerce. Needless to say, we are absolutely delighted.''

Headquartered in El Paso, Texscan Corp. is a leading designer and manufacturer of a broad line of distribution and commercial insertion products for the cable television industry, and a large scale fiber optic systems integrator.

NEWTON, MA (NOV. 27) BUSINESS WIRE - Marcam Corp. (NASDAQ:MCAM) Tuesday reported that for the full fiscal year ended Sept. 30, 1990, net income increased 350 percent to $4,108,000, or 59 cents per share, from $913,000, or 14 cents per share, in fiscal 1989.

Fiscal 1990 revenues of $33,309,000 were 99 percent higher than fiscal 1989 revenues of $16,702,000.

Net income for the fourth quarter ended Sept. 30, 1990, increased 239 percent to $1,467,000, or 20 cents per share, from net income of $433,000, or 6 cents per share, in the final quarter of fiscal 1989. Revenue for the quarter grew 72 percent to $9,866,000 from $5,736,000 in the final quarter of fiscal 1989.

International revenues climbed 117 percent to $3,631,000 from $1,676,000 in the fourth quarter of fiscal 1990 and grew 112 percent for the full year to $10,901,000 from $5,138,000 in fiscal 1989.

At Sept. 30, 1990, the company's cash reserves stood at $12,075,000.

''The applications technology built into Marcam's PRISM software and the coverage of our worldwide distribution and support organizations were the primary reasons for our excellent financial results in 1990. In the coming year, our continuing investment in applications, distribution, service and support will create opportunity for substantial growth. We look forward to 1991 with great enthusiasm,'' said Paul Margolis, Marcam's president and chief

executive officer.

Marcam Corp. provides applications software and related services to process manufacturers worldwide. The company is an IBM Authorized Industry Applications Specialist and Business Partner, and a member of IBM's Cooperative Software Program.

Founded in 1980, Marcam has 16 offices throughout North America, Europe and the Far East, and is represented in more than 25 countries. Marcam's customers include Kraft/General Foods, Coca-Cola USA, Ralston Purina, SmithKline Beecham, Gillette, and Rhone Poulenc.

#90331b0845 11/27/1990 ~Business Wire

PROVIDENCE, RI (NOV. 27) BUSINESS WIRE - The board of directors of Old Stone Corp. annnounced Tuesday the promotion of James V. Rosati (41) to the position of president and chief executive officer of Old Stone Bank, the corporation's principal subsidiary.

The chief executive officer postion has been held for 15 years by Theodore W. Barnes who remains as chairman of Old Stone Bank and president and chief executive officer of Old Stone Corp. Rosati joined Old Stone Bank in 1972 and handled various positions of increasing responsibility within the retail and commericial banking areas.

From 1984 to 1989 he headed the bank's Commercial Banking Group. Last year his duties were expanded when he became chairman of the Credit Policy Committee and assumed responsibility for the Real Estate Investment Group and real estate development projects.

At the same time, the board announced a major reorganization which replaces all of the Rhode Island bank's line functions under Rosati's direction. The reorganization is consistent with the corporation's current strategy of refocusing its energies on its basic businesses of attracting deposits and serving the borrowing needs of local businesses and the retail customer.

The board announced the promotion of A. Michael Marques to executive vice president of Old Stone Bank, responsible for its commercial lending functions, and Robert G. Burkhart to executive vice president of Old Stone Bank, responsible for its retail banking functions.

Marques and Burkhart will report to Rosati. Also reporting to Rosati is S. Lee Miller who heads Old Stone Financial Services which includes Old Stone Trust Co.

In announcing the promotions and reorganization, Barnes pointed out that for the first time since the mid 1970s, all of Old Stone Bank's operations are now grouped under the direction of one individual. ''The board feels that Mr. Rosati is well qualified to deal with the challenges faced by the bank today and to lead it forward in the future,'' said Barnes.

Three major groups headed by Rosati, Edward J. Braks, executive vice president and chief financial officer, and Winfield W. Major, executive vice president and general counsel, emerge from the reorganization. All three individuals report directly to Barnes. As noted previously, Rosati heads Old Stone Bank and continues to supervise the wind-down of Old Stone Development Corp.

Braks (48) is responsible for all accounting, regulatory reporting, budgeting and finance activities. In addition, the Administrative Services Group headed by Ms. Beverly Najarian, executive vice president, reports to Braks. As part of the reorganization, Old Stone Securities Co. and the Investment Group headed by Jeffrey E. Anthony, senior vice president, will report to Braks.

Major (43) who serves as General Counsel directs the Corporate Services Group which includes the Personnel, Legal and Purchasing departments. Since last year, he has also had responsibility for most of the corporation's remaining out-of-state subsidiaries: Old Stone Bank of North Carolina, Old Stone Credit Corp., Old Stone Bank of California and Old Stone Mortgage Corp.

''The board feels we have an energetic and very capable management team and the tightening of reporting responsibility will aid greatly in making Old Stone's operations more efficient,'' Barnes noted.

#90331b0856 11/27/1990 ~Business Wire

BURLINGTON, VT (NOV. 27) BUSINESS WIRE - The board of directors of Banknorth Group Inc. Tuesday declared a dividend distribution of one common share purchase right on each outstanding share of the company's common stock.

John H. Barry, president and chief executive officer of Banknorth Group Inc. stated: ''The rights are designed to assure that all of Banknorth Group's stockholders receive fair and equal treatment in the event of any proposed

takeover of the company and to guard against partial tender offers, squeeze-outs, open market accumulations and other abusive tactics to gain control of the company without paying all shareholders a control premium.''

Each right will entitle stockholders to buy one share of common stock at an exercise price of $35. The rights will be exercisable only if a person or group acquires 20 percent or more of the company's common stock or announces a tender offer, the consummation of which would result in ownership by a person or group of 20 percent or more of the common stock.

If a person or group acquires 20 percent or more of the company's outstanding common stock, each right will entitle its holder (other than such person or members of such group) to purchase, at the right's then-current exercise price a number of shares of the company's common stock having a market value of twice such price.

Further, at any time after a person or group acquires 20 percent or more (but less than 50 percent) of the company's outstanding common stock, the board of directors may, at its option, exchange part or all of the rights (other than rights held by the acquiring person or group) for shares of the company's stock on a one-for-one basis.

In addition, if the company is acquired in a merger or other business combination transaction after a person or group has acquired 20 percent or more of the company's outstanding common stock, each right will entitle its holder to purchase, at the right's then current exercise price, a number of the acquiring company's common shares having a market value of twice such price.

Prior to the acquisition by a person or group of beneficial ownership of 20 percent or more of the company's common stock, the rights are redeemable for one cent per right at the option of the board of directors.

The board of directors is also authorized to reduce the 20 percent threshold referred to above to not less than 10 percent.

The rights are intended to enable all Banknorth Group stockholders to realize the long-term value of their investment in the company. They will not prevent a takeover, but should encourage anyone seeking to acquire the company to negotiate with the board prior to attempting a takeover.

The rights will be distributed on Dec. 7, 1990 to stockholders of record on that date and will expire on Dec. 7, 2000. The rights distribution is not taxable to stockholders.

Banknorth Group Inc., the largest commercial banking company in Vermont, was formed on Dec. 1, 1989 with the merger of Banknorth Group Inc. and Howard Bancorp and is comprised of First Vermont Bank and Trust Co., Franklin

Lamoille Bank, Granite Savings Bank and Trust Co., The Howard Bank N.A., and Woodstock National Bank. Banknorth common stock is traded on the NASDAQ National Market System under the symbol BKNG. Information published prior to Dec. 1, 1989 does not relate to the new BKNG stock.

#90331b0861 11/27/1990 ~Business Wire

NEW YORK (NOV. 27) BUSINESS WIRE - The Global Yield Fund November 1990 monthly update.

Investment Advisor Commentary

- The Fund returned 1.7 percent for the month of October.
- As expected, the Federal Reserve lowered interest rates a quarter of a point to 7-3/4 percent following the U.S. budget agreement. Further easing of interest rates is expected as the U.S. economy continues to struggle. This will lead to a further decline in the U.S. dollar as U.S. interest rates become increasingly uncompetitive.
- The British pound entered the exchange rate mechanism of the EMS early in October and short-term interest rates were simultaneously cut 100 basis points to 14 percent.

Initially, the pound soared against the U.S. dollar and the deutschemark, but receded somewhat from its highs on fears of further interest rate cuts. Once Britain's inflation picture improves, we expect further reductions in U.K. rates. In a weak dollar environment, however, the pound will continue to do well.

- Australian short-term interest rates were lowered 100 basis points in Oct. to 13 percent, resulting in an initial 5 percent decline in the Australian dollar. Although further interest rate cuts are expected, we expect the Australian dollar to hold steady in light of a negative U.S. dollar environment.

- In New Zealand, the election victory by the National Party came as no surprise. It is not yet clear what economic policies the new government will enact and when. The very independent Reserve Bank remains committed to reducing inflation and maintaining a stable currency.

- They will keep interest rates firm at 14 percent until inflation falls and the government reduces the budget deficit. The New Zealand dollar should continue to be steady in this environment.

- We continue to be positive on the European currencies and accordingly have the majority of the Fund's holdings invested there. We increased our holdings in Sweden and Norway to take advantage of their high interest rates.

- We have added a small position in Canada where we believe the currency will remain stable against the dollar. Currently, we maintain a small position in New Zealand and very limited exposure to Australia.

- As yield curves steepen, we will begin to buy longer dated securities thereby raising the average maturity of the Fund. We expect this trend to continue as economic growth begins to slow worldwide. While we remain negative on the U.S. dollar, we continue to be prudent in the size of our foreign currency exposure because of the very real threat of war in the Middle East. This has been an excellent year for the Fund and we do not wish to take unnecessary risks at this point in the year.

WASHINGTON (NOV. 27) COMTEX - The 8-K report filed at the SEC shows on Nov. 19, 1990, the board of directors of Arista Investors Corp.(TICKER: ARIN) approved the recommendation of their audit committee not to retain Ernst & Young as their auditors for the year ending Dec. 31, 1990.

Ernst & Young and Arthur Young & Co. had been the company's independent auditors for more than five years.

The board instead voted to retain Blonder Seymour & Shapss as independent auditors for the company and Arista Insurance Co., Arista's wholly-owned subsidiary.

For the previous two fiscal years, audits performed by those former auditors contained no adverse opinion or disclaimer of opinion nor were they modified as to uncertainty, audit scope, or accounting principles.

The company, a development stage enterprise, states fluctuation in revenues for the quarter ended Sept. 30, 1990 and the nine months ended on that date were a function of availability of funds and availability of research facilities at Virginia Commonwealth University, with whom Phoenix reports it contracted for research and development related to an anti-inflammatory drug.

The revenues shortage also was caused in part by the purchase of partnership interests of Phoenix Ltd. by Phoenix during the first quarter of 1990, the company says.

The company's address is 4020-400 Newberry Road, Gainesville, Florida 32607, and its telephone number is (904) 372-9585.

WASHINGTON (NOV. 27) COMTEX - The 8-K report filed at the SEC shows on Nov. 16, 1990, David Swenson, president of Twin Creek Exploration Inc. (TICKER: TWCE), announced that the planned reorganization whereby Twin Creek Exploration Inc. would acquire all the assets and business of Gantom Inc. was terminated.

According to Swenson, the notice of the termination of the agreement from Gantom stated that because of a downturn in the economy and higher-than-anticipated expenses in opening new stores, Gantom sought an end to the acquisition agreement.

Accordingly, Twin Creek agreed to cancel the agreement, Swenson said.

WASHINGTON (NOV. 27) COMTEX - The 8-K report filed at the SEC shows on Nov. 8, 1990, Hanger Orthopedic Group Inc.(TICKER: HNGR) acquired substantially all the manufacturing assets of Ralph Storrs Inc.

The acquisition, which is being accounted for as a purchase transaction, was effected pursuant to the terms of an asset purchase agreement, dated as of Oct. 26, 1990.

The agreement included Hanger, Storrs Acquisition Corp., a wholly-owned subsidiary of Hanger, Storrs and Ralph Storrs, the sole shareholder of Storrs.

The purchase price was $2.67 million, consisting of $2.23 million in cash, two promissory notes issued by the company totaling $430,179, of which $245,000 is payable over three years and $185,179 is payable over five years.

It also included 7,273 shares of common stock of Hanger with an aggregate market value of $10,000, based on the closing asked price of the stock on Nov. 7, 1990.

#90331c0047 11/27/1990 ~Comtex

WASHINGTON (NOV. 27) COMTEX - The 8-K report filed at the SEC shows on Nov. 14, 1990, American Bankers Insurance Group Inc.(ABIG)(TICKER: ABIG) adopted

amendments to its shareholder rights plan dated Feb. 24, 1988.

Concurrent with the initial adoption of the rights agreement in 1988, ABIG declared a dividend of one right for each share of ABIG's common stock outstanding.

Each right is a part of and trades with each share of ABIG's common stock and entitles the holder to purchase either a unit consisting of 1/100 of a share of Series A Participating Preferred stock at $31 per unit, or under certain circumstances, shares of either ABIG's common stock or stock in an acquiring entity at half of market value.

Rights are not exercisable until the distribution date and expire on March 10, 1998, unless ABIG redeems them earlier.

The amendment provides that the rights will separate from the common stock and a distribution date will occur upon the earlier of 10 days following a public announcement that a person or group of affiliated or associated persons has acquired, or obtained the right to acquire, beneficial ownership of 15% or more of the outstanding shares of common stock or 10 business days following the commencement of a tender offer or exchange offer that would result in a person or group beneficially owning 15% or more of such outstanding shares of common stock.

By MICHAEL STRAUSS - Comtex Washington Correspondent

WASHINGTON (NOV. 27) COMTEX - Saying his immediate objective is to "learn and listen," Securities and Exchange Commission Chairman Richard C. Breeden opened a meeting today examining ways to improve the national system for clearing and settling securities transactions.

Members of the Group of Thirty, a private-sector group composed of representatives of international financial institutions, discussed their findings at an all-day "roundtable" sponsored by the commission.

The group's main proposals include shortening the settlement cycle from five business days after the trade date to three business days, using same-day funds instead of next-day funds for settlement and establishing a book-entry settlement procedure.

Many foreign markets, including those in Germany and Japan, settle transactions in three days or less and the Group of Thirty's working committee on clearance and settlement concluded that implementing these recommendations will act to reduce risk in U.S. financial markets and help to ensure that U.S. markets remain competitive.

The SEC chief agreed that delays in execution and settlement result in added risk to market participants.

"The longer the time between execution and settlement, the greater the chance that the value of the securities purchased or sold will change materially, and that the counterparty will default," Breeden said.

The Group of Thirty is pushing for a three day settlement cycle and the establishment of a book-entry system for recording ownership and transfer of securities by 1993 for all market participants. A book-entry system utilizes computer entries and would do away with stock certificates.

"The committee believes that coupling these two goals, and implementing them as a single event, is the most practical and cost-effective way to shorten the settlement cycle," said Ronald Readmond, an executive vice president at Charles Schwab & Co. in San Francisco and co-chairman of the Group of Thirty working committee.

However, Breeden cautioned the Group of Thirty's recommendations could have important consequences such as burdening small retail brokerage firms with the added expense of adapting their operations systems to accomodate a shorter settlement cycle and the need to make payments in same-day funds.

In addition, a survey commissioned by the Group of Thirty indicated that a retail customer at a small firm is more likely to request receipt of a physical certificate, and eliminating stock certificates may have the effect of discouraging some individual investors from participating in the securities markets.

"In the long term, our goal should be to ensure that clearance and settlement systems are at least sufficiently linked to respond properly to the actual risk exposure of their participants," Breeden said. "The time is ripe to re-evaluate our clearance and settlement system to determine how best to minimize any systemic risks in a cost-effective manner."

#90331c0097 11/27/1990 ~Comtex

WASHINGTON (NOV. 27) COMTEX - The 8-K report filed at the SEC shows on Nov.

14, 1990, the board of directors of Bank of New Hampshire Corp.(TICKER: BNHC) voted a quarterly dividend for the fourth quarter of five cents per share, as compared to the third quarter dividend of $0.13 cents per share, a 62% reduction.

The company attributed the reduction in part to a continued overall softening of the local and regional economies.

-30- 595

#90331c0098 11/27/1990 ~Comtex

WASHINGTON (NOV. 27) COMTEX - The 8-K report filed at the SEC shows on Nov. 16, 1990, a three-person arbitration panel ruled that Mestek Inc.(TICKER: MCC) was not liable to Weber Metals Corp. for an allegedly defective stamping press built by Mesta Machine Co. over five years ago.

The alleged failure had been footnoted in Mestek's 1989 stockholder's annual report and 10-K report, Mestek states.

The panel instructed Weber Metals Corp. to pay $200,000 of Mestek's remaining account receivable from that company, with interest from 1988 to date.

TOKYO (NOV. 27) - Japan's second-largest electric machinery maker, Toshiba Corp., said Tuesday its consolidated net profit and sales both hit records for the six months to September.

Toshiba said net profit jumped 12 perent from a year earlier to 70.7 billion yen (512 million dollars), while sales soared 13 per cent to 2,268 billion yen (16.4 billion dollars).

Sales of information and communication equipment and electronic devices, accounting for half the total sales, rose 12 per cent, while other sales items also scored gains.

The company attributed the brisk business performance to strong domestic demand and a stronger dollar that boosted exports by 16 percent to 758 billion yen (5.5 billion dollars).

For the full year to March, net profit is forecast at 132 billion yen (955 million dollars) on sales of 4,252 billion yen (30.8 billion dollars).

#90331d1370 11/27/1990 ~French/German News Agency

MANILA (NOV. 27) - The Asian Development Bank (ADB) said Tuesday it has approved a 10.5 million dollar concessional loan to Papua New Guinea to combat unemployment and declining wages in that country.

The loan will help the government meet the social cost of structural adjustment by supporting projects on health improvement and water facilities, the Manila-based bank said in a written statement.

The loan has a 35-year maturity with a 10-year grace period and a one percent annual service charge.

Similar assistance is being provided to Papua New Guinea by the International Bank for Reconstruction and Development, the Australian International Development Assistance Bureau and the European Community, the ADB said.

The Pacific nation's economy has been adversely affected by the closure of the Bougainville copper mine for most of 1989 due to armed rebellion.

#90331d1380 11/27/1990 ~French/German News Agency

SYDNEY (NOV. 27) - After months of economic gloom, two banks Tuesday sent their first cautiously optimistic signals to Australia's business community.

A survey by the Westpac Bank and the Melbourne Index of Consumer Sentiment showed consumer confidence had picked up in November after a record low in October.

And Citibank economists in their monthly forecast said there were growing signs the economy has bottomed out and may now be moving into recovery.

The optimism follows lower-than-expected inflation statistics for the September quarter, last week's announcement of a wage-tax trade off with the unions and a subsequent drop in home loan rates.

Citibank said a knock-on from declining economies elsewhere in the world could put "a low speed limit on Australia's revival," but the risks of that should not be exaggerated.

The wage-tax deal could accelerate the recovery, not only for interest rates but for the real economy.

Real after-tax wages were being maintained, profits would be higher than expected, less unemployment would therefore result and the ensuing upturn had been brought closer, Citibank said.

Westpac said the November consumer index rose two points, seasonally adjusted, following steep declines since July.

#90331d1600 11/27/1990 ~French/German News Agency

SHENZHEN, CHINA (NOV. 27) - The mayor of this special economic zone, Zheng Liangyu, dismissed criticism Tuesday that Shenzhen relied mainly on the state for its capital investment in obtaining a high growth rate.

Mr. Zheng told a press conference to commemorate the 10th anniversary of China's largest special economic zone that of 18.2 billion yuan (3.5 billion U.S. dollars) invested in the zone's infrastructure over the last decade, only 1.7 percent came from the state.

The share from domestic joint ventures with various ministries under the central government and other provinces provided 22.5 percent, bank loans represented 18.9 percent and local revenue accounted for 35.7 percent, Mr. Zheng said.

The remainder, slightly more than 20 percent, came from foreign investment.

"The investment composition indicates that the construction of Shenzhen does not rely on state investment and loans," he said.

His remarks were seen as directed to central government economists who have criticised the special economic zone for failing to fulfil its duty to attract foreign investment and become export-oriented.

Mr. Zheng predicted that the total production value of the zone in 1990 will reach 26.8 billion yuan (5.14 billion dollars), an increase of 20.2 percent over last year.

Total export volume will hit 2.8 billion dollars, up 28.8 percent compared with last year's figures, he said.

JAKARTA (NOV. 27) - The Organisation of Petroleum Exporting Countries (OPEC) should consider ways of controlling production once the Gulf crisis has ended, Indonesian Mines and Energy Minister Ginanjar Kartasasmita said Tuesday.

OPEC ministers meeting for its end of the year conference in Vienna on

December 12 should strive to consolidate the organisation in order to be able to pass crisis in which some of its members were involved, Mr. Ginanjar said.

"It is important that once the Gulf situation returns to normal, OPEC should bring its production under control," he said.

Mr. Ginanjar said OPEC was already producing above its ceiling, set before the August 2 Iraqi invasion of Kuwait, of 22.5 million barrels per day (bpd) to help ease pressures on the oil markets caused by the Gulf crisis.

OPEC's production, excluding those from Kuwait and Iraq, had already reached 22.6 million bpd and could reach 23 million bpd, he added.

Oil from Iraq and Kuwait, which Baghdad annexed in August, is subject to an international trade embargo.

Indonesia had already raised its oil output from 1.28 million bpd in August to 1.3 million at present and would increase it further to 1.5 million bpd by January, Mr. Ginanjar said.

He said Indonesia would have to reduce its output back to its quota of 1.37 million bpd if the situation in Gulf returned to normal, but he admitted that "this would not be easy."

CANBERRA (NOV. 27) - Australia is prepared to compromise in GATT negotiations with the European Economic Community (EEC) over cuts in agricultural protection, Trade Negotiations Minister Neal Blewett said here Tuesday.

Mr. Blewett, chairman of the Cairns Group of agricultural exporting countries, told reporters he was prepared for compromise on the size of cuts sought on border protection, internal support and export subsidies by the EEC.

He leaves Thursday for Brussels and the final meeting of the four-year Uruguay Round of negotiations under the General Agreement on Tariffs and Trade (GATT), which begins on Monday.

The aim of that meeting is to unravel the political deadlock on agriculture which threatens reform in 15 trading areas.

The Cairns Group and the United States want border protection and internal support cut by 75 percent, and export subsidies cut by 90 percent.

The EEC has offered a 30 percent cut in overall protection, based mainly on reductions in internal support, and refuses to negotiate.

Mr. Blewett said if there were to be a breakthrough, the EEC would have to signal "clearly and unequivocally they are prepared to make explicit and specific commitments in each of the three areas."

The importance of agricultural reform in the negotiations meant "there just won't be an outcome unless there's a breakthough on agriculture."

This view was held not only by the U.S. and Cairns Group, but by an increasing number of other countries which did not have a major stake in agriculture, he said.

"We are prepared to be flexible, but we expect the same flexibility from the Europeans," Mr. Blewett said.

"We recognise we have to try to pursue a compromise."

Mr. Blewett acknowledged speculation that Germany, which has with France resisted significant reform, may be more flexible after elections at the weekend.

NEW DELHI (NOV. 27) - A protest strike sponsored by Sikh political parties paralysed Punjab on Tuesday as 11 people were killed in a continuing upsurge of separatist violence, the Press Trust of India (PTI) reported.

The strike shut markets, businesses, banks, schools and colleges, the news agency said. Milk, food and fodder supplies were also affected.

Public transport was running on a few select routes and trains were operating with heavy security, PTI said.

The strike was called by several Sikh political parties to protest against a ban imposed by the government on a Sikh convention in the town of Anandpur Sahib on Sunday.

The ban was accompanied by the preventive arrest of scores of Sikh politicians.

The Punjab administration justified the measures on grounds that Sunday's convention had been called to announce a "subversive programme of action intended to create ... a situation of confrontation with the government so as to encourage the secessionist forces."

Sikh separatist militants have stepped up their campaign of violence since Prime Minister Chandra Shekhar took office on November 10.

Another 11 people, including four suspected militants, were killed in violence

overnight Monday, PTI said.

#90331d2680 11/27/1990 ~French/German News Agency

HANOI (NOV. 27) - Hardliners appeared willing to accept limited economic liberalisation after heated and protracted debate with reformers at a closed-door Communist Party plenum here, informed Vietnamese sources said Tuesday.

But any attempt at political opening would be firmly resisted, and leading reformers came under harsh criticism for pro-Western policies, they said.

Fierce debate has raged since the central committee session opened unannounced here several days ago, the sources said.

"The economy has never weighed so much in central committee deliberations and the committee has never been so divided," one source revealed, adding that changes in the party leadership could be introduced before the winter session of parliament opens on December 5.

A close ally of the once monolithic Soviet bloc, Vietnam has been badly hit by recent changes in the Soviet Union and Eastern Europe, which formed the principal export market for Vietnamese goods and also supplied Vietnam with cheap raw materials and consumer goods.

The country's resulting near-bankruptcy, Vietnamese sources say, has prompted "serious differences" at the plenum, which, together with a recent national congress of party cadres, is preparing for a full party Congress scheduled for May next year.

Sources close to the government say no major changes will be introduced before the Congress, which will be called on to adopt "new political and economic perspectives."

The Congress must confirm the separation of party and state, a major issue at the plenum, they said. But they stressed that the plenum was "totally opposed" to allowing political pluralism in the one-party state.

#90331d2870 11/27/1990 ~French/German News Agency

SEOUL (NOV. 27) - The South Korean government Tuesday announced a long-awaited set of rules which will allow foreign securities' firms to open branches and do business here.

Under the rules announced by the finance ministry, foreign brokers must have had a representative office in South Korea for at least two years before they can open a branch office.

Twenty-four foreign scurities firms currently have offices here and 12 of them meet the two-year requirement, officials said.

The rules divided the work of securities firms into three main areas -- dealing, brokerage and underwriting -- and set minimum capital levels.

For a branch engaged in one business area, foreign securities' firms must put up at least 10 billion won (14 million U.S. dollars).

For those operating in two areas, the minimum amount was set at 15 billion won (21 million dollars) and for three areas, 20 billion won (28 million dollars).

Admitting foreign securities firms to the Korea Stock Exchange (KSE) and the Korea Securities Dealers' Association will be decided by the members of the KSE themselves, officials said said.

The United States and other countries have been demanding that foreign securities firms be allowed to join the KSE and the dealers' association.

In any joint ventures, the South Korean partners must hold at least 50 per cent and paid-up capital for such a brokerage will be a minimum of 70 billion won (98 million dollars). A 50 billion won (70 million dollars) minimum was set for joint ventures engaged in other business.

However, the 30 largest South Korean conglomerates will be barred from entering a joint venture with foreign securities firms to prevent further concentration of economic power, the officials added.

TOKYO (NOV. 27) - Japan's top leasing firm, Orix Corp., said Tuesday it has set up a joint venture in Hong Kong with South Korea's Hanjin Group.

The new firm, named Korea Orix Lease and Finance Ltd. and capitalized at five million dollars, is owned 35 percent by Orix and 65 percent by Hanjin's investment arm, Korean French Banking Corp., Orix officials said.

It will lease aircraft and ships and provide international financial services including financing for the Hanjin Group, the officials said.

Expected turnover in the first year of operations for the new company was put at 300 million dollars, the officials said.

Orix hoped to expand its business in Asia through the tie-up with Hanjin, which includes Korean Airlines and other major South Korean construction and transport companies, they added.

PORT ELIZABETH, South Africa (NOV. 27) - Demand at the seventh Cape winter mohair sale showed a marked improvement from recent sales, with 37 per cent of the 3,530 bales on offer sold, the Mohair Board announced here Tuesday.

A spokesman for the board said a drought currently gripping parts of the Cape province had resulted in finer hair and had seen more general demand for adults.

But demand for kids and young goats was still restricted, he added.

The next sale, the last for the winter, will be on December 11.

Approximate price in South African cents per kilogram (252 cents to one U.S. dollar).

	Adults	Young goats	Kids
Strong:	670-690	-	-
Average:	690-700	1500-1600	2550-2650
Good-average:	700-720	1700-2000	2700-2800
Fine:	850-1050	2050-2150	3200-3300

LONDON (NOV. 27) - The British Argyll Group food company on Tuesday reported a 28 percent increase in pre-tax half-time profits to 143 million pounds (283 million dollars) from 111.8 million pounds for the same period a year earlier.

Sales rose by 15.4 percent to 2.47 billion pounds from 2.14 billion pounds, and profits per share rose from 8.6 pence to 10.6 pence. The interim dividend

was set at 2.85 pence compared with 2.45 pence.

The result was better than had been expected by analysts who had forecast about 135 million to 140 million pounds.

Argyll shares gained one pence to 243 pence.

The improvement was mainly due to the performance of Safeway supermarkets which made an operating prodit of 102.5 million pounds compared with 69.2 million pounds.

-30- 959

#90331d3000 11/27/1990 ~French/German News Agency

LONDON (NOV. 27) - The British Allied Lyons food and drinks group on Tuesday reported a 10 percent increase in half-time profits to 286 million pounds (566 million dollars) from 260 million pounds for the same period a year earlier.

The result was in line with forecasts by analysts.

Sales rose by four percent to 2.53 billion pounds from 2.43 billion pounds.

The interim dividend was increased by 11 percent to 6.27 pence per share from 5.65 pence.

The group said that the trading environment had worsened but said that it was confident about the rest of its financial year.

Allied Lyons shares lost 10 pence to 488 pence.

MAPUTO (NOV. 27) - Suspected RENAMO rebels abducted 25 children and killed four guests in a raid on a wedding party outside Maputo after police, headquartered only a few hundred yards away, refused to provide protection, press reports said Tuesday.

Mozambique's official news agency AIM blamed the attack, which took place Saturday in Maputo's outlying Mbuyanguana area, on rebels of the Mozambique National Resistence (RENAMO).

AIM, reflecting recently enhanced freedom for the press in the former Portuguese colony, also reported criticism of security forces for failing to heed appeals to protect the wedding celebrations.

A police training centre was 800 metres (yards) from the scene, and a police roadblock was sited only 400 metres (yards) away, AIM noted.

The attackers killed four people and seized 25 children between the ages of seven and 14.

Forced involvement of children in Mozambique's 15 year civil war has been strongly condemned by international human rights workers.

AIM also reported Tuesday that government forces killed 20 RENAMO rebels near Male, in the central Mozambican district of Mocuba, Zambezia Province, when they repulsed an attack last Thursday. The troops killed a further 21 rebels when they beat off an attack on the small town of Molavele, in Zambezia's Ile district, on an undisclosed date, according to AIM.

Other suspected rebel attacks were reported from the port of Beira.

The latest incidents coincided with a resumption of stalled peace talks in Rome between the Mozambique governent and RENAMO. Both sides have now agreed to "analyse" RENAMO demands for a withdrawal of 10,000 Zimbabzean troops aiding the government, prior to a ceasefire.

#90331d3410 11/27/1990 ~French/German News Agency

KIGALI (NOV. 27) - War-torn Rwanda needs additional aid of 100 to 110 million dollars to finance its structural adjustment programme, Planning Minister Augustin Ngirabatware said here Tuesday.

Addressing donors' representatives, Mr. Ngirabatware said aid already pledged by the World Bank and the International Monetary Fund (IMF) before civil war broke out last month would be too little to finance the programme.

Two weeks ago the World Bank granted Rwanda aid of 80 million dollars to help it overcome its current economic difficulties, which have been compounded by a rebel invasion from neighbouring Uganda on October 1.

The civil war in the north of the landlocked country has cut off vital food imports which used to come via Uganda.

Rwanda's economy had already been weakened by the slump in the price of coffee its main export. Tourism has virtually stopped as Rwanda's main attractions, the Parc des Volcans, famous for its gorillas, and the Akagera national park, are both in the combat zone.

Rwanda had earlier asked the IMF for additional aid of 8.76 million Special Drawing Rights (SDRs) in addition to 30.60 million SDRs which it has asked for to finance its 1991-1993 structural adjustment programme, informed sources said here.

The United Nations Development Programme is also expected to sign an agreement to grant Rwanda 350,000 dollars in project aid in the next few days, officials said.

Rwanda devalued its currency by 40 percent last month, and announced big food and fuel price increases.

DOHA (NOV. 27) - The forthcoming summit meeting of the six-nation Gulf Cooperation Council (Gcc) will centre on the Gulf crisis, Omani Minister of Information Abdel Aziz al-Rawass was quoted as saying Tuesday.

The heads of state of Saudi Arabia, Kuwait, Qatar, Bahrain, Oman and the United Arab Emirates (Uae), making up the Gcc, are scheduled to hold their llth summit conference in the Qatari capital of Doha on December 22.

Preparations for the meeting are going ahead against the backdrop of the Iraqi occupation of a Gcc member state and amid growing fears of a military confrontation between Iraq and the U.S.-led alliance over the Iraqi invasion of Kuwait on August 2.

In an interview with the Qatari magazine Al Ahd, Rawass stressed that the quickest way to solve the Gulf crisis was through the implementation of United Nations Security Council resolutions, which call for a total and unconditional Iraqi withdrawal from Kuwait and the restoration of the legitimate government there.

He said any Arab or international solution to the Gulf crisis should be based on Iraq's declaration of its acceptance to withdraw from Kuwait.

Meanwhile, two Qatari envoys will visit Gcc states this week carrying formal invitations to the summit meeting from Qatar's ruler, Sheikh Khalifa bin Hamad al-Thani, it was announced here Tuesday.

The Gcc was set up in 1981 in a bid to coordinate economic and defence polices of the six conservative oil-rich states.

Duesseldorf (NOV. 27) - The heavy industry group Thyssen improved its turnover in the just-finished business year but earnings fell off, company chairman Dieter Spethmann said Tuesday.

Without disclosing final official figures for the 1989-90 year which ended September 30, Spethmann said that Thyssen's turnover rose by ''clearly more

than 1 billion marks'' (670 million dollars) over 1988-89 levels, but earnings were lower.

In the 1988-89 year, Thyssen achieved 34 billion marks turnover, up 17 percent from the year before, while its earnings increased by one-half billion marks to 1.7 billion marks.

Spethmann said that the 1989-90 earnings, while retreating from last year's level, would be higher than the 1.2 billion marks profit in 1987-88.

DHAKA (NOV. 27) - Bangladesh's two main opposition leaders, Sheikh Hasina Wazed, of the Awami League, and Begum Khaleda Zia, of the Bangladesh Nationalist Party, were arrested here Tuesday, opposition sources said.

Police also arrested former foreign minister Kamal Hussain and a youth leader, Mostafa Mohsin, as authorities moved to crush growing demands for the resignation of President Hussain Muhammad Ershad.

The state-run radio reported the imposition of an indefinite curfew Tuesday on Dhaka and its suburbs, the scene of violent disturbances in which two people were killed.

Opposition activists went on a rampage damaging public transport and smashing shop windows after news of the arrests spread. Police had picked up Sheikh Hasina and Begum Khaleda up at their homes, the sources said.

Troops in armoured cars ringed Dhaka university campus, a stronghold of the All Party Students Unity organisation which has called for a nationwide general strike Wednesday to press for the government's resignation.

Militant students brandishing automatic weapons fired in the air forcing thousands of other students and teachers to run for cover. Eyewitnesses said security forces moved on to the campus under a dense cloud of teargas.

University officials said a teacher at the Dhaka Medical College, Shamsul Alam Milon, was killed in crossfire between rival student groups. Three people have died in campus violence since Saturday, police said.

#90331d4120 11/27/1990 ~French/German News Agency

PRETORIA (NOV. 27) - Black nationalist leader Nelson Mandela said Tuesday ahead of a meeting with President Frederik de Klerk that "major national interests" were at stake and their talks would be "very sensitive".

The face-to-face talks have been called by Mr. De Klerk to try break a deadlock in clearing the way to formal constitutional negotiations.

A presidential spokeswoman said the crucial meeting got under way at 4 p.m. (1400 GMT) but she was not able to say how long it would last or whether Mr. De Klerk was accompanied by senior advisers.

Mr. Mandela was accompanied only by a personal bodyguard.

Observers said the special rapport between Mr. De Klerk and Mr. Mandela, deputy president of the black nationalist African National Congress (ANC), would be sorely tested as they tried to find solutions to problems which ANC and government negotiators have failed to solve over the past six weeks.

Political violence in black townships and a campaign of protest action by the ANC have stalled the peace process and threaten to delay the start of full-blown negotiations toward a new constitution to enfranchise the black majority.

Mr. De Klerk has hit out at the ANC's campaign of "mass action" -- consumer boycotts, protests and strikes -- saying it is destabilising the country and hindering the creation of a climate of peace.

Mr. Mandela, meanwhile, has warned that if the government is not prepared to contain the violence, the ANC will not continue to talk peace.

Since August, more than 800 people have died in Johannesburg's townships in fierce fighting between ANC supporters and hostel dwellers who back Zulu leader Mangosuthu Buthelezi's Inkatha Freedom Party. Another 11 people were killed late Monday in an attack on a squatter camp near here.

#90331d4140 11/27/1990 ~French/German News Agency

TOKYO (NOV. 27) - Japan's top carmaker Toyota Motor Corp. said Tuesday it would invest 800 million dollars on a second car plant in the United States as part of a strategy to boost U.S. sales by 50 percent over five years.

Toyota, the country's biggest company and the world's third-largest carmaker, said in a statement that the plant would be located on the site of Toyota's existing Georgetown plant in Kentucky.

"The expansion means future production could grow by as much as 200,000 units annually and will result in at least 1,500 new American jobs," it said.

Toyota said the construction of the new plant would begin early next year and was targetted to be completed in late 1993.

The existing plant already has the capacity to produce 240,000 vehicles a year and currently makes about 215,000. Toyota also has a joint venture with General Motors Corp. in California, producing about 100,000 Toyota cars a year.

The proposed investment is part of Toyota's strategy to boost sales in the United States from around one million vehicles a year to 1.5 million vehicles over the next five years.

"In addition to allowing Toyota to increase the percentage of American-made vehicles its sells in the United States, the expansion will provide new opportunities for U.S. auto suppliers," the statement said.

Toyota gave no further details although a senior company official was quoted as saying local content at the Kentucky plant would be raised from 65 percent to 75 percent as a result of the investment.

The expansion is likely to lead to increased exports of Toyota cars from the United States, the statement added, noting that the existing plant already exports cars to Taiwan and plans to start exporting to Japan in 1992.

Despite being Japan's biggest carmaker, Toyota lags behind third-ranked Honda Motor Co. Ltd. in terms of car sales in the United States due to its rival's more extensive local facilities. Honda's plants have the capacity to manufacture more than 500,000 cars a year and currently produce about 460,000.

#90331d4230 11/27/1990 ~French/German News Agency

WASHINGTON (NOV. 27) - Sales of existing homes in the United States fell 4.7 percent in October to their lowest level since February 1985, a real estate trade group said Tuesday.

The National Association of Realtors said house resales totalled a seasonally adjusted annual rate of 3.02 million, down from 3.17 million in September.

The lowest previous sales rate was in Feburary 1985 when the total dropped to 2.95 million.

The realtors association also said that the median price of an existing home was 92,800 in October, down 1.7 percent from September - a sign that sellers are lowering prices in a buyers market.

Sales have been dampened by persistent deficit problems, a general economic sluggishness nationwide and the threat of war against Iraq, said NAR President Harley Rouda.

BEIJING (NOV. 27) - Chinese philosopher Feng Youlan has died at the age of 95 the New China News Agency (NCNA) said Tuesday.

Mr. Feng, who earned his doctorate in philosophy at Columbia University in New York, received a chair at Beijing University in 1952, and was a historian of Chinese philosophy.

Closely allied with the communist government, Mr. Feng sought to recast China's pre-1949 philosophy in a Marxist light.

In 1955, he was inducted into the Academy of Social Sciences and became a Communist Party central committee member. But one year later he was criticised for an article that appeared during the 100 Flowers Campaign -- when intellectuals were encouraged to express themselves freely -- arguing that some traditional philosophical concepts should be rehabilitated.

He was to be labelled a revisionist several times, before being publicly accused of being a "counter-revolutionary" in 1968, two years after the start of the Cultural Revolution (1966-1976). He subsequently had to quit all his official duties.

The philospher He did not reappear until 1972. He rejoined Beijing University the following year and in 1983 he was reinstated in the party central committee.

NCNA failed to mention the periods when Mr. Feng was out of favour with the authorities. It described him as a "noted educationalist and patriotic personage."

His works included the two-volume "History of Chinese Philosophy" and "New History of Chinese Philosophy," which came out 30 years after he wrote it.

#90331d4450 11/27/1990 ~French/German News Agency

BRASILIA (NOV. 27) - The presidents of Brazil and Argentina will sign an

agreement Wednesday renouncing completely the production of nuclear weapons in their countries, moving South America into a denuclearized era.

Argentine President Carlos Saul Menem and Brazilian President Fernando Collor de Mello will sign the treaty at Foz do Iguacu, Brazil at the spectacular Iguazu falls on the border between the two countries.

Diplomats from the two countries call the accord "historic", as it will lay to rest a regional rivalry that in recent decades served to justify secret nuclear programs by the military in both nations.

Brazilian Science and Technology Minister Jose Goldemberg said the two governments will have mutual treaty verification rights, and that the accord will finally eliminate "the phantom of war nourished by both nations."

These rivalries over the years have enabled military officials to intervene "for strategic reasons" to prevent the construction of roads, bridges and railways across the borders of the neighboring countries.

On signing the Foz do Iguacu accord the two South American countries will fall into line with the Tlatelolco Treaty which calls for a Latin America free of nuclear arms.

Cuba is the only other Latin American country that does not recognize the treaty of Tlatelolco.

The Argentine-Brazilian agreement also includes planned exchanges of electro-nuclear equipment by the Brazilian power plant d'Angra and Argentina's Atocha reactor.

Another consequence of the accord will to pick up the trail of 200 tonnes of uranium secretly imported by Brazil from China in the early 1980s and dispersed among several military research programs.

Mr. Collor's administration has given priority to halting all nuclear research for military purposes and has sealed a giant pit in the Amazon region that was to be used for nuclear tests.

The Argentine-Brazilian agreement was reached after six months of negotiations and will be monitored by the International Atomic Energy Agency in Vienna.

#90331d4460 11/27/1990 ~French/German News Agency

PARIS (NOV. 27) - Soviet exports of oil to members of the Organisation for Economic Cooperation and Development (OECD) have been maintained although exports to eastern Europe are expected to have fallen by 25 per cent to 30 per cent in 1990, Cambridge Energy Research Associates (CERA) reported.

But CERA in the recent report did not rule out the possibility that Soviet supplies to OECD countries might decline in coming months.

Soviet exports to OECD countries in August were 200,000 barrels per day above the level a year earlier, and this trend had continued in September and in October, they said.

During the first nine months of 1990 these exports totalled 66.9 million tonnes compared with 65.27 million tonnes during the same period of the previous year.

The level had been maintained despite falling production because of a decline in domestic consumption caused by severe recession in the Soviet Union, the report said.

However, supplies to OECD countries had been maintained at the expense of countries in eastern Europe.

Since the beginning of the Gulf crisis, the Soviet Union had accelerated its policy of substituting gas for oil in exports to eastern Europe. The reduction of oil exports to these countries had gathered pace in the second half of the year.

For the whole year exports to eastern Europe were expected to fall to between one million and 1.5 million barrels per day compared with 1.5 million barrels per day last year, while exports to Cuba of 80,000 barrels per day in 1989 had been halted.

A draft Soviet budget presented on Monday to the federal parliament said that total Soviet exports were likely to fall by half next year and that output would fall to 560 million tonnes from 575 million tonnes in 1989.

#90331d4630 11/27/1990 ~French/German News Agency
BAGHDAD (NOV. 27) - Some 70 Italian hostages of about 280 held by Iraq will be allowed to leave Wednesday, Italian embassy sources said late Tuesday.

The Italians, whose release was authorized by President Saddam Hussein following the intercession of Monsignor Hilarion Capucci, the Greek Catholic Archbishop of Jerusalem, will head for Amman on board an Iraqi Airways jet, they said.

The hostages will then transfer to an Alitalia flight for Rome, they added.

The announcement Saturday of their release coincided with the arrival here of an Italian plane carrying 25 tonnes of medicines and children's vaccines sent by Italian pharmaceutical companies, with the approval of the government in Rome.

Earlier Tuesday, 10 Britons, five Germans and three Americans flew from Baghdad to the Jordanian capital aboard a regular Iraqi Airways flight after being authorized to leave Iraq.

They had been held since Iraq invaded Kuwait on August 2.

#90331d4650 11/27/1990 ~French/German News Agency
BRUSSELS (NOV 27) - The European Economic Community (EEC)'s executive commission wants to extend until end-1991 a ban on the use of the hormone somatotropine in milk production, a commission spokesman said here Tuesday.

He said the delay, requested by farm Commissioner Ray MacSharry, would give the commission time to collect new data on the effects of the hormone, which increases the yield of dairy cattle by at least 10 percent.

A temporary ban on commercial use of somatotropine, manufactured by the U.S. firm Monsanto and the British firm Lilly among others, was first imposed by the EEC in 1989.

Critics of the hormone say its use is counter-productive at a time when the EEC produces a big subsidised surplus of milk and when small farmers are being threatened by the huge output of agro-business.

The EEC placed a blanket ban on the use of growth hormones since 1988, but somatotropine has escaped this ban because, under current EEC regulations, it is classified not as a hormone but as a veterinary medicine.

#90331d4670 11/27/1990 ~French/German News Agency
BUENOS AIRES (NOV 27) - President Carlos Menem has authorized layoffs of 122,000 public employees over a three year period starting January 1 in an effort to streamline government operations and save 1.5 billion dollars a year.

The plan, which Mr. Menem signed late Monday, targets the department of education, customs and civilian workforce of the armed forces for most of the layoffs.

The Argentine government currently employs some 700,000 people.

Since assuming office 17 months ago, Mr. Menem has sought to strip back the bureaucracy and privatize money-losing state enterprises to pull the country out of a financial quagmire resulting from its 63 billion dollar foreign debt.

Under the plan, many of the public employees ware to be sent into forced retirement or pressed into voluntary early retirement.

The Interamerican Development Bank, based in Washington, will assist the Argentine government in financing compensation schemes for government workers choosing voluntary retirement, government officials said.

A special commission of experts from the private sector will be put in charge of retraining programs for laid-off government employees, they added.

#90331d4930 11/27/1990 ~French/German News Agency
WASHINGTON (NOV 27) - Stanislaw Tyminski, the political unknown who took a surprising second place in Poland's presidential elections, Tuesday promised to lower taxes if elected in the December 9 runoffs.

"The country is in deep crisis ... There is time for a change, and I offered this possibility through my candidacy in this important election for my country," Mr. Tyminski said in an interview aired on CBS Television.

In Sunday's presidential elections in Poland, Mr. Tyminki, 42, came in second with 23 percent of the vote in a stunning upset that knocked Prime Minister Tadeusz Mazowiecki out of the running.

Solidarity leader Lech Walesa led the polls with 40 per cent pf the vote.

Asked how he could improve on Mr. Mazowiecki's 15-month-old government, Mr. Tyminski said: "Just a structural change of our tax system so we have similar conditions to those that exist in the United States, where people are free to have disposable income."

"Since the second war (World War II) we have the same tax system ... the words have changed, but not the system," he added.

Mr. Tyminski, who left Poland in 1969 to pursue a carreer in business in Peru and Canada, rebuffed charges that he was a newcomer to politics, recalling that last May he was elected leader of the ultraconservative Libertarian Party of Canada, which has some 3,500 members.

He also said that while he lived in Peru, he became "very active in politics because of the poverty in the country ... starting in 1981."

Mr. Tyminksi, 42, holds passports from Poland, Canada and Peru.

The self-made millonaire said "scare tactics" from the "Stalin days in the 1950s" were still being used in Poland, alluding to threats he may be tried for having accused Mr. Mazowiecki of betraying his people economically.

"I hope to gain immunity as the president on the 9th of December, and then there will be no problem," he added.

#90331d5030 11/27/1990 ~French/German News Agency

BERLIN (NOV 27) - Renovating the Reichsbahn, the decrepit state-owned railway of east Germany, is one of the toughest tasks facing the post-unification government in Bonn.

The network was paralysed Tuesday as employees continued an unlimited strike for higher wages and job guarantees in a challenge to the government ahead of Sunday's parliamentary election.

Transport Minister Friedrich Zimmermann says the decaying network can only be brought up to western levels if overmanning is reduced and up to 100 billion

Deutsche marks (71 billion dollars) are injected over the next 10 years.

That the old name of the company -- "Reichsbahn" means "imperial railway" -- remained unchanged throughout four decades of Communist rule seemed to symbolise its low priority in state investment.

It has a network of 14,000 kilometers (8,750 miles) of which 3,500 kms (2,187 miles) are electrified. By comparison, west Germany's heavily-subsidised Deutsche Bundesbahn (DB) has a network of 27,400 kms (17,125 miles), of which 13,000 kms (8,100) are electrified.

While the DB operates gleaming trans-European expresses that can race up to 250 kph (156 mph), the top speed on the Reichsbahn is just 120 kph (75 mph).

The reason: nearly 11 million concrete sleepers are discovered to have been badly made, and are crumbling.

The east German rolling stock, too, is also ancient. It still has 263 steam locomotives in regular use. The DB has none.

#90331d5160 11/27/1990 ~French/German News Agency

FRANKFURT (NOV 27) - The electrical industry in western Germany expects a six percent growth rate this year and between four and five percent next year despite pressures on foreign markets, an official said here Tuesday.

Professor Rudolf Scheid, managing director of the electrical and electronics industry federation (Zvei), said orders were 8.4 percent up in the first nine months of 1990 against the previous year.

Domestic investment and consumer demand were expected to continue on a high level while foreign orders would not go up at the same rate, he said.

The industry employs 1.1 million people, an increase of 2.3 percent or 25,000 persons during the first nine months. Production of household goods was running at full capacity while producers of investment goods operated at 86 percent of capacity, Scheid said.

Another Zvei official drew a grim picture of the electrical industry in the former East Germany. He said consumer demand had turned almost entirely to Western-made goods.

The biggest problem was that exports to the former East Bloc countries would probably collapse next year, said Zvei manager Bodo Boettcher.

Products from eastern Germany were often not competitive. The government had cut export price subsidies, and eastern European countries lacked hard cash to

pay for for imports.

Boettcher said in eastern Germany, only companies with a strong western German firm backing them had a chance to survive.

#90331d5500 11/27/1990 ~French/German News Agency

BEIRUT (NOV. 27) - A tank-led Israeli force crossed the border into southern Lebanon Tuesday evening hours after five Israeli soldiers and two Palestinian guerrillas were killed in a fierce firefight in the area, security sources said.

About 500 Israeli regulars in 40 tanks and armoured personnel carriers took up positions at the edge of the so-called security zone facing the Bekaa Valley southeast of Beirut.

Another force of 40 soldiers and four armoured personnel carriers advanced outside the zone into the villages of Mimes and Markaba. They fired flares before combing the landscape with machineguns and grenades.

Earlier, Israeli soldiers who had been flown in by helicopter intercepted a group of heavily armed Palestinians near the village of Shaba'a, seven kilometres from the Israel-Lebanon border.

The group was identified as belonging to the Damascus-based Popular Front for the Liberation of Palestine (Pflp) headed by George Habash. Although Israeli sources spoke of four guerrillas, a Pflp spokesman said there had been 13, one of whom was reported missing.

Following the clash, Israeli warplanes bombed guerrilla positions near the South Lebanese city of Sidon, 40 kilometres south of Beirut. Lebanese police said six people died and 10 were wounded in the strikes.

An Israeli army spokesman said the targets were staging posts for attacks against Israel by fighters loyal to Abu Nidal and Na'if Hawatme. All targets were hit and the planes returned safely to base, an official communique said.

LONDON (NOV. 27) - John Major pledged here Tuesday that as prime minister he would unite the Conservative Party and lead it to win a fourth consecutive general election.

In a brief appearance in front of his official residence at No. 11 Downing Street, Mr. Major said he "will endeavor to discharge my responsibilities to the best of my abilities."

Flanked by his wife Norma, he added: "We're going to unite totally and absolutely and we're going to win the next general elections."

His remarks came after he met outgoing Prime Minister Margaret Thatcher who was said to be "thrilled" by Mr. Major's victory in a vote for the next Tory party leader and thus prime minister.

NEW YORK, UNITED NATIONS (NOV. 27) - U.N. Secretary General Javier Perez de Cuellar Tuesday asked the Security Council to extend the mandates of U.N. peace keeping forces posted along the Iran-Iraq border and between Israel and Syria in the Golan Heights.

Mr. Cuellar told the Security Council that Iraq had requested a six month extension for the the U.N. Military Observer Group in Iran and Iraq, while its former foe to the east had asked for only a two-month extension.

The secretary general welcomed the fact that both countries had decided to release all prisoners of war taken during their eight-year war, which ended in 1988, and to retreat to internationally established boundaries.

But he noted that "the fundamental change in the relations between the two countries has come at a time of new crisis for the region," referring to the Gulf crisis.

Mr. Perez de Cuellar also asked the Security Council to extend for six months the mandate of the U.N. Disengagement Observer Force (UNDOF) deployed in the Golan Heights between Israel and Syria.

In his report, the U.N. Secretary General said that "despite the present quiet in the Israeli-Syria sector, the situation in the Middle East as a whole continues to be potentially dangerous and is likely to remain so, unless and until a comprehensive settlement covering all aspects of the Middle East problem can be reached."

The FNUOD was created in 1974 and its mandate has been renovated on a semi-annual basis.

The Security Ciuncil is expected to approve Mr. Perez de Cuellar's requests next Friday.

MUSCAT (NOV 27) - Sheikh Salem al-Sabah, the interior minister of Kuwait's government-in-exile, Tuesday rejected any dialogue with Iraq before it agrees to withdraw troops from all Kuwaiti territory.

His remarks came in a statement to the Kuwaiti News Agency (Kuna) at the end of a two-day official visit to Muscat during which he conveyed an oral message on the Gulf crisis from exiled Kuwaiti Emir, Sheikh Jaber al-Ahmed al-Sabah, to Omani Ruler, Sultan Qabus bin Said.

''A dialogue with Iraq should be based on the Iraqi government's full commitment to implement the resolutions of the Arab League, the Organisation of Islamic Conference and the United Nations Organisation. After that, dialogue is possible,'' said Salem, commenting on Qabus' call on Omani National Day (November 18) for dialogue among the parties involved in the Gulf conflict.

These resolutions, which Iraq has rejected, provide for a total and unconditional withdrawal of Iraqi forces from Kuwait and the reinstatement of the Jaber government there.

Salem said the U.S.-led 300,000-strong multinational force in the Gulf had the specific objective and strategy of forcing Iraq out of Kuwait.

War would inevitably break out in the Gulf if Iraq continued to reject international calls for pulling its troops out of Kuwait, he added.

WASHINGTON (NOV. 27) - U.S. Secretary of State James Baker has invited China's Foreign Minister Qian Quichen to Washington for talks after an impending U.N. Security Council vote on Iraq, the State Department announced Tuesday.

State Department spokesman Richard Boucher said Mr. Qian was expected in here Friday after the security council vote on a resolution authorizing the use of force against Iraq if Baghdad doesn't withdraw its forces from Kuwait.

Mr. Qian was to be in New York Thursday for a security council meeting at the foreign minister level at which the vote on the U.S.-sponsored resolution was to be held.

One of five permanent members of the security council with veto power, China

has not said it will vote in favor of the resolution but has let it be understood it would not oppose it.

Mr. Qian's meeting with Mr. Baker would be their fifth since U.S. President George Bush imposed sanctions against China June 20, 1989 in the wake of the Tiananmen Square massacre.

"Given China's role as a permanent member of the Security Council of the U.N. and our common interest in advancing a range of global and regional issues, including Cambodia, we believed it useful to invite Foreign Minister Qian Quichen to Washington for a comprehensive review of those matters as well as an in-depth discussion of bilateral issues," Mr. Boucher said.

Mr. Boucher stressed that the meeting did not mean a change in U.S. policy toward China, under which high-level exchanges with Beijing have been suspended.

"We've always made a distinction between contacts and exchanges," he said.

The Bush administration, however, intends "to explore ways to strengthen cooperation on global and regional issues and seek understandings on ways to achieve improvement in our bilateral relations, including further progress in the area of human rights that would permit a gradual return to normal high level exchanges."

BAMAKO (NOV. 27) - West African leaders opened a special summit here Tuesday over ways to end Liberia's 11-month civil war.

Thirteen heads of state from the 16-nation of the Economic Community of West African States (ECOWAS) attended the group's opening session.

In his welcoming address, Malian President Moussa Traore said it was time to "bring a definitive end" to the crisis whch had already lasted too long by "turning the page on the past" and finding concrete solutions.

He added the community should demonstrate its determination and capacity to resolve the conflict through dialogue.

For his part, Ugandan President Youweri Museveni, current chairman of the Organization of African Unity (OAU) said it was time that the situation of armed conflict was changed to situation of peace.

"It is not necessary to fight to the end" in search of democracy, he said, adding that the combattants should "rise to the occasion" and put the interests of Liberia over those of the separate factions.

Mr. Museveni said after years of wars, his country has since 1986 "ushered in an era of reconciliation" where "the enemies of yesterday are now members of government.

"We've done it in Uganda, and it can be done in Liberia," he said.

Gambian President Dawda Jawara, who is current ECOWAS chairiman, said the meeting "offers hope, perhaps the last hope" to reach a lasting solution to the "Liberian tragedy."

He added that the reponsibility to finding a solution the the crisis "lies squarely on our shouldiers."

The Gambian president said the group needed "speedy action" to end the conflict in which many West Africans have been killed or trapped in the war-wracked country.

A U.N. official told Agence France-Presse here that the number of Liberians taking refuge in neighboring Sierra Leone, Guinea and the Ivory Coast has reached 700,000.

Sir Dawda said a West African intervention force, known as ECOMOG had succeded in its task by evacuating thousands of people from Liberia and by "making Monrovia and its environment safe enough" for the arrival of an ECOWAS-backed interim government last week led by Amos Sawyer and relief supplies for Liberians in the capital.

The force, comprising troops from Nigeria, Ghana, Sierra Leone, the Gambia and Guinea, has driven back Charles Taylor's National Patriotic Front of Liberia (NPFL) rebels, who charged that Nigerian jets had bombed their positions in western Cape Mount and Lofa counties Monday and Tuesday.

The meeting got underway more than an hour late because of apparent difficulties during informal discussions between the main rebel leader, Charles Taylor and members of ECOWAS' mediation committee, led by Sierra Leone's President Joseph Momoh and Malian head of state, Moussa Traore.

Sources close to the conference said problems arose when Mr. Taylor said he would sign sought-after ceasefire agreement if the interim government, set up by Liberian politicians and exiles in August in the Gambia under ECOWAS auspices, resigns.

Mr. Taylor, who has declared himself president and who has set up his own administration in northern Liberia, has refused to recognize th interim government, which is a main element in ECOWAS's peace plan.

Following the opening ceremony, heads of state continued their discussions

behind closed doors. According to the official summet program, the meeting is to end Wednesday morning.

WASHINGTON (NOV 27) - A U.S. Navy cruiser intercepted a German cargo ship in the northern Red Sea November 22, carrying "two heavy boxes on board that couldn't be opened," a Pentagon spokesman said Tuesday.

The cruiser Biddle intercepted and turned away the German-registered cargo ship Premier, whose manifest "had been changed several times," Pentagon spokesman Pete Williams said.

The cargo ship refused to reveal the origin or destination of its load.

Due to the multiple manifest changes, the Biddle forced the Premier to turn back.

Asked about the ship's new destination, the Pentagon spokesman said ,"We don't tell them where to go. We simply say, 'You can't go there, you can't go to that destination'. It's up to them to decide where to go."

Mr. Williams did not supply details on the Premier's mysterious load, citing the U.S. Defense Department policy of not describing the cargo of inspected ships.

#90331d6430 11/27/1990 ~French/German News Agency

MOSCOW (NOV 27) - Saudi Arabia is to make a four-billion-dollar loan to the Soviet Union, with which the Gulf kingdom renewed diplomatic relations in September, Tass news agency said Tuesday.

The announcement came at the end of a meeting here between President Mikhail Gorbachev and Saudi Foreign Minister Prince Saud al-Faisal.

The agency added that Mr. Gorbachev and King Fahd had also invited each other to exchange official visits.

Mr. Gorbachev and Prince Saud agreed that Iraq's military potential and the ambitions of the country's leadership constituted a danger, even for countries far removed from the Gulf region, said Tass.

The two leaders once again condemned Iraq's occupation of Kuwait and said the adoption of a new U.N. Security Council resolution should achieve a just solution to the crisis.

The Saudi envoy arrived here Tuesday less than 24 hours after Iraqi Foreign Minister Tareq Aziz had talks in Moscow with the Soviet leadership.

Mr. Gorbachev's spokesman Vitaly Ignantenko said earlier Tuesday that the meeting with Mr. Aziz had been "very tough", adding that the "participants parted on cold terms. There was a very sharp exchange, related especially to the problem of the hostages."

Moscow has made it clear it will vote for a Security Council resolution with a clear-cut deadline for the withdrawal of Iraq from Kuwait and the liberation of the hostages.

MOSCOW (NOV 27) - Soviet servicemen were ordered to use arms in the event of violence and armed attacks on soldiers or military facilities in the union republics, Soviet Defence Minister Dmitry Yazov said Tuesday, the official Tass news agency reported.

Yazov said ''actions against the army have become more frequent lately,'' adding that independent army units were being formed in separate republics. Attacks had been made on military installations and there were cases of the honour and dignity of servicemen and their famiies being impaired.

In the event of unlawful actions against military garrisons, such as the cutting off of electricity and water, commanders were ordered to put the facilities and life support systems under strict guard.

Servicemen were also instructed to act ''decisively to counteract the erection of monuments and other forms of glorifying facists and their hirelings and to eliminate the already existing symbols of this kind,'' said Yazov.

-30- 1182
#90331d6800 11/27/1990 ~French/German News Agency
MOSCOW (NOV. 27) - Soviet soldiers have been given new orders for dealing with unrest in the country's constituent republics, and are now authorized to open fire if they or their installations come under attack, Defence Minister Dmitri Yazov said here Tuesday.

In a filmed statement, Marshal Yazov said the new rules were being enacted on orders from President Mikhail Gorbachev in order to respond to "illegal measures by republics," which threatened the defence of the Soviet Union.

In particular, actions by Soviet republics to set up their own armed forces were "illegal and contrary to the country's defence imperatives," the minister said.

Thefts of arms from military bases, "vandalism against monuments" and "attacks on the honour of soldiers" would not be admitted, he added.

Among other regulations, the minister announced that in the event of local services, such as electricity supply, being withdrawn from troops, the facilities in question would be placed under military control.

The Soviet armed forces "should be in the service of the people," Marshal Yazov said.

Earlier on Tuesday Mr. Gorbachev issued a decree obliging the local authorities in areas where troops are based to register them, so that they receive the same benefits as the civilian population.

In strongly nationalist areas, the local authorities have recently taken to withdrawing benefits and services to military bases.

Commenting on the new rules, Mr. Gorbachev said he had "ordered the defence minister to defend the armed forces against attacks and humiliations."

He added that incidents such as armed attacks on military bases "have nothing to do with democracy.

"They are hysteria. If things go on like this, we'll have to let perestroika go to the devil," he said, referring to his restructuring programme.

"We have to stop the extremists," Mr. Gorbachev said.

TEHERAN (NOV. 27) - Iranian President Ali Akbar Hashemi Rafsanjani met here Tuesday with North Korean armed forces minister, O Jin-U, who handed him a message from North Korean President Kim Il Sung.

Teheran Radio said Mr. Rafsanjani hailed Mr. Kim as "a friend of the Islamic revolution" and described his collaboration with Iran during the war with Iraq as "unforgettable."

The Iranian leader expressed "the desire of the government to develop and deepen relations with North Korea," according to the radio.

O Jin-U, who is heading a 31-member military delegation, said North Korea "will continue its loyalty to the Islamic republic."

"Independence struggles waged against imperialism are an essential factor in relations between Teheran and Pyongyang," he added.

#90331d7060 11/27/1990 ~French/German News Agency

NICOSIA (NOV. 28) - British Labour Party member of parliament Tony Benn met on Tuesday with the speaker of the Iraqi parliament, Saadi Mahdi Saleh, the Iraqi News Agency said in a report monitored here.

Mr. Benn, whose mission to Iraq has not been endorsed by his party, arrived earlier Tuesday to discuss peace moves to settle the Gulf crisis and seek the release of British hostages.

Mr. Saleh, during talks with Mr. Benn, stressed the "need to examine all issues in the region according to the same criteria," INA said.

Mr. Benn underlined the "right of all peoples to life," according to INA, which said the MP expressed his "solidarity with the Iraqi people, faced with military and economic threats."

INA also published a statement by Mr. Benn which called on the United Nations

to play a role in finding peaceful solutions for the region within an Arab framework.

Some 800 Britons are being held against their will in Iraq, including 300 at strategic sites to deter a feared attack from U.S.-led multinational forces that deployed in the Gulf following the August 2 Iraqi invasion of Kuwait.

More than 500 Britons are also reported to be living in hiding in Kuwait. In London, a Foreign Office spokesman said Monday that 60 Britons formerly held at strategic sites in the occupied Gulf kingdom had been moved to the Melia al-Mansour hotel in Baghdad.

The spokesman would not confirm reports that the Britons were to be freed and handed over to Mr. Benn.

Separately, 10 British hostages authorized to leave Iraq on Saturday in response to requests put to President Saddam Hussein by their wives arrived in the Jordanian capital Amman on Tuesday.

Britain's Conservative government under outgoing Prime Minister Margaret Thatcher has been among Iraq's harshest critics over its almost four-month-old occupation of Kuwait.

#90331d7140 11/27/1990 ~French/German News Agency

PARIS (NOV. 28) - France, alongside Indonesia, is ready to convene a new international conference on Cambodia on condition that the Cambodian parties to the conflict settle their "remaining differences," Foreign Minister Roland Dumas said here on Tuesday.

Speaking in parliament here, Mr. Dumas said that France "without yielding to discouragement, has made ever-increasing efforts to restart the negotiation process, which was threatening to get bogged down in indifference, particularly from the superpowers."

France and Indonesia are the two co-chairmen of the Paris International Conference on Cambodia, which last met in August but failed to reach a conclusion.

However, at the weekend officials from the five permanent members of the United Nations Security Council -- Britain, China, France, the Soviet Union and the United States -- plus the two chairmen, met here and agreed on the basic documents for a future Cambodian settlement.

All that remains now is for the Vietnamese-backed Phnom Penh government and the three resistance factions opposing it to agree on concrete steps, particularly the exact composition of a future transitional authority to run

the country.

Mr. Dumas said that France wanted to "allow the former Indochina, the misery of which makes a striking contrast with the prosperity of the southeast Asian region, to at last get down to the tasks of reconstruction."

#90331d7170 11/27/1990 ~French/German News Agency

WASHINGTON, (NOV 27) - Asylum-seekers including a Chinese doctor who treated wounded protesters in the Tiananmen massacre have been unnecessarily held in refugee centers in the United States, a private group said Tuesday.

Instead, the government should expand a pilot program in which 200 refugees were allowed to live in U.S. communities pending a ruling on their asylum request, the Lawyers Committee for Human Rights said.

Those 200 candidates were required to post a 500-dollar bond to ensure they would not disappear, and in almost all cases they reported promptly for immigration hearings in New York, Miami, Los Angeles and San Francisco, the group said.

The Immigration and Naturalization Service (INS) is currently holding some 2,000 refugees in its own facilities, privately-run centers and federal and state jails pending a decision by the government on whether to repatriate them.

At the beginning of the year those refugees included people from China, Afghanistan, El Salvador and Iraq.

"The success of the pilot release program mandates an end to the unnecessary detention of refugees in the United States," the committee said.

The panel has asked INS commissioner Gene McNary to expand the pilot project, but the agency says it is too early to do that.

INS spokesman Duke Austin said the plan was due to last 18 months and "we're not yet through a full cycle of events." The refugees released into the community have agreed to report for deportation if the government decides they do not qualify for asylum.

"We'll wait to see what happens," he said, referring to the possibility of refugees absconding.

Among those held in detention centers before being released in the pilot program was a 29-year-old surgery professor who treated wounded demonstrators in the June 1989 crackdown on pro-democracy ferment in Beijing, the group said. That unidentified doctor spent three months detained in Miami.

Under a 1982 INS regulation, foreigners who arrive without required travel documents are detained unless they are found to pose no risk of disappearing and can get a relative or sponsor in this country to file a petition on their behalf.

#90331d7580 11/27/1990 ~French/German News Agency

JAKARTA (NOV. 28) - Indonesia's balance of payments for the current fiscal year ending in March is estimated to post a surplus of around 1.88 billion dollars, Finance Minister Johannes Sumarlin has said.

"The surplus is a result of a significant lowering of the current account deficit, especially following an increase in net capital inflow," Mr. Sumarlin was quoted by newspapers here as telling a parliamentary committee hearing Tuesday.

Mr. Sumarlin said the current account in the second half of the fiscal year 1990-91 is estimated to record a deficit of only 46 million dollars compared to 2.48 billion dollars for the first six months.

He said he based his figures for the current account -- measuring only transactions of commodities and services -- on projections of the country's total exports and imports for the second half of the fiscal year.

Total exports would stand at 13.96 billion dollars, up 17.2 per cent from the first semester, while imports would reach 14 billion dollars, up 2.7 per cent over the first half of the fiscal year.

Net capital inflow for the second semester was also projected to increase from 1.51 billion dollars in the first half of the fiscal year to 1.93 billion dollars in the second half, Mr. Sumarlin said.

The minister also said that the country's foreign exchange reserves, which he said stood at 6.82 billion dollars last month and which is estimated to reach 8.4 billion dollars by March, were more than enough to cushion the effects of a fall in foreign aid and lower world oil prices.

Indonesian oil and gas export revenues account for almost half of the state's revenue.

He assured Indonesians that the government saw no need to devalue the local currency, the rupiah, because of its determination to keep inflation rate down to a single digit through strict monetary measures and the presence of sufficient foreign exchange reserves.

#90331e0013 11/27/1990 ~Latin America New Agency
Berlin (NOV. 27) EFE - Some 260,000 striking rail workers paralyzed rail traffic in eastern Germany for the second day Tuesday, while union leaders warned that the walkout over more pay and job security could spread to the west, the ADN news agency reported.

Quoting Trade Union leader Rudi Schaefer, ADN said unionists in western Germany had to prevent large numbers of rail workers from joining the protest in solidarity with their eastern colleagues.

The strike began Monday, less than a week before pan-German elections.

All passenger and freight trains - except suburban services - were halted in eastern Germany Tuesday, while trains running from the west to the east were severely reduced.

Railway authorities estimated that some 150,000 people were affected by the strike, the first major labor dispute since German unification.

Union officials have said that metropolitan services in Berlin, Leipzig, Halle and Rostock might also be halted during off-peak hours if no agreement was is reached with the eastern German rail transport management.

The strike was called in demand of wage increases and in protest at plans to lay off some 68,000 workers.

East German railway workers earn roughly one-third of what their western German counterparts are paid.

German unification, which took effect October 3, has brought high prices, rising unemployment and an end to subsidies in eastern Germany.

But in Sunday's pan-German elections, the ruling Christian Democrats, the architects of unification, are expected to remain the leading political force and continue their coalition with the liberal Free Democrats.

Chancellor Helmut Kohl has promised east Germans that unification will raise their living standards rapidly.

#90331e0015 11/27/1990 ~Latin America New Agency
Paris (NOV. 27) EFE - Libyan-backed Chadian rebels have inflicted a heavy defeat on the Chadian Army, French military sources said Tuesday, adding that President Hissene Habre had only narrowly escaped when the column he was leading was ambushed.

But Chad's state radio Tuesday denied rebel claims that 1,200 Army troops were

killed in the battle with Patriotic Salvation Movement (MPS) rebels on Sunday.

It also said the Army had recaptured three towns near the central African nation's eastern border with Sudan, but that heavy fighting was continuing near a French garrison at Abeche.

France has a heavy military presence in its former colony.

The MPS claimed Monday it had routed two Army units over the weekend and was in hot pursuit of Habre who had been leading the Army in its widescale sweep.

It said the rebels had seized the command vehicle and personal documents belonging to Habre, who is believed to have fled on foot.

French Army sources in Paris Tuesday confirmed Habre had only narrowly avoided capture when the heavily-armed column he was leading was ambushed and routed.

The MPS has also claimed that 30 high-ranking officers have deserted to their side and that they captured 30 lorries loaded with arms and provisions in the ambush.

Diplomatic sources in the capital, N'Djamena, said the Army was facing heavy resistance and that Habre had not been seen in public for two days.

The MPS is led by Idris Deby, a former Armed Force chief who fled to Sudan last year after a failed coup.

Deby is said to have a deep personal grudge against Habre who ordered the killing of his cousin, Hasan Yumus, a national hero from past frontier wars with neighboring Libya, although he supported Habre when he took power in 1982.

Libya has renounced its previous claims on parts of northern Chad. But Habre says it is backing the MPS. , which his government refers to as the Islamic Legion.

Although the French Army has intervened in previous disputes between Chad and Libya, defense ministry sources in Paris said it would not get involved in a civil war, despite calls for assistance from Habre's government.

#90331e0044 11/27/1990 ~Latin America New Agency

LIMA (NOV 27) EFE - More than 90 percent of the 600,000 Peruvian state workers who went on strike just under two weeks ago have returned to work, the Labor Ministry said Tuesday.

Despite the back-to-work movement, union leaders have declined to "officially" call off the strike begun November 15 until the government signs a pact with

workers to guarantee an emergency wage agreement.

Prime Minister Juan Carlos Hurtado Miller last week offered the striking workers an emergency package for November of dlrs 45 and another of dlrs 90 for December.

Confederation of State Workers chief Luis Iparraguirre called the package "insufficient" but said the fact that workers were returning reflected their willingness to end the strike.

Iparraguirre has asked the government to sign a pact to guarantee the package, but the government has declined saying the "word of the prime minister is sufficient."

Labor Minister Carlos Torres y Torres-Lara said he would meet in January with business and union leaders to work out pay increases for public and private sector workers.

The government of President Alberto Fujimori implemented drastic austerity measures in August aimed at stabilizing the crisi-hit economy and reducing hyperinflation.

Meanwhile, teachers at state-run schools have called a 24-hour strike Wednesday to demand better salaries.

NAIROBI (NOV. 27) XINHUA - TOURISM IS EXPECTED TO EARN KENYA 10 BILLION KENYAN SHILLINGS (ABOUT 420 MILLION U.S. DOLLARS) IN 1990, SAID AN ASSISTANT MINISTER FOR TOURISM AND WILDLIFE.

THE RULING PARTY NEWSPAPER "KENYA TIMES" TODAY QUOTED MR. MOODY AWORI AS SAYING THAT RECEIPTS OF TOURISM AS A PERCENTAGE OF TOTAL EXPORTS INCREASED FROM 7.9 PERCENT IN 1963 WHEN KENYA GAINED INDEPENDENCE FROM BRITAIN TO 37 PERCENT AND 42 PERCENT IN 1988 AND 1989 RESPECTIVELY.

HE NOTED THAT TOURISM HAS PLAYED A MAJOR ROLE IN THE EAST AFRICAN COUNTRY'S ECONOMY, PARTICULARLY AFTER THE FALL IN PRICES OF KENYA'S TRADITIONAL EXPORTS -- COFFEE AND TEA -- IN THE WORLD MARKET.

TOURIST TRADE, OVERTAKING COFFEE AND TEA, HAS BECOME THE COUNTRY'S LARGEST FOREIGN EXCHANGE EARNER. IT EARNED KENYA 6.9 BILLION SHILLINGS AND 8.6 BILLION SHILLINGS IN 1988 AND 1989 RESPECTIVELY.

THE KENYAN GOVERNMENT HAS SET A TARGET OF ONE MILLION TOURISTS BY THE YEAR 1993, UP FROM THE CURRENT 700,000 PER YEAR.

BEIJING (NOV. 27) XINHUA - MORE THAN 2,500 ANCIENT COINS HAVE BEEN UNEARTHED ON A FARM NEAR YINCHUAN, CAPITAL OF NINGXIA HUI AUTONOMOUS REGION, NORTHWEST CHINA, THE "GUANGMING DAILY" REPORTED TODAY.

THE PAPER SAID THAT WHILE WORKERS WERE LEVELLING LAND ON THE NANLIANG FARM EARLIER THIS MONTH, THEY FOUND A CERAMIC JAR WHICH CONTAINED THE COINS.

UPON EXAMINATION, ARCHEOLOGISTS IN YINCHUAN FOUND THAT THE COINS WERE FROM THE QIN, HAN, TANG, SONG, JIN AND WESTERN XIA DYNASTIES, AND DATE BACK 2,200 TO 700 YEARS.

THE ARCHEOLOGISTS SAID THAT EVEN THOUGH THE COINS HAD BEEN BURIED FOR HUNDREDS OF YEARS, MOST OF THEM ARE IN GOOD CONDITION. THEY ADDED THAT SOME COINS ARE A BIT TARNISHED, BUT THE CHARACTERS ARE STILL CLEAR.

ACCORDING TO THE ARCHEOLOGISTS, ABOUT 70 PERCENT OF THE 2,500 COINS WERE FROM THE NORTHERN SONG DYNASTY. NOTING THAT THE COINS WERE BURIED ONLY A FEW DOZEN KILOMETERS FROM THE CAPITAL OF THE WESTERN XIA DYNASTY, THE ARCHEOLOGISTS SAID THE FIND INDICATES THAT THERE WERE CLOSE CULTURAL AND ECONOMIC LINKS BETWEEN NORTHWESTERN AND CENTRAL CHINA IN THE PAST.

WELLINGTON (NOV. 27) XINHUA - NEW ZEALAND AND HUNGARY HAVE EXPRESSED THEIR INTEREST AND NEEDS FOR INVESTMENT IN EACH OTHER'S COUNTRIES WHILE CONTINUING THEIR EXISTING ECONOMIC COOPERATION.

THIS WAS STATED AT A PRESS CONFERENCE TODAY CO-SPONSORED BY NEW ZEALAND FOREIGN MINISTER DON MCKINNON AND VISITING HUNGARIAN FOREIGN MINISTER GEZA JUSZENSKY.

JUSZENSKY IS THE FIRST HIGH-RANKING OFFICIAL FROM CENTRAL EUROPE TO VISIT NEW ZEALAND.

SHORTLY AFTER HE ARRIVED IN WELLINGTON YESTERDAY TO BEGIN HIS THREE-DAY VISIT, JUSZENSKY SAID THAT HIS COUNTRY HAS OFFERED MORE TO NEW ZEALAND BUSINESS THAN HIS NEIGHBORS, BUT HE WARNED INVESTORS TO BE PATIENT" AS HUNGARY HAS TO "UNFOLD FROM MORE THAN 40 YEARS OF ECONOMIC PARALYSIS".

NEW ZEALAND HAS ALREADY BEEN INVOLVED IN SEVERAL JOINT VENTURES IN HUNGARY. AGRICULTURE OFFERS MANY JOINT VENTURE OPPORTUNITIES WHICH CAN PROVIDE A WAY FOR NEW ZEALAND TO GAIN MORE ACCESS TO THE LUCRATIVE COMMUNITY MARKET, THE HUNGARIAN MINISTER SAID.

MCKINNON SAID AT THE PRESS CONFERENCE THAT NEW ZEALAND IS THANKFUL TO THE HUNGARIAN GOVERNMENT WHICH IS AN ACTIVE MEMBER OF THE CAIRNS GROUP. REGULAR CONTACTS AND ECONOMIC COOPERATION HAVE BEEN MAINTAINED, PARTICULARLY IN AGRICULTURAL RESEARCH, MCKINNON SAID.

LUSAKA (NOV. 27) XINHUA - SMUGGLING OF PETROL INTO ZAIRE BY ZAMBIANS THROUGH

A BORDER POST NAMED KASUMBALESA HAS INCREASED RECENTLY, TIMES OF ZAMBIA REPORTED TODAY.

DARING SMUGGLERS OPENLY DEFY LAW ENFORCEMENT AGENTS WHILE CROSSING THE BORDER ILLEGALLY TO SELL FUEL IN ZAIRE, THE REPORT SAID.

SOURCES AT THE BORDER SAID A FIVE LITRE CONTAINER OF SUPER PETROL CAN FETCH 25 U.S. DOLLARS IN ZAIRE INSTEAD OF ONLY FIVE DOLLARS IN ZAMBIA.

ZAIREANS ARE ALSO SEEN TRYING TO CROSS INTO ZAMBIA THROUGH FOOTPATHS ON THE WESTERN SIDE OF THE BORDER POST.

"SOMETIMES LORRIES ARE DRIVEN THROUGH THE SAME PATHS AT NIGHT TRANSPORTING ESSENTIALS. IT IS UNBELIEVABLE TO THINK OF A TRUCK BEING DRIVEN IN THE BUSH AT NIGHT WITHOUTH BEING CORNERED BY THE ARMY," THE SOURCES SAID.

SUGAR, MEALIE MEAL AND OTHER FOODSTUFFS ARE THE FAVORITE ITEMS FOR SMUGGLING INTO ZAIRE AND IN RETURN THE ZAMBIANS BRING IN CHITENGE MATERIALS, PLASTICS SHOES AND USED CLOTHES.

ON THE ROUTE TO KASUMBALESA, THERE ARE THREE ZAMBIA ARMY CHECK-POINTS.

WINDHOEK (NOV. 27) XINHUA - NAMIBIAN FOREIGN MINISTER THEO-BEN GRURIRAB SOMMONED SPANISH AMBASSADOR CHARLOS DE BOADO MONDAY TO LODGE AN OFFICIAL PROTEST OVER THE ILLEGAL FISHING IN NAMIBIAN WATERS BY SPANISH VESSELS.

THE PROTEST FOLLOWED THE IMPOUNDING OF FIVE SPANISH VESSELS, WHICH WERE FOUND FISHING ILLEGALLY IN NAMIBIAN WATERS, ON NOVEMBER 24. A SIXTH VESSEL MANAGED TO GET AWAY.

"THE NAMIBIAN" NEWSPAPER SAID TODAY THAT FOREIGN MINISTER GURIRAB TOLD THE SPANISH AMBASSADOR THAT THE CULPRITS SHOULD PAY, AND PAY DEARLY FOR THEIR ACTIONS.

GURIRAB SAID THAT BETWEEN 10 AND 12 SPANISH SHIPS CARRYING "STOLEN FISH" CAUGHT OFF NAMIBIA'S COAST WERE HEADED HOMEWARDS.

GURIRAB SAID THAT THE SPANISH GOVERNMENT MUST TAKE SERIOUS STEPS TO ENSURE THAT FISHERMEN STOPPED FISHING ILLEGALLY IN NAMIBIAN WATERS, OR THE ILLEGAL FISHING COULD THROW "COLD WATER ON THE OTHERWISE GOOD RELATIONS BETWEEN THE TWO COUNTRIES."

WELL-EQUIPPED NAMIBIAN HELICOPTERS USED TO INTERCEPT THE BOATS WERE ORDERED ONLY TO SINK THE VESSELS AS A LAST RESORT, MINISTER GURIRAB SAID.

CAPTAINS OF THE IMPOUNDED SPANISH VESSELS WILL APPEAR IN THE COURT IN NAMIBIAN PORT LUDERITZ TODAY. THEIR VESSELS MIGHT BE CONFISTCATED IN ADDITION TO A FINE UP TO 400,000 DOLLARS FOR EACH VESSEL.

WINDHOEK (NOV. 27) XINHUA - POACHERS AND SMUGGLERS IN IVORY AND RHINO HORNS WILL FACE 20 YEARS OF IMPRISONMENT AND FINES UP TO 80,000 U.S. DOLLARS IN NAMIBIA ONCE A NEW BILL TABLED IN THE NAMIBIAN NATIONAL ASSEMBLY BECOMES LAW.

INTRODUCING THE BILL TO THE ASSEMBLY MONDAY, MINISTER OF WILDLIFE, CONSERVATION AND TOURISM NICO BESSINGER SAID THE INCENTIVES TO POACH HAS BECOME SO GREAT THAT WELL-ARMED GANGS CROSS INTERNATIONAL BOUNDARIES TO POACH RHINOS AND ELEPHANTS IN NAMIBIA.

THE BLACK RHINO POPULATION IN AFRICA HAS DRASTICALLY DECLINED FROM AN ESTIMATED 68,000 TO 3,000 SINCE 1970.

THIS RAPID DECLINE IN NUMBERS HAS BEEN ACCELERATED BY POACHING FOR THE RHINO HORN, WHICH IS VALUED AT ABOUT 25,000 DOLLARS A KILOGRAM ON THE BLACK MARKET IN THE FAR EAST.

NAMIBIA HAS ABOUT 400 RHINOS AND 6,000 ELEPHANTS WITHIN ITS TERRITORY. BESSINGER SAID THAT THE JUDICIARY SHOULD HAVE NECESSARY POWERS TO COMBAT THE THREAT TO THE COUNTRY'S RENEWABLE NATURAL RESOURCES.

BELGRADE (NOV. 27) XINHUA - A STRONG EARTHQUAKE BROKE OUT IN THE YUGOSLAV

COASTAL REGION OF DALMATIA EARLY MONDAY MORNING, SLIGHTLY AFFECTING BELGRADE AND SARAJEVO.

BUT NO CASUALTIES WERE REPORTED YET. ACCORDING TO THE BELGRADE SEISMIC BUREAU, THE QUAKE, WHICH ERUPTED AT 5:40 LOCAL TIME, REGISTERED 5.5 MAGNITUDE ON THE RICHTER SCALE, WITH ITS EPICENTER IN THE MOUNTAIN AREA ABOUT 30 KILOMETERS TO THE NORTHEAST OF SPLIT CITY IN THE COASTAL REGION OF THE ADRIATIC SEA.

THE OFFICIAL TANJUG NEWS AGENCY SAID THE QUAKE SHOCKED THE SLEEPING RESIDENTS IN THE DALMATIA AND OTHER NEIGHBORING REGIONS INCLUDING SARAJEVO, ZENICA AND LIVNO, WHO IMMEDIATELY LEFT THEIR HOMES FOR PARKS OR SQUARES.

AFTERSHOCKS WERE STILL FELT, TANJUG ADDED. IN JULY 1973, SKOPLJE, CAPITAL OF THE REPUBLIC MACEDONIA, SAW A STRONG QUAKE OF OVER 6 MAGNITUDES ON THE RICHTER SCALE, WHICH KILLED MORE THAN 1,100 PEOPLE.

DAR ES SALAAM (NOV. 27) XINHUA - PRESIDENT ALI HASSAN MWINYI HAS APPOINTED 20 REGIONAL COMMISSIONERS OF TANZANIA MAINLAND WHO WILL ALSO BECOME REGIONAL SECRETARIES OF THE RULING REVOLUTIONARY PARTY.

ACCORDING TO THE LIST PUBLISHED HERE TODAY, 12 OF THE 20 REGIONAL LEADERS WERE NEW COMERS AND THE REST WERE FORMER REGIONAL COMMISSIONERS OR REGIONAL PARTY SECRETARIES.

TWELVE FORMER REGIONAL COMMISSIONERS LOST THEIR POSTS IN THE NEW LINE-UP. SEVERAL OF THEM ALSO LOST THEIR PARLIAMENT SEATS IN THE GENERAL ELECTIONS LAST MONTH.

THE RULING PARTY MADE THE DECISION TO MERGE THE GOVERNMENT AND THE PARTY AT CENTRAL, REGIONAL AND DISTRICT LEVEL LAST FEBRUARY TO SAVE EXPENDITURE, SIMPLIFY THE ADMINISTRATIVE STRUCTURE OF THE PARTY AND TO STRENGTHEN THE CENTRALIZED LEADERSHIP.

THE MERGER AT THE CENTRAL LEVEL WAS DONE IN AUGUST WHEN PRESIDENT MWINYI WAS ELECTED CHAIRMAN OF THE PARTY AFTER FORMER CHAIRMAN JULIUS NYERERE VOLUNTARILY RETIRED.

MR. MWINYI IS EXPECTED TO APPOINT DISTRICT LEADERS SOON. THE REVOLUTIONARY PARTY IS THE SOLE POLITICAL PARTY IN TANZANIA. ACCORDING TO THE CONSTITUTION, THE GOVERNMENT FUNCTIONS UNDER THE LEADERSHIP OF THE RULING PARTY.

SINGAPORE (NOV. 27) XINHUA - THE MALAYSIAN GOVERNMENT HAS AGREED TO THE DEFENSE MINISTRY ACQUIRING FOUR SUBMARINES -- TWO NEW ONES AND TWO REFURBISHED ONES, SAID MALAYSIAN DEFENSE MINISTER DATUK SERI NAJIB TUN RAZAK.

ACCORDING TO A REPORT BY THE RADIO AND TELEVISION OF MALAYSIA (RTM) TODAY, THE MINISTER SAID THE PURCHASE OF THE SUBMARINES WOULD COST MORE THAN ONE BILLION MALAYSIAN RIGGIT (373 MILLION U.S. DOLLARS), TO BE PAID IN A PERIOD OF ABOUT 10 YEARS.

HE DECLINED TO DISCLOSE THE TYPE AND MAKE OF THE SUBMARINES. "WE HAVE IDENTIFIED THEM AND ARE NOW IN THE FINAL STAGE OF DISCUSSION ON THE PURCHASE AND MODE OF PAYMENT," HE SAID.

ON THE DEFENSE ALLOCATION IN THE 1991 BUDGET, HE SAID IT WOULD REFLECT THE GOVERNMENT'S COMMITMENT TOWARDS BUILDING A STRONG AND CAPABLE DEFENSE FORCE.

OTTAWA (NOV. 27) XINHUA - APPROXIMATELY 14,500 WORKERS OF CANADA'S BIG THREE AUTO MAKERS FACE WORK STOPPAGES BEFORE THE END OF THE YEAR AS A RESULT OF SLUMPING CAR SALES ACROSS NORTH AMERICA.

FORD MOTOR CO. OF CANADA LTD. -- THE COUNTRY'S NUMBER TWO AUTO MAKER -- ANNOUNCED MONDAY TEMPORARY LAYOFFS AFFECTING 4,100 WORKERS AT SIX PLANTS.

LAST WEEK, GENERAL MORTORS OF CANADA LTD., CANADA'S LARGEST AUTO PRODUCER, ANNOUNCED TEMPORARY LAYOFFS FOR 7,600 WORKERS. AND THE NUMBER THREE AUTO MAKER OF CHRYSLER CANADA LTD. HAS ALSO ANNOUNCED TEMPORARY LAYOFFS FOR 2,800 OF ITS WORKERS.

CANADIAN AUTO INDUSTRY SPOKESMEN ATTRIBUTED THE LAYOFFS TO SLUMPING SALES IN CANADA AND THE UNITED STATES, WHERE 80 PERCENT OF CANADIAN PRODUCTION GOES.

THE BIG THREE AUTO COMPANIES, ALL OF WHICH POSTED CONTINUED SALES DECLINES ACROSS CANADA DURING THE PAST FEW MONTHS, HAVE BLAMED THE COUNTRY'S HIGH INTEREST RATES FOR SLUMPING SALES. THE ANNUAL INTEREST RATE FOR A CAR LOAN IN CANADA HOVERED AROUND 17 PERCENT OVER THE PAST FEW MONTHS.

ALL THE THREE COMPANIES HAVE SAID THE LAYOFFS ARE TEMPORARY AND THE PLANTS ARE SCHEDULED TO RESUME FULL PRODUCTION BY JANUARY 2, 1991.

THE WORKERS CAN GET BETWEEN 80-AND-95 PERCENT OF THEIR SALARY DURING THE LAYOFF PERIOD THROUGH UNEMPLOYMENT INSURANCE AND SUPPLEMENTARY BENEFITS PAID BY THEIR COMPANIES.

TOKYO (NOV. 27) KYODO - MITSUI AND CO. HAS SET UP A DISTRIBUTION SERVICE VENTURE IN SHANGHAI WITH ITS GROUP COMPANY MITSUI WAREHOUSE CO., AND TWO CHINESE PUBLIC CORPORATIONS, THE COMPANY SAID TUESDAY.

THE NEW FIRM, SHANGHAI XINCHANG DISTRIBUTION PROCESSING SERVICE CO., IS CAPITALIZED AT 1.5 MILLION U.S. DOLLARS (ABOUT 130 MILLION YEN), MITSUI OFFICIALS SAID.

CHINA NATIONAL FOREIGN TRADE TRANSPORTATION CORP. AND ITS BRANCH IN SHANGHAI ARE THE CHINESE PARTNERS.

THE FOUR PARTNERS EACH PUT UP 25 PERCENT OF THE CAPITAL AND WILL START OPERATIONS OF THE NEW FIRM AT TEMPORARY FACILITIES IN DECEMBER.

THE NEW COMPANY WILL INSPECT PRODUCTS TO BE EXPORTED FROM CHINA BEFORE SHIPMENT, AND PROVIDE LABELING, PACKING AND ADDITIONAL PROCESSING SERVICES.

IT WILL ALSO WORK TO PREVENT LEGAL CLAIMS BY CHINA'S TRADING CUSTOMERS BY IMPROVING PRODUCT MANAGEMENT AND MEETING DELIVERY DATES, THE OFFICIALS SAID.

OPERATING A DISTRIBUTION SERVICE COMPANY IN CHINA, WHERE LABOR COSTS ARE LOWER THAN IN JAPAN, WILL BENEFIT THE MITSUI COMPANIES, THEY SAID.

THE PERMANENT FACILITIES OF THE NEW FIRM WILL BE COMPLETED NEXT YEAR. IT EXPECTS ANNUAL SALES OF 2 MILLION DOLLARS IN THE INITIAL YEAR AND 4 MILLION DOLLARS IN THREE YEARS.

#90331k0082 11/27/1990 ~Japanese News Agency

TOKYO (NOV. 27) KYODO - THE NUMBER OF FOREIGN TOURISTS TO JAPAN THIS YEAR WAS ESTIMATED TO HAVE EXCEEDED 3 MILLION FOR THE FIRST TIME AS OF TUESDAY, A TOURIST ORGANIZATION SAID.

THE JAPAN NATIONAL TOURIST ORGANIZATION, AN AFFILIATE OF THE TRANSPORT MINISTRY, SAID THE NUMBER OF FOREIGN TOURISTS HAD INCREASED 370,000 OR 15.7 PERCENT OVER THE SAME PERIOD OF THE PREVIOUS YEAR AND THAT IT IS CERTAIN THAT THE OVERALL NUMBER EXCEEDED 3 MILLION TUESDAY.

THE NUMBER OF FOREIGN TOURISTS TOTALED A RECORD 2.83 MILLION LAST YEAR, THE ORGANIZATION SAID.

THE ORGANIZATION ESTIMATES THE NUMBER OF FOREIGN TOURISTS TO JAPAN IN THIS YEAR AS A WHOLE WILL REACH 3.2 MILLION.

TOURISTS FROM ASIAN AND MIDDLE EAST REGIONS ACCOUNTED FOR 60 PERCENT OF THE INFLUX, THOSE FROM NORTH AMERICA 20 PERCENT, AND THOSE FROM EUROPE 15 PERCENT, THE ORGANIZATION SAID.

SOUTH KOREA TOPPED THE LIST OF COUNTRIES OF ORIGIN, FOLLOWED BY TAIWAN AND THE UNITED STATES.

IN THE TWENTY YEARS BETWEEN 1964 AND 1984 THE NUMBER OF FOREIGN TOURISTS CLIMBED FROM 352,000 TO 2.11 MILLION.

#90331k0085 11/27/1990 ~Japanese News Agency

TOKYO (NOV. 27) KYODO - NIPPON SUISAN KAISHA LTD., JAPAN'S TOP FISHING FIRM, PLANS TO DRASTICALLY REDUCE THE NUMBER OF ITS TRAWLERS IN THE FACE OF INCREASINGLY STRICT REGULATIONS ON FISHING, ACCORDING TO INDUSTRY SOURCES.

THE DEMANDS ABROAD FOR TOUGHER CURBS ON FISHING IS FORCING JAPANESE COMPANIES TO SCALE DOWN THEIR INTERNATIONAL OPERATIONS.

THE COMPANY, WHICH NOW HAS 14 TRAWLERS AND ABOUT 900 CREWMEN, WILL LIKELY GIVE THE ALL JAPAN SEAMEN'S UNION ITS FORMAL FLEET REDUCTION PLAN BY THE END OF THE YEAR, THEY SAID.

ANOTHER MAJOR JAPANESE FISHING FIRM, TAIYO FISHERY CO., HAS ALSO AGREED WITH THE SEAMEN'S TRADE UNION ON ITS REDUCTION OF ITS TRAWLER FLEET FROM THE PRESENT 15 TO EIGHT.

-30- 857

#90331k0086 11/27/1990 ~Japanese News Agency

TOKYO (NOV. 27) KYODO - MITSUBISHI MOTORS CORP. SAID TUESDAY IT HAS DONATED A FLEXIBLEFUEL VEHICLE (FFV) TO THE CALIFORNIA ENERGY COMMITTEE (CEC) FOR THE STATE'S PROGRAM ON FFVS, OR VEHICLES FUELED BY METHANOL INSTEAD OF GASOLINE.

THE FFV, BASED ON MITSUBISHI'S GALANT SEDAN, WILL BE USED AS A TEST CAR BETWEEN NOVEMBER 1990 AND DECEMBER 1992 TO DETERMINE THE PRACTICAL USE OF METHANOL-FUELED AUTOS, MITSUBISHI OFFICIALS SAID.

UNDER TOUGHER ANTIAIR POLLUTION LEGISLATION IN CALIFORNIA, THE CEC HAS BEEN STUDYING THE PRACTICAL USE OF METHANOL AS AUTO FUEL. METHANOL GENERATES LESS HYDROCARBON EMISSIONS THAN GASOLINE AND OTHER PETROLEUM FUEL.

-30- 804

#90331k0088 11/27/1990 ~Japanese News Agency

TOKYO (NOV. 27) KYODO - JAPAN'S PETROLEUM WHOLESALERS NOTIFIED RETAILERS TUESDAY THAT THEY WILL RETAIN THE CURRENT LEVELS OF WHOLESALE PRICES OF LIQUIFIED PETROLEUM GAS (LPG) OR EVEN LOWER THEM IN DECEMBER.

IDEMITSU KOSAN CO. AND KYODO OIL CO. SAID IT WILL NOT RAISE ITS CURRENT PRICES WHILE AN AFFILIATE OF COSMO OIL CO. SAID IT WILL CUT ITS PRICE BY 0.30 YEN PER BARREL FROM DECEMBER 1.

LPG PRICES WERE RAISED OVER THE PAST TWO MONTHS DUE TO THE PERSIAN GULF CRISIS.

HOWEVER, A CRUDE OIL PRICE HIKE BY SAUDI ARABIA OF AROUND 10 DOLLARS PER TON IN NOVEMBER WAS OFFSET BY THE YEN'S RECENT ADVANCE AGAINST THE U.S. DOLLAR, ACCORDING TO OFFICIALS OF THE COMPANIES.

INDUSTRY SOURCES SAID OTHER WHOLESALERS MAY FOLLOW SUIT.

BANGKOK (NOV.27) KYODO - THAILAND AND VIETNAM HAVE AGREED IN PRINCIPLE TO ESTABLISH A JOINT FISHING VENTURE CAPITALIZED EQUALLY BY NATIONAL COMPANIES OF THE TWO COUNTRIES, THAI FISHERY DEPARTMENT DIRECTOR GENERAL PLODPRASOB SURASAWADEE SAID TUESDAY.

PLODPRASOB SAID DURING HIS LATEST VISIT TO VIETNAM LAST WEEK, HE SIGNED A NOTE OF UNDERSTANDING WITH HIS VIETNAMESE COUNTERPART CONCERNING THE ESTABLISHMENT OF THE JOINT VENTURE.

HE SAID BOTH SIDES AGREED TO SET UP THEIR OWN NATIONAL COMPANIES BY THE END OF THIS YEAR WHILE THE JOINT THAI-VIETNAMESE COMPANY SHOULD BE REALIZED IN THE FIRST QUARTER OF NEXT YEAR.

THE FIRST PHASE OF THE JOINT VENTURE, PLODPRASOB SAID, WILL INVOLVE A VIETNAMESE GOVERNMENT CONCESSION ALLOWING THE JOINT VENTURE TO FISH A MINIMUM OF 50,000 TONS A YEAR WITH A FLEET OF 100-150 BOATS FROM THAILAND IN VIETNAMESE WATERS FOR 20 YEARS.

THE SECOND PHASE WILL INCLUDE THE SETTING UP OF RELATED INDUSTRIES, SUCH AS DOCK AND COLD-STORAGE, IN VIETNAM, ACCORDING TO THE DIRECTOR.

A TECHNICAL TEAM FROM THAILAND WILL VISIT VIETNAM AGAIN DECEMBER 9-20 TO MAKE A DETAILED STUDY FOR THE JOINT VENTURE, HE SAID.

#90331m0001 11/27/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (NOV. 27) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

IN THE NEWS:

World stocks are lower this morning. ... The Nikkei loses 139 points. dollar is mixed. ... The long bond is yielding 8.43% in overseas trading. ... Crude oil prices are firm with Brent off two cents at $33.03. ... MCA agreed to be acquired by MATSUSHITA ELECTRIC for about $6.59 billion in a mostly cash deal, the largest-ever U.S. purchase by a Japanese company. ... NAVISTAR INTERNATIONAL says it has raised its stake in Mexican truck builder DINA CAMIONES from 5% to 17%. ... CHRYSLER is offering rebates for the first time on its redesigned 1991 mini-vans in a bid to hold on to past buyers of its most profitable vehicle. ... Canada's ALLEGIANCE CAPITAL and Sweden's IKEA are launching an economy hotel chain in North America.

WHAT'S AHEAD:

An SEC-backed conference today is considering securities-clearance changes, including replacing stock certificates with electronic entries. ... TOYOTA MOTOR CORP. is expected to announce today that it will build a second auto assembly plant in the United States. ... MIDWAY AIRLINES says it will delay closing the planned sales of its Philadelphia operations to USAIR GROUP to give the JUSTICE DEPARTMENT more time to review the deal.

FROM THE BULLS:

"I am having growing doubts about the talk [that] stocks are in a bear market " says GENE JAY SEAGLE of GRUNTAL & CO. "The ability of the market to survive the sell-off tells me that it doesn't want to go down much." Seagle predicts that the market will be over 2700 by the end of December. ("Investor's Daily" 11/27)

"I think we've seen the bottom and we'll go up from here," says MICHAEL METZ, chief investment strategist for OPPENHEIMER & CO. The fact that stock prices could rise in the face of rising oil prices shows an underlying desire to move stock prices higher, says Metz. (WSJ, 11/27)

"Uncertain times have proven to be outstanding buying opportunities," says BERNARD SCHAFFER at the "Option Advisor". "Bearishness in the extreme bodes well for our conclusion the market has bottomed." (CNBC "World Business", 11/27)

FROM THE BEARS:

Stock investors are treading on thin ice if they think share prices are headed much higher, says JAMES SOLLOWAY, chief economist at ARGUS RESEARCH. "Some of the bullishness toward bonds may be warranted," he says, "but I'm concerned that here we are in the midst of a recession that is only now beginning to bite and yet we have a price- earnings ratio on the S&P [Standard & Poor's index of 500 stocks] of 14 and a P/E of over 12 on the Dow Jones industrials. Given where we are in the cycle, that's on the high side." (WSJ, 11/27)

"Yes, Virginia, it is still a bear market," says the Wellington Letter. While the market could rally, the longer term negatives outweigh any shorter term positives, say the editors: "Any move above Dow 2626 offers superb opportunity to add to short positions." (CNBC "World Business", 11/27)

"For all we know, this could be another 1972, when stocks go down and stay down for 10 years," says PETER CANELO, chief investment strategist for BEAR STEARNS & CO. He urges caution in buying stocks by limiting purchases primarily to electric and gas utility stocks because they pay high dividends and are generally safe. He says the key to picking stocks and bonds now is "financial stability." All stocks and bonds must be rated at least A-plus. (WSJ, 11/27)

STOCK MARKET:

GAIL DUDACK at S.G. WARBURG says another decline in BOEING stock yesterday shows "the unforgiving nature of this market. People are still trying to 'talk' the broader market higher, but once an individual stock gets hit hard - once it's out of favor - it stays out of favor." ("The Washington Post", 11/27)

"The market is acting as if the interest rate environment will continue to

improve," says BEAR STEARNS strategist PETER CANELO. "It's not going to worry too much about oil." (NYT, 11/27)

"We have more than enough oil, floating around the world today, to meet demand " says MARSHALL ACUFF of SMITH BARNEY. He says that surplus will keep oil prices stable, and claims that to be "constructive" for both the stock and bond markets. "We think the bond market still has a ways to go. We think in the equity market there are buyers under this market, and we saw some of that" on Monday. (FNN "Marketwrap", 11/26)

PHIL RETTEW, market specialist for MERRILL LYNCH, sees no evidence that stock prices are awaiting an opportunity to stage a breakout to the upside. He sees resistance above 2580 on the industrial average and expects to see the market in a wide trading range until the fundamentals change the market's dynamics. (WSJ, 11/27)

"The Fed has been restraining money supply growth and the economy needs money to grow," says MONTE GORDON at DREYFUS CORP. "The market is ignoring the short-term hysteria over Iraq. Instead, it's anticipating a significant turn in monetary policy and for the longer term that would be a bullish sign." ("USA Today", 11/27)

"You don't want to get all your money committed to stocks before the market makes its final low," says BRAD PERRY, chairman of DAVID L. BABSON CO., an investment-management firm in Cambridge, Mass. (WSJ, 11/27)

"The market is such a contrarian animal [that many past military actions] have been fairly decent buying opportunities," says LANCE STONECYPHER of NED DAVIS RESEARCH. "With the negative money growth, we're looking at a long-term recession now. [The opportunities] should be looked at in a shorter-term context." ("Investor's Daily", 11/27)

STOCK TIPS:

"It's a stock picking market," says GABELLI GROWTH FUND manager ELIZABETH BRAMWELL. She likes MERCANTILE STORES CO., MEAD CORP. and TIMKEN CO. Twenty percent of the 125 companies in her portfolio are selling below book value, which she says is "odd for a growth fund." ("Investor's Daily", 11/27)

"Selected technology stocks like IBM, INTEL [and] DIGITAL EQUIPMENT look good " says MARSHALL ACUFF of SMITH BARNEY. He also likes some cyclicals such as DOW CHEMICAL and some of the drug stocks. (FNN "Marketwrap", 11/26)

SANTA FE PACIFIC CORP. and its plans to split into three separate companies are featured in the "Company Spotlight" in "USA Today" this morning. Some analysts are pessimistic about how the new stocks will be received. "The market is currently unkind to asset-play situations," says GRAEME LIDGERWOOD at FIRST BOSTON. "It's an issue of timing." ANTHONY HATCH at PAINEWEBBER

says: "Spin-offs get dumped on. The index funds sell them indiscriminately. After a couple of weeks, we'll see the true values of the new companies." ("USA Today", 11/27)

CHRYSLER shares are cheap and likely to get even cheaper. That's the opinion of BERNARD SCHAFFER at the "Option Advisor" who advises buying the January 10 put. A short squeeze could drive FOREST LABS as high as 55, and Schaffer likes the February 50 call. RUBBERMAID is likely to break resistance at 39; buy the February 40 call, says Schaffer. (CNBC "World Business", 11/27)

MICHAEL METZ, chief investment strategist for OPPENHEIMER & CO., suggests an aggressive stock move for retirement portfolios. He would put two-thirds of the retirement payout into two types of stock funds: single country closed-end funds and small-company growth-stock funds. He likes the closed-end funds, such as EMERGING GERMANY FUND, EMERGING MEXICO FUND, FRANCE GROWTH FUND, JAKARTA GROWTH FUND and UNITED KINGDOM FUND, partly because they're selling for less than the value of the stocks they hold. Thus, "you can buy professional management at a discount now." In addition, he says, growth in Europe and Southeast Asia is going to exceed U.S growth in the next five years. Metz would put the rest of the retirement account into seven-to-10 year government bonds. (WSJ, 11/27)

K.C. GRAINGER of JESUP, JOSEPHTHAL & CO. says a surge in insider buying is focused on secondary stocks, many of them regional banks. Among the specific stocks he mentions as favorites of inside buyers are HOUSEHOLD INTERNATIONAL, WOLVERINE WORLDWIDE, LAMPSON & SESSIONS, PLACERDOME GOLD and PEGASUS GOLD. (CNBC "Market Wrap-Up", 11/26)

BRAD PERRY, chairman of DAVID L. BABSON CO., is cautious on the stock market currently, but suggests a gradual movement into stocks. Mr. Perry would select "high-growth companies whose prices have dropped to reasonable valuations in the market decline." He likes ANHEUSER- BUSCH, DILLARD DEPARTMENT STORES, AUTOMATIC DATA PROCESSING and SIGMA-ALDRICH. Mr. Perry also recommends "quality companies in troubled industries" such as AMERICAN INTERNATIONAL GROUP in insurance, BANC ONE in banking, GEORGIA-PACIFIC in paper and KING WORLD PRODUCTIONS in entertainment. (WSJ, 11/7)

"SYNOPTICS COMMUNICATIONS ran into some panic profit-taking," says ALICE BRADIE of HAMBRECHT & QUIST INC. "The company's in really good shape." ("Investor's Daily", 11/27)

-30- 9380

#90331m0002 11/27/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (NOV. 27) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

MONEY & CREDIT:

"The Fed doesn't usually change reserve requirements as its normal course of executing monetary policy," says WILLIAM SILBER of the NEW YORK UNIVERSITY STERN SCHOOL OF BUSINESS. But such a change has been considered as a way of helping to boost banks' earnings. (FNN "Marketwrap", 11/26)

"I predict that before this recession is over, we will have a reduction in [bank] reserve requirements," says BILL WOLMAN, chief economist at "BusinessWeek" and "CNBC." "It's probably not very far away. ... Will it do the trick? I really think the trick is going to await a resolution on the Mideast, but it sure will help. I think we have to do something quickly or the economy really will deteriorate. So I think it is a good idea to raise the issue of getting the Fed to pump out more money directly by reducing bank reserve requirements. It's the most dramatic move they can make and they should make it. We're in trouble if they don't. ... I think we have to go full throttle to ease money at this point, and we will before very long." (CNBC "Market Wrap-Up", 11/26)

Over the past year, the high yield market has been more attractive than the stock market to arbitraguer CHARLES LEMONIDES of GRUNTAL & COMPANY. "We think the faster rebound will be in the high yield environment where there is a fixed payout over time and the analysis techniques are similar to risk arbitrage." Lemonides says there's no credit crunch at SAFEWAY where a 12% yield makes their bonds attractive to income oriented investors. Slightly more aggressive is RJR where non-cash paying bonds could return 20% over the next three and a half years, according to Lemonides. (FNN "Business A.M.", 11/27)

"Rates could begin dropping much faster, and very soon," says ROBERT BRUSCA of NIKKO SECURITIES CO. The underlying strength of the market is the basis for that decline in bond yields and other interest rates. ("Investor's Daily", 11/27)

STEVE RICCHUITO, an economist at BARCLAYS de ZOETE WEDD SECURITIES, INC., says the shift from short-term to longer-term securities is a sign that investors are becoming more confident and want to get the biggest bang for their investment buck. Although long-term securities are riskier than short-term securities, "if you believe that a recession will bring down interest rates and that oil prices are coming down, you want to be in long-term paper" since long-term securities appreciate faster than short-term securities when the market is rising, says Mr. Ricchuito. (WSJ, 11/27)

"What we saw [Monday] was a demonstration of the bond market's resiliency," says WILLIAM SULLIVAN of DEAN WITTER REYNOLDS. "The bond market is no longer intimidated by rising energy prices." (NYT, 11/27)

"Bonds generally ignored the higher crude prices," says DENNIS JARRETT of

KIDDER, PEABODY. "The equity and bond markets then moved in lock step." (NYT 11/27)

THE ECONOMY:

"Only by bringing inflation under control will we be able to promote maximum economic growth in the U.S. economy in the years ahead," says ROBERT PARRY, president of the FEDERAL RESERVE BANK OF SAN FRANCISCO. He believes "more prudent lending standards should be applauded because they enhance the stability of our economy." ("Investor's Daily", 11/27)

While recent years have seen inflation among service-sector prices, that factor is likely to be lessened as the current downturn means "some slowdown in the volume of activity in the service industry is likely," according to GEOFFREY MOORE, director of the CENTER FOR INTERNATIONAL BUSINESS CYCLE RESEARCH. He says overall, "inflation will continue to be a problem in the sense that it will be (growing at a rate of) 4%, but that does not mean it will be accelerating." ("Investor's Daily", 11/27)

ROBERT BRUSCA, an economist at NIKKO SECURITIES INC., cautioned that economic fundamentals may soon take a back seat to the escalating conflict in the Middle East. "The rhetoric is getting harsher, and [PRESIDENT BUSH and IRAQI PRESIDENT SADDAM HUSSEIN] are backing themselves into a corner and will wind up fighting their way out." (WSJ, 11/27)

"Unless we get something dramatically new, I think that resistance level [of $36 a barrel for oil] may prove to be a tough barrier," says WILLIAM O'NEILL, chief futures strategist at MERRILL LYNCH. "I think it's a crucial level. Technically, if we can close over that, there probably would be about another $2 in the market. So it's an important level technically and fundamentally." (CNBC "Market Wrap- Up", 11/27)

#90331p8341 11/27/1990 ~PR Newswire

SALT LAKE CITY (NOV. 27) PR NEWSWIRE - American Stores Co. (NYSE: ASC) today announced sales for the 13-week third quarter ended Nov. 3, 1990, amount ed to $5,443,766,000, an increase of 3.30 percent over 1989. Sales year-to-date were $16,447,302,000, an increase of 3.69 percent over 1989. Like store sales increased 2.39 percent for the 13-week quarter and increased 2.72 percent for the 39 weeks year-to-date.

Third quarter earnings per common share were $0.89 versus $0.60 per common share in 1989, an increase of 48.33 percent.

The third quarter of 1990 includes gains on the sale of assets of $0.10 per common share, the majority of which related to the gain on the sale of the Buttrey Food and Drug Division. The third quarter of 1989 includes earnings

of $0.26 per common share from the sale of assets and expenses of $0.06 per common share resulting from the San Francisco earthquake. Net earnings for the third quarter 1990 were $30,906,000 compared to $18,847,000 in the third quarter of 1989.

Net earnings for the 39 weeks ended Nov. 3, 1990, amounted to $96,353,000, or $2.79 per common share compared to $65,002,000, or $1.84 per common share, for the comparable period of the prior year. The 1990, 39-week year-to-date includes earnings of $0.16 per common share from the sale of assets, while the 1989 year-to-date earnings per common share were increased by $0.56 per common share for non-recurring items. The 1989 non-recurring items were $0.46 from the sale of assets, $0.16 per common share of interest income associated with the Eagle sale partially offset by a charge of $0.06 per common share from expenses incurred as a result of the San Francisco earthquake.

The pre-tax LIFO charge to earnings in the third quarter of 1990 was $22,500,000 and decreased earnings per common share by $0.39 compared to $22,500,000 or $0.43 per common share in 1989. The year-to-date pre-tax LIFO charge to earnings of $62,500,000 decreased earnings per common share by $1.09 in 1990, compared to a pre-tax charge to earnings of $55,500,000, or $1.09 per common share in 1989.

#90331p8365 11/27/1990 ~PR Newswire

WEST LONG BRANCH, N.J. (NOV. 27) PR NEWSWIRE - Electronic Associates, Inc. (NYSE: EA) today announced an agreement to purchase 215,200 shares of its common stock from Raymond G. Perelman and two companies owned by him as part of the settlement of a derivative lawsuit brought by Perelman against EAI and certain of its current and former directors. The purchase of Perelman's stock EAI said, is separate from a 200,000-share open-market purchase plan announced Nov. 8, which will continue unchanged.

The purchase from Perelman will be at a price of $2.50 per share. In addition, Perelman will receive reimbursement of $125,000 of expenses incurred as a result of the lawsuit and other activities undertaken by him as a shareholder of EAI. EAI's insurer will pay $112,500 of these expenses. Thus, the total value of the transaction will be $663,000, and the cost to EAI will be $550,500. Funds for the purchase will be provided by bank financing.

The retirement of Perelman's shares into treasury stock should have a favorable effect on EAI's earnings per share and book value per share, said Robert G. Finney, president and chief executive officer. However, as a result of this transaction, EAI is required to record a charge in the fourth quarter equal to the difference between EAI's transaction cost and the current market price of the stock. With the current market price of $2.125 per share, that

charge will be $93,200 before tax.

"The purchase of all of the stock owned and controlled by Mr. Perelman brings to an end a relationship marked by disagreement and expense," a company statement said. "This year, for example, he sued the company and the directors over the EAI-Japan sale. While we believe this lawsuit was without merit, we have had to spend a substantial amount to date defending it. This agreement allows both Mr. Perelman and the company to concentrate on more fruitful pursuits. Mr. Perelman, his son Jeffrey and their affiliated companies have agreed not to purchase any EAI shares for five years."

Based in West Long Branch, N.J., EAI is engaged principally in two service businesses, contract manufacturing and field service, serving users and producers of electronic products and items. In contract manufacturing, EAI provides manufacturing services for products designed and marketed by customers. In field service, the company provides independent maintenance of electronic equipment.

#90331p8366 11/27/1990 ~PR Newswire

SEATTLE (NOV. 27) PR NEWSWIRE - After ruling that the trade name "Univar" belongs to Seattle-based Univar Corp. (NYSE,PSW: UVX) , a company incorporated in 1924, the United States District Court in Los Angeles has ordered Software Acquisition Corp. and its wholly-owned subsidiary, Software Central, Inc., to cease using the name "Univar" as its own, and to turn over for destruction all signage, printed materials and other items which have the Univar name on them. The order came as a result of a motion for summary judgement filed in Los Angeles by Univar Corp., and granted by U.S. District Judge David Kenyon, Univar announced today.

"We are gratified by Judge Kenyon's decision," said Univar President and Chief Executive Officer James W. Bernard. "The Univar name is one we've worked hard to build over the decades, and the courts have upheld the correctness of our determination to aggressively pursue those who try to misappropriate it."

Univar Corp. is the corporate parent of Van Waters & Rogers Inc., America's largest chemical distributor, and Van Waters & Rogers Ltd., which is one of Canada's largest chemical distributors. Univar has a long history of creating value growth by acquiring, building and then selling or spinning off companies. Three other publicly traded companies, Penwest, VWR Corp. and Momentum Distribution Inc., were formed as spin-offs during the mid- to late-'80s. Within the past decade, Univar has bought and/or sold companies involved in activities ranging from grain milling to manufacturing, to distribution of electronic components.

#90331p8367 11/27/1990 ~PR Newswire

NEW YORK (NOV. 27) PR NEWSWIRE - Doctors say a new breast implant with a textured outer surface rather than the conventional smooth surface, solves a cosmetic problem familiar to the 100,000 women who have breast reconstruction and augmentation surgery every year: "Hard Breast Syndrome."

Hard Breast Syndrome occurs when a thick layer of scar tissue encapsulates a breast implant, causing the breast to feel and look hard and unnatural. Doctors call this phenomenon capsular contracture because the implant becomes encapsulated by the scar tissue, which, as it builds up, contracts around the prosthesis.

The textured outer silicone covering of the implant is what makes it different. Siltex has a rough textured outer surface that feels and looks natural to the woman herself. With other implants, the outer texture is smooth. For some women that is extremely important.

The formation of the capsule around the implant is a natural response to contact with an inert foreign substance. All breast implants are biocompatible and all implants will stimulate this natural response. The difference is in the degree of inflammatory response, which varies widely from woman to woman depending on her genetic pre-disposition to healing. With a smooth outer texture, in some cases, the scar tissue continues to form around the implant. Because the texture is dissimiliar to what is naturally inside the body, the scar tissue continues to form until the implant begins to wrinkle. The more the implant wrinkles, the more trauma to the area occurs, and the more scar tissue is formed; therefore, the breast gets hard and unnatural.

With a rougher outer surface, the new implant (Siltex) is more similar to tissue normally found within the body. Scar tissue still forms around the implant, but is disrupted by the prosthesis, keeping the consistency of the "new" breasts soft and natural.

Some women experience firmness right away with Siltex, but with time, the hardness gives way to natural softness. Many conventional implants start off feeling soft and harden with time -- exactly the opposite.

Another benefit of the new implants is less traumatic surgery. The incision needed to place the implants is no bigger than a finger, which makes for a quicker recovery, say doctors.

The new Siltex implant is manufactured by Mentor Corp. (NASDAQ: MNTR), a leading manufacturer of implantable devices. Anyone interested in receiving

free information can call The Breast Council at 1-800-221-5517 or write The Breast Council at P.O. Box 60260, Santa Barbara, CA, 93160. To set up interviews with Dr. Striker and his patients, call The Halsted Organization for Danielle Epstein or Wendy Basil at 1-800-522-8877.

NEW YORK (NOV. 27) PR NEWSWIRE - The American Israel Economic Corporation has rescheduled its conference on "The Integration of Soviet Engineers and Scientists into the Economy of Israel," to take place on May 6 and 7, 1991, at the United Nations Jewish Center, it was announced today by Dr. Mordecai Hacohen, honorary chairman of the corporation.

The conference will be held under the chairmanship of the world renowned scientist, Herman Branover, professor of Magnetohydrodynamics and head of Liquid Metal MHD Laboratories at the Ben Gurion University of the Negev in Beer Sheva and founder of SATEC the high-technology company in Jerusalem.

Many Soviet engineers and scientists who are now arriving in Israel in ever growing numbers must find employment in their profession if they are to settle in the country. It is estimated that within the next few years some 35,000 engineers and scientists will have to be absorbed in various industrial and research projects in Israel.

The purpose of the conference is to bring together top executives of leading American corporations in high-technology, financial institutions, venture capital entrepreneurs and R&D managers with a select group of outstanding

engineers and scientists who will present projects for which capital investments are required.

The conference in May 1991, will include an additional number of distinguished engineers and scientists who are shortly expected to arrive in Israel and will be included in the originally published agenda.

For further information write to: American Israel Economic Corporation, 122 East 42nd Street, New York, N.Y. 10168.

WOBURN, MASS. (NOV. 27) PR NEWSWIRE - Thermedics Inc. (AMEX: TMD) announced today the award of $1.8 million in federally funded contracts relating to the company's explosives-detection technology.

The first contract, awarded by the Defense Advanced Research Project Agency and administered by the U.S. Army-Fort Belvoir, will fund the development of a land-mine detector. Thermedics will modify the vapor- detection technology now being used in its EGIS(R) explosives detector in order to develop a prototype instrument capable of detecting the explosive charge in a land mine, even if the mine itself is made from non-metallic materials. Many land mines are currently being made out of plastic to avoid identification by conventional metal detectors. U.S. Army sources estimate that a significant share of all casualties reported by U.S. forces during the Vietnam War were the result of land mines.

John W. Wood Jr., president of Thermedics, said, "Land mines have proven to be among the most harmful conventional weapons in armed combat. If we can successfully develop a way to detect those mines, it will be a major advance."

An additional contract, funded by the U.S. Department of State, provides for ongoing field support of the company's explosives detectors now being used abroad.

Thermedics develops, manufactures, and markets biomaterials, biomedical products, analytical instruments, and explosives- and drug- detection devices, and provides analytical laboratory services. Thermedics is a public subsidiary of Thermo Electron Corporation (NYSE: TMO).

#90331p8374 11/27/1990 ~PR Newswire

AUSTIN, TX (NOV. 27) PR NEWSWIRE - Dell Computer Corporation (NASDAQ: DELL) today reported record earnings per share of $.34 in the third quarter of fiscal 1991, which ended Nov. 3, 1990. Sales increased 43 percent to $136.7 million, fueled by strong gains in both domestic and international operations.

DELL COMPUTER CORPORATION
(In millions, except per share)

Periods ended	Third Quarter		Nine Months	
Fiscal Year	1991	1990	1991	1990
Net sales	$136.7	$ 95.5	$ 378.9	$ 278.7
Operating income	11.3	1.1	31.6	$ 10.4
Net income	6.9	.1	18.6	4.0
Earns. per share	$.34	$.01	$.94	$.21

"We are especially pleased with our domestic growth in light of the continued sluggishness in the United States market for personal computers," said Michael S. Dell, chairman and chief executive officer.

Domestic sales increased 25 percent to $95.1 million in the third quarter, compared with $76.1 million in the third quarter a year ago, and were up nearly 19 percent over sales of $80.2 million in the second quarter of this fiscal year.

International sales more than doubled to $41.6 million, vs. $19.4 million in the prior-year period. The company continued to expand its international operations during the quarter, opening its sixth wholly owned operating subsidiary in Italy and announcing a European manufacturing center in Ireland. Dell also has operating subsidiaries in the United Kingdom, Germany, Canada, France and Sweden.

Approximately half of the year-to-year revenue increase came from sales of five new higher-end systems introduced in late August, Dell noted. "Clearly, our customers recognize that these aggressively priced, high-performance systems represent an exceptional value," he said.

In total, sales of systems based on the Intel 386, 386SX and i486 microprocessors accounted for 88 percent of system revenues in the quarter, compared with 58 percent of system revenues in the third quarter a year ago.

"We are very well positioned in the high end of the market with four, i486 EISA-based systems and a full 386-based product line," said Dell. "Sales of i486-based systems have increased to nine percent of total system revenues in less than a year and are overtaking sales of our 286-based systems."

#90331p8378 11/27/1990 ~PR Newswire

WORCESTER, MA (NOV. 27) PR NEWSWIRE - Transgenic Sciences, Inc. (NASDAQ: TSIN) today announced that it has signed an agreement to acquire the Center for Diagnostic Products, Inc., (CDP) a privately held manufacturer of bioreagents including bulk human serum, plasma derived serums and other products used in the manufacture of human diagnostics. CDP will become the marketing arm for TSI's own line of proprietary diagnostic and laboratory reagents. The acquisition will be on a pooled interest basis involving the exchange of approximately 600,000 TSI common shares for all outstanding CDP stock. CDP is profitable on revenues of $3.5 million.

James Sherblom, TSI chairman and chief executive officer said, "CDP brings to TSI established relationships with the major diagnostic and boitechnology companies throughout the world. We plan to use this market position to build an expanded line of advanced bioreagents based on the combined research and product development efforts of both TSI and CDP. This merger brings to TSI another commercial outlet for its technology."

CDP, located in Milford, Mass., was established in 1987 from the CBR Laboratories subsidiary of The Center for Blood Research. CDP supplies critical and custom raw materials for use in the production of chemistry controls and medical diagnostic test kits to the worldwide biomedical and medical diagnostic communities. The company has recently expanded its product line to include a range of disease state human serums, animal serums, antigens calibrating serums and specialty items used for the manufacture of diagnostic test kits. Among the TSI products to be added to the CDP line are TMBlue(tm) and APPurple(tm), chromogenes used to enhance reactions in diagnostic test kits.

Lucien Liddy, president of CDP commented, "The relationship with TSI will provide us with much needed financial strength and management skills that will enable us to expand significantly and to better serve our customer base. I am particularly excited by the prospect of combining our market expertise with TSI's proven ability to develop new biological products."

TSI is a life sciences company developing advanced toxicology test and disease models based on genetic engineering and transgenic techniques to improve the efficiency of the pharmaceutical/chemical development process. TSI is also developing animal strains capable of producing commercially valuable pharmaceutical proteins, as well as strains with desirable growth and genetic characteristics.

#90331p8380 11/27/1990 ~PR Newswire

JACKSON, MICH. (NOV. 27) PR NEWSWIRE - Consumers Power Company and The Detroit Edison Company (NYSE: DTE) today announced significant progress in the second year of a multi-year program aimed at optimizing the effectiveness of the world's largest barrier net at the Ludington Pumped Storage Hydroelectric Plant. The protective net was placed in Lake Michigan to keep fish from the power plant's water intake area.

The net, nearly 2.5 miles in length, made of nylon mesh, was installed in April and removed in late October. It was secured to the bottom of Lake Michigan by a heavy chain and 65 fixed anchors driven 10 feet into the lake bed.

The report is being submitted to an Advisory Committee, established by Consumers Power Company, comprised of the Michigan Department of Natural Resources, the U.S. Fish & Wildlife Service, the Michigan United Conservation Clubs and the National Wildlife Federation. Comments from these organizations and the report, will be submitted before the end of the year to the Federal Energy Regulatory Commission which regulates the facility.

The barrier net proved effective in keeping fish outside the net, the report said. It was over 69 percent effective in keeping out chinook salmon more than 12 inches in length. Nearly 46 percent fewer alewives, the most numerous forage species at Ludington in 1989, were measured inside the barrier net than outside. Both are improvements on 1989 totals.

Overall, the barrier net was effective in keeping out more than 37.6 percent of all fish, a 25 percent improvement over 1989, the report said. The effectiveness-monitoring study showed that adult salmon and trout represent only about 3 percent of the total number of fish sampled in the vicinity of the plant. The alewife was the most abundant species, representing 62 percent and yellow perch the second most abundant, representing 17 percent. A total of 34 fish species were sampled during the study.

Detroit Edison is Michigan's largest electric utility serving nearly 5 million people in its 7,600-square-mile service area in southeastern Michigan.

Consumers Power Company, the principal subsidiary of CMS Energy Corporation (NYSE: CMS), is Michigan's largest utility serving almost 6 million of the state's 9 million residents in 67 of the 68 Lower Peninsula counties.

#90331p8381 11/27/1990 ~PR Newswire

SHERMAN OAKS, CALIF. (NOV. 27) PR NEWSWIRE - House of Fabrics Inc. (NYSE: HF)

recorded a 21 percent increase in net income per share for the third quarter as the company continued to realize substantial benefits from its expanding base of super stores.

For the three months ended Oct. 31, 1990, net income totaled $4,518,000, equal to 76 cents per share, compared with $4,296,000, or 63 cents per share, one year ago. Third quarter sales climbed 12.8 percent to $104,360,000 from $92,511,000 in the prior year.

Average shares outstanding for the third quarter totaled 5,947,511 in the current year and 6,811,686 in the prior year. The decreased number of shares outstanding in fiscal 1991 reflects the company's stock repurchase program. Under authorizations granted by its board of directors, the company has repurchased 1,107,500 shares at an average cost of $20.28 per share.

For the first three quarters, net income was $7,357,000 compared with $5,516,000, and on a per share basis was $1.19, up 47 percent from 81 cents in the comparable period of the prior fiscal year. Sales for the nine months advanced 10 percent to $278,137,000 from $253,310,000 in the year earlier period.

Gary L. Larkins, president and chief executive officer, said: "The company turned in another solid performance in the third quarter. As in past quarters our gains continue to reflect the favorable results being generated by our expanding base of super stores. Like store sales registered a 14 percent increase for the quarter.

"Over the past several years, our company has been making the transition from operating smaller 4,000 square foot units to our present reliance on much larger stores, averaging 12,000 square feet of space, and featuring a greatly expanded inventory. The conversion process is now approximately 70 percent completed. These super stores, which have been well received by customers, will provide a sturdy foundation for our continued progress.

House of Fabrics Inc. is the nation's largest chain of company owned and operated retail fabric stores with 613 currently in operation.

#90331p8382 11/27/1990 ~PR Newswire

TOKYO (NOV. 27) PR NEWSWIRE - Kubota Corporation (NYSE: KUB), Japan's leading manufacturer of agricultural machinery, pipes, industrial machinery and housing materials, today issued its consolidated statements of earnings for the first half of fiscal 1990, reporting an increase in sales and a decline in profits from the comparable period of last year.

According to the statements, the company's sales for the April 1- Sept. 30 period totaled Yen 412.1 billion ($2,986 million), up 17.0 percent over the comparable period of the previous year, due to intensified sales efforts in domestic and overseas markets and an increase in the number of consolidated subsidiaries.

Domestic sales rose 12.5 percent to Yen 334.4 billion ($2,423 million) over the comparable period of the previous year owing to a healthy growth in the sales of environment control facilities, prefabricated houses, construction machinery and plastic pipes, buoyed by strong domestic demand. Agricultural machinery and ductile iron pipes, both Kubota's main products, also saw their sales expand.

Overseas sales surged a whopping 41.3 percent to Yen 77.7 billion ($563 million) over the comparable period of the previous year due partially to robust sales of electronics-related products in the U.S. market, boosting the ratio of export sales to total net sales by 3.3 percentage points to 18.9 percent over the comparable period of the previous year.

However, operating income declined 17.6 percent or Yen 2.8 billion to Yen 13.3 billion ($97 million) from the comparable period of the previous year as a result of soaring materials and construction costs as well as a rise in advance investment costs by new consolidated subsidiaries. Net income sagged 56.4 percent or Yen 3.1 billion to Yen 2.4 billion ($17 million).

Consequently, net income per shareholders' equity for the current business year shrunk Yen 2.18 to Yen 1.68 from the comparable period.

BOSTON (NOV. 27) PR NEWSWIRE - Thermo Instrument Systems (AMEX: THI) today announced receipt of a record $2.3 million order for advanced air pollution analyzers to equip a new monitoring network in Taiwan.

Under the order, Thermo Instrument is providing more than 300 instruments and

related equipment for detecting and measuring pollutants in ambient or open air throughout the heavily industrialized and populated island nation. Each of approximately 65 stations in the network's initial phase will be equipped with analyzers from Thermo Instrument. The instruments will analyze ambient air to detect and measure gases designated in this country as criteria pollutants -- sulfer dioxide, oxides of nitrogen, ozone, and carbon monoxide -- linked to a range of environmental and health problems.

The order comes as a result of Thermo Instrument's longtime interest in Taiwan and with the assistance of the Massachusetts Office of International Trade and Investment (OITI). The Office of International Trade works with Massachusetts companies to expand their markets overseas. OITI assisted Thermo Instrument by introducing key Taiwanese trade officials in Massachusetts and Taipei to company executives, providing opportunities to demonstrate their products and technical capabilities.

Denis A. Helm, Thermo Instrument vice president and head of its monitoring instrument operations in Franklin, Mass., said, "Establishing an advanced, nationwide air-quality monitoring network will benefit Taiwan and, in a larger sense, other Pacific Basin countries. We're glad that our instruments have again been selected for determining the nature and extent of a nation's environmental problems and, most important, monitoring progress toward the solutions."

Thermo Instrument is the world's leading supplier of environmental monitoring instruments and has previously supplied equipment for major air monitoring networks in the Netherlands; Israel; and the Chinese cities of Beijing, Lanzhou, and Anshan.

Thermo Instrument Systems develops, manufactures, and markets analytical instruments used to detect and monitor air pollution, radioactivity, complex chemical compounds, and toxic metals and other elements in a broad range of liquids and solids. The company also provides environmental science and engineering services, laboratory-based testing, and nuclear health physics services. Thermo Instrument Systems is a public subsidiary of Thermo Electron Corporation (NYSE: TMO).

WILLOW GROVE, PA (NOV. 27) PR NEWSWIRE - C. Scott Kulicke, chairman of Kulicke and Soffa Industries Inc. (NASDAQ-NMS: KLIC), reported today that sales for fiscal year 1990 were $102,812,000 with a net income of $3,390,000 or 44 cents per share, compared with sales of $96,475,000 and net income of $5,827,000 or 75 cents per share in 1989.

"These are preliminary numbers," Kulicke commented, "which are still being audited. Detailed financial data will be released in the 10K."

Clifford G. Sprague, chief financial officer, noted, "Net income in 1990 was impacted by one-time charges of approximately $4.8 million recorded during the second quarter. Additionally, during the year, K&S recorded extraordinary gains of $1,441,000 ($0.19 per share) from the early retirement of outstanding debentures at prices below face value.

"Sales for the fourth quarter were $28,216,000 with a net income of $2,347,000 or 31 cents per share, compared with sales of $22,863,000 with a net income of $953,000 or 12 cents per share for the fourth quarter 1989."

"As we continue to strengthen our financial position," commented Kulicke, "we are also carefully observing the tense world situation and troubling economic news so that we can properly manage any change in the marketplace. However, backlog at the end of 1990 was $22 million, an increase of 16 percent over the 1989 year end backlog of $19 million and our orders are stable. We remain cautiously optimistic about the present year and we are moving ahead with our product development plans."

Kulicke and Soffa is a leading global supplier of assembly equipment and systems for the semiconductor industry. K&S serves both the IC and hybrid markets with sales and service facilities worldwide. In addition to wire bonding systems, the company's product line includes wafer preparation, wafer dicing and die bonding systems. Traded on the Over-the-Counter National Market, the company's headquarters are located in Willow Grove.

LOWELL, MA (NOV. 27) PR NEWSWIRE - Wang Laboratories, Inc. (AMEX: WAN) and the University of Southern California (USC) today announced an alliance for marketing an automated student admissions processing application.

The solution is designed to help colleges and universities improve their admissions process and achieve strategic advantage over competing schools. It allows admissions counselors to view electronic images of student applications transcripts, letters of recommendation, and other paper-based documents interactively with computerized student data records.

Installed at USC, the system has enabled the university to reduce processing time for admissions applicants from six to three weeks, to eliminate lost documents which are inherent to a paper file system, and to decrease file space requirements.

"USC competes with many top-ranked schools for students," said Tom Myers, director of Information Systems and Research at USC. "The faster we can decide and notify an applicant of acceptance, the greater chance the student will select USC. Increasing competition for students among institutions will lead them to computer imaging to gain advantage in processing admissions."

The application will be marketed by Wang to colleges and universities worldwide. Wang will be demonstrating it at the CAUSE90 conference which runs Nov. 27-30 in Miami Beach, Fla. CAUSE is an association of college and university information technology professionals.

The application runs on Wang Integrated Image Systems (WIIS) which are based on Wang VS mid-range computers. With WIIS, paper documents are electronically duplicated as images using scanners and stored for quick retrieval. Once documents are scanned and indexed into a computer database, they can be accessed interactively by an entire admissions department.

The Wang/USC application is designed to efficiently process incoming student applications and financial aid requirements. It can also be extended to services such as student recruiting, scholarship administration, registration and generalized student or alumni records.

The system can operate in a multivendor environment. For example, USC's imaging system was integrated into its existing Prime Computer network.

USC has also integrated Wang's Freestyle(tm) personal computing system which permits counselors to electronically add handwritten annotations on applicants' transcripts while the images are being viewed on the workstation.

#90331p8392 11/27/1990 ~PR Newswire

BELLEVUE, WASH. (NOV. 27) PR NEWSWIRE - Millions of melon seeds are sprouting into new ocean freight business for DANZAS' Denver office.

Fall is the export season for southern Colorado's "cucurbit" or melon-seed industry, as container loads of seed move to farmers in warm- weather growing regions near the Mediterranean Sea. DANZAS, the worldwide freight forwarder that has expanded its services throughout the United States over the past 18 months, expects to nurture the successful export of 50,000 kilos of seed this season.

Ocean freight and customs brokerage are new services for DANZAS' Colorado customers. The company's Denver office recently added new staff members and established a direct computer link with the U.S. Customs Service Automated Broker Interface System (ABI) to provide mountain region shippers the same capabilities available in major seaport cities. They can now tap into a 34-country door-to-door ocean freight forwarding network through DANZAS Corp. and the DANMAR Lines NVOCC.

DANZAS' Denver District Vice President is Rosalie Kent. She is supported by Jacquelynn Martino, ocean export/import coordinator, and Rod Horton, district licensed customshouse broker.

"We have seen an immediate demand in Denver for more sophisticated ocean and customs services," said Kent.

Colorado growers are shipping their melon seeds via DANZAS to the south of France, Italy and several markets in the Middle East, Kent said. The largest recent shipment -- three 40' ocean containers -- went to Haifa, Israel. Other Colorado customers are importing textile products from the far east and exporting all kinds of industrial equipment, including an entire assembly line for a plant in Indonesia.

With the addition of new services in Denver, DANZAS continued its extension of ocean freight and customs brokerage capabilities in the western United States. The company handles large volumes of import and export sea freight on the east coast and in southeastern states. Since its 1989 acquisition of Northern Air Freight (a strong west coast company) DANZAS has established additional ocean and customs services in Seattle, Portland and San Francisco and expanded its capabilities in Los Angeles. DANZAS/Charlotte has also established new ocean and customs services.

Commercial and industrial companies can work with DANZAS as a freight forwarder or ship goods via DANZAS' Non Vessel Operating Common Carrier (NVOCC), DANMAR Lines. The company also operates extensive truck and rail distribution systems in Europe.

COSTA MESA, CALIF. (NOV. 27) PR NEWSWIRE - Parker Automotive Corporation (NASDAQ: PKRA) announced today that it has agreed to enter into a long-term distribution agreement for its CarbonClean products in Spain and Portugal with Medosa Servicios, S.A., a domestic associate of the CEPSA group of companies. Medosa Servicios, S.A. has been assigned this project by CEPSA and will coordinate the entrance of the remaining divisions of CEPSA into the project.

CEPSA Group is one of the most important industrial corporations in Spain. Its activities include all areas relating to the petroleum industry, which are carried out by the parent company and more than forty interrelated companies.

Total turnover in 1989 was over 450,000 million pesetas ($4.5 billion U.S.).

Today, CEPSA has two refineries, numerous petrol chemical plants, two plants for lubricants, three for packaging, one for manufacturing asphalts, eleven plastics processing plants, one fine chemical plant, four bunkering factories, six airplane supply stations, six commercial offices and an extensive network of service stations, all which provide the group with a strong brand image. CEPSA (Compania Espanol de Petroleos, S.A.) was established on Sept. 26, 1929. As of Dec. 31, 1989 company capital totaled 29,730,549,000 pesetas ($297,305,490 U.S.).

CEPSA's shares have been quoted on the continuous stock market as quantified listed securities since September, 1989. The degree of CEPSA's commercial development is rising. It supplies the national market of Spain from both inside and outside the scope of the monopoly, is active in marine ports and airports and carries out major export activity. More than forty well-established and diversified companies represent a structure integrated in the field of petroleum. Its activities span exploration, crude production to plastics processing and technological research in its own facilities.

Parker Automotive manufactures a line of products marketed under the CarbonClean name that are patented and proprietary. These products have proven to reduce emissions, increase fuel economy and improve maintenance management in tests around the world.

PAC suspended trading in its NASDAQ-listed securities Tuesday, Nov. 20 as too many parties were aware of the negotiations. The company wanted to wait until the agreement in principle was fully negotiated before any news of the magnitude of the agreement reached the public.

LONDON (NOV. 27) PR NEWSWIRE - United Distillers, the spirits company of Guinness PLC, has reached agreement with all the shareholders of Asbach & Co. (Asbach) to acquire 67.5 percent of Asbach of Rudesheim, on the Rhine, Germany.

Asbach produces, markets and sells the famous Asbach Uralt brandy, the leading German premium brandy and which, in value, is the largest spirits brand in that market. The company also distributes Furst Bismark Doppelkorn, a premium grain spirit, the leading domestic Doppelkorn. In the year to Dec. 31, 1989, the Asbach Group's turnover was DM 468 million (158.6 million pounds sterling at the illustrative rate of exchange of 1 pound equals DM 2.95). The consolidated net assets at that date were DM 99 million (33.6 million pounds).

Tony Greener, managing director of United Distillers, commenting on the

acquisition, said, "We are delighted to have reached a unanimous agreement with members of the families of Asbach to acquire a controlling interest in the company. The Asbach name is highly respected in Germany, and we are very pleased to be associated with such a famous brand. Asbach will significantly strengthen United Distillers' position and broaden its premium branded portfolio in the important German market. United Distillers look forward to working with the Asbach Company to further develop its business in the future."

The consideration is not material in relation to the net assets of Guinness PLC.

TAMPA, FL (NOV. 27) PR NEWSWIRE - Eastern Environmental Services, Inc. (NASDAQ: EESI) today announced that it has purchased an operating industrial waste landfill with 10 million yards of capacity in South Carolina. The purchase price was not disclosed. However, EESI President Randall W. Skuba stated that "the purchase price included cash, EESI stock and the assumption of certain debt."

EESI's strategy is to continue to acquire landfills and waste hauling companies in the eastern and midwestern U.S. to create a large regional network of disposal and transportation companies handling special and industrial wastes. EESI now owns and operates three landfills and has signed letters of intent to acquire eight landfills in six states. Acquisition of the eight landfills is subject to company due diligence items and regulataory approval and company officials emphasize that there is no guarantee that any of the landfills will be acquired.

ST. PETERSBURG, FLA. (NOV. 27) PR NEWSWIRE - Milton Roy Company (NYSE: MRC) today announced that the special meeting of shareholders called for purposes of taking action with respect to the company's proposed merger with Sundstrand Corporation (NYSE: SNS) has been rescheduled for Friday, Jan. 4, 1991, and that the proxy materials for the meeting will be mailed to shareholders on Wednesday, Nov. 28. If shareholders approve the transaction it is expected to be consummated on Jan. 8, 1991, or as promptly as practicable thereafter.

On Sept. 21, 1990, Milton Roy and Sundstrand Corporation announced a merger

agreement under which Milton Roy shareholders, other than Sundstrand, will receive $28 in cash for each outstanding share. Additionally, shareholders would receive two cents per share associated with the redemption of rights related to the company's Share Purchase Rights Plan (Poison Pill).

Milton Roy is a multinational manufacturing company which produces process control equipment and analytical instruments. Major product lines include metering and centrifugal pumps, spectophotometers, mass spectrometers and environmental and automotive emissions testing equipment. These products are used in a wide variety of industrial, research and educational applications where they control and monitor the flow of liquids and analyze the components of a complex mixture of fluids or gases.

Sundstrand Corporation, with 1989 sales of $1,595.4 million, is a market leader in the design, manufacture, and sale of a variety of proprietary, technology-based components and subsystems for aerospace (67 percent of 1989 sales) and industrial (33 percent of 1989 sales) markets. Sundstrand's common stock is listed on the New York, Midwest and Pacific Stock Exchanges under the symbol SNS.

#90331p8409 11/27/1990 ~PR Newswire

TORONTO (NOV. 27) PR NEWSWIRE - Cineplex Odeon Corporation (NYSE: CPX) today announced that it has reached agreement in principle with its banking syndicates to replace existing lending agreements with a new four-year banking agreement. This agreement is required to be finalized by Jan. 14, 1991.

The new bank agreement will combine the banks which were formerly in two separate syndicates, and three other banks that were outside such syndicates, to form a single bank group.

Additionally, the new arrangements eliminate previously existing compulsory asset sale requirements and defer any principal repayments until July 1992. The new bank agreement will also relax financial covenants to which the corporation is subject.

In accordance with previously announced commitments, MCA Inc. and the Claridge Group have already advanced to the corporation US$100 million in subordinated debt pursuant to pre-existing bank agreements; approximately US$40 million was advanced on Oct. 10, 1990, and the balance was advanced on Nov. 26, 1990.

The newly revised bank arrangements require that the subordinated debt be converted to equity by May 31, 1991. The board of directors of the corporation is currently exploring the possibility of effecting a rights offering of

equity shares to accomplish this.

Also provided for in these arrangements is the previously disclosed new secured US$35 million credit line under which the corporation's two largest shareholders, MCA Inc. and the Claridge Group, will provide funds.

In commenting upon today's announcement, Allen Karp, the corporation's president and chief executive officer, stated that, "these arrangements represent something of a milestone in the restructuring of our corporation.

"Having in place a businesslike, stable banking relationship over the long term, together with the financial commitment of our shareholders to strengthen our equity base and provide appropriate working capital, will enable the corporation to continue its ongoing revitalization program in a positive manner."

Cineplex Odeon is one of the largest theatre circuits in North America, with approximately 1,700 screens in 415 locations.

LOWELL, MASS. (NOV. 27) PR NEWSWIRE - Wang Laboratories Inc. (AMEX: WAN) today announced that it has signed an agreement that will make it the official computer company of The Great American Pyramid and Festival Island, a sports and entertainment complex curently under construction along the banks of the Mississippi River in Memphis, Tenn.

Wang will supply the Pyramid and Island with personal computers (PCs), mid-range systems, cabling, point-of-sale devices, security and timecard processors, voice mail systems, office systems, application systems, and consulting. The agreement calls for Wang's products to enjoy exclusive status and be included in numerous promotions involving the Pyramid.

"We feel that the relationship with Wang is perfect for us," said Dean Bonham of Bonham/Shlenker & Associates, the sports-marketing agency for the Pyramid project. "We decided to approach Wang because it is on the leading edge of computer technology, providing products and services that pull together a lot of different components. Wang showed us how to computerize our project in a way to provide the maximum efficiency. But more than anything else, we were impressed with the Wang people -- their professionalism, vision, and foresight. They are the kind of people with whom we wanted to do business."

"We are extremely excited to be the official computer supplier to the Pyramid project," said Michael Bullard, corporate account executive in Wang's Memphis office. "This is an opportunity for Wang to be affiliated with one of the

most unique attractions in the world. Memphis can be particularly proud of the Pyramid, and Wang is enthusiastic to share in the excitement over the project."

Scheduled to open in June 1991, The Great American Pyramid and Festival Island will be the nation's largest sports and entertainment complex. The stainless steel-clad Pyramid will be more than 30 stories tall and will boast a range of multi-media attractions. These include: the Egyptian Experience; the Memphis Music Experience and American Music Awards Hall of Fame; a glass-enclosed Inclinator ride rising to the Pinnacle of the Pyramid; a 22,000-seat, all-purpose arena; the College Football Hall of Fame; and a host of shops and restaurants. Just blocks from The Great American Pyramid, sitting right in the middle of the mighty Mississippi River is Festival Island, an oasis celebrating American music and the Mississippi River.

#90331p8412 11/27/1990 ~PR Newswire

CHINO, CA (NOV. 27) PR NEWSWIRE - American Confectionary Corp. (NASDAQ: CNDY) headquartered here, today announced that Larry Batina has been appointed president and chief operating officer, and that Arnold Gendel, formerly an ACC consultant, will become chief executive officer.

Steve Kircher, formerly president, chief executive officer and chairman, will retain the latter position and will continue to guide the overall direction of the company.

The changes were prompted by the company's desire to consolidate management, production, distribution and office personnel at its Chino plant following the divestiture of ACC's retail assets, including the Sacramento-based J. Higby's yogurt chain. All of American Confectionary's manufacturing and office personnel will now be housed in the Chino facility.

Batina, 38, has almost 10 years of experience in consumer food and beverage markets. For the past four years, he served as chief financial officer of Klein Foods, a privately held consumer food and beverage company distributing packaged products such as sunflower seeds, nuts and raisins, as well as operating a 250,000 case winery. Batina is a certified public accountant and holds a masters in business administration from Harvard University.

Gendel, 49, has more than 25 years in the confectionery and nut meat industry. Since July of this year, he had been serving ACC as sales consultant, taking charge of the company's marketing drive targeted toward major retailers, particularly supermarkets and mass merchandisers. From 1980 to 1988, Gendel was executive vice president of the candy division of MEI Corp., a $200 million California-based confectioner. During this time, he expanded sales of the

company's candy lines to major supermarket chains including Safeway, Waldbaum's and A & P, and to mass merchandisers such as Sears Roebuck and Price Co.

American Confectionary is a manufacturer and distributor of gourmet treats, including nuts, candies and chocolates and sugarless candies and chocolates.

CONTACT: Steve Kircher, chairman of American Confectionary Corp., 916-635-3131; Jimmy Caplan of Market Makers, 805-569-6919, or Rick Eisenberg of Eisenberg Communications, 212-496-6828, both for American Confectionary Corp.

COSTA MESA, CALIF. (NOV. 27) PR NEWSWIRE - Expressing confidence in the ability of Parker Automotive Corporation's (NASDAQ: PKRA) management team, a judge today vacated a temporary receivership that had been imposed with notice effective Nov. 19, 1990 in an action filed by the creditor's committee of another company owned by Michael E. Parker, shareholder and director of Parker Automotive Corporation.

At a hearing on the matter on Nov. 21, 1990, attorneys and representatives of the party seeking the receivership admitted they were unable to find any unusual transactions between Parker Automotive Corporation and Michael E. Parker.

Michael E. Parker made the following statement: "Several months ago, I announced that in the event claims made against me began to detract from the operation of Parker Automotive Corporation, I would resign as chief executive officer of the company. Recent events have convinced me that the time has come for me to do just that. The company has passed the development stage and become a substantial entity marketing its products in more than 60 countries worldwide. I cannot allow the confusion that is generated by the outrageous allegations being made against me to interfere with the growth and potential of the company. Therefore, I have resigned as chief executive officer of the company effective immediately. I will remain with the company as a director and will continue to focus my attention on its sales and marketing efforts.

"Subject to the approval of the board of directors, Ronald L. Cedillos has been nominated as chief executive officer of the company, and I have every confidence that his experience and abilities will provide the company with skilled leadership as the company continues to grow.

"The management team of Mr. Cedillos; Eric A. McAfee, chief financial officer; Donley L. Lincicome, vice president of operations; Mark C. Wessel, vice president of international sales; and Diane M. Parker, vice president of investor relations, is totally qualified to manage the operations of the company in an efficient and effective manner."

SUMTER, SC (NOV. 27) PR NEWSWIRE - The proposed merger between NBSC Corporation (NASDAQ-NMS: NSCB) and Southern National Corporation (NASDAQ-NMS: SNAT) advanced a step Monday when NBSC board members approved the definitive share exchange agreement between the two corporations. The agreement now has to be approved by Southern National.

Among other provisions, the agreement specifies that Sumter will be the

corporate headquarters of Southern National Bank of South Carolina, the operating bank in South Carolina when the corporations merge, and that SNB South Carolina's operations center will be located in NBSC's present operations facility in Sumter. NBSC employees will continue to receive benefits in the aggregate comparable to those received now.

"We expect shareholders to vote on the merger sometime next spring," said Marvin Trapp, NBSC's chairman and chief executive officer.

Merger coordinators from NBSC and Southern National have been developing plans to integrate operations of the two banks. These plans will be shared with employees as soon as available.

A comprehensive prospectus and proxy statement with complete details about the merger will be mailed to NBSC shareholders before they vote.

NBSC's common stock is traded over-the-counter and is quoted under the symbol NSCB on the NASDAQ National Market System.

#90331p8421 11/27/1990 ~PR Newswire

SAN FRANCISCO (NOV. 27) PR NEWSWIRE - Partners in the long-stalled, 300-million-barrel Point Arguello offshore oil project today announced plans to prepare for startup of production and the utilization of pipeline transportation to carry up to 20,000 barrels per day of oil to refineries outside Southern California. Point Arguello is permitted to produce a maximum of 100,000 barrels of oil per day, equivalent to approximately half of U.S. imports from Kuwait prior to the Iraqi invasion.

In a letter sent today to Secretary of Energy James D. Watkins, Kenneth T. Derr, chairman of Chevron Corp., on behalf of the 18-company Point Arguello consortium, thanked the Department of Energy for its efforts to negotiate a compromise between the project and Santa Barbara County officials which would

have brought the Point Arguello crude into production quickly, while addressing environmental concerns.

Consistent with commitments made by the partners to DOE in its efforts to secure a compromise, Derr said the partners are willing to do their part to respond to the President's call for increased domestic production. Production of up to 20,000 barrels of oil per day from Point Arguello will begin as quickly as possible.

Preparations to reactivate the projects mothballed facilities -- including three offshore platforms, onshore and offshore pipelines, onshore oil and gas processing plants, storage tanks and a marine terminal -- will take several months.

Santa Barbara County officials rejection of DOE's compromise and of Chevron's proposal for interim tankering using only double-hulled vessels has made it impossible to use refineries in the Los Angeles area, where the partners can process Point Arguello crude. There are no feasible pipelines to this destination currently.

Derr noted that earlier attempts by Chevron to build a pipeline to carry Point Arguello crude to the Los Angeles basin, the largest market for motor fuels in the world, were thwarted by elected officials there, leading the partners to request interim tankering. Santa Barbara County officials prefer that the thick offshore oil be blended with light crude to allow it to flow through a new connecting line which would have to be built and tied into an existing, limited-volume line to Los Angeles.

HIGHLAND PARK, MICH. (NOV. 27) PR NEWSWIRE - Chrysler Corporation (NYSE: C) will telecast training programs and newscasts, beginning today, through its new Chrysler Dealer Network (CDN).

Half-hour training programs and three-minute newscasts will be telecast six hours per day every Tuesday, Wednesday and Thursday. Topics will range from sales and technician training to dealership success stories.

"Our satellite provides instant communication to our dealer body," said Clay James, CDN manager. "It dovetails with our existing dealer communications and provides a valuable service to our dealerships at no cost."

The free programming will be funded through advertising, much like a commercial network, James said. Automotive supply companies and businesses not traditionally linked with the automotive industry are interested in

advertising on the network. Potential advertisers include Time Magazine, International Business Machines Corporation (IBM), The Reynolds & Reynolds Co. ADP Dealer Services Inc., Goodyear Tire & Rubber Co. and Champion Spark Plug Co.

Ross Roy Productions of Detroit will produce the news and training segments and Chrysler personnel will sell the air time.

Each show will be telecast 12 times during the three days to allow dealership personnel flexibility in viewing, James said.

Chrysler has installed satellite dishes at most of its 5,300 dealerships and regional and zone offices in the United States. The network is the largest private satellite network in the world.

Transmissions are bounced off a Hughes Network Systems satellite in orbit more than 22,000 miles above Earth.

Chrysler recently telecast its 1991 Model Dealer Announcement Show to dealers nationwide.

LANDOVER, MD (NOV. 27) PR NEWSWIRE - Hechinger Company (NASDAQ-NMS: HECHA, HECHB), a chain of 116 specialty retail do-it- yourself home centers, today announced sales and earnings for its third quarter, which ended Nov. 3, 1990.

Sales for the quarter were up 14 percent to $349.0 million from $306.9 million last year. Earnings were $4.9 million ($.15 per share) compared to $5.4 million ($.16 per share) last year. Comparable store sales were down 4 percent during the quarter.

Sales for the first nine months of the current fiscal year were up 18 percent to $1.08 billion from $918.7 million last year. Earnings, before the nonrecurring cumulative effect of adoption of SFAS 96, Accounting for Income Taxes, were $24.1 million ($.68 per share) up 7 percent from $22.5 million ($.64 per share) last year. Comparable store sales were up 2 percent for the first nine months of this year.

During the quarter, the company opened three Home Quarters Warehouse stores, one in Denbigh, Va., and the first two of approximately 12 HQ stores to be opened in the Boston metropolitan area in the communities of Danvers and Norwood. In November the company expanded its Home Quarters division with the opening of three additional stores: one in Columbus, Ga.; a third store in

Birmingham, Ala.; and a third store in the Boston area in Brockton, Mass. Expansion plans for the Home Quarters division for 1991 include continuing to fill in the greater Boston market; Montgomery, Ala.; Memphis, Tenn.; Louisville, Ky.; Cincinnati, Ohio; and in the Raleigh, N.C. market in Cary, N.C.

Hechinger has also announced plans to strengthen its presence in existing markets with the opening of four Hechinger stores in 1991. The new stores will be located in Leesburg, Va.; Largo, Md.; Maple Shade, N.J.; and Reading, Pa.

The company recently announced the election of Allan J. Bloostein, Ann D. Jordan and Alan J. Zakon as outside directors to the company's board. Bloostein has over 35 years of experience in the retailing industry and is currently a consultant in both retail and consumer goods marketing. Jordan currently serves on the board of Johnson & Johnson Corporation, Capital Cities - ABC, Inc., and Primerica, Inc. Zakon is currently a managing director and chairman of the Strategic Policy Committee at Bankers Trust Corporation. Bloostein, Jordan and Zakon join Herbert J. Broner, retired chairman, president and chief executive officer of Mohasco Corporation and David O. Maxwell, chairman and chief executive officer of the Federal National Mortgage Association as outside directors of the company.

Hechinger Company operates 87 Hechinger stores, 23 Home Quarters Warehouse stores and 6 Triangle Building Centers stores in 14 states and the District of Columbia.

#90331p8429 11/27/1990 ~PR Newswire

ATHLONE, IRELAND (NOV. 27) PR NEWSWIRE - Elan Corporation, plc (AMEX: ELN) today announced acquisition of worldwide rights from Rush-Presbyterian-St. Luke's Medical Center in Chicago for a new agent with unique and promising therapeutic potential in multiple sclerosis.

The compound, codenamed EL970, has been evaluated at Rush Multiple Sclerosis Center under the direction of neurologist Floyd A. Davis, M.D., and the medical center has obtained an Orphan Drug designation.

EL970 is not a cure for MS, but it can restore nerve conduction in the demyelinated nerve fibers which characterize the illness. This results in improvement of both motor and visual functions in many multiple sclerosis patients.

In preliminary placebo-controlled clinical studies, clinically important improvements were observed in 86 percent of patients.

Elan, using one of its proprietary delivery systems, will formulate the drug to reduce current dosing interval requirements and achieve more sustained blood levels of the compound.

Elan said it plans to market the product directly in the U.S. in keeping with its strategy to self market products to niche markets.

Under terms of the agreement, Elan will have access to the Rush data base and, with key technical and clinical support from Rush, will fund multicenter clinical trials and be responsible for regulatory interaction and submissions. Elan will pay Rush a data access fee, a series of milestone payments, and will also pay a royalty on product sales.

Elan is a leader in the specialized health care field of advanced reformulation and drug delivery, concentrating on improved drug absorption and utilization. Elan operates research and manufacturing facilities in Athlone; Gainesville, Ga.; Enschede, Netherlands; Manila, Philippines; Brea, Calif. and Cambridge, Mass.

NEW YORK (NOV. 27) PR NEWSWIRE - Bio-Technology General Corp. (NASDAQ: BTGC) announced today that it has concluded an expanded human growth hormone agreement with its Canadian licensee, ABI Biotechnology Inc. The agreement provides for incremental funding of new clinicals to be conducted by BTG to test the potential of human growth hormone to prevent muscle and body mass atrophy.

ABI will provide $2-3 million in new funding to BTG over the next two years. BTG is planning to initiate four new human growth hormone clinical trials in 1991. Discussions with BTG's other human growth hormone partners for the joint development of these new indications are in progress.

"The non-stature-related potential indications of human growth hormone could certainly rival the already proven worldwide commercial success of human growth hormone in short stature usage. We intend for BTG and its corporate partners to play a leading role in the understanding and actualization of these expanded opportunities," stated Sim Fass, BTG's president and chief executive officer.

Bio-Technology General Corp. is engaged in research, development and manufacture of genetically engineered products for human and animal health care.

#90331p8433 11/27/1990 ~PR Newswire

PRINCETON, NJ (NOV. 27) PR NEWSWIRE - The Liposome Company, Inc. (NASDAQ: LIPO) announced today the signing of an agreement licensing its TLC-LA19 Lupus Anticoagulant diagnostic test to Diagnostica Stago (Stago), of Paris. Commercial sales of the product, which will be an in vitro test for the presence of certain antibodies in plasma, could start in the first half of 1991.

In the agreement, The Liposome Company granted worldwide marketing rights for the product to Stago in return for royalties and a licensing fee. Final development and manufacturing of the product will be the responsibility of Stago, which plans to launch the product by June of next year.

Diagnostica Stago is a world leader in developing, selling and marketing in vitro testing products for the diagnosis of blood and clotting disorders. Stago distributes products in the U.S. through American Bioproducts Co. of Parsippany, N.J.

TLC-LA19 is a patented, in vitro diagnostic test, developed by The Liposome Company, to detect the presence of so-called lupus anticoagulants in several types of patients. Lupus anticoagulants are a class of autoimmune antibodies which are associated with a variety of blood clotting disorders, obstetrical abnormalities and cardiovascular conditions. The name "lupus anticoagulant" is an historical artifact, and presence of this antibody is not diagnostic of lupus. Identification of the presence of these antibodies is important in obstetrical patients with a history of spontaneous abortions and in pre-surgical patients suspected of having blood clotting abnormalities. However, no simple, reliable test is available for making this diagnosis. In fact, no currently marketed test can specifically identify lupus anticoagulants.

TLC-LA19 grew out of basic research conducted at the Liposome Company and McGill University. Andrew Janoff, Ph.D. executive director- research for the Liposome Company and Joyce Rauch, Ph.D., associate professor, Microbiology and Immunology at McGill University, discovered that a unique phospholipid structure, known as the hexagonal phase, could be used to specifically detect lupus anticoagulants in patient plasma, making their identification both simple and direct.

The largest company dedicated exclusively to the development of liposome-based pharmaceuticals, The Liposome Company is primarily focused on developing advanced liposomal drugs for the treatment of cancer and serious infectious diseases.

CONTACT: Anne Van Lent, senior vice president of The Liposome Company, 609-452-7060, or Claudia Mueller of Noonan/Russo Communications, 212-979-9180, for The Liposome Company

CHICAGO (NOV. 27) PR NEWSWIRE - USG Corp. (NYSE: USG) today announced that its board of directors has elected Michael P. Kane vice president, regulatory affairs and chief labor counsel effective Jan. 1, 1991.

He will have overall responsibility for labor, environmental, governmental, and regulatory affairs as well as corporate product safety and quality assurance programs.

The 39-year-old Kane is an 18-year veteran of USG, where he began his career as an hourly employee at United States Gypsum Co.'s Stony Point, N.Y., plant. He worked his way up through the ranks of U.S. Gypsum Co., holding various line positions at Stony Point and later at Clark, N.J.

In 1978 he transferred to Chicago as labor relations analyst and has held positions of increasing responsibility including his most recent appointment in 1988 as director, regulatory affairs and chief labor counsel.

Kane's memberships include the Chicago, Illinois, and American Bar Associations. He is president of the Council on Labor Law Equity and represents the corporation on issues for various trade and professional associations.

NEW YORK (NOV. 27) PR NEWSWIRE - The Cooper Companies, Inc. (NYSE: COO) announced today that it has signed an exclusive worldwide licensing agreement with noted researcher Mark Abelson, M.D., to develop and market Class I calcium channel blocker compounds for use in treating glaucoma.

The agreement, Cooper's fifth healthcare transaction of 1990, expands the company's presence in the ophthalmic pharmaceutical sector of the healthcare industry.

Cooper co-chairmen Gary A. Singer and Bruce D. Sturman, in a jointly issued statement, said, "This agreement is one more important building block in the orderly development and expansion of our Healthcare Group.

"We believe our strategic plan of acquiring and developing specialty niches within the healthcare sector and exploiting our competitive advantages in other business sectors will strengthen the company and produce long-term shareholder values."

Richard W. Turner, chief executive officer of the company's Healthcare Group, added "More than 2.5 million Americans already suffer from glaucoma and, as our population ages, those numbers increase dramatically each year. All the indications are that calcium channel blockers can provide significant benefits to this rapidly growing group of patients."

Turner noted that the worldwide market for glaucoma treatments is estimated to be over $600 million this year alone and stated, "Our goal is to capture a significant portion of that business, pending completion of clinical trials and FDA approvals."

Turner added that the development of these Class 1 calcium channel blockers, one of which (Verapamil) is already FDA-approved and is currently used by cardiologists for the management of essential hypertension, arrhythmias, and angina, would be managed by Cooper's newly formed pharmaceutical unit.

The Cooper Companies, Inc. develops, manufactures and markets optometric and ophthalmic products, pharmaceuticals as well as specialized surgical equipment worldwide.

#90331p8451 11/27/1990 ~PR Newswire

NORWOOD, MA (NOV. 27) PR NEWSWIRE - Microcom, Inc. (NASDAQ: MNPI), an internetworking vendor, and Radio Free Europe/ Radio Liberty (RFE/RL) today announced that RFE has standardized on Microcom LAN Bridges(tm) (MLB)(tm) as part of their move to expand and enhance broadcasting services.

"The liberalization of Europe has provided us with unprecedented opportunities. The Microcom LAN Bridge is enabling us to capitalize on them in a responsive, cost-effective manner," stated Robert Short, director of Corporate Information Services for Radio Free Europe/ Radio Liberty.

RFE/RL operates under American management and broadcasts news and information in 23 languages to the countries of Eastern Europe, the Baltic States, the Soviet Union and Afghanistan. The opening of Eastern Europe has allowed RFE/RL to establish news bureaus within countries that until recently were jamming RFE news broadcasts.

"On-site bureaus enable us to directly observe and report on the exciting change process within those countries," notes Short.

RFE is currently relying on Microcom LAN bridges to provide users at sites in Munich, Germany, Washington, D.C., and the New York Programming Center in Manhattan, with access to E-mail, administrative, word-processing, telemetry,

analysis and on-line storage services. RFE/RL computer centers at headquarters in Munich and in Washington, D.C., support approximately 1,200 local and remote users on VAX clusters.

Microcom's International LAN Bridge Product Manager, Margaret Kelliher, stated "Microcom has been marketing its internetworking products internationally for two years. We're pleased our technology is assisting Radio Free Europe in providing important information to Eastern bloc countries."

Compression and filtering capacities were key reasons for RFE's selection of the Microcom LAN Bridge. With Microcom's 2:1 compression over X.25 links, information is transmitted at speeds of up to 128 Kbps on a 64 Kbps link. "The high cost of international and transatlantic dedicated connections requires the use of sophisticated networking devices, such as the Microcom LAN Bridge. Its ability to compress, filter and direct data, combined with a simplicity of management, make it an excellent solution," explained Robert De Toro, director of Network Services.

The MLB is a family of bridges including the following products: the MLB/6000(tm) series for private line connections; the MLB/5000(tm) series for dial-up links, and more recently the MLB/6500(tm) for X.25 links and MLB/5500(tm) for ISDN connections. The family supports Ethernet-to-Ethernet and Token Ring-to-Token Ring connections.

A recognized leader in creating and defining new connectivity markets, Microcom was the first vendor to market a remote Token Ring transparent bridge and the first to enhance bridge performance with data compression. Microcom recently announced 4:1 compression on its private line and dial-up bridge series.

Microcom is a PC and workstation connectivity company headquartered in Norwood Mass.; with offices in Danbury, Conn.; Wilmington, Del.; Durham, N.C.; Caguas Puerto Rico; and international offices in France, Hong Kong, and the United Kingdom. Principal product lines include Protocol Modems; LAN bridging products; Carbon Copy Plus(tm), RELAY Gold(R), Virex(R) and Microcom 911 Utilities(tm) software packages; and ISDN products.

CHICAGO (NOV. 27) PR NEWSWIRE - Air Wisconsin and United Airlines have signed a new United Express contract.

William J. Andres, Air Wisconsin president and chief executive officer, and John C. Pope, United executive vice president-marketing and finance, jointly announced a new five-year agreement between the two carriers superseding the

current contract which expires June 6, 1991. The new agreement was effective on Nov. 1, 1990.

In announcing the new agreement, both Andres and Pope emphasized that the terms of the new United Express agreement will set the tone for continuing a mutually beneficial business arrangement.

"After being in the program for over four years, both Air Wisconsin and United have learned from the experience," stated Andres. "We have maintained those elements of the program that are working well and have modified other aspects of the program."

"The new five-year United Express agreement between United and Air Wisconsin represents a commitment to a long-term relationship that has proven to be mutually beneficial to both companies and, most importantly, to our customers " said Pope.

"The United and Air Wisconsin marketing arrangement permits United Express customers to share in the benefits of competitive joint fares, coordinated schedules, convenient connections and superior service."

Air Wisconsin was the first regional carrier to enter into an agreement with United Airlines to provide United Express service. Both carriers exchange passenger and cargo traffic at the major connecting hub airports of Chicago O'Hare International and Washington Dulles International Airport and also at Denver with Air Wisconsin's subsidiary, Aspen Airways.

NEW YORK (NOV. 27) PR NEWSWIRE - Pan American World Airways (NYSE: PN) is offering a one-way fare of $149 to London this winter, based on a roundtrip purchase.

The fare to London is valid from New York, with slightly higher fares in effect from Pan Am's other U.S. gateways. Pan Am is also offering sale fares to most of its other 33 European destinations, including a roundtrip fare of $378 from New York to both Paris and Frankfurt, $448 roundtrip to Vienna and $548 roundtrip to Rome.

"The softening of traffic demand expected during the first quarter of 1991 due to weakening economic conditions has prompted us to offer winter sale fares to Europe," said John Bloodworth, vice president - advertising and marketing programs at Pan Am. "We are confident that the fares will stimulate traffic during the traditionally slow winter travel period," he added.

Passengers must purchase tickets by Dec. 7, 1990, and travel between Jan. 7 and March 21, 1991, with all travel commencing by March 14. The fares are non-refundable and represent a limited number of seats.

In ddition, Kemwel is offering Pan Am passengers the use of a complimentary car for three days in both London and Germany, and a reduced rate at many of Pan Am's other European destination.

Pan Am is also offering discounts on hotel rooms through Pan Am Holidays' Affordable Hotels program. Prices start at $29 per person based on double occupancy and are available in 29 European cities.

CINCINNATI (NOV. 27) PR NEWSWIRE - Meridian Diagnostics, Inc. (NASDAQ/NMS: KITS) today reported for the fiscal year ended Sept. 30, 1990 that record net sales were $8,478,000 as compared to $6,213,000 during fiscal 1989, an increase of $2,265,000 or 36 percent. Net earnings for fiscal 1990 were $685,000 ($.14 per share) versus $317,000 ($.07 per share) for fiscal 1989, an increase of $368,000 or 116 percent.

Net sales and net earnings for the fourth fiscal quarter ended Sept. 30, 1990 were $2,584,000 and $295,000 ($.06 per share), respectively, as compared to net sales of $1,659,000 and $88,000 ($.02 per share) during the same period of the prior fiscal year. These results represent an increase for the fourth fiscal quarter in sales of $925,000 or 56 percent and in earnings of $207,000 or 235 percent over the prior periods.

Jerry L. Ruyan, president and chief operating officer, said, "Fourth quarter and fiscal 1990 sales and profits were positively impacted by the product lines acquired in January and the market's favorable acceptance of new products introduced during the second half of the fiscal year."

William J. Motto, chairman of the board, said, "The strong increase of fiscal 1990 sales and earnings together with the new cash dividend policy represent our continued commitment to enhance shareholder value."

Cash Dividends In recognition of the company's improved operating results, strong cash flow and financial condition, and outlook for fiscal 1991 and beyond, the board of directors adopted a cash dividend policy consisting of regular, quarterly and special year-end dividends. The board has set a targeted payout ratio of 45 percent to 55 percent of annual net income. Approximately 30 percent to 35 percent of forecasted net income for each fiscal year would be paid in regular quarterly dividends with a balance to be

paid as a year-end special dividend after actual operating results are known. The actual declaration of cash dividends will, of course, be subjected to the judgement of the board after considering all relevant factors.

The board of directors declared a $.06 per share special year-end dividend for fiscal 1990. The dividend is payable Dec. 20, 1990, to shareholders of record on Dec. 5, 1990 and represents 43 percent of the company's net income for fiscal 1990. The board also established a regular quarterly cash dividend for fiscal 1991 at the rate of $.02 per share. The first regular quarterly dividend will be paid during the first calendar quarter of 1991.

MERIDIAN DIAGNOSTICS, INC.

FOURTH QUARTER AND YEAR-END RESULTS The following table sets forth the comparative operating results of Meridian Diagnostics, Inc. for the three months and year ended Sept. 30, 1990 and 1989.

NEW YORK (NOV. 27) PR NEWSWIRE - Facelifters Home Systems, Inc. (OTC) today announced that net sales for the six months ended Sept. 30, 1990 increased approximately $1,611,655 or 62 percent to $4,194,156 from sales of $2,582,501 in the corresponding period of the prior year. For the company's second quarter, ended Sept. 30, 1990, sales increased 66 percent to $2,032,403 from $1,224,425 in the comparable period in the prior year. Sales through the company's installed sales division, selling directly to homeowners in the New York Metropolitan market, accounted for substantially all of the increase. Six months net income increased 160 percent to $132,340, or $.02 per share, from $50,994, or $.01 per share, recorded for the prior year six months ended Sept. 30, 1989. The net income figure for the prior year six months ended Sept. 30, 1989, included $100,416 or $.01 per share, arising from income derived out of discontinued operations during the phase out period of two non-operating subsidiaries.

The company is engaged, through direct consumer marketing, in the manufacturing, sale and installation of kitchen cabinet refacing, custom counter-tops, add-on cabinets and hardware. Until 1988 the company sold its products primarily through dealers and contractors. In 1988 the company entered into the sale of its products directly to homeowners in addition to dealers and contractors.

GARDEN CITY, N.Y. (NOV. 27) PR NEWSWIRE - The Vader Group Inc. (AMEX: VDR) has entered into discussions with Ozite Corp. (OTC) in reference to Ozite's offer to acquire Vader. The proposed transaction would involve an exchange of existing Vader shares for newly issued Ozite shares. The exchange ratio is still under negotiation and subject to review and recommendation of investment advisors.

Vader has terminated negotiations with Prior Management Inc. regarding a previously announced business combination, since the parties could not agree on the terms of the proposed transaction.

Ozite, which recently completed the acquisition of privately owned Sage Group Inc., manufactures non-woven fabric products for the automotive, industrial and commercial markets. The acquired Sage Group manufactures specialty plastic compounds, fabricated precision plastic compounds, plastic additives and garden hose which are sold to diverse consumer, commercial and industrial specialty markets. It is a leading manufacturer of garden hose for the retail

lawn and garden markets, and through its Action Technology division, is the leading manufacturer and marketer of extruded precision plastic components for writing instruments, aerosol dispensers and corrugated hose products.

Ozite's pro forma sales for its last fiscal year ended July 31, 1990, which include Sage Group Inc., are in excess of $160 million.

Vader will engage an investment bank to act as its advisor and provide a fairness opinion regarding the proposed transaction.

The approval of the board of directors and shareholders of Vader, plus required government regulatory authorities is required prior to completing the transaction.

Vader anticipates, if current negotiations are agreed to, that it may take up to 180 days to complete the transaction.

AUSTIN, TEXAS (NOV. 27) PR NEWSWIRE - Dr. James A. Turman, president of Austin-based Chaparral Mining Corp. (NASDAQ: CHRL), today announced the commencement of stockpiling of approximately 12,000 to 15,000 tons of the company's chemical-grade barite which will be sold on contract in the upcoming year. Chemical grade barite, depending on its end use and degree of processing, has a price range from a low end of $120 per ton to a high end of $480 per ton; low end prices are for lump, unprocessed barite and high end prices are for ground and processed barite. The company is now entering into final phase negotiations with several end users for its barite and anticipates the completion of negotiations after the first of the year.

In addition, Dr. Turman announced the addition of Thomas M. Keel to Chaparral's board of directors. Keel served as director of the Texas Legislative Board (LBB) from 1967 to 1982. The LBB prepares and recommends a biennial budget for operations of the Texas State Government. Keel also served as executive director of finance and administration for the University of Texas System. Currently, he is serving as a lecturer at the Lyndon B. Johnson School of Public Affairs. Dr. Turman stated, "Marked by integrity, Tom Keel is a man of extraordinary abilities and I am very pleased to have him join us as a director of Chaparral."

WESTBORO, MASS. (NOV. 27) PR NEWSWIRE - Data General Corporation (NYSE: DGN) said today that it has received the initial order from the U.S. Geological Survey, Department of Interior, as part of the Distributed Information Systems (DIS-II) contract, and has begun shipping its AViiON family systems.

The DIS-II contract, which has a procurement value of $127 million was reinstated to Data General last month by the Court of Appeals for the Federal Circuit in Washington. The court overturned an earlier ruling by the General Services Board of Contract Appeals that supported a protest by a losing bidder. Data General had originally been awarded the contract last December.

"We are pleased that we finally will be able to work with the Geological Survey (USGS) to develop its new computer network and to work closely with that agency in its efforts to improve understanding of and management of the nation's critical water resources," said Data General President Ronald L. Skates.

"While it has taken a while to reach this point, we feel that today's announcement demonstrates that the Federal procurement process truly works."

Under terms of the DIS-II contract Data General will supply more than 6,000 AViiON family workstations and servers to be used in a nationwide computer network by the Geological Survey.

Data General's AViiON systems will handle a variety of hydrologic applications for the USGS' Water Resources Division, in addition to being used for office automation and electronic report preparation applications.

The Water Resources Division is headquartered in Reston, Va., and has offices in all 50 states plus Puerto Rico and the Virgin Islands.

Data General will be responsible for all the hardware, software, training, documentation, systems engineering, support and service over the life of the contract.

Data General Corporation, based in Westboro, Mass., is a leading supplier of general purpose computer and communications systems worldwide. In fiscal 1990 the company reported revenues of $1.22 billion.

MALVERN, PA (NOV. 27) PR NEWSWIRE - Systems & Computer Technology Corp. (SCT) (NASDAQ: SCTC) today announced a new product that provides English language query capability for the Company's BANNER Series of applications software

products for higher education and local government.

The product, called IntelliQuest(TM), is a natural language query system that allows executives and other system users to query their BANNER database in plain English. Using reasoning-based technology from Natural Language Inc., IntelliQuest allows complex database inquiries to be initiated with English commands that require no technical knowledge. The product can also understand grammatical nuances, interpret misspelled words, and "learn" from previous questions.

For example, the dean of a college with the BANNER Student System could type in, "Compare the total enrollment figures for the fall of 1989 and the fall of 1990." IntelliQuest would automatically generate the SQL code needed to query the BANNER database, initiate the query, and give the answer -- in English -- within moments. It could also provide a graph of the answer.

IntelliQuest works with all five systems in SCT's BANNER product line: Student; Finance; Financial Aid; Alumni/Development; and Human Resources.

SCT is a leading provider of administrative software and computing management services for higher education institutions and local government jurisdictions nationwide. The company is headquartered in Malvern, Pa., a suburb of Philadelphia.

Note: BANNER and IntelliQuest are trademarks of Systems & Computer Technology Corp.

PHILADELPHIA (NOV. 27) PR NEWSWIRE - SAP America, Inc., a subsidiary of SAP AG, one of Europe's leading software developers, today announced it has signed an agreement with Deloitte & Touche to provide and support information solutions based on SAP's R/2 System. The R/2 System is an online, realtime software system that handles a full range of business applications.

Under the agreement, the companies will collaborate on R/2 System implementation and integration projects to ensure full information management across regional and international boundaries. In addition to systems integration, Deloitte & Touche will offer its management consulting services to help customers maximize their information technology strategies.

"We are delighted to be working with Deloitte & Touche," said James Bensman, president of SAP America, Inc. "By teaming SAP's dedicated project managers with Deloitte & Touche's integration and implementation experts, we can provide our customers with the highest levels of service and support."

Deloitte & Touche, the nation's third largest professional services firm, provides accounting and auditing, tax and management consulting services. With 20,000 people in more than 100 offices, the firm reported 1990 revenues of almost $2 billion. It is the leading member firm of DRT International. Its management consulting practice in the U.S. has more than 2,000 partners and staff.

SAP America, Inc., headquartered in suburban Philadelphia, markets and supports the R/2 System, a fully-integrated mainframe application software system designed to manage the information needs of large, multinational businesses. The R/2 System is comprised of ten integrated modules covering the full range of business applications, from inventory control and production planning to cost accounting and order processing. SAP America is a subsidiary of SAP AG, one of Europe's leading software developers with more than 1,300 customers worldwide.

EL SEGUNDO, CALIF. (NOV. 27) PR NEWSWIRE - Reflecting continued strong momentum in its Electronics Marketing Group, Wyle Laboratories (NYSE: WYL) registered sharply higher profits in the third quarter on record sales, Charles M. Clough, president and chief executive officer, announced today. The three months ended Oct. 31, 1990, marked the sixth consecutive quarter in which earnings have risen over the preceding quarter.

Clough commented: "Our consistent earnings growth is being driven by higher sales and productivity gains at the Electronics Marketing Group. The group's strategic investments in value-added services, along with its expansion into the New England market, have contributed to our increased profits and should continue to benefit future results."

Net income for the quarter rose 54 percent to $3,357,000, equal to 34 cents per share, from $2,178,000, or 22 cents per share, one year ago. Third quarter sales improved 8 percent to $114.0 million from $105.8 million in the prior year.

For the first nine months of fiscal 1991, net income nearly doubled to a record $9,447,000, equal to 95 cents per share, from $4,759,000, or 47 cents per share, in the previous year's period. Sales for the three quarters totaled $336.0 million, up 9 percent from $309.5 million last year.

Clough said: "The Electronics Marketing Group recorded outstanding results in

the third quarter. Income surged 54 percent over the prior year to $6,150,000 on a 14 percent improvement in sales to a record $92.4 million. Sales and profits also surpassed second quarter levels, counter to industry trends.

"Despite a sluggish market environment, the group achieved gains in market share both in key semiconductor lines and in computer systems products. This progress results directly from Wyle's successful strategy of concentrating on higher complexity products and related value-added services, together with a strong focus on customer service.

Wyle Laboratories is one of the nation's leading marketers of high-technology electronic components and computer systems. The company is also a major supplier of research, engineering and testing services to the aerospace, defense and energy industries.

#90331p8505 11/27/1990 ~PR Newswire

THOROFARE, N.J. (NOV. 27) PR NEWSWIRE - According to a study conducted for Checkpoint Systems Inc. (NASDAQ: CHEK), the nation's leading provider of disposable target electronic article merchandising systems, 83 percent of U.S. consumers agree that shoplifting has become a significant problem and 78 percent believe retail prices are higher because of shoplifting.

The study, conducted for Checkpoint by Management Horizons, a division of Price Waterhouse, assessed the impact of retail security systems on consumer attitudes and shopping behavior. Consumers were surveyed by mail and in focus groups. According to Sharyn Brooks, vice president of Management Horizons, more than 85 percent of the shoppers surveyed feel that retailers should make

an effort to control shoplifting.

"In terms of shopping behavior, less than 1 percent of consumers have ever avoided a store that has security sensor like those manufactured by Checkpoint " said Brooks. Gerald Klein, Checkpoint's president and chief operating officer, equated Checkpoint's security systems with airport security systems. "Travellers today take security systems for granted, and most are comforted by their presence. The same can be said for retail security systems. They have become a fact of life and can provide benefits to both the retailer and the consumer."

Consumers feel, however, that some types of security methods can make shopping more difficult and can be unattractive if not properly implemented. While 71 percent of consumers surveyed feel that hard tags attached to clothing are the most effective means for reducing shoplifting, they also express a negative attitude towards them.

For example, 41 percent feel that hard tags attached to clothing make it more difficult to determine how an item fits, and 60 percent are concerned that hard tags can damage clothing.

Checkpoint recognized these concerns more than 10 years ago and developed a disposable security target. These targets can now be disguised as price or promotional tickets. Taking this concept one step further, Checkpoint is working with major manufacturers and retailers to implement Impulse(TM), a plan to embed its security targets in products or product packaging at the point of manufacture.

"Impulse has been designed to protect those high-margin, high-volume products which also have high shrink levels," said Klein. "With built- in security, products can be put on open display, making it easier for consumers to access and purchase those items previously kept under lock and key."

The majority of consumers value such self-service merchandising for small convenience items. As many as 81 percent of the consumers surveyed prefer self-service shopping for items like batteries, razors, pre-recorded audio and video cassettes and CDs, and fragrances.

According to the study, time-pressed consumers do not appreciate having to wait for sales help to buy these items. They will often walk away from a sale if the wait is too long.

The study said that most shoppers believe the advantages of Checkpoint's methods far outweigh the disadvantages. Quick, easy access to the merchandise and a more efficient shopping experience are more important than the concerns about these types of security systems, the study concluded.

Checkpoint is offering retailers a free copy of the retail security study

which can be obtained by writing: Glenda Laudisio, Communications Manager, Checkpoint Systems Inc., 550 Grove Road, Thorofare, N.J., 08086, or by calling 609-848-1800, ext. 211.

#90331p8519 11/27/1990 ~PR Newswire

STAMFORD, CT (NOV. 27) PR NEWSWIRE - To succeed in today's cost conscious business environment, the office products supplier needs more than a good product. It requires creative, new ways of doing business and applying products to meet the needs of specific situations.

"Savin understands today's needs better than most copier marketers," said Brian Merriman, president, Savin Corporation (NYSE: SVB). "To meet those needs you have to offer creative pricing packages, dedicated support and the ability to take the burden of managing systems off the customer's shoulders."

An example of Savin's willingness to assess and address customer needs can be seen in its recent winning of a major contract from CIGNA Corporation. Initially, CIGNA will utilize 105 copiers, most of them the new 9710 model, and 140 model 630 fax machines. The five-year program, being phased in over the next eight months, marks the first time that both faxes and copiers are being offered on a cost-per-copy basis.

"Most fax machines are sold outright or rented for a flat amount," Merriman explains. "Companies have to deal with two separate and totally different accounting methods. Copiers are billed according to copies made, and faxes according to phone time.

Now, for the first time, copiers and faxes are accounted for according to units. This not only eases billing procedures, but provides an efficient, simplified method for monitoring machine usage by cost centers or departments."

Key to the CIGNA decision was the fully-featured 9710 copier, Savin's first entry into Segment 5, producing 71 copies per minute. "CIGNA wanted a

user-friendly walk-up copier without compromising speed. The 9710 gives the company the benefit of user friendliness and options with the speed of a copy-center machine." Savin is providing complete service - right down to loading paper into the copiers - through its on-site representatives.

"The comprehensive major account program was the key to receiving the vote of confidence form CIGNA management," Merriman says. "It is an example of how we assess specific needs and come up with creative solutions tailored to the customer."

CONTACT: Steve Hoechster or Grace Szwagulinski of Geltzer & Company, (212) 575-1976, for Savin.

NEW YORK (NOV. 27) PR NEWSWIRE - Corroon & Black Corporation announced today the appointment of Richard Q. Ford to the position of managing director of the National Benefits Division of its Brokerage Services Group.

The National Benefits Division, headquartered in Seattle, Wash. serves as a resource for all Corroon & Black offices. The division coordinates the goals for the benefit components of the Brokerage Services Group's plan for the 1990s. It will also be developing and marketing innovative employee benefit products and services.

Ford's promotion was announced by James V. Davis, Ph.D., chairman of the National Resource Division of the Corporation's Brokerage Services Group.

"Rich Ford is a nationally-recognized expert in the employee benefits field, and his expertise will add considerable value to the products, services, and operations of the National Benefits Division."

Ford has been with Corroon & Black for more than 10 years, and most recently served as vice president of the National Benefits Division and as director of the National Employee Benefits Resource Unit. He has also served as senior vice president and manager of employee benefits for Corroon & Black, Inc., in Seattle. He has a bachelor's degree in accounting from the University of Washington and has completed graduate studies at Seattle University.

Corroon & Black Corporation, now an operating division of Willis Corroon plc, is headquartered in New York City. Corroon & Black is one of the world's largest full-service insurance intermediaries, providing insurance brokerage, risk management services, reinsurance brokerage, and employee benefits, compensation, and actuarial consulting to individuals, local governments, professions, business and industry. It has offices across the United States and affiliated offices throughout the world. Willis Corroon (ADRs traded on NYSE & PSE: WCG) traces its origins to 1828, with the establishment in London of Henry Willis & Company. Its Corroon & Black division was founded in 1905 in New York City.

CHICAGO (NOV. 27) PR NEWSWIRE - Selfix(R), Inc. (NASDAQ-NMS: SLFX) today reported that it has purchased the assets of the hardware division of Homecraft of Orangeburg, N.Y., a division of Dynacast, Inc.

Homecraft markets a broad line of products for home organization, including decorative hooks, picture hangers, fasteners, swag and planter hooks, tacks and security hardware. Homecraft markets these products through distribution channels similar to Selfix.

Robert Mariani, president of Selfix, stated, "The acquisition of Homecraft significantly expands our market position in a core category. Selfix has experienced continued growth in its plastic hook and organizer line for several years. Now with the addition of the Homecraft product line, we offer the broadest, most complete line of hooks and organizational hanging hardware in the industry.

Selfix, Inc., based in Chicago, designs manufactures and markets a wide range of consumer home products, including more than 700 home organization products and a line of plastic exterior shutters.

For further information, contact Robert Mariani, president, Selfix, Inc., 4501 West 47th St., Chicago, Ill, 60632, 312-890-1010.

SPRING VALLEY, NY (NOV. 27) PR NEWSWIRE - Par Pharmaceutical, Inc. (NYSE: PRX) today reported financial results for its fiscal year ended Sept. 29, 1990.

Sales for the year were $48,953,000, down 52 percent from the sales of $102,578,000 reported for the fiscal year ended Sept. 30, 1989. The company incurred a net loss for the year of $14,753,000, or $1.31 per share, as compared with net income of $4,054,000, or 36 cents per share, for the prior fiscal year. For the fourth quarter, sales were $7,005,000, down 59 percent from sales of $16,928,000 in the fourth quarter of the 1989 fiscal year, while the net loss for the quarter amounted to $3,913,000 (34 cents per share) as compared with net income of $311,000 (3 cents per share) a year earlier.

Results for the year were adversely impacted by provisions for inventory write-offs, recall costs, and other items related to the company's previously disclosed regulatory difficulties, which aggregated $11,503,000 for the 1990 fiscal year, as compared with $6,557,000 in the 1989 fiscal year.

Kenneth I. Sawyer, Par's president, said, "Even though we are reporting these losses for the quarter and for the year, we are very pleased with the progress that we have made to date in turning the company around. We have already achieved our initial goal of restoring Par's oral solid product line to profitability, and we look forward to the continued resurgence of that product line as we continue the rebuilding process with our injectable line."

Sawyer noted that the loss for the fourth quarter was wholly attributable to

losses and write-offs incurred by Par's wholly owned injectable manufacturing subsidiary, Quad Pharmaceuticals, Inc., which is in an early stage of the regulatory audit process. Sawyer went on to say that, while he expected the audit process at Quad to continue for several more months, he is confident that the company has sufficient resources to sustain itself through this period.

Sawyer also stated that he was happy to report that he expected the regulatory audit of Par's product line to conclude by the end of December, and noted that well over 95 percent of the products reviewed to date had been cleared for market reintroduction by Par's independent regulatory auditor.

TORONTO (NOV. 27) PR NEWSWIRE - Interhome Energy Inc. (NASDAQ: IHEI) announced today that Olympia & York Developments Limited has made a new proposal to the board of directors of Interhome specifying the terms of a spin-off of Interhome's wholly owned oil and gas subsidiary, Home Oil Company Limited, to Interhome shareholders on a pro rata basis.

This new proposal does not contemplate a merger of Home and Gulf Canada Resources Limited. As a result of the proposed spin-off, Interhome shareholders will be provided with direct ownership of Interhome's two existing businesses through two separate publicly traded companies -- Home, which will carry on the oil and gas business, and Interprovincial (as Interhome would be renamed), which will carry on the regulated pipeline business. The spin-off, expected to be implemented in the first quarter of 1991, is subject to the receipt of certain board, shareholder, regulatory and court approvals and a favorable advance income tax ruling. The board of directors of Interhome intends to consider the proposed spin-off expeditiously and will retain a financial adviser to assist the board in its consideration of the proposed spin-off.

The proposal includes a commitment by Olympia & York, subject to the approval of GW Utilities Limited, to pursue the sale of Interprovincial (the regulated pipeline business of Interhome). Minority shareholders of Interprovincial will be provided with a "coattail," for a period of two years following completion of the spin-off, which will require any arm's length third party purchaser of all or substantially all of the controlling interest in Interprovincial to make a concurrent offer to purchase the shares of all other Interprovincial shareholders on identical terms.

CHICAGO (NOV. 27) PR NEWSWIRE - Prospects for the next few years are dim for Unisys Corporation, unless two critical events come together, says an analyst with Duff & Phelps Inc., the investment research and financial consulting firm headquartered here.

"I see two keys to the survival of Unisys," said David J. Schofield, a computer analyst who follows the company for Duff & Phelps Inc. "In the short term, dependence on the support of their bank revolver is crucial, with critical importance placed on the net worth covenant. Second, the completion of substantial asset sales is imperative to improve cash flow and reduce debt."

Over the next few years, revenue growth and margins are expected to be flat and cash flow will continue to be negative without substantial changes. Financial restructuring has become a priority.

"Unisys is in a bind," Schofield said. "They have only an estimated five percent of the mainframe market, and they are in a good position to encourage the move to 'open systems' or more standards-based products. However, they are struggling to protect their small base of proprietary customers while trying to move forward with the market and broaden its potential customer base."

The analyst feels that for Unisys to survive it must change its fundamentals of business, operations and finances. The potential growth is impeded by incompatible product lines inherited from parent companies, the maintenance of two research, design, and engineering staffs, and a fragmented customer base.

Duff & Phelps recently lowered the senior debt rating of Unisys to "BB" from "BBB-", lowered the preferred stock rating to "B-" from "BB", and withdrew the commercial paper rating.

DETROIT (NOV. 27) PR NEWSWIRE - W.Y. Campbell & Company and Manufacturers National Corporation (NASDAQ-NMS: MNTL) today announced an agreement which will result in Manufacturers acquiring a minority equity interest in the Detroit-based investment banking firm. Details of the agreement were not released. It is subject to regulatory approval.

The equity investment, believed to be the first of its kind in the Michigan financial services community, is seen as a significant step by both parties. W.Y. Campbell & Company, in a relatively short period of time, has become a leader in the regional investment banking business. As an investment banker,

the firm provides to both public and private companies assistance in the areas of divestiture, mergers and acquisition, private placements, valuations and fairness opinions.

"The agreement provides a foundation for W.Y. Campbell & Company to bring our corporate financial services to Manufacturers' extensive commercial customer base," said William Y. Campbell, managing director of W.Y. Campbell & Company. "We view our involvement with Manufacturers as a further step toward achieving a prominent position within the Midwest investment banking community " Mr. Campbell said. "Manufacturers' preeminent reputation in business banking makes them our perfect partner," he concluded.

"Manufacturers Bank is aligning itself with established professionals at W.Y. Campbell & Company so that we can broaden our array of high-quality corporate financial services," said Joseph J. Buttigieg III, executive vice president of Wholesale Administration at Manufacturers, in announcing the agreement. "With W.Y. Campbell & Company as an affiliate, we believe we offer a service necessary to meet the growing needs of our customers," Buttigieg added.

Manufacturers National Corporation is a bank holding company headquartered in Detroit. It operates four subsidiary banks in Michigan, including its principal bank subsidiary, Manufacturers National Bank of Detroit. The corporation operates Affiliated Bank in metropolitan Chicago, and other financial subsidiaries in Delaware, Florida and Illinois.

ARDMORE, OKLA. (NOV. 27) PR NEWSWIRE - Noble Affiliates Inc. (NYSE: NBL) today announced that its wholly owned subsidiary, Samedan Oil Corp., has discovered additional oil and gas reserves on its West Cameron 290 property located offshore Louisiana.

The company drilled the OCS-G 4818 No.4 well to a total depth of 8,700 feet and logged 110 feet of gas/condensate pay in the "I" sand. The well tested 10.6 million cubic feet of gas and 77 barrels of condensate per day through a 27/64 inch choke with 2,574 pounds flowing tubing pressure. The well is located approximately 1,700 feet from the No.3 (A-1) well, which is the closest producing well on the property.

Samedan is operator of the well and owns a 25 percent working interest in the property. Other working interest owners include New England Energy Inc., a wholly owned subsidiary of New England Electric System, 25 percent, and Walter Oil and Gas Corp. and its exploration program participants, 50 percent.

Noble Affiliates Inc. is an independent energy company with exploration and production operations throughout major basins in the United States, including the Gulf of Mexico and offshore California, as well as foreign operations primarily in Canada, Tunisia and Indonesia. Its common stock is listed on the NYSE under the symbol NBL.

#90331p8557 11/27/1990 ~PR Newswire

TORONTO (NOV. 27) PR NEWSWIRE - Dr. Klaus M. Zeitler, president and chief executive officer of Metall Mining Corporation announced today that the corporation's net income for the nine months ended Sept. 30, 1990 was $9.3 million or $0.24 per share compared to $27.8 million or $0.74 per share in 1989. Earnings for the third quarter were $4.2 million or $0.11 per share compared to $6.5 million or $0.17 per share in the comparable period last year.

Sales were $128.9 million for the nine months ended Sept. 30, 1990 as compared to sales, in 1989, of $75.7 million. For the third quarter, sales were $47.7 million, in 1990, compared to $34.4 million in 1989. The increase in sales reflects nine months of sales for the Copper Range Company compared to six months last year (as Copper Range was acquired effective April 1, 1989) and the acquisition in 1990 of mining operations in Germany and Thailand.

Copper Range produced 71.2 million pounds of equivalent copper cathode during the nine months ended Sept. 30, 1990. Production improved in the third

quarter to 25.0 million pounds of copper compared to 23.3 million and 22.8 million pounds in the first and second quarters, respectively. The underground equipment modernization program has resulted in increases in production and significant productivity gains in the mining units which have been upgraded and ongoing improvements are anticipated. Operating costs remain high due to the increased underground development expenditures and repairs and maintenance costs. Copper Range contributed operating earnings of $7.5 million and $2.6 million, respectively, for the nine and three months ended Sept. 30, 1990.

The OK Tedi project in Papua, New Guinea, in which Metall has a 7.5 percent interest, had a profit of $70.9 million in the nine months ended Sept. 30, 1990, compared to $16.9 million in the comparable period in 1989. Metall's share, in 1990, was $3.1 million compared to $0.9 million in 1989. This improved performance was largely due to increased mill throughput. OK Tedi's production for the nine months was 338,000 ounces of gold and 272 million pounds of copper.

Metall's common shares were listed for trading on The Montreal Exchange on Nov. 9, 1990 under the symbol MLM.

#90331p8562 11/27/1990 ~PR Newswire

NEW YORK (NOV. 27) PR NEWSWIRE - The American Stock Exchange today announced it would aggressively pursue the trading of unregistered foreign securities now trading as American Depositary Receipts (ADRs) over-the-counter market electronic bulletin board or "pink sheets."

The proposal to trade these unregistered ADRs of large foreign issuers will be submitted to the exchange's board of governors at its Dec. 13 meeting. It is expected that the board will consider a number of alternative trading vehicles including:

-- using existing floor facilities of the American Stock Exchange such as its order delivery systems and the market capability of its specialists;

-- using a variation of the System for Institutional Trading of Unregistered Securities (SITUS), an electronic network under development by the Amex and Reuters for the trading of private placement securities; or

-- using a new trading facility being planned in Hawaii by the Amex and the Economic Development Corporation of Honolulu (EDCH).

Any action of the exchange's board of governors would require approval of the

Securities and Exchange Commission.

Many of the world's largest corporations have shares of stock, represented by ADRs, trading in this country in the over-the-counter market. These corporations want exposure to U.S. investors but do not wish to adhere to certain accounting and disclosure requirements necessary for formal listing on a U.S. exchange.

"With the SEC-mandated establishment of the electronic bulletin board, the public now has full access to these securities. We feel that we can provide a trading vehicle that blends the access of a bulletin board and the protection of a national auction marketplace. It fits nicely into the American Stock Exchange's strategic plan of establishing a powerful presence for itself in the international securities market," said American Stock Exchange Chairman James R. Jones.

"We all need to recognize the world is changing, but at the same time we must maintain the integrity of the marketplace if we are going to attract sustained investor interest. Trading in the securities we are targeting in this proposal should be monitored to the fullest extent possible to protect the investor. The American Stock Exchange can provide the qualities deemed necessary for safe participation in these markets," said Jones.

SAN DIEGO (NOV. 27) PR NEWSWIRE - San Diego Gas and Electric (SDG&E) (NYSE: SDO) officials said today the company will contest a FERC administrative law judge's initial decision to reject the proposed Southern California Edison-San Diego Gas & Electric merger.

Judge George P. Lewnes issued his 119-page decision today, calling the proposed merger "anti-competitive."

"We're not surprised with the decision and will appeal to the full Commission to reverse this result," said Lee Haney, senior vice president of finance and chief financial officer. "We believe that the record supports the nearly $1.7 billion in merger benefits and that the antitrust conditions agreed to with the Department of Justice resolve any competitive concerns.

"In addition, we note that the FERC staff found that the benefits of the merger justify approval with conditions similar to those agreed to by the Department of Justice."

Haney added that the company will continue its work to consummate the proposed merger.

"We observe that FERC reversed the same ALJ on the Utah-Pacificorp merger," said Haney. "We expect the Commission to do the same here."

LAS VEGAS (NOV. 27) PR NEWSWIRE - American Pacific Corp. (NASDAQ: APFC, PSE: APFP), in line with the preliminary figures released on Nov. 5, today reported sharp gains in revenues, net income and net income per share for both the fourth quarter and fiscal year.

For the year ended Sept. 30, 1990, net income climbed to $7,363,000, equal to $1.42 per share on revenues of $59,509,000. Results for the prior year are not directly comparable since the company was operating in a start-up mode for the first 10 months of fiscal 1989. For that year, the company reported net income of $1,366,000, equal to 25 cents per share on revenues of $13,962,000. Weighted average common shares outstanding were 5,147,000 in fiscal 1990 and 4,860,000 in fiscal 1989.

Net income for the fourth quarter totaled $1,819,000, equal to 37 cents per share, up 36 percent from $1,353,000 or 27 cents per share one year earlier. Fourth quarter revenues increased 40 percent to $15,317,000 from $10,988,000 in the fiscal 1989 quarter.

American Pacific's principal business activities consist of the production of ammonium perchlorate, the oxidizer utilized in composite solid rocket propellants employed by a large number of space and military systems. Through

direct and indirect subsidiaries, the company is engaged in the manufacture of chlorate and perchlorate chemicals, the design and manufacture of electrolytic systems and electrodes, the design and manufacture of pollution control systems, and industrial real estate development.

MOUNTAIN VIEW, CALIF (NOV. 27) PR NEWSWIRE - ParcPlace Systems today shipped the newest releases of its object-oriented programming systems, Objectworks(R)/C++ and Objectworks/Smalltalk, and announced the formation of ParcPlace Partners, a value-added business program for third-party Smalltalk application developers and systems integrators.

"Since we announced the two Objectworks systems this summer, the response from our beta-site developers has been extremely positive," said Doug Pollack, ParcPlace's vice president of marketing, sales and services. "We're confident that the business and engineering communities at large will embrace Objectworks/Smalltalk and Objectworks/C++, adding to the momentum of object-oriented technology," he concluded.

The ParcPlace Partners program will provide a support infrastructure for value-added resellers (VARs), systems integrators and independent software vendors (ISVs) who develop applications in the Smalltalk language. "Recent attention from a variety of sources has elevated market awareness of the benefits of Smalltalk," explained Pollack. "ParcPlace Partners should continue increasing the market acceptance of Smalltalk by helping third parties develop and implement applications that address real-world business issues," he added.

Partners Working Together

The ParcPlace Partners program offers a variety of marketing and technical services that support the development, porting and selling of Smalltalk applications. ParcPlace Partners will provide input to the ParcPlace Advisory Council, which offers valuable feedback on products and other issues. Marketing services include a Partners catalog, a direct-mail program, a special column in ParcPlace's newsletters, as well as other co-marketing activities. Technical services include a support hotline, a technical newsletter, an electronic bulletin board, discounted software updates, and early releases of new versions of Objectworks/Smalltalk.

ParcPlace Partners are also eligible for significant discounts on development licenses. Partners receive a 90 percent discount on their first development license, and a 40 percent discount on the next ten development licenses. Partners also receive 20 percent off tuition for courses offered through ParcPlace's Educational Services.

Based in Mountain View, ParcPlace Systems Inc. is a pioneer and leader in bringing the benefits of object-oriented programming technology to commercial organizations.

HIGHLAND PARK, MI (NOV. 27) PR NEWSWIRE - Chrysler Corporation (NYSE: C) reported a 10.8-percent increase in domestic car sales and a 0.5-percent increase in domestic truck sales for the mid 10-day selling period of November compared to the same period a year ago. Total car sales, which includes imports, are up 8.4 percent.

Dodge Dynasty sedans led car sales with an 81-percent gain. Chrysler brand large sedans, Plymouth Acclaim and Laser, Dodge Spirit, and Eagle Talon, Summit and Premier also registered gains.

Dodge Caravan and Plymouth Voyager minivan sales were up 35 and 31 percent, respectively, which Chrysler attributed to attractive incentives on 1989 and '90 models. Jeep Wrangler sales were up 4 percent, helping contribute to the increase in truck sales for the period.

NEWPORT NEWS, VA (NOV. 27) PR NEWSWIRE - The Flight International Group, Inc. (NASDAQ: FLTI) announced today that on Nov. 20, 1990 Smith Technologies Inc., pursuant to an amended Option and Stock Purchase Agreement it had previously executed with Flight International, exercised its option to purchase 500,000 additional shares of Flight International's common stock at an exercise price

of $3.00 per share.

As a result of the exercise of such option, Smith Technologies' right to require Flight International to purchase, at an aggregate price of $1,000,000, the 333,333.3 shares of Flight International's common stock owned by Smith Technologies prior to such exercise has been extinguished.

The exercise by Smith Technologies brings Smith Technologies' ownership of Flight International's outstanding common stock from approximately 7.57 percent to approximately 17 percent. The Option and Stock Purchase Agreement contains certain anti- dilution provisions, which the board of directors of Flight International is currently reviewing.

Fred Shaw, senior vice president and chief financial officer of Flight International, stated: "This additional investment adds $1.5 million in primary capital to the company, and because the 'put' option has been extinguished, the company can now recognize as capital the earlier $1 million investment of Smith Technologies."

The Option and Stock Purchase Agreement provides that Smith Technologies has a further option to purchase 4,500,000 additional shares of Flight International's common stock, at an exercise price of $3.00 per share, in three annual installments beginning July 12, 1991.

Flight International also announced that Smith Technologies has stated that Smith Technologies will seek to change the composition of the present board of directors of Flight International and to designate representatives of Smith Technologies to constitute a majority of the board of directors.

The Flight International Group, Inc. is a leader in aviation services with interests in government and military contracts as well as commercial flight operations.

BOSTON (NOV. 27) PR NEWSWIRE - At the First Boston Technology Conference here today, AMP (NYSE: AMP) Chairman and Chief Executive Officer Harold A. McInnes commented on estimated fourth quarter results and on the outlook for next year.

He indicated fourth quarter sales are expected to be up about 12 percent year-to-year to $760-770 million. This would be up from $750 million in the third quarter and similar to the record $764 million sales in the first quarter. Fourth quarter earnings are expected to be about 65 cents/share -- similar to the 65 cents in the year-earlier period and down slightly from the

68 cents in the third quarter. These estimates are $10-15 million lower in sales and 5-10 cents/share lower in earnings than was expected as AMP entered the fourth quarter. The lower current estimate is due to slowing in parts of AMP's European business.

For all of 1990, sales are expected to be up 8-9 percent to over $3 billion from $2.8 billion in 1989, and earnings about $2.70/share up from $2.63/share in 1989.

For 1991, sales are expected to grow 7-9 percent to about $3.3 billion. U.S. sales are expected to be flat or up a few percent. At constant currency rates, Europe is expected to grow about 10-13 percent in U.S. dollars and Asia/Pacific at over 20 percent in U.S. dollars.

AMP recently announced a price increase to U.S. customers effective Jan. 1, 1991, estimated to average between 2 percent and 5 percent.

McInnes stated, "If we get the sales growth we expect and some improvement in U.S. margins, there is a good chance we can equal or exceed this year's earnings and the possibility of breaking the $3.00/share earnings barrier.

Harrisburg, Pa.-based AMP Inc. is the world's leading producer of electrical/electronic connection devices. It has nearly 25,000 employees in nearly 160 facilities in the U.S. and 27 other countries. AMP stock is listed on the New York, Pacific and other regional stock exchanges (symbol -- "AMP").

BIRMINGHAM, AL (NOV. 27) PR NEWSWIRE - Big B (NASDAQ: BIGB) announced today record sales for the 38-week and 12-week periods ended Oct. 27.

Sales rose to $327,347,000 from $285,050,000 for the 38-week period, up 14.8 percent. The company reported a net loss for the period of $(3,920,000) as compared to a profit of $2,895,000 in the prior year.

For the 12-week third quarter, sales rose to $103,208,000, up 14.8 percent from $89,876,000 in the prior year while the company recorded a net loss of $(959,000) for the quarter as compared to a net loss in the prior year of $(584,000).

The company noted that implementation of cost-cutting measures and gross margin adjustments following the second quarter had substantially reduced the loss in the third quarter and are expected to result in further improvement during the fourth quarter.

The board of directors elected to omit a quarterly dividend normally paid in December due to restrictive provisions in various debt agreements and to further enhance cash flow to facilitate debt repayment. Future quarterly dividends will be reviewed based on the company's operations at that time.

During the quarter four stores were opened and the final store opening planned for this fiscal year was opened the first week of the fourth quarter, bringing the total store count to 311. The new stores are located in Birmingham (2), and Tallassee, Ala.; and Atlanta and LaFayette, Ga. The 200,000-square-foot expansion of the distribution center is nearing completion and should begin operating during the fourth quarter. The company reported that it had closed the Atlanta distribution center during the third quarter and will benefit from much improved operating efficiency by now shipping all stores from its expanded 440,000-square-foot state-of-the-art facility located in Bessemer, Ala.

Big B Inc. operates stores in Alabama (151), Georgia (113), Florida (20), Mississippi (9) and Tennessee (18).

PALM BEACH GARDENS, FL (NOV. 27) PR NEWSWIRE - Top Source, Inc.'s (NASDAQ: TOPS) CEO, Stuart Landow, announced today results of independent lab tests, which verified that the Tops Engine Control System (EFECS) exclusively licensed to the company from M.I.T., could be programmed to improve fuel economy up to 18 percent or significantly reduce exhaust emission without power loss while using less costly, lower octane fuels.

Optimal balance measured a 6 percent economy gain with emissions calculated to be within federal standards when engine speed and load were comparable to a 50 m.p.h. cruise.

The system was tested, using a retrofitted late model GM V6 engine, on a fully instrumented engine dynomometer at the Arthur D. Little Laboratory in Cambridge, Mass. ADL's engineers commented that there is significant potential for additional gains from further optimization.

EFECS (Engine Fuel Economy, Emission Reduction Control System) will be marketed to vehicle manufacturers worldwide to help meet future engine performance standards and can be retrofitted on cars, trucks and other engines to reduce fuel consumption, utilize lower octane fuels and help improve present air quality conditions.

#90331p8600 11/27/1990 ~PR Newswire

MIDDLETOWN, PA (NOV. 27) PR NEWSWIRE - The evaporation of 2.3 million gallons of processed water from GPU Nuclear's Three Mile Island Unit 2 is expected to begin Thursday, Nov. 29.

Evaporation, which was scheduled to begin in September, was delayed to allow the commonwealth of Pennsylvania to review a Columbia University health study released Aug. 31 that found no link between the TMI-2 accident and cancer incidence in the area.

In a letter to GPU Nuclear, Pennsylvania Department of Environmental Resources (DER) Secretary Arthur Davis said DER found "no reason to continue our request for a hold on the evaporation process."

The U.S. Nuclear Regulatory Commission (NRC) and the DER had previously ruled, following extensive public NRC hearings and DER review, that the two-year evaporation process will not present a threat to public health or to the environment.

The water contains slight amounts of radioactivity and is being stored on site in large tanks.

The average exposure to any individual within 50 miles of TMI during the entire two years of evaporation will be 0.005 millirem. (A millirem is a measurement of radiation exposure.)

By comparison, the average exposure from natural background radiation in the United States is about 1 millirem per day. That means that during two years of evaporation, the average exposure is a minute fraction of the exposure one receives each day from being outdoors. Or put another way, the maximum dose from the entire two-year process will be equivalent to what the average television viewer receives annually watching color TV.

The evaporation process involves first boiling the water in small batches to remove trace radioactive particles such as cesium and strontium and non-radioactive particles such as boron and sodium. The particles will be collected, dried, placed in drums and shipped to a low-level waste site.

After the water is boiled and turned to steam it is then turned back into water, passed through a radiation monitor, vaporized and released as steam through a vent stack.

More than 99 percent of the original radioactivity in the water has been removed over the years by processing the water through a demineralizing system installed at Unit 2 after the accident.

An additional 99 percent of the remaining radioactive and non- radioactive particles will be removed from the water during the evaporation process. The evaporator, however, will not remove tritium from the water. Tritium is a form of hydrogen and because hydrogen and oxygen combine to make water, the tritium cannot be separated from the water, but will be released into the atmosphere.

GPU Nuclear's environmental monitoring program will help verify that there are no adverse effects on the environment during and after evaporation.

Atmospheric water vapor will be collected by equipment at five new locations around TMI and checked for tritium. In addition, tritium analyses will be done on environmental samples such as milk collected from seven local farms and vegetation from 20 locations during the growing season.

Regular reports on the results of the environmental monitoring program will be filed with the NRC and the DER. GPU Nuclear will make the monitoring results available in routine newspaper advertisements.

MENTOR, OHIO (NOV. 27) PR NEWSWIRE - ISK Enterprises, Inc., a subsidiary of Ishihara Sangyo Kaisha, Ltd. (ISK) of Osaka, Japan, today acquired 100 percent of SDS Enterprises, Inc. from Fermenta AB of Stockholm, Sweden, for a total consideration of approximately US $300 million. SDS Enterprises, Inc. has one wholly owned subsidiary known as SDS Biotech Corporation (SDS).

SDS has two wholly owned operating subsidiaries, Fermenta ASC Corporation and Ricerca, Inc. Fermenta ASC Corporation, based in Mentor, Ohio, has production facilities near Houston, and manufactures and markets a variety of agricultural and specialty chemical products. Ricerca, Inc. is a research and development company which provides broad-based technical services to clients on a contract basis. Its facilities are located in Concord Township, Ohio. ISK intends for these two companies to continue to operate in the same manner as they do currently.

According to Franklin S. Barry, president of SDS, "The acquisition by ISK is indicative of its objective to maximize return on investment in new technologies. ISK's excellent track record in research, combined with our strength in product development, registration, and marketing, result in an integrated organization with worldwide reach."

Barry said that customers currently served by the two units will benefit from several new products to be introduced by ISK in the near future.

ISK, one of the world's leading producers of titanium dioxide, also develops, manufactures, and markets agricultural chemicals as well as magnetic materials. Its 1990 sales totaled US $800 million, including the sales of its subsidiary companies.

WEST ORANGE, NJ (NOV. 27) PR NEWSWIRE - Micro Healthsystems, Inc. (NASDAQ: MCHS), a manufacturer of Bedside Nursing Patient Care Systems and Healthcare Financial Management Systems, "is guaranteed significant revenues and profits from its recently signed contract with Baxter Healthcare Corporation, a subsidiary of Baxter International (NYSE: BAX), thus assuring the continuation of the record growth which in the last three fiscal years resulted in earnings rising from $.06 per share to $.21 per share to $.49 per share, and in the half year ended Sept. 30, 1990 increasing to $.42 against $.24," S.M. Caravetta, chairman and chief executive officer, today told money managers and analysts attending the Seventh Annual Medical Conference hosted by Robertson, Stephens and Co. "Earnings for the year beginning April 1, 1991, barring unpredictable circumstances, should exceed $1.25 per share," he said.

Caravetta also informed analysts that "under the agreement with Baxter, MedTake will also develop additional systems to permit its usage in ICU/CCU, emergency rooms and other hospital departments. Therefore our reach in the hospital market will expand dramatically. In addition to eventually linking MedTake with all other hospital information systems, such as admitting, pharmacy, laboratory and acuity, we plan ultimately to place MedTake units in physician's offices, allowing doctors to monitor their patients' treatment and condition from the office."

Caravetta further stated that "although Baxter will be the exclusive distributor in the U.S. and Canada, the contracts for the installation of the MedTake System and ongoing hardware and software service agreements will be signed by the hospitals directly with our MedTake subsidiary. MedTake will continue to directly receive maintenance, upgrade and renewal fees from all the hospitals."

With MedTake now servicing approximately 4,000 beds in 30 institutions, MedTake has approximately 70 percent of the installed base of Bedside Nursing Patient Care Systems in the U.S., Caravetta stated. He pointed out that "the approximately 1.3 million military and civilian beds in the U.S. represent a major market opportunity for us, and the Baxter affiliation will permit us to not only accelerate our already aggressive growth program, but expand it into the Canadian market and into other hospital activities. The significance of this opportunity is best illustrated by noting that our record revenues of $7.4 million for the year ending March 31, 1990 included not only MedTake, but our financial administrative software programs and services for hospitals. Although clearly we are growing very rapidly and profitably on our own, the Baxter arrangement presents an unusual opportunity to shorten the cycle in which we capture a very large portion of a marketplace in which we are already the dominant factor."

Caravetta noted that "our financial administrative systems continue their slow

but steady growth with high profitability. We believe we are now in an excellent position to take advantage of the expanding hospital marketplace, both for MedTake and for our financial management and administrative software services. We have no formal debt, approximately $3.0 million in cash, substantial bank lines and strong cash flow. As of Sept. 30, we had a current ratio of 4.7 to 1, and a quick ratio of 4.2 to 1.

"In being selected for the first time by Forbes Magazine as one of the "200 Best Small Companies in America," Micro Healthsystems moved into 164th place by achieving a latest 12 month return on equity of 23.1 percent, 5 year earning per share growth rate of 116 percent and a debt/equity ratio of 0," he said.

#90331p8622 11/27/1990 ~PR Newswire

WABASH, IN (NOV. 27) PR NEWSWIRE - The Shirt Shed, Inc. (NASDAQ/NMS: SHRT) announced an indefinite postponement of its annual meeting of shareholders, previously scheduled to be held on Dec. 11, 1990. Shirt Shed and Signal Apparel Company, Inc. (NYSE: SIA) jointly announced on Oct. 30, 1990 that they commenced discussions concerning a proposal by Signal to enter into a negotiated transaction pursuant to which all of Shirt Shed's shares other than those held by Signal would be acquired. The proposal is subject to the negotiation and execution of a mutually acceptable acquisition agreement, approval by the boards of directors of both Signal and Shirt Shed. Signal's arranging financing and the receipt of any required regulatory and other approvals, including any required shareholder approvals. There can be no assurance as to whether or when a transaction will be consummated.

In addition to the annual election of directors, shareholders were to be asked at the Dec. 11 meeting to consider a proposed amendment to Shirt Shed's certificate of incorporation. The amendment would authorize a new class of preferred stock and additional common stock, as contemplated by the previously announced transaction pursuant to which Signal acquired a $6,000,000 subordinated note of Shirt Shed. The note, issued July 13, 1990, is convertible into 8 percent convertible preferred stock if the charter is amended. The preferred stock would be convertible into 2,000,000 shares of Shirt Shed's common stock.

In connection with postponement of the meeting, Shirt Shed and Signal amended their agreement under which the subordinated note was issued. This agreement requires Shirt Shed's charter to be amended as described above by Dec. 15, 1990. The amendment to the agreement provides that Shirt Shed will not be in default for failure to meet this deadline for so long as discussions are

continuing regarding the proposed transaction. If either party terminates the discussions or determines not to proceed with the transaction, the amendment to the agreement allows adequate time for Shirt Shed to attempt to obtain shareholder approval for the charter amendments.

#90331p8631 11/27/1990 ~PR Newswire

PITTSBURGH, (NOV. 27) PR NEWSWIRE - Computer Research Inc. (NASDAQ: CORE) today reported a net loss of $358,837 or 9 cents per share on revenues of $11,007,613 for the fiscal year ended Aug. 31, 1990, compared to earnings of $38,622 or 1 cent per share on revenues of $12,136,181 for the previous 12-month period.

Computer Research provides computerized back-office accounting services for about 80 securities broker/dealers and brokerage subsidiaries of banks throughout the United States. Its wholly owned subsidiary, Computer Applications Division Inc., provides CAD/CAM (computer-aided design-drafting/computer-aided manufacturing) systems, equipment and training for engineers, architects, industrial designers and educational institutions in western Pennsylvania and in the Denver area.

James L. Schultz, president, said the 9 percent drop in revenues for 1990 compared to the previous year was due primarily to a decrease of $1.3 million in sales by the CAD subsidiary. He said the decline reflected both a softening

in demand for CAD/CAM software and hardware and lower unit prices resulting from advances in computer hardware development.

Approximately 57 percent of the company's total revenues for the year were generated by the CAD subsidiary.

"This was a disappointing year for us," Schultz said. "Industry predictions of growth in the CAD/CAM market simply did not materialize and our sales fell by more than $1 million.

"Revenues from our data-processing services grew slightly, but not enough to offset the substantial drop in the CAD/CAM area, which had been the strong growth segment of our business in the previous two years."

#90331p8632 11/27/1990 ~PR Newswire

NEW YORK (NOV. 27) PR NEWSWIRE - J. Michael Cook, chairman and chief executive officer of Deloitte & Touche, has just assumed the leadership of the nation's largest United Way organization, The United Ways of Tri-State. He will serve as chairman of the board for the next two years, succeeding David T. Kearns, chairman of Xerox Corporation.

In this role, Cook will lead a board of 80 community leaders from across the tri-state area of Connecticut, New Jersey and New York in supporting the nation's largest charitable contributions drive and the provision of services through 35 area United Ways. Two out of five people in the tri-state area benefit from United Way-funded services.

"The United Way has long provided the infrastructure for the voluntary delivery of health and human service across the nation. That system of caring faces particular challenges in the environment of a weakening private-sector economy and reduced government funding on the local, state and national level " Cook explained. "We are caught in a 'Catch-22'. The need for United Way agency services has never been greater nor has the challenge of raising the funds to make it all possible. With the help of the thousands of volunteers across the tri- state system, I know we'll meet that challenge."

Cook is no stranger to community involvement. He served with the United Ways of Tri-State for the last three years, most recently chairing its Strategic Planning Committee. He has been active with local United Ways in both New York City and Wilton, Conn., and served on the United Way of America's Strategic Planning Committee. Cook is a member of the board of directors of the New York City Ballet, the board of trustees of the Central Park Conservancy and the board of trustees of the U.S. Council of International

Business.

He is past chairman of the American Institute of Public Accountants, having served as chairman during its centennial year, and is currently serving as chairman of the 1992 World Congress of Accountants. Cook is a member of the Conference Board.

The United Ways of Tri-State is a fundraising partnership of 35 local United Ways in New York, New Jersey and Connecticut, which raised over $200 million last year, the greatest amount ever raised for health and human services in this region. Over 1,800 human care agencies are supported through the regionwide fundraising campaign. The 1990-91 United Ways of Tri-State campaign, currently underway, seeks to raise $218 million.

Cook noted that this year's ambitious fundraising goal marks the first step in a multi-year plan to strengthen the United Way's resources to help people in need throughout the region, despite economic challenges and uncertainties. "The human service needs of our communities are expanding and the United Way Partnership in the tri- state region must meet the challenges of these growing needs," he affirmed. "The dollars raised are more than numbers; they represent meals, shelter, health services and many other vital programs. So much depends on everyone assuming a leadership role and taking responsibility for making a difference at this critical time."

Deloitte & Touche, the nation's third largest professional services firm, provides accounting and auditing, tax and management consulting services through 20,000 people in more than 100 U.S. cities.

BEDFORD, Mass. (NOV. 27) PR NEWSWIRE - Millipore Corporation (NYSE: MIL) announced today that it was consolidating its MilliGen/Biosearch Division into the company's Waters Chromatography Division. At the same time the company announced that Douglas A. Berthiaume, senior vice president and chief financial officer of the company, would become president of the Waters Chromatography Division, succeeding William L. Shippey. Shippey resigned as president of that division as well as executive vice president of Millipore to pursue other options.

In making the announcements, John A. Gilmartin, chairman and chief executive officer of Millipore, stated: "We have achieved significant market penetration through the focused efforts of our MilliGen/Biosearch Division, but in the current worldwide business climate, the company's life science instrumentation opportunities can best be fulfilled with MilliGen/Biosearch as

part of the Waters Chromatography Division. We are confident that MilliGen/Biosearch can be integrated with the rest of our instrument business while maintaining its customer focus and its drive for future growth, and at the same time allowing Millipore to achieve the benefits resulting from such consolidation."

Millipore is a multinational, high technology company that leads the $3 billion separations industry. Millipore products are used for analysis, synthesis and purification in life science research, pharmaceutical production environmental testing, beverage processing, semiconductor manufacturing, health care and other applications.

#90331p8635 11/27/1990 ~PR Newswire

GREENVILLE, SC (NOV. 27) PR NEWSWIRE - Gates/FA Distributing (NASDAQ: FACO) has reported financial results for the first quarter ended Sept. 30, 1990. The company realized a net income of $189,000 or 1 cent per share, compared to a net income of $280,000, or 1 cent per share for the three months ended Sept. 30, 1989.

Net sales for the first fiscal quarter of 1991 were $40.1 million, compared to $41.2 million for the same quarter a year earlier, representing a 2.79 percent decrease. However, sales for the first quarter were 13.36 percent, or $4.7 million higher than the fourth quarter of 1990.

According to management, this increase indicates that the company has recovered from the loss of the Toshiba line as reported in the March 31, 1990, quarterly report, through increased sales in existing lines and the addition of new product lines.

Due to competitive pressures, gross margins decreased from 10.57 percent for the first quarter of fiscal 1990 to 10.02 percent for the same period in 1991. However, margins have increased from the 9.65 percent recorded for fiscal 1990. This increase is a result of the company's focus on higher margin sales for fiscal 1991.

Despite the decrease in sales and gross margins, income before income taxes was $318,000, representing an increase of 13.57 percent, or $38,000 over $280,000 for the same period in 1990. Selling, general and administrative costs (SG&A) as a percent of sales for the most recent quarter reported were 7.74 percent, compared to 8.22 percent for the corresponding quarter of fiscal 1990. This reduction reflects the increased efficiencies realized by the successful completion of the centralization of warehouse operations.

Gates/FA Distributing is a national distributor of a select number of high-quality microcomputer product lines. Serving only the reseller, Gates/FA offers "Next Day/ No Extra Cost!" delivery from its centralized-hub warehousing facility. The corporate headquarters are located in Greenville, S.C., at 803-234-0736. The national toll-free sales telephone number is 800-332-2222.

NORFOLK, VA (NOV. 27) PR NEWSWIRE - Norfolk Southern Corporation (NYSE: NSC) today made several senior management changes, including the election of Joseph R. Neikirk as vice chairman and the elevation of three other officers. The changes were announced by Chairman, President and Chief Executive Officer Arnold B. McKinnon following approval by the board of directors.

Neikirk, currently executive vice president-Administration, will assume his new position January 1. Also effective January 1:

Robert E. L. deButts, currently senior vice president-Corporate Development and Real Estate, becomes executive vice president-Corporate Development and Real Estate. David R. Goode, currently vice president-Taxation, will succeed Neikirk as executive vice president-Administration.

Henry C. Wolf, currently assistant vice president-tax counsel, will succeed Goode as vice president-Taxation.

Neikirk, 62, began his career with Norfolk and Western Railway in 1955 and rose through the ranks in various Operations positions. When NW and Southern consolidated in 1982, he became vice president-Corporate Development for Norfolk Southern, and subsequently vice president-Personnel and Labor Relations.

Neikirk, a University of North Carolina graduate, became executive vice president-Administration in 1987, and also serves as vice president and executive director of the Norfolk Southern Foundation.

deButts, 63, rose through increasingly responsible positions in the Southern Railway law department and became general counsel of Norfolk Southern. He was named vice president-Real Estate in 1984, vice president-Corporate Development and Real Estate in 1987 and senior vice president in 1988. He holds BA and LLB degrees from the University of Virginia.

Goode, 49, joined Norfolk and Western as a tax attorney in 1965, became director-Taxation in 1971 and was elected vice president-Taxation of Norfolk Southern in 1985. He is a graduate of Duke University and Harvard Law School.

Wolf, 48, joined NS in 1973 as senior tax attorney, becoming assistant vice president and tax counsel in 1984. A former attorney adviser for the U.S. Tax Court in Washington, Wolf holds BA and JD degrees from William and Mary, an MBA from Louisiana State and a LLM degree from Georgetown University.

MILAN, ITALY (NOV. 27) PR NEWSWIRE - The new Montedison (NYSE: MNT), the company resulting from the recent merger between Ferruzzi Agricola Finanziaria and Montedison, announced today the decision to form a new holding company for its chemical, energy and pharmaceutical activities.

This new company will be called Montecatini S.p.A. and will be 100 percent owned by Montedison. Italo Trapasso, vice chairman of Montedison, will be Chairman of Montecatini S.p.A..

Montecatini will be the parent company for Himont (the world's leading producer and marketer of polypropylene), Ausimont (fluorochemicals), Sir (advanced materials), Selm (the energy company of the group, whose corporate name will be changed to Edison S.p.A.), Erbamont (pharmaceuticals), and all of the other companies which comprise Montedison's chemicals, pharmaceuticals and energy sectors. Montecatini S.p.A. and Edison S.p.A. were the names of the companies which originally merged to form Montedison S.p.A. in 1966.

The formation of Montecatini is part of the strategy for the development of the new Montedison, which will emphasize a strong agro-industrial sector coordinated by Eridania and an equally important and highly technological chemical sector coordinated by Montecatini.

Montecatini will have consolidated sales of approximately 6.5 trillion lire (approximately US$5.8 billion) as of 1991. Including the 50/50 joint ventures Monteshell and Ja/Mont, the combined sales revenues will be roughly 11 trillion lire (US$9.9 billion). The company will benefit from the significant research organizations within each sector.

The Ferruzzi Group is a leading international industrial system which operates through Montedison in the chemical, pharmaceutical and energy sectors, as well as in the agro-industrial sector, with an aggregate turnover of approximately $40 billion.

HARTFORD, CONN. (NOV. 27) PR NEWSWIRE - The board of directors of Connecticut Natural Gas Corporation (NYSE: CTG) today declared a quarterly dividend of 35 cents per share on the common stock of the company payable Dec. 21, 1990, to stockholders of record Dec. 7, 1990.

President Victor H. Frauenhofer noted that the amount of this quarterly dividend constitutes a one cent increase over the dividend payments made to common shareholders in the most recent quarters. "The increase largely was made possible through the disposition this year of several non-regulated

businesses that resulted in a net gain, as well as improving earnings from the ongoing non-regulated operations, for which there is no plan of disposition," Frauenhofer said.

Connecticut Natural Gas Corporation has paid quarterly cash dividends for 139 consecutive years, longer than any other gas distribution utility listed on the New York Stock Exchange.

Connecticut Natural Gas Corporation's common stock ticker symbol, as listed on the New York Stock Exchange, is CTG. The Wall Street Journal listing is ConnNatGas and in other newspapers the listing is ConnNG.

#90331p8645 11/27/1990 ~PR Newswire

GLEN ELLYN, ILL. (NOV. 27) PR NEWSWIRE - The Nuclear Regulatory Commission staff has proposed a $112,500 fine against the Illinois Power Company for two violations of NRC safety requirements at the Clinton Nuclear Plant, Clinton, Ill.

NRC inspections March 14-May 14, 1990, and May 18-31, 1990, determined that the first violation involved the inoperability of the plant's two primary emergency diesel generators.

NRC regulations require the reactor to be shutdown if one of the two diesels is not operational within two hours. (An emergency diesel generator provides electrical power to the reactor and its safety systems in the event off-site electrical power is lost.)

Beginning May 14, 1990, the reactor was in an operating condition for 31 hours even though both diesel generators were inoperable. During this period, the licensee discovered that several valves in the service water system serving the two diesels were incorrectly positioned by operators following maintenance. The mispositioned valves would have prevented the service water system from adequately cooling the diesels if they had been called upon during an emergency.

Regional Administrator A. Bert Davis, in notifying the company of the proposed fine, said that "if the diesel generators had been called upon during a loss

of coolant accident, coincident with a loss of offsite power, the diesels would have physically failed within approximately 30 minutes of starting unless the operators responded to the diesel trouble alarm, correctly diagnosed the problem, and locally opened the valves." The proposed fine for this violation is $62,500.

The second violation involved a failure by the licensee to promptly identify and correct a potential safety problem first discovered on Jan. 24, 1990. At that time, plant engineers found that the flow of water through a heat exchanger in a room housing the shutdown service water pump was lower than expected. Without a properly functioning heat exchanger, heat could build-up in the room and either damage the pump or force it to shut down. (The shutdown service water pump provides cooling water to many components and heat exchangers in the plant. A heat exchanger provides the same type of heat removal service as the radiator on a car.)

#90331p8646 11/27/1990 ~PR Newswire

NEW YORK (NOV. 27) PR NEWSWIRE - Aer Lingus has announced the deferment of the Los Angeles-Ireland service as part of an action plan to counter rising costs and the effects of the recession in air transport. The announcement follows a major review of the airline's operating plans in the light of weakening demand and escalating costs affecting airlines worldwide.

Key elements in the program will also include suspension of Los Angeles to Ireland freighter service, reduction of flights on some British and domestic Aer Lingus routes and the disposal of some of the older 737 aircraft. The plan also calls for revised schedules designed to protect the airlines strategic long term interests and position Aer Lingus to take advantage of expansion opportunities when buoyancy returns to the market.

Senior Vice-President North America, John Bastable said "the decision to postpone the start of the Los Angeles service was very disappointing and arrived at reluctantly. Factors affecting this decision included the weakness of the dollar, the late delivery of the new Boeing 767, due to a strike at the manufacturers and the recent increases in the price of fuel due to the continuing Gulf crisis."

He went on to say "we are forced to withdraw the Los Angeles freighter service due to the sharply increased price of fuel. Despite excellent loads it is running at a loss and until the situation improves it cannot be justified. The measures being taken were necessary in the current recessionary climate, but I can assure you that the airlines will continue to provide the highest standards of service to its customers. In 1991 Aer Lingus will operate a

transatlantic schedule from New York, Boston and Chicago similar to this past year. The airline will continue to have a sales office in Los Angeles and I expect to commence passenger service in 1992."

LANSING, MI (NOV. 27) PR NEWSWIRE - Oldsmobile dealers reported sales of 12,763 passenger vehicles in the Nov. 11-20 period for an increase of 11.1 percent over the same period a year ago. In addition, Oldsmobile's model year car and truck sales to date through Nov. 20 are up 16.5 percent from 59,671 last year to 71,501 this year.

Leading this sales increase in an otherwise flat market were the Cutlass Calais with sales up 26.7 percent for the period and 29 percent for the model year and the Cutlass Supreme which marked a 58.5 percent increase for the period and 59.0 percent for the model year. Reflecting Oldsmobile's increased presence in the marketplace, the division's percent of industry now stands at 5.5 percent, up nearly half a point from last year.

"Any sales increase given the current economic and political uncertainties is encouraging, but we're particularly thrilled that we're showing this kind of performance considering we're just now beginning to ship our Bravada sport utility vehicles and Custom Cruiser large wagons," said Oldsmobile General Sales and Service Manager David E. Lahti.

"That tells me that when these new products hit full stride and join our

family of other fine vehicles, including the totally redesigned and reengineered Ninety Eight, we ought to be seeing steady sales and market share gains for the year."

TULSA, OKLA (NOV. 27) PR NEWSWIRE - MPSI China Inc., a wholly owned subsidiary of MPSI Inc., announced today the formation of a new subsidiary, Shanghai MPSI Corp.

The new office will be based in Shanghai, China, and is set to open in January 1991. It will be used to recruit and train computer programmers and conduct software development work for that region. Selected candidates will spend up to one year training in MPSI's Americas region in Tulsa, Okla. Training will consist of learning MPSI computer software systems and models. Gordon Chang will direct the subsidiary's operations from Tulsa.

At the completion of their training, the programmers will develop software for MPSI's clients either at one of MPSI's facilities or at the client's site.

The first four programmers will begin training in Tulsa in early January 1991. It is expected that 10 to 20 programmers will be recruited for the training program each year.

This program will help build a strong software base in China, facilitating future expansion in South Asia. This office will also strengthen MPSI's position as a consulting and services company.

MPSI Inc. is an international computer software and information services company operating in more than 60 countries.

BOSTON (NOV. 27) PR NEWSWIRE - A former closing attorney for ComFed Savings Bank pleaded guilty today to conspiracy to commit bank fraud.

Wayne A. Budd, United States Attorney for the District of Massachusetts, announced that Daniel J. Scanlon of Londonderry, N.H. pleaded guilty to conspiring to defraud ComFed between December of 1987 and March of 1988 by creating false loan documents. These loan documents failed to disclose the full amounts of second mortgages for buyers at Old English Estates in Derry, N.H.

United States District Court Judge Robert E. Keeton set Scanlon's sentencing for Jan. 29, 1991. Scanlon faces a maximum sentence of 5 years incarceration and $250,000 in fines.

The case was investigated by Special Agents of the Federal Bureau of Investigation and was prosecuted by Assistant United States Attorney Margaret R. Hinkle of the Economic Crimes Division.

#90331p8674 11/27/1990 ~PR Newswire

BEAVERTON, OR. (NOV. 27) PR NEWSWIRE - Mentor Graphics Corp. (NASDAQ: MENT) today articulated its vision of concurrent engineering as the most significant engineering methodology of the 1990's, and announced strategic and organizational plans to be the leader in providing the technologies, products and services to realize that vision. The company also announced organizational plans to ensure continued leadership in both the systemr and IC design marketplaces.

A new Concurrent Engineering Group has been established, with Philip Robinson named as its president. This group will include the company's Falcon Framework for Concurrent Design; the OpenDoor program, whereby third parties are encouraged to incorporate their design automation tools and technologies within the Falcon Framework; the company's product data management (formerly the products of the Context Division), CASE and mechanical products; platform engineering and marketing; and responsibility for establishing and managing strategic relationships with vendors of technologies which complement and enhance Mentor Graphics products.

"Our ability to both support and help shape concurrent engineering is a great challenge and opportunity for Mentor Graphics," said Thomas H. Bruggere, chief executive officer and chairman of the board of directors. "We believe very strongly that concurrent engineering will define the design automation industry of the '90s, and we intend to be at the forefront of that methodology.

"While 'frameworks' have been a rallying cry for the '80s," Bruggere continued "the industry now recognizes that frameworks, while central to concurrent engineering, are not the complete answer. Our Concurrent Engineering Group will develop and deliver the complete package of technologies, products, services and third-party solutions required to make concurrent engineering a reality.

"We're particularly pleased to have Phil Robinson join us in this effort: his extensive industry experience, personal energy and vision, and customer orientation make him extremely well-qualified to lead our concurrent engineering effort." Robinson joins Mentor Graphics from Tektronix Inc. where he was most recently vice president of administration. Robinson joined Tektronix in September 1979 and has held various positions with that company, including senior vice president and chief marketing officer; vice president and general manager, Instrument Systems Group; vice president, Corporate Marketing and Service; and national sales manager.

In addition to its new Concurrent Engineering Group, the company will continue to dedicate resources to both the systems and IC design marketplaces through its existing Systems Group and IC Group.

Gerard H. Langeler will be president of the Systems Group, which includes the company's Design Synthesis Division; Simulation and Test Division; electronic packaging products; and Printed Circuit Board (PCB) Design and Layout

Division. Langeler is a co-founder of Mentor Graphics and a member of its board of directors.

James T. Hammock will continue as president of the IC Group. Hammock was president of Silicon Compiler Systems prior to its acquisition by Mentor Graphics in March 1990.

In a related change, David Moffenbeier, who has been executive vice president of Mentor Graphics, becomes president of the newly-formed World Trade Group, with expanded responsibilities for major accounts, customer service and support, and all international operations.

It was also announced that David Chen has been named vice president of corporate marketing and that Patti O'Connor will be vice president of employee relations. Robinson, Langeler, Hammock, Moffenbeier, Chen and O'Connor will all report to Bruggere, in addition to his current reports.

"This organizational structure reflects our determination to expand our design automation leadership throughout the 1990s," said Bruggere. "We are convinced that success in Concurrent Engineering, Systems and IC are necessary for overall industry leadership; and we are convinced as well that each segment requires a dedicated organizational effort. At the same time, we are establishing senior-level corporate positions to ensure we do not neglect the need to coordinate our efforts and to ensure that we continue to devote resources to developing our people and their talents.

"Our customers' requirements and the demands of the design automation marketplace are increasingly sophisticated," Bruggere concluded. "It is important that our corporate structure respond to and reflect that sophistication. Each of our Group Presidents, operating in a decentralized and largely autonomous environment, will be able to focus on the needs of specific customers and industry segments. It is an exciting and expanded opportunity for these executives; at the same time, this structure will encourage and reward even greater participation and contributions from a broad cross-section of our employees."

Mentor Graphics Corp., Beaverton, Ore., was established in 1981 to design, manufacture, market and service electronic design automation (EDA) systems. The company is the leader in worldwide EDA sales, with revenues of $433,789,000 over the last 12 months. The company currently employs more than 2,600 people. In addition to its corporate offices in Beaverton, Mentor Graphics has sales and support offices in 66 locations worldwide. The company's headquarters are located at 8500 S.W. Creekside Place, Beaverton, OR 97005.

NOTE: Falcon Framework for Concurrent Design is a trademark of Mentor Graphics Corp. OpenDoor is a servicemark of Mentor Graphics Corp.

WASHINGTON (NOV. 27) PR NEWSWIRE - The International Monetary Fund has approved a loan equivalent to special drawing rights (SDR) 6.84 million (U.S. $9.9 million) for the Government of The Gambia, in support of the third annual arrangement under the Enhanced Structural Adjustment Facility (ESAF).

This new loan is to be disbursed in two equal semi-annual installments. The Gambia has already drawn SDR 13.68 million (U.S. $19.9 million) under the previous two programs of the three-year ESAF arrangement, approved in November 1988 for a total of SDR 20.52 million (U.S. $29.8 million).

The ESAF is a concessional lending window created by the IMF under which loans are made available to low income members undertaking macroeconomic reforms to strengthen their economic and financial position. ESAF loans have a rate of interest of one half of one percent, and are repayable over 10 years with a five and a half year grace.

The Gambia's quota in the IMF is SDR 17.1 million (U.S. $24.9 million) and its outstanding financial obligations to the IMF currently total the equivalent of SDR 28.89 million (U.S. $42.0 million), including outstanding SAF, ESAF, and Trust Fund loans.

During the second annual ESAF arrangement covering 1989/90, The Gambia registered strong economic growth and a substantial improvement in its balance of payments despite a downturn in tourism receipts. A significant increase in groundnut production, a high level of private and public investment, and a rebound in re-export trade during the second half of the year contributed to an estimated growth of real gross domestic product (GDP) of 6.0 percent. Inflation, however, accelerated from 8.0 percent in the year ended June 1989 to 13.3 percent in the year ended June 1990. A tightening of financial policies and a relatively stable exchange rate in the latter part of the fiscal year helped to slow the inflation rate. The Gambia's economic program for 1990/91 builds on the foundation of recent progress, emphasizing tight fiscal and monetary policies to sustain non-inflationary economic growth, a stable foreign exchange regime to foster export diversification and import substitution, a flexible interest rate policy to promote savings, and cautious external debt management policies to reduce the foreign debt service burden.

The economic goals for 1990/91, in line with the ESAF program objectives, are to achieve a growth of real GDP of at least 4.5 percent, to reduce the rate of inflation to 6.0 percent; and to generate an overall balance of payments surplus to build up the country's official reserves.

GREENWICH, CONN (NOV. 27) PR NEWSWIRE - Helm Resources (AMEX: H) today announced that it currently holds a total of 2,437,000 out of 3,046,088 outstanding shares of Interpak Holdings, Inc., increasing its ownership in Interpak to approximately 80 percent. Helm has increased its ownership in Interpak from approximately 53 percent to the current 80 percent level over the past five months through private and open market purchases at prevailing market prices.

Interpak Holdings, Inc. was a 100 percent owned subsidiary of Bamberger Polymers, Inc. (AMEX: BPI) which was spun out to BPI's stockholders as a stock dividend during May of 1990. Interpak performs warehousing and packaging services for the petrochemical industry.

Helm Resources, Inc. is a diversified business enterprise, with consolidated annual revenues of approximately $200 million, and various business interests that include the worldwide marketing and distribution of thermoplastic resins; the acquisition and marketing of seismic data to oil and gas companies; the development and marketing of optical disk software to the legal and financial services industries; the manufacture and marketing of industrial quality control products and agricultural products; the manufacture and sale of personal size hovercrafts. It affiliate Cliff Engle, Ltd. is engaged in the design, manufacture and distribution of apparel products that are officially licensed by the major sports leagues and the National Collegiate Athletic Association, while its subsidiary National Sports Marketing, Inc. is the exclusive U.S. distributor and licensee of Rossignol racquets and racquet sports apparel and accessories.

NASHVILLE, TN (NOV. 27) PR NEWSWIRE - At the annual meeting held today, shareholders of Metropolitan Federal Savings and Loan Association (NASDAQ-NMS: MFTN) approved a change of charter to a federal savings bank.

As a federal savings bank, Metropolitan Federal will continue to be regulated by the Office of Thrift Supervision (OTS), and deposits will continue to be insured up to $100,000 by the FDIC. Upon final approval by the OTS, Metropolitan Federal will adopt a new name: Metropolitan Federal Bank, a federal savings bank.

"While the new charter and name will have no effect on operations, management or customer relationships, we believe this change will more accurately reflect the full array of consumer banking services now offered by Metropolitan Federal," commented Edwin W. Moats, Jr., chairman and chief executive officer.

Moats said that the name change will be accomplished within budget and no additional expenses will be incurred.

In his remarks to shareholders in attendance, Moats announced that Metropolitan Federal has contracted to sell loan servicing on approximately $150 million of residential mortgage loans, which will result in a gain of approximately $2 million. The sale is expected to close by December 31, 1990. Moats added that the $2 million gain will be used to help offset the anticipated operating loss this quarter that is likely to result from the high level of non-performing assets which are negatively affecting the net interest margin.

Shareholders also approved the re-election of two directors: R. Murray Hatcher partner with J.C. Bradford and Company, and E.B. Tanner, former president and chairman of First Federal Savings and Loan Association of Union City. Both were elected to three-year terms.

In other action, shareholders approved the appointment of KPMG Peat Marwick as independent auditors.

Metropolitan Federal, Tennessee's largest publicly-traded savings and loan with 19 offices, operates throughout the state. Metropolitan Federal's common stock is traded on the over-the-counter market in the National Market System under the NASDAQ symbol MFTN.

PHILADELPHIA (NOV. 27) PR NEWSWIRE - CIGNA Corp. (NYSE: CI) announced today a business strategy for the United Kingdom that would focus on the further development of its British corporate employee risk benefits and health care operations.

As part of the new strategy, the company said it would consider the sale of its principal U.K. individual life insurance and pensions business.

CIGNA would said it consider offers for these interests through the sale of the shares of its U.K. subsidiary, Crusader Insurance plc. The company said it intends to retain Crusader's employee risk benefits and health care operations, which would remain a part of the CIGNA International Financial Services (CIFS) Division. The retained businesses would be marketed through CIGNA (Europe) and CIGNA Life (Europe), or their U.K. affiliates.

Geoffrey Saggers, CIFS senior vice president, Europe, said: "Crusader's individual life insurance and pensions business has performed well. However, CIFS believes that, because of changing fundamentals in the U.K. marketplace, its longer-term U.K. interests would best be developed by concentrating on its strong employee risk benefits and health care capabilities, which is where we have specific strategic advantages and a very solid base of knowledge and skill.

"We're committed to developing innovative employee risk benefits solutions for U.K. and multinational employers, who are becoming increasingly concerned with managing employee risk benefits costs without reducing the quality of their programs.

"In the United States," Saggers noted, "CIGNA has applied significant resources to building its health care business. In fact, CIGNA companies currently are the largest providers of combined group life and health insurance and managed health care in the United States. So this direction tracks very closely with our U.S. strategy."

CIGNA said that this announcement is unrelated to and won't affect other CIGNA U.K. operations, which include property-casualty insurance and investment management.

The CIGNA companies, with assets of more than $60 billion, are leading providers of property and casualty insurance, health care, employee risk benefits, pension and investment management, and related financial services to businesses and individuals worldwide.

DOWNERS GROVE, IL (NOV. 27) PR NEWSWIRE - James C. Smith, president and chief executive officer of HealthCare COMPARE Corp. (NASDAQ: HCCC), announced today at the Robertson Stephens Health Care Conference that the company and its wholly owned subsidiary, AFFORDABLE Health Care Concepts, have entered into agreements to provide utilization review (U/R) and PPO services to, among others:

	Services	
	U/R	PPO
National Association of Letter Carriers		X
Pioneer Financial Services	X	
Denny's		X
NutraSweet	X	
Sherwin Williams		X
Bay Area Painters and Tapers	X	
Special Agents Mutual Benefit Association		X

Smith commented that based upon these new agreements and previously announced agreements, he is quite encouraged about the prospects for 1991. Additionally Smith noted that he is very pleased with these new agreements since clients which represent approximately 50 percent of the company's capitated utilization review revenue are now utilizing the company's PPO services.

HealthCare COMPARE Corp. is one of the nation's leading independent managed care/cost management companies. The company provides data analysis, extensive utilization management and provider negotiation services (PPO development and management). Its services are provided to indemnity health care payers as well as alternative delivery systems. The company manages costs and utilization without compromising the quality of care available to health care plan participants.

#90331p8700 11/27/1990 ~PR Newswire

WASHINGTON (NOV. 27) PR NEWSWIRE - The Allied-Signal Foundation will award a $500,000 grant to the American Diabetes Association to study possible genetic links of type II diabetes.

The funds will be used to initiate inheritance pattern research to accurately identify causes of type II diabetic genes, making possible early diagnosis and treatment.

"We hope that our grant will lead to new avenues of research into this debilitating disease, which strikes nearly 20 percent of those over age 60,"

said Edward L. Hennessy, Jr., chairman and CEO of Allied-Signal Inc. (NYSE: ALD). "By identifying those who are most likely to contract diabetes, we will be better prepared to lessen or prevent its occurrence."

"This generous donation will enable the association to enhance its type II research programs, providing support to investigators committed to diabetes research," said Edward Horton, MD, ADA president.

A $100,000 check, to be accepted tonight by Meredith Baxter-Birney, ADA National Spokesperson, is the first installment of the $500,000 challenge grant. Other identical installments will follow through 1995. ADA will match the $500,000 gift with funds from individuals and private foundations in order to meet Allied-Signal's challenge, bringing the total of this program to $1,000,000 donated.

The grant was made possible through Allied-Signal's Program on Aging, established in 1984, to enrich the lives of older Americans. Since then, Allied-Signal has awarded $4 million for medical research on diseases affecting the elderly.

More than 14 million people have diabetes, a disease in which the body does not produce or respond to insulin, a hormone needed for daily life. The resulting high blood sugar can severely damage the heart, blood vessels, kidneys, nerves, and eyes. If left untreated, diabetes can lead to death.

The American Diabetes Association -- celebrating its 50th Anniversary in 1990 -- is the leading voluntary health organization supporting diabetes research and education. Founded in 1940 as a professional society, the ADA is an internationally recognized organization of affiliates and chapters in over 800 communities that serves all people with diabetes, regardless of age, type of diabetes, or economic condition.

PHILADELPHIA, (NOV. 27) PR NEWSWIRE - Pep Boys -- Manny, Moe & Jack (NYSE: PBY), the nation's leading automotive aftermarket retail chain, today announced record sales but a decline in earnings for the 13 weeks ended Nov. 3 1990.

OPERATING RESULTS: Third Quarter Sales for the quarter ended Nov. 3, 1990, rose to a record $224,823,000, 9.6 percent greater than the $205,098,000 that was recorded last year. Sales in stores that were open both years increased 1.3 percent.

Earnings for the period were $8,285,000, a 7.6 percent decline from the $8,962,000 that was achieved last year. Earnings per share were $.15, 6.3 percent lower than the $.16 that was recorded last year.

Nine Months Sales for the nine months ended Nov. 3, 1990, rose to a record $672,127,000, 15.3 percent greater than the $583,125,000 recorded last year. Comparable store sales increased 5 percent.

Earnings for the first nine months of the year increased to a record $30,852,000, 15.9 percent greater than the $26,609,000 that was earned last year. Earnings per share were $.55, 14.6 percent greater than the $.48 that was achieved last year.

STORE EXPANSION PROGRAM: Eight new automotive supercenters, all of which include 10 bay service centers, were opened during the third quarter. During

the quarter the company opened its fifth automotive supercenter in Jacksonville, Fla., its third supercenter in Austin, Texas, its fifth supercenter in Salt Lake City, Utah, and its fifth supercenter in Albuquerque, N.M. Three new markets were entered during the quarter when single units were opened in Tulsa, Okla., and Savannah, Ga., and two supercenters were opened in Raleigh, N.C.

At the close of the third quarter, Pep Boys operated 301 units in 17 states. Twelve automotive supercenters, all of which are approximately 23,000 square feet and feature 10 service bays, are expected to open during the balance of the fiscal year.

HILLSDALE, MI (NOV. 27) PR NEWSWIRE - Norman F. Rodgers, president and chief executive officer of Hillsdale County National Bank, Hillsdale, and Thomas R. Ricketts, chairman and chief executive officer of Standard Federal Bank (NYSE: SFB), Troy, Mich., announced today that Hillsdale County National Bank and Standard Federal have executed a definitive agreement under the terms of which Standard Federal will sell its branch office and related deposit accounts in Hudson, Mich., to Hillsdale.

The acquisition of this branch office and deposit accounts by Hillsdale County National Bank is subject to approval by the Office of Thrift Supervision, the Federal Deposit Insurance Corporation and the Office of the Comptroller of the Currency. Application for regulatory approval is expected to be made within the next two weeks by Standard Federal and Hillsdale and acted upon within 90 to 120 days thereafter.

Standard Federal Bank, headquartered in Troy, is a $9.48 billion FDIC-insured savings institution with 117 branch offices serving Michigan and Indiana. Standard Federal's concentration of branch offices is in southeastern Michigan where it has 70 offices.

Hillsdale County National Bank is a $100 million independent locally owned banking organization operating continuously since 1934 with five offices currently serving Hillsdale County, including a full-time trust department.

Commenting on the agreement, Ricketts stated, "This sale is part of Standard Federal's ongoing effort to maximize profitability in its branch office network by concentrating efforts in those markets we are most familiar with. The Hudson branch was acquired as part of Standard's Federal's acquisition of Peoples Savings Bank of Monroe, Mich., and is geographically distant from Standard Federal's primary market areas. We feel our customers in Hudson will

be well served by Hillsdale County National Bank following this sale."

Rodgers added, "We are extremely pleased to make this announcement and to offer our full range of financial services to this attractive and growing community in our market area. Hillsdale will not be purchasing loans as part of this transaction except those loans related to the deposit accounts. We are pleased to maintain continuity for all present customers of the Hudson office through planned continuity of existing personnel."

#90331p8725 11/27/1990 ~PR Newswire

TUSKEGEE, AL (NOV. 27) PR NEWSWIRE - If the United States government decides to construct the X-30 manned research vehicle two years from now, the materials from which it is developed could well have been identified from research studies in Alabama at Tuskegee University.

Officials from the U.S. government and General Dynamics were at Tuskegee University today (Tuesday, Nov. 27) to announce a two-year $810,351 contract award that university professors will use to conduct research on various materials being considered for the National Aero-Space project.

The Tuskegee research proposal was developed in concert with General Dynamics, which will serve as a subcontractor for some components of the composite materials work. General Dynamics is a member of the National Aero-Space Plane National Contractor Team -- McDonnell Douglas, Rockwell, Pratt & Whitney and Rocketdyne.

General Dynamics serves as a mentor to Clarkson Engineering, a minority-owned Houston firm that will also be a subcontractor in the Tuskegee University materials research project.

Powered by hydrogen-fueled supersonic combustion or scramjet engines, the National Aero-Space Plane could begin flight test around 1997 if a decision is made to construct two flight test vehicles and one ground test article in early 1993. The proposed single-stage-to orbit manned research vehicle will take off and land like a conventional aircraft.

Tuskegee professors will focus on identification of composite materials that can sustain operation under significant structural loads at very high temperatures. Materials that evidence short-term high temperature stability and resistance to thermal shocks will also be of special concern to Tuskegee researchers.

The $810,351 grant will make possible the addition of some 12 students to the

20 already involved in materials research at the university. Their research will be directed by Tuskegee professors in aerospace science, chemical, and mechanical engineering.

The government-funded research grant will also enhance the materials research laboratory at Tuskegee University which is already valued at several million dollars. Composite materials research at Tuskegee is funded mostly by the Office of Naval Research, the United States Air Force, NASA, and SDC (the Strategic Defense Command), and exceeds $1.4 million annually.

In addition to Tuskegee University, which has academic programs in aerospace science, chemical, electrical and mechanical engineering, the prestigious list of universities doing government-funded research in connection with development of the X-30 manned research vehicle include, among others: Harvard, Stanford University, University of Texas, Virginia Polytechnic Institute, and Carnegie-Mellon University.

MILWAUKEE (NOV. 27) PR NEWSWIRE - Value Merchants, Inc. (NASDAQ: VLMR), Milwaukee-based operator of over 100 Toy Liquidators, close-out toy retail outlets and over 100 Everything's A $1.00 close-out variety retail outlets nationwide, and a major national toy wholesaler, announced today that operations for the third quarter (12 weeks) of fiscal 1991, ended Nov. 10, 1990, resulted in a net profit of $909,000, or $0.15 per share, compared to a net profit of $925,000, or $0.20 per share, in the comparable period of fiscal 1990. Net sales for the period were $32,865,000, compared to $16,402,000 reported for the same period last year.

Revenues for the 40-week period ended Nov. 10, 1990, were $81,520,000, compared to revenues of $39,561,000 in the comparable period of fiscal 1990. The company reported net income of $531,000, or $0.09 per share, compared to net income of $1,006,000, or $0.21 per share, for the comparable nine-month period in fiscal 1990.

Value Merchants said that its increase in net sales reflects the acquisition of Everything's A Dollar, Inc. in December 1989 and the continual expansion of the Toy Liquidators and Everything's A $1.00 stores. Since the beginning of fiscal 1991, the company has opened 26 Toy Liquidators stores, giving it 102 stores nationwide, and 40 Everything's A $1.00 stores, giving it a total of 101 stores.

The company reported that its Toy Liquidators comparable same store sales declined 6 percent in the third quarter, which converted the previous year-to-date increase to a decrease of 1.5 percent. However, the company

indicated that for the first 16 days of the fourth quarter, comparable same store sales have increased 6 percent. The company also reported that its Everything's A $1.00 (EAD) same store sales increased 10 percent for the third quarter and 23 percent year-to-date. Also, EAD stores opened in fiscal 1991 are averaging about 60 percent higher sales per day than the older stores. The company's third quarter operating results have been impacted by the decline in consumer spending as a result of their diminishing confidence in a sustained, healthy economy and the Mideast crisis.

Value Merchants also indicated that its decline in net income is primarily attributable to a decrease in wholesale sales and losses to date for the Everything's A $1.00 operations. Everything's A $1.00 was profitable for the last four week period of the third quarter, but operated at a loss for the third quarter and year-to-date. Everything's A $1.00 sales for the 12-week fourth quarter period is expected to be approximately 44 percent of their annual sales and accordingly, it is expected Everything's A $1.00 will contribute significant income for both the fourth quarter and all of the fiscal year.

Value Merchants, Inc. is a publicly owned company whose stock is traded in the NASDAQ National Market System under the symbol VLMR.

#90331u0048 11/27/1990 ~United Press International

NEW YORK (NOV. 27) UPI - The New York Rangers outscored Buffalo by five goals and still lost.

Jan Erixon, the Rangers' best defensive forward and a player who had shown increased offensive creativity this season, suffered a knee injury in the first period of New York's 5-0 victory over the Sabres Monday night.

Erixon sustained a Grade B sprain of the medial collateral ligament in his right knee and is to be sidelined for four weeks, the team said.

With defenseman Mark Hardy facing a five-game suspension and defenseman Randy Moller out with a shoulder dislocation, the Rangers will need depth to remain in contention for the league's best defensive record.

''He's probably the best checking winger in the league,'' Ranger forward Brian Mullen said of Erixon.

Former Sabre Ray Sheppard scored two goals and John Vanbiesbrouck collected his third shutout of the season, helping the Rangers extend their unbeaten streak to 10.

Sheppard scored once in a three-goal first period and capped the night with a tuck-in at 18:52 of the final period. Vanbiesbrouck withstood a two-man disadvantage for 1:11 of the second period. He stopped 27 shots, including one from the slot with four seconds remaining.

''Every time I get excited about our hockey team we put on a game like this,'' said Rick Dudley, the Sabres' coach. ''The last three games we played

exceptional.

''We had two meetings today. We discussed what we had to do then we didn't do it. We became individuals as soon as we got behind.''

''It seems every time we got something going they countered it,'' added Mike Foligno, the Sabres' captain.

With five wins and five ties in their last 10 games, the Rangers have assembled their longest unbeaten streak since 1974. The franchise record is 19 set in 1939-40.

New York took a 3-0 lead in the first period. John Ogrodnick took Mullen's feed behind the defense, then outwaited goalie Clint Malarchuk for his 14th goal.

At 16:31, Kevin Miller skated down the left side, put a spin on defenseman Uwe Krupp, and fed Sheppard for a wrist shot from the slot. It was Sheppard's ninth goal of the season.

Just 1:52 later, Mullen intercepted a clearing pass and relayed to Bernie Nicholls, who beat Malarchuk from in front.

Erixon sustained the injury when defenseman Mike Ramsey hit him while attempting an open-ice check. Rangers Coach Roger Neilson said Ramsey kneed Erixon.

''He was trying for a hip check, and he got his knee in on it,'' Neilson said. ''It wasn't really obvious. We jumped (referee Ron) Hoggarth and said it was kneeing.''

Neilson said that Erixon's absence would bring center Mark Janssens back into the lineup. He said either Jody Hull or Paul Broten would take Erixon's place on the wing.

Kelly Kisio made it 4-0 at 5:24 of the second period with his second goal of the season. He eluded a defender and beat Malarchuk one-on-one.

Sheppard capped the scoring by banging in a cross-crease pass from Troy Mallette on a two-on-none.

New York closed its season series with the Sabres with two wins and a tie. The Rangers have beaten Buffalo only twice in their last 12 matches.

(NOV. 27) UPI - Margaret Thatcher's protege has been elected Britain's new

prime minister. 47-year-old Chancellor John Major tomorrow will become Britain's youngest prime minister this century. Major has pledged to unify the badly divided Conservative Party.

Some members of the Senate want to stall military action against Iraq in favor of continued economic sanctions. Massachusetts Senator Edward Kennedy has said ''If ever there was a case for giving peace a chance, this is it.''

In another development, a published report says the White House had lined up the votes it needs in the U-N Security Council to pass a resolution authorizing force against Iraq. The Washington Post says the council's five permanent members appear to have agreed on the issue.

Meanwhile, Kuwait has asked the United Nations to take custody of the emirate's civil records for future litigation against Iraq. A delegation of Kuwaiti refugees told a U-N Security Council session today that Iraq is systematically destroying their country.

Economists say the nation's economy is in a ''mild'' recession. But they say the downturn should last only through the middle of next year. One economist predicts that oil prices will come down over the next year and that will diminish the negative impact on the economy.

In other economic news, the Commerce Department said today that the U-S merchandise trade deficit increased to 29-point-eight BILLION dollars during the third quarter. The red ink was was the largest since the third quarter of last year.

Consumer confidence has dropped again. The Conference Board says consumer confidence edged down in November following October's record decline. The index stood at 61-point-five, down from 115-point-one one year ago and down from 62-point-sixe in October.

-30- 1971

#90331u0115 11/27/1990 ~United Press International

(NOV. 27) UPI - White House spokesman Marlin Fitzwater says the Bush administration is optimistic the U-N Security Council will authorize military force against Iraq.The United States asked the Security Council to set a January 1st deadline for Iraq to get out of Kuwait before force is used. But diplomats say the Soviet Union and France want to give Iraq even more time.

Japan is ending its ban on medical shipments imposed after Iraq invaded Kuwait more than three months ago. Japanese Foreign Ministry officials say Tokyo will send two-Million dollars worth of medical supplies to Iraq, which Baghdad has already paid for and has been asking for since September.

Bulgarians unhappy with the pace of government reforms have joined in a

nationwide strike to hamper industry and public transportation and force the resignation of Prime Minister Andrei Loukanov. Strike organizers Monday claimed several hundred thousand Bulgarians joined in the action.

Czechoslovakia's once all-powerful Communist Party made surprising gains in local government elections held Friday and Saturday. New returns show the Communists took several percentage points more than their results in last June's parliamentary elections. Communists won 13- point-six percent of the vote in Slovakia and 17-point-four percent of the vote in the Czech lands.

British Prime Minister Thatcher continued a round of farewells to friends and acquaintances on the eve of Tuesday's leadership vote. Her handpicked successor, Chancellor John Major, her nemesis Michael Heseltine and Foreign Secretary Douglas Hurd each are expressing optimism Major would be the next prime minister of Britain.

#90331u0128 11/27/1990 ~United Press International

MONTERREY, Mexico (NOV. 27) UPI - Cheered by a crowd estimated at 250,000 people, President Bush and Mexican President Carlos Salinas de Gortari called for a new era of neighborly cooperation between their two countries.

''Salinas, Bush - solidarity,'' the flag-waving crowd chanted Monday at the Macro Plaza in Monterrey, an industrial city in northeastern Mexico.

''Muchas gracias,'' boomed Bush, drawing thunderous applause. ''Viva Mexico!''

Salinas welcomed Bush and said, ''your arrival expresses the friendship and respect which guide our new relations.''

The presidents complete a two-day summit Tuesday on a variety of topics, ranging from the war on drugs and efforts to protect the environment to border violence and a drive to develop a U.S.-Mexican free-trade agreement.

Bush, who has made the trade accord a top priority, was also to confer with Mexican and American business leaders before returning to Washington.

The U.S. Chamber of Commerce predicts that the current $52 billion in annual U.S.-Mexican trade could more than double under a free trade agreement that lifts tariffs and quotas.

But the AFL-CIO is already preparing to oppose such a pact, saying competition from low-paid labor in Mexico could destroy American jobs and reduce U.S. wages.

The administration rejects such fears as unfounded and maintains it will seek a trade agreement that generates good jobs on both sides of the border.

Formal negotiations are to begin next year.

Salinas, a 42-year-old Harvard educated economist, has been a reformer during his two years as president.

He has attacked corruption, reduced tarrifs and sought to patch over past border differences with the United States in such sensitive areas as drug fighting, border control and a Mexican fear of Yankee exploitation.

Salinas and Bush conferred Monday in Mexican president's hometown of Agualeguas, 80 miles northeast of Monterrey, after attending a folk dance and rodeo in the small village.

At about dusk, they arrived together in Monterrey, where they were greeted by tens of thousands of people who lined streets and showered their motorcade with red, white, blue and green confetti.

The crowd filled the giant Macro Plaza and stretched for blocks in nearly ever direction. Salinas' chief of protocol estimated the gathering at 250,000.

Flanked by Salinas and standing behind bullet-proff glass, Bush praised the Mexican leader as an ''architect of breathtaking economic transformation.''

Bush told the crowd: ''I've come to Mexico tonight with a message of respect, of admiration and hope for a brighter future shared by our two countries.''

Seeking to brush aside past differences, Bush said, ''With candor and mutual respect ... let us cross over into a new era of shared progress and prosperity for a stronger Mexico and a stronger United States, and a better world.''

Salinas said, ''Our new relationship as neighbors provides more benefits to our people and greater to strength to our nations. We are determined to show that the new currents toward freedom, tolerance and cooperation between Mexico and the United States can be permanently beneficial.''

Bush and Salinas first agreed to seek a free trade agreement during their meeting in Washington last June.

Salinas views free trade as a way to stimulate his nation's economy with new jobs and investment. But he also says he wants to exempt Mexican oil from any free trade agreement.

''The oil is the property of the Mexican government,'' Salinas said in the current edition of Newsweek Magazine. ''It will stay that way.''

Critics of the Mexican leader, however, are not convinced. They are afraid Salinas will compromise away some oil rights in an effort to become a bigger

trading partner with the United States.

Bush, in a recent interview with Mexico's official news agency, said, ''Although I recognize Mexico's determination to control its own resources, I am convinced there are important areas in which we could work together and which could be mutually advantageous for investment and exploration of oil and natural gas.''

The United States already buys more than 50 percent of Mexico's petroleum exports. In September, Mexico increased its shipments to the United States by 100,000 barrels a day in response to the shortages caused by the Persian Gulf crisis.

White House press secretary Marlin Fitzwater said Monday that Bush and Salinas would likely not discuss oil this week, leaving the volatile issue to aides in later more detailed discussions.

Fitzwater also said the United States is encouraged by the progress that has been made thus far in informal talks on the trade pact and said U.S. Trade Ambassador Carla Hills ''thinks it's on track.''

#90331u0148 11/27/1990 ~United Press International

SEATTLE (NOV. 27) UPI - Three counties in western Washington were declared federal disaster areas Monday in the wake of widespread flooding that caused an estimated $42 million in damage before a second surge of water added to the misery over the holiday weekend.

Carl Suchocki, a spokesman for the Federal Emergency Management Administration in Washington, D.C., said Monday that Scagit, Whatcom and Snohomish counties were declared disaster areas by President Bush and that other counties could be added to the list after damage surveys are completed.

The declaration clears the way for federal help in obtaining temporary housing grants and loans to affected individuals and businesses.

Gov. Booth Gardner has asked that 10 additional counties be added to the list in the wake of the second wave of flooding over the Thanksgiving weekend.

Rivers swollen by torrential rains began receding Monday as commuters weathered the loss of a major interstate bridge, dairy farmers discovered entire herds lost and residents began returning to flooded homes.

No official damage estimates were available, but losses were expected to reach into the tens of millions of dollars. Flooding two weeks earlier already caused $42 million in damage to homes, businesses, roads and other public facilities.

Already prior to Thanksgiving, 57 homes were wiped out, 400 more were heavily damaged and another 400 received minor damage in flodding Nov. 9-12. Officials said damage from the second wave would likely be higher.

More than a dozen rivers overflowed their banks and several thousand people were forced to scramble for higher ground. One man caught by the floodwaters of the Snoqualmie River near Duvall was presumed drowned.

By Monday morning, the waters in most areas of western Washington were slowly ''starting to go down,'' Mark Stewart, a spokesman for the state Division of Emergency Services, said.

''Some folks who live on higher ground are starting to go home. Those in lower areas haven't been able to,'' Stewart said.

Meanwhile, Rep. Norm Dicks, D-Wash., said he had received assurances from federal transportation officials for up to $100 million in emergency funds for the old Interstate 90 floating bridge that sank in Lake Washington.

The old four-lane bridge, closed in 1989 after the new seven-lane parallel I-90 floating span opened, sank when water flooded hatches cut into the sides of bridge sections by contractors doing resurfacing work on the bridge. Four workers jumped onto a waiting barge at the last moment before six of 25 pontoons went down.

The Lacey V. Murrow Bridge - the nation's first concrete floating span when it opened in 1940 - had been scheduled to reopen in 1992 to complete the Seattle-Bellevue link, the final project of the Boston- Seattle interstate.

Dicks said it was possible that federal funds could help replace the span by 1992.

But for the short term, a commuter nightware was in progress because the new parallel bridge also was closed. Divers confirmed Monday that 13 cables anchoring the new bridge were severed and another heavily damaged by the sunken pontoons from the old bridge.

As winds began to pick up Monday evening, four tugboats attached lines to the bridge and steamed into the wind, hoping to hold the new bridge in place.

The bridge disaster was only the most spectacular of dozens and dozens of flood calamities, which included helicopter rescues, collapsed dikes, stranded trains, washed-out bridges and roads, an overturned river barge and massive, all-night sandbagging efforts by citizens protecting their towns.

One of the many hard-hit areas was the Snoqualmie Valley, east of Seattle, where dairy farmers Monday found herds of cattle lost while some minor looting

was reported in a nearby town.

''My major concern is for the thousands of families that are out of their homes, have lost their cars and are trying to put their lives back together,'' Gardner said.

''With the National Guard, the Salvation Army, the U.S. Forest Service, the Red Cross and just ordinary Washington citizens helping, we're making great progress, but we have a lot of work to do,'' Gardner said.

Rail service over the mountains has been a problem since Friday, when parts of the main Burlington-Northern link through Stevens Pass began washing out.

Burlington-Northern spokesman Howard Kallio said there were six or seven washouts on the line and crews were checking whether a major trestle in Cashmere on the east side had shifted three feet off its foundation.

All trans-mountain freight trains were being detoured south to Vancouver, Wash., and east to the Tri-Cities. Callio said the main line would be shut down for at least a week.

#90331u0153 11/27/1990 ~United Press International

(NOV. 27) UPI - President Bush and Mexican President Salinas complete a two-day summit Tuesday in Mexico. Talks between the two leaders were expected to center on a variety of topics, ranging from the war on drugs and efforts to protect the environment to border violence to a drive to develop a U-S-Mexican free-trade agreement. Bush and Salinas were cheered Monday by a crowd estimated at 250-thousand in Monterrey. The two leaders called for a new era of neighborly cooperation.

The Justice Department says President Bush has a right to send U-S forces to the Middle East. Responding to a lawsuit challenging Bush's authority, the government said that the issue is political and NOT a matter for courts to decide. The government was answering a suit filed by 45 Democratic congressmen seeking to block the president from launching a war with Iraq without first getting consent from Congress.

Flood waters are going down in western Washington state after a weekend of widespread flooding. President Bush declared three counties federal disaster areas. The flooding had already caused an estimated 42- Million dollars in damage before a second surge of water added to the misery over the Thanksgiving holiday weekend. Officials say that other counties could be added to the list of disaster areas after damage surveys are completed.

More testimony will be heard Tuesday before a Senate panel examining the activities of the so-called Keating Five senators. The former chairman of the

Federal Home Loan Bank Board said Monday that meetings held with bank regulators in 1987 capped a campaign of ''private threats and public vilification'' aimed at gutting federal oversight of the thrift industry. Edwin Gray is a key figure in the case against the five senators.

The Justice Department says it collected more than 250-Million dollars in the past year from companies that defrauded the government. The department says the fraud directed at the Defense Department made up a large part of the cases. That included a 34-Million-dollar settlement last December in a case brought against a bid-rigging cartel in Japan. The military charged that construction costs of a U-S Navy facility in Yokosuka were inflated by 25 percent.

#90331u0160 11/27/1990 ~United Press International

HOUSTON (NOV. 27) UPI - Houston's run-and-shoot finally lived up to its name. Warren Moon threw two touchdown passes and Lorenzo White accounted for 214 yards total offense and one score Monday night, leading the Oilers to a 27-24 victory over Buffalo and ending the Bills' eight-game win streak.

Teddy Garcia added two field goals for the Oilers, 6-5, who moved into a three-way tie for first place in the AFC Central with Cincinnati and Pittsburgh.

Jim Kelly threw two scoring passes, Thurman Thomas scored once and Scott Norwood added a field goal for the Bills, 9-2.

The victory by Houston completed a weekend in which every division leader was beaten. Buffalo is now tied with Miami for first place in the AFC East.

Entering Monday's game, the Oilers lead the league in nearly every passing category, but had not had a 100-yard rusher this season and only twice had managed 100 yards rushing as a team.

White, though, exploded for a career-high 125 yards on 18 carries and caught five passes for 89 yards. It was the first 100-yard rushing day for Houston since White gained 115 against Pittsburgh last December.

''It all starts with the line,'' said White. ''The holes were there. I just tried to run hard, then it was just me and the linebackers. Once I got into the secondary, I was by myself.''

White's performance was even more significant in that he ran most of the his plays over Buffalo's All-Pro defensive end Bruce Smith. The added dimension of an effective running game made Moon more potent. He completed 16 of 22 passes for 300 yards and no interceptions. It was his fourth straight 300-yard passing game, which tied an AFC record.

''The way we were moving the ball tonight I could be selective on passing,'' said Moon. ''Lorenzo knew he was going to be called tonight. The way they (Bills) were lined up, we knew we had to run.''

Oilers Coach Jack Pardee agreed.

''When they play with five guys up front and six back, we'd better be able to run the ball,'' Pardee said. ''They were moving Smith around a lot and (tackle Don) Maggs did a good job on him.''

Kelly's two touchdown passes, both to tight ends, gave Buffalo a 14- 13 halftime lead. Houston blew two potential touchdown opportunities because of penalties - one erased a touchdown run - and settled for two field goals.

Buffalo opened the second half with Norwood's 43-yard field goal for a 17-13 lead, but Houston came back with 14 straight points.

''Their running game hurt us,'' said Buffalo Coach Marv Levy. ''I fear it as much in this offense as I do the passing game. Warren made a couple of big plays under duress and under a heavy rush. They had us confused all night.''

Moon hit Drew Hill for two 15-yard gains, then fired a 43-yarder to Hill to the Buffalo 1. White scored on the next play to give Houston a 20-17 lead late in the third quarter.

Houston regained possession and Moon's gutsy 2-yard sneak on fourth- and-1 to the Bills 40 sparked another score. He hit White for a 28-yard gain and on third-and-goal, fired a 3-yard scoring pass to Leonard Harris, giving Houston a 27-17 lead with 7:21 left.

Kelly countered with passes to Don Smith for 54 yards, setting up a 2-yard scoring run by Thomas with 3:29 left. The Oilers converted two third-down plays and ran out the clock.

''We took a step forward tonight,'' said Kelly, who completed 23 of 34 for 224 yards and one interception. ''We didn't win, but we came here and played hard and we played as a team, and that's a plus.''

Houston scored on the game's opening possession. White's 22-yard reception and three rushes for 20 yards set up Moon's 37-yard scoring strike to Haywood Jeffries, who beat defender John Hagy.

Buffalo came back with a 75-yard, 15-play drive that consumed 9:11. A pass interference penalty on defender Richard Johnson moved the ball to the Houston 29, and a facemask penalty after a 5-yard reception by Andre Reed put the ball at the 4. Smith was stopped by Bubba McDowell on third-and-goal. Kelly called a play-action fake and hit Pete Metzelaars for the touchdown with 2:31 left in

the first quarter.

White's 22-yard run and a 20-yard catch by Ernest Givins put Houston on the Buffalo 3. White then ran for an apparent TD on first-and-goal, but a holding penalty on center Jay Pennison wiped out the score and the Oilers had to settle for Garcia's 25-yard field goal and 10-7 lead early in the second quarter.

Buffalo recovered a Houston fumble, but Kelly gave the ball back when he overthrew Keith McKeller and Terry Kinnard intercepted, returning the ball 26 yards to the Houston 33.

White's 16-yard run and 29-yard reception helped move the ball to the Bills 11 but a false start and 2-yard loss on a reverse forced Houston to again call on Garcia and he hit a 36-yard field goal with 3:07 left before halftime.

Kelly rallied the Bills, completing six of eight passes for 67 yards, including a 12-yard TD pass to McKeller 40 seconds before halftime to give Buffalo a 14-13 lead.

#90331u0214 11/27/1990 ~United Press International
JOHANNESBURG, South Africa (NOV. 27) UPI - Black tribal factions fought running battles with clubs, machetes and firearms overnight, killing at least 10 people in the troubled eastern Katlehong township, police said Tuesday.

Police found 10 bodies near the township's Mandela Park squatter camp around dawn, spokeswoman Capt. Ida van Zweel said. ''There are possibly still more ... some were found almost hidden under bushes or cars,'' she noted.

Van Zweel said one of the victims died of gunshot wounds and the others were hacked, stabbed or clubbed to death. ''It looks like a number of separate battles were fought.''

Police described the fighting as tribal, between Zulus and Xhosas.

The last heavy fighting in the area was on Nov. 19, when factional clashes killed up to 28 people in Katlehong's Zonkezizwe squatter camp.

Police have described the latest surge of internecine strife as the worst in Katlehong since predominantly Xhosa supporters of the African National Congress and Zulus of the Inkatha Freedom Party clashed in townships surrounding Johannesburg over a six-week period to mid- September.

Some 800 people died in the earlier clashes, the worst outbreak of urban violence in the country's history. The bloodshed ended after authorities imposed tough emergency measures.

#90331u0218 11/27/1990 ~United Press International
(NOV. 27) UPI - Around the world... Around the clock... U-P-I brings the latest news...

A published report says the five permanent members of the U-N Security Council appear to agree on a U-N resolution authorizing the use of force against Iraq. But the report says the only sticking point is whether the resolution should set a deadline of January 1st or January 15th for Iraq to get out of Kuwait.

President Bush completes a two-day summit in Mexico today. Bush's talks with Mexican President Salinas have centered on a variety of topics, from the war on drugs to border violence. But Bush has made a free trade accord with Mexico a top priority. Bush is to confer with Mexican and U-S business leaders before returning to Washington tonight.

Soviet President Gorbachev reportedly is vowing to use all means within his power to keep the Baltic republics in the Soviet Union. An influential Latvian deputy says an angry Gorbachev also warned of repressive measures that could bring bloodshed if the republics continue to defy Moscow.

Firefighters have gained the upper hand on wildfires raging in Montana and Colorado, thanks to winter snows and plunging temperatures. With snow falling over central Montana, a 32-thousand-acre fire in the Lewis and Clark National Forest was 90 percent contained. And a fire that destroyed 10 high-priced residences near Boulder was all but out, with a few hot spots remaining.

In Denver, crews still are trying to stop the spread of an inferno raging for two days in a jet-fuel storage tank near Stapleton International Airport. Officials say the blaze in an 800-thousand-gallon tank may burn itself out by tomorrow afternoon. Firefighters have been pouring water and fire-retardant foam on the flames and nearby tanks to keep them cool.

Education Secretary Lauro Cavazos says colleges and universities must cut costs so they can reduce tuition. College tuition has risen much faster than the rate of inflation. Cavazos says between 1975 and 1987, inflation-adjusted tuition grew 28 percent at public colleges and 44 percent at private colleges.

U-S officials in Panama say the Panamanian and U-S governments have agreed to end their joint police patrols in the country. The officials say American troops who have worked with Panamanian police since the U-S invasion last year will be withdrawn in December. Critics say the U-S military presence in Panama violates the country's sovereignty. .

#90331u0224 11/27/1990 ~United Press International

BEIRUT, Lebanon (NOV. 27) UPI - Relatives and friends of British hostage John McCarthy marked his 34th birthday by addressing messages of support to the captive via a Lebanese newspaper, widely distributed in mainly- Moslem areas.

The daily newspaper As-Safir Tuesday published a list of brief statements by friends of McCarthy and his fiancee, Jill Morrel, who have relentlessly campaigned to win his freedom.

''See you for Christmas, so hurry it up,'' said a friend of McCarthy, named Nigel.

McCarthy was en route to Beirut airport April 17, 1986, after completing a 32-day assignment in Lebanon with Worldwide Television News when he was snatched by gunmen.

His family and friends had reported that the only reliable news they received of him was when a group of French hostages released in May 1988 said he was

alive.

Since his disappearance, Morrel, with whom he planned to buy an apartment in London, and his family have fought for his freedom.

Morrel in her statement published by As-Safir sought to boost his morale, saying in part ''I am praying it will not be long. Love as always.''

McCarthy is believed held along with 11 other foreign citizens in Lebanon.

He had fallen victim of a wave of anti-Western abductions by pro- Iranian zealots that broke out in 1984.

TOKYO (NOV. 27) UPI - Japan will send nearly $2 million worth of medical supplies to Iraq, ending a ban on such shipments imposed after the Aug. 2 invasion of Kuwait, Foreign Ministry officials said Tuesday.

Meanwhile, Japan's ruling Liberal Democratic Party has invited Iraqi legislators to Tokyo next month to discuss a peaceful resolution of the Gulf crisis, ministry officials confirmed.

The decision to allow Japanese companies to ship the medical supplies - for which Iraq has already paid $1.9 million - came in response to requests from Iraq going back to September, said Taizo Watanabe, chief spokesman for the Foreign Ministry.

''The offer of medical goods is based on purely humanitarian motives, '' Watanabe said.

Supplying medicine for humanitarian purposes falls under an exception to the United Nations mandatory sanctions against Iraq.

''We formed our own interpretation of U.N. resolutions,'' Watanabe said.

Japan has informed the United Nations and its allies of its move, he added.

He denied any government connection with the invitation to Iraqi lawmakers.

The timing of the two announcements was purely coincidental, said another Foreign Ministry official on condition on anonymity.

Nevertheless, Japan's unilateral action, combined with the invitations, is bound to anger some of its allies, especially the United States.

The Bush administration is trying to win authorization for military action

against Iraq if it refuses to withdraw from Kuwait.

Western officials have discounted Iraqi claims of medical shortages, noting that Iraq stripped Kuwaiti hospitals bare.

The invitation to Iraqi legislators to visit Tokyo in mid-December represents the first by any government since Iraq invaded Kuwait.

Liberal Democratic Party officials would not confirm the initiative, but Japanese media quoted party sources as saying it was intended to find a way to free the 233 Japanese civilians who remain trapped in Iraq.

The move follows a visit to Baghdad earlier this month by former Prime Minister Yasuhiro Nakasone in which he obtained the freedom of 74 Japanese hostages.

On his return, Nakasone said he had promised nothing in return, but some Japanese media speculated that the invitations were issued during his visit.

#90331u0473 11/27/1990 ~United Press International

BONN, GERMANY (NOV. 27) UPI - A senior aide to Chancellor Helmut Kohl flew to Moscow Tuesday to discuss the logistics of distributing German food donations to help the Soviet Union.

Horst Teltschik, Kohl's adviser on East-West affairs, headed a 12- person delegation of German government experts on the two-day visit.

''We want to make sure that the goods ... do get to those they are destined for and do not end on the black market,'' Teltschik said in an interview with German television before his departure.

The Soviet Union has raised the issue of food assistance in recent weeks, saying it would ease the burden of economic restructuring in the country. Despite a bumper grain crop, there have been reports of spotty shortages of some foods, apparently due to shipping and economic dislocations.

Teltschik said his delegation will examine the logistics of transporting food donations from Germany to the areas where they are most needed.

The fact that Teltschik heads the delegation is widely seen as a signal of the personal interest Kohl has taken in the massive food relief operations being planned by the German government, private firms and humanitarian organizations.

Kohl and Gorbachev had discussed the question of emergency food donations earlier this month when the Soviet leader visited Germany, and the German chancellor has taken up the issue as part of his campaign leading to Dec. 2

elections.

On Monday Kohl urged industrialists to participate in the relief effort which he said will be the first test of the new Soviet-German relationship - established after Gorbachev gave the green light for the Oct. 3 reunification of East and West Germany.

Numerous humanitarian and media organizations have called for the private donations.

Officials in Bonn are considering setting up a major air-bridge to the Soviet Union to transport some of the food, which might include daily rations that had been meant for German soldiers.

The authorities were also examining the possibility of donating massive food stocks stored in Berlin.

Tens of thousands of food parcels have already been shipped to the Soviet Union by individuals and humanitarian organizations.

Earlier this month more than 70,000 parcels were sent by sea from Hamburg to Leningrad and a German entrepreneur said he collected donations totaling the equivalent of $120,000 within 48 hours.

#90331u0499 11/27/1990 ~United Press International

(NOV. 27) UPI - Saudi Foreign Minister Saud al Faisal arrived in Moscow today as the Soviet Union continues its efforts to avoid a war in the Gulf region. Saud's visit comes one day after Iraqi Foreign Minister Tariq Aziz was harshly warned by Soviet President Mikhail Gorbachev that Iraq must withdraw from Kuwait to avoid bloodshed. Gorbachev said ''The fate of Iraq is in the hands of its leadership, and time is elapsing.''

A goverment spokesman in Tokyo says Japan will send nearly two Million dollars worth of medical supplies to Iraq, ending a ban on such shipments imposed after the August 2nd invasion of Kuwait. Foreign Ministry officials say Japan's ruling Liberal Democratic Party has invited Iraqi legislators to Tokyo next month to discuss a peaceful resolution of the Gulf crisis.

The publishers of the New York Daily News yesterday told a legislative committee that they have the right to hire permanent replacements for strikers. They blamed the paper's nine unions for increasing violence in the bitter walkout. The hearing was held to determine whether legislation should ban the use of strike breakers and replacement workers.

18-year-old Kharey Wise yesterday said he was forced by police to make two videotaped confessions in the gang rape and beating of a female jogger in New

York's Central Park last year. The judge ordered the courtroom cleared after Wise blew up when Assistant District Attorney Elizabeth Lederer introduced a copy of a report detailing his school truancy records for 1985 and 1989.

South African President Frederik de Klerk and black leader Nelson Mandela meet today to try to revive South Africa's peace process which has been damaged during recent months. The African National Congress and the government have accused each other of using violent tactics. Both leaders have said they will seek resolutions to the problems during the talks today.

Security sources say Israeli warplanes today blasted Palestinian positions in southern Lebanon, inflicting massive damage. The sources said four Israeli jets dropped 20 rockets on a military base and three other positions of the Fatah Revolutionary Council of Abu Nidal, east of the port city of Sidon. There was no immediate word on casualties. Earlier, guerrillas ambushed an Israeli military patrol in southern Lebanon, causing injuries.

#90331u0553 11/27/1990 ~United Press International

DEARBORN, MI (NOV. 27) UPI - Members of a touring Israeli basketball team walked off the court Monday night because Arab protesters waved a Palestinian flag behind the Israeli bench at the University of Michigan- Dearborn.

The demonstration was organized by the U-M Dearborn Arab Student Association to protest what the group called Israel's human rights violations against Palestinians on the West Bank.

About 40 demonstrators carried their banners and Palestinian flags into the arena, marched onto the basketball court and sat in the middle of the floor as the Israeli and U-M Dearborn players warmed up before the game.

They later moved to bleachers directly behind the Israeli team, called Hapoel Hagalil Haelcon. The start of the game was delayed about 40 minutes when the Israeli team refused to play while the protesting students sat and chanted in bleachers behind them.

The game finally started after the Israeli team moved its chairs to the opposite side of the arena. The teams were on the court for just five minutes, with the Israelis leading 10-2, when four demonstrators with a Palestinian flag crossed the court and waved it behind the Israeli bench.

The Israeli team asked for a time-out and went into the locker room as angry fans in the crowd of about 150 exchanged shouts with the protesters. University officials then announced that the game was canceled and asked visitors to leave the arena in orderly fashion.

The Israeli team has played seven other college teams in Michigan and Ohio

without incident, and U-M Dearborn was its last stop on a U.S. tour.

After the game was canceled, U-M Dearborn players visited the Israeli locker room to thank them for coming.

Mike Awad, 22, a U-M Dearborn senior and spokesman for the Arab group, said he was pleased with the demonstration. Allowing the Israeli team to play, he said ''is a shame and insensitive to Arab students.''

#90331u0605 11/27/1990 ~United Press International

(NOV. 27) UPI - Iraqi Foreign Minister Tariq Aziz accused the U.N. Security Council of adopting a policy of double standards, and said the government of Saddam Hussein would never succumb to pressure, Baghdad Radio said Tuesday.

Yemen's Sanaa Radio reported that the five permament Council members reached a broad agreement on a draft resolution authorizing the use of force if Iraq fails to get out of Kuwait by Jan. 1. There was no elaboration.

The Washington Post also reported an agreement had been apparently reached but that the Council was trying to nail down a deadline for a pullout from the oil-rich emirate.

France, a permanent Council member, has said it wants a Jan. 15 deadline. The Council is scheduled to meet Thursday to discuss and possibly vote on the proposed resolution.

Aziz spoke to reporters upon his return to Baghdad late Monday from Moscow - where he met with Soviet leader Mikhail Gorbachev and Soviet Foreign Minister Eduard Shevardnadze in talks in which the Soviets put the onus of a war in the gulf on Iraq.

The Iraqi minister was commenting on the draft war resolution the United States is pushing the Security Council to adopt.

''The continuous resolutions issued by the Security Council, including the one the Americans are seeking to adopt this week, do not serve the cause of peace ... but emphasize the double standards which the Council subscribes to,'' the state-owned Iraqi radio, monitored in Cairo, quoted Aziz as saying.

''Iraq will never succumb to pressure and will remain struggling fairly to achieve peace and justice in the region, with the rights of the Palestinian people foremost in its mind.

''Iraq's position on Kuwait will remain unchanged,'' Aziz said.

The foreign ministers of the Security Council are to meet Thursday at the

request of the United States, which is the current chairman of the U.N. body.

The Council has five permanent members and 10 rotating, or temporary, members. Six of the rotating members have reportedly indicated they will vote for a war resolution.

The Washington Post reported Tuesday that the five permanent members of the Council - the United States, Britain, France, China and the Soviet Union - appeared to have agreed on the use of force with the only sticking point being whether the resolution set a pullout deadline of Jan. 1 or Jan. 15.

French Foreign Minister Roland Dumas said in a statement Tuesday that he proposed Jan. 15 as the last date for a pullout, citing Soviet ''reticence'' on setting New Year's Day as the deadline.

Yemen, a temporary member, is scheduled to assume the Council's chairmanship Jan. 1.

Soviet leaders began talks in Moscow Tuesday with visiting Saudi Foreign Minister Prince Saud al Faisal.

Faisal was in Moscow last month to restore diplomatic relations between the two states after a break of some 50 years.

Radio Riyadh said the Soviets were keen to hear Saudi Arabia's view before Thursday's crucial vote at the United Nations, which could trigger a mass land air and sea strike by the U.S.-led multinational force against Iraq to liberate Kuwait from Saudi territory.

In the stream of diplomacy efforts of the gulf crisis, Soviet leaders told the visiting Aziz Monday that Baghdad must get out of Kuwait and allow some 3,000 Soviet nationals to leave the country or face ''the worst.''

''The fate of Iraq is in the hands of its leadership, and time is elapsing,'' Soviet leader Mikhail Gorbachev said. ''If Iraq actually wants a settlement in the entire region and is seeking to avoid the worst, it must declare right now openly and to show by deeds that it is leaving Kuwait."

In Amman, Jordan, one West European diplomat told United Press International Saddam Hussein's claim Monday that Iraqis were dying through lack of food and medicine was a ''lie.''

''(Saddam) is telling a lie ... there is no evidence at all from Iraq to say Iraqis are dying through lack of food and medicines because of the United Nations blockade,'' the diplomat said.

''(Saddam's) chief preoccupation these days is to distract the world's attention away from his brutal annexation of Kuwait,'' said the diplomat, who

is in touch with his country's mission in Baghdad.

Saddam met Monday with the wives of U.S. hostages being held in Iraq and told them their husbands could return home with them, the Iraqi news agency reported.

The U.S. State Department said it expected only three American husbands to be released.

Saddam said during his meeting with the American families that Iraq wanted peace, because it is in a ''very bad need for such peace,'' INA reported.

#90331u0651 11/27/1990 ~United Press International

(NOV. 27) UPI - Continued worries over the possibility of war in the oil-rich Persian Gulf coupled with weaker bond prices to send stock prices lower Tuesday in dull trading on the Tokyo Stock Exchange.

The bellwether Nikkei Average of 225 selected shares, which gained 362.58 points Monday, fell 139.35 points to 23,623.51.

The broader-based Tokyo Stock Exchange Price Index of all major shares dropped 12.78 points to 1,734.30 after gaining 19.42 points Monday.

Volume remained sparse at an estimated 250 million shares, virtually unchanged from the 249 million shares traded Monday.

Declines outnumbered advances 641 to 314, while 170 issues remained unchanged.

Elsewhere in Asia, stock prices on the Hong Kong Stock Exchange posted slight gains in thin trading.

The benchmark Hang Seng Index, which lost 20.54 points Monday, gained 3.42 points to 2,998.94.

Among the narrower indexes, utilities gained 24.53 points, financials fell 12.22, properties rose 10.58 and industrials slipped 0.22 points.

Volume amounted to around an estimated 579 million shares, compared with 591 million shares Monday.

In Singapore, stocks dipped in light trading Tuesday on the Singapore Stock Exchange following the resignation of Singapore's Prime Minister Lee Kuan Yew after 31 years in power.

The Straits Times Industrial Index, which lost 7.69 points Monday, fell 2.93 points to 1,118.29. The broader-based All Singapore Index eased 1.31 points to 310.89.

Volume amounted to around an estimated 31.5 million shares, compared with 13.5 million shares Monday.

Elsewhere around the region, in Bangkok, stocks closed lower in moderate trading on the Thailand Stock Exchange.

The Securities Exchange of Thailand Index, which fell 37.10 points Monday, lost another 9.25 points to 592.60.

Volume amounted to around an estimated 64 million Thai shares, compared with 39 million shares changing hands Monday.

In Australia, stocks closed lower on the Sydney Sharemarket in moderate trading.

The All Ordinaries Index, which lost 11.2 points Monday, slipped 5.1 points to1,350.3. The All Industrials index fell 10.1 points 2,037.2 and the All Resources Index lost 1.5 points to 817.2

Volume amounted to around an estimated 61 million shares, compared with 61.4 million shares Monday.

Meanwhile in Wellington, stock prices closed lower in moderate trading on the New Zealand Stock Exchange as local investors reacted negatively to some corporate news.

The Barclays Share-Price Index fell 26.15 points to 1,277.96.

#90331u0670 11/27/1990 ~United Press International

GENEVA (NOV. 27) UPI - Economies and living standards are seriously deteriorating in eastern Europe and the Soviet Union, the U.N. Economic Commission for Europe said Tuesday.

The U.N. agency issued a report citing falling output and productivity, rising unemployment and accelerating inflation.

''The oil shock has made matters considerably worse and in Bulgaria, Romania and the Soviet Union basic food shortages are increasing and threaten to become very serious during the winter,'' the report said.

A sharp fall in output and living standards was the immediate economic sequel to last year's political changes, it said.

''But the recession which was already apparent in a number of countries by late 1989 has spread throughout the region and deepened considerably in the first nine months of 1990,'' the report continued.

Industrial production in eastern Europe fell 18 percent on average against the first nine months last year, it said, with declines ranging from 4 percent in Czechoslovakia to 27 percent in Poland.

A drop in production of 20 percent is expected for 1990 as a whole with an 11

percent decline in net material product.

In the Soviet Union, the report said, ''conservative estimates'' forecast a fall in industrial output of 1.5 percent and of 4 percent to 5 percent in net material product.

''There also appears to have been a general collapse in fixed investment (with) gross outlays expected to be down by over 20 percent on average in eastern Europe and by some 12 percent in the Soviet Union, '' it said.

East European net foreign debt will probably rise $9 billion this year to $79 billion, the agency's economists said.

The Soviet Union has been helped somewhat by higher oil prices but its trade deficit with the West is still likely to be around $5 billion this year against $3 billion in 1989, the report said.

''With increased net interest payments abroad, the current account deficit is likely to be more than $7 billion this year compared with $4 billion in 1989 '' it said.

#90331u0705 11/27/1990 ~United Press International

WARSAW, POLAND (NOV. 27) UPI - Supporters of Prime Minister Tadeusz Mazowiecki, who lost his presidential bid and immediately resigned, were reluctantly asked Tuesday to support conquering opponent Lech Walesa as the lesser of two evils.

''We are not backing away from the critical remarks we have made about Mr. Walesa,'' wrote Adam Michnik, editor-in-chief of the independent newspaper Gazeta Wyborcza, in the lead editorial. ''But today he is the only candidate that counts.''

Michnik, once one of Solidarity trade union founder Walesa's closest confidants, became his most vocal critic last year when Walesa began expressing dissatisfaction with Mazowiecki.

Mazowiecki was once a top adviser to Walesa and was the union leader's handpicked choice for premier last summer when the Communist Party was forced

to give up its 46-year monopoly on power.

The newspaper's reluctant endorsement, taken after a vote Monday night of the Gazeta editorial staff, climaxed three days of political upheaval in Poland after Sunday's elections in which an expatriate businessman, Stanislaw Tyminski, edged out Mazowiecki in the six-man race to face Walesa in the Dec. 9 runoff.

''Walesa's victory will bring great risks for Poland,'' Michnik wrote. ''Tyminski's victory would absolutely certainly bring great degradation of our country. Polish reform will be then condemned to a dangerous defeat.''

Mazowiecki, who came to power in August 1989 as the first non- communist premier in the former East Bloc, resigned Monday night, saying the election showed Poles no longer support his economic austerity plan.

At a news conference Tuesday, Tyminski condemned Mazowiecki's economic policies, which halted hyperinflation but at the cost of a drop in the standard of living.

He said he wants to create in Poland the same conditions as in America so that entrepreneurs can prosper and help to rebuild the country.

''Many people will come back from American to Poland if we allow the opportunity for them to grow,'' he said.

But the Polish press turned hostile when Tyminski praised the former Communist Party leader and current president, Wojciech Jaruzelski, who declared martial law in 1981 to crush Solidarity.

When repeatedly asked what he supported in 1981 - Solidarity, or Jaruzelski and martial law - Tyminski refused to answer directly, saying at that time he was in Canada, and then in Peru, and did not have enough information to make a judgment.

''I'm asking you who was right,'' he told one questioner. ''I wasn't there.''

Official election results released Monday night gave Walesa 39.96 of the vote, Tyminski 23.10 and Mazowiecki 18.08.

At a news conference in Gdansk, Walesa announced he would take part in the runoff. Previously he had suggested he needed a clear majority of the voters in the first round in order to be a strong president, and if he did not get it he might withdraw.

''Now, I have no choice as one cannot give Poland into untested hands,'' he said. ''If Mazowiecki had moved to the runoff, I would have withdrawn, giving him my votes.''

Despite his comment, few analysts believe he would have dropped out when his support in the first round was twice that of Mazowiecki's.

Mazowiecki announced his resignation and that of his government late Monday at an emergency session of the Council of Ministers, his Cabinet.

''The vision of Polish democracy and formation of the foundations of a healthy economy, the goal of my government, was questioned'' in the election, he said.

''Society has made its choice. From this choice I drew my own conclusion. I decided to submit the resignation of the government.'' He said the development does not mean Poland will sink into anarchy because his government will stay on in a caretaker role until a new premier is named.

''The government will still function and fulfill its consitutional duties,'' he said.

The resignation will be submitted to Parliament after the new president is elected Dec. 9, probably just before the Christmas holidays.

The new president will submit to the parliament his choice for prime minister, who will form the new government.

At Belwedere Palace, Jaruzelski, who agreed to step down under public pressure only one year into his six-year term, received Mazowiecki's resignation with ''understanding and regret,'' Polish radio said.

-30- 4645

#90331u0781 11/27/1990 ~United Press International

BEIJING (NOV. 27) UPI - China is tightening the noose around a group of prominent dissidents branded as core agitators in the 1989 Tiananmen Spring democracy movement, charging at least four in recent days with counterrevolution or sedition.

Only two jailed activists - editor Wang Juntao, 32, and economist Chen Ziming, 38 - face trial on both offenses, suggesting the communist government is saddling them with responsibility for the movement now branded a ''counterrevolutionary rebellion.''

Notice of the charges was transmitted to Wang's kin and Chen's kin on Nov. 24 and both families got vague assurances the trials would be swift, friends and family told United Press International.

Under China's socialist legal system, the filing of formal charges generally is tantamount to conviction and defendants are expected to earn leniency by admitting their guilt.

Word of the stiff charges touched off rumors Monday and Tuesday in the United States and China that Wang already had been tried and sentenced to death.

Conviction on the more serious sedition charge, namely intent to overthrow the government, carries penalties ranging from long prison terms to death.

University lecturers Liu Suli, 32, and Liu Xiaobo, 35, face trial on the single charge of spreading counterrevolutionary propaganda, punishable by at least five to 10 years in prison.

Friends said Liu Suli's family was notified Monday, while Liu Xiaobo's wife received official notification Nov. 17.

Several other key activists also are known to have been hit with the counterrevolutionary propaganda charge, including veteran human rights activist Ren Wanding and China Politics and Law University student union leader Zhou Yongjun.

China has not publicly acknowledged that it is moving forward with prosecution of dissidents active in last year's pro-democracy movement, which was crushed by army tanks and gunfire June 4.

Hard-line Premier Li Peng, in a rare comment on China's human rights situation told five visiting U.S. congressmen this month that the charges against Tiananmen Spring defendants would be resolved ''swiftly.''

Chinese sources have quoted officials as saying the government would show no mercy to older dissidents who were active in earlier democracy campaigns.

The prosecutions would be the first major political trials in China since the show-trial convictions of the ultra-leftist Gang of Four in 1977 and of Democracy Wall activist Wei Jingsheng in 1979.

The Gang of Four, led by Chairman Mao Tse-tung's wife Jiang Qing, was convicted of persecuting 700,000 people during the chaotic 1966-76 Cultural Revolution - including 35,000 who were hounded to deaths.

Wei, an electrician whose eloquent appeal for new liberties in the 1978-79 Democracy Wall movement alarmed the authoritarian government, was imprisoned for 15 years for leaking secrets to foreign reporters and publishing counterrevolutionary statements.

China's counterrevolution laws date to 1951 and were revised in 1979 to prohibit ''acts undertaken with the purpose of overthrowing the political power of the dictatorship of the proletariat and the socialist system and which harm the Chinese People's Republic.''

Wang and Chen, active in democracy campaigns since the Tiananmen Incident of 1976, were arrested in October 1989 and have been held without charge at notorious Qincheng Prison outside Beijing.

The pair have been pegged as core agitators in the 1989 movement and branded as behind-the-scenes ''black hands'' in the official press.

Although China has freed hundreds of activists jailed after the June 4 crackdown, a small number of intellectuals remain behind bars, presumably facing prosecution.

Among them are key Beijing University student leader Wang Dan, 21, who topped a government warrant naming suspected student agitators.

Also facing likely prosecution are Chen Xiaoping, a constitutional law scholar at Politics and Law University, and Bao Zunxin, a senior historian at the Chinese Academy of Social Sciences.

#90331u0825 11/27/1990 ~United Press International

GENEVA (NOV. 27) UPI - The chairman of the Uruguay Round trade talks said Tuesday the negotiations could still produce meaningful results if governments make the necessary ''tough decisions'' at a ministerial conference next week.

Arthur Dunkel, director of the General Agreement on Tariffs and Trade, said the 391-page ''draft final act'' compiled in four years of negotiation was a massive and unprecedented undertaking.

All the same, he conceded, it basically comprises conflicting positions of the major participants on all the key issues - especially agriculture, services, and textiles and clothing.

Trade ministers of the 105 participating states at a Dec. 3-7 meeting in Brussels were to have adopted an average of 30 percent cuts in barriers in all sectors of global trade - worth $3.1 trillion last year.

The Uruguay Round was launched in the Uruguayan resort of Punta del Este in 1986. GATT officials and delegates said ministers next week can either decide to end the talks or make concessions needed for a meaningful extension of the negotiations.

''If governments don't go to Brussels with the firm will to succeed, if they are not prepared to shift position from the very beginning, then it will be a failure,'' Dunkel told a news conference.

''The Round is in a crisis.....but we have all the edlements which can lead to a success,'' he said.

''For the time being there is no reason to envisage any extension, otherwise there was no reason to fix the (Brussels) rendezvous,'' Dunkel said. ''Let us go to the meeting first, otherwise we will not get the tough decisions we need.

''Now is the time for decisions. We have to put governments up against the wall.''

Dunkel agreed the German elections this Sunday prevented Germany and the European Community in general from ''showing its cards'' on agriculture.

The main shifts needed, he said, are EC concessions on reducing farm export subsidies and U.S. agreement to free access for foreign services sectors such as banking, insurance, telecommunications and transportation.

The United States originally insisted on inclusion of services in the negotiations but backed off because of pressure from lobbies.

Dunkel said governments must recognize the overall interest of all countries in a successful Uruguay Round rather than ''special interests.''

''Everybody will otherwise be a loser,'' he warned.

''The world economy is slowing down, the reforms in eastern and central European countries have to be incorporated into the global trading system, and there is also instability caused by the Gulf crisis, Dunkel added.

''Developing countries and those countries engaged in reform would be the biggest losers but the major countries will lose as well.''

Reductions in EC farm exports subsidies of 90 percent and in domestic supports of 70 percent are demanded by the United States and 14-member Cairns Group of farm exporting nations led by Australia, Argentina, Brazil and Canada.

The EC, however, has offered only a 30 percent reducion in internal supports with nothing on export suibsidies.

The EC and developing countries insist the United States permit free access for all countries in the services sector instead of bilateral arrangements as Washington suddenly proposed.

Developing countries also have demanded greater commitments from the richer

nations to lower barriers to tropical products and other Third World exports.

SOFIA, BULGARIA (NOV. 27) UPI - Police used tear gas and truncheons Tuesday to disperse protesters who blocked a central Sofia intersection on the second day of a general strike to force the resignation of the Socialist government.

The clash came amid reports that more than 5,000 coal miners had joined the nationwide strike, which organizers said involved several hundred thousand workers on its first day.

Government officials maintain that the strike is illegal and say that only about 1 percent of the nation's workers were participating. The independent Podkrepa trade union, the strike organizer, is demanding the ouster of Socialist Prime Minister Andrei Loukanov and his Cabinet.

The clash Tuesday came when police tried to clear away several trucks which striking drivers had used to block a major intersection in downtown Sofia.

A crowd of about 200 people gathered and began jeering the police, and some tried to stop police from removing the vehicles. Police reinforcements arrived and used tear gas and truncheons to disperse the crowd.

There were no serious injuries and no arrests, the state-run BTA news agency said.

In a separate incident, a crowd of youths set up a human barricade across another Sofia intersection, blocking traffic and overturning a trolley, authorities said. Several young people were arrested and fined.

A Podkrepa spokesman said 5,300 miners in 47 pits throughout the country had joined the 2-day-old walkout, adding to a growing number of striking workers in larger cities including Plovdiv, Rousse, Bourgas and Lovech.

The chairman of the Podkrepa National Strike Committee, Krustyu Krustev, said Monday that 50 enterprises in Sofia, 102 in Plovdiv, workers at the large chemical plant and oil refinery in Burgas, and those in some chemical and metallurgical industries as well as bus drivers in Sofia had joined in the strike.

In Sofia, military buses driven by civilians replaced striking public transportation workers. Members of other unions, including the Confederation of Independent Syndicates, the largest union in Bulgaria, also joined in the strike and it was backed by the Union of Actors as well as Bulgarian Radio and Bulgarian Television.

The strike comes after several weeks of demonstrations by opposition groups led by UDF and a four-week strike by university students, who say Loukanov's socialist-led government is stalling on reforms. Polls have showed that the public is also frustrated by the chaos in Bulgaria's parliament, where the Bulgarian Socialist Party, the former Communists, hold a slim majority.

#90331u0834 11/27/1990 ~United Press International

BELGRADE, YUGOSLAVIA (NOV. 27) UPI - Serbia's main opposition parties, hailing a decision by the communist government to let them participate in vote-counting, Tuesday called off a threatened boycott of the country's first multi-party elections in 45 years.

''Serbia hurries to take off a red gown from itself and stop being an object of ridicule of Europe,'' said Vuk Draskovic, president of the nationalist Serbian Renwal Movement.

''We have nothing to worry about, communism has fallen all over Europe and now comes our turn to win in Serbia,'' he told a news conference at a Belgrade hotel.

Draskovic, who also is a candidate for the Serbian presidency, said the opposition parties renounced their threat to boycott the elections and canceled a planned anti-communist rally in downtown Belgrade set for Dec. 3, six days before the balloting.

The communist government of Yugoslavia's largest republic Monday succumbed to opposition pressure and reversed a decision barring opposition parties from participating in panels that will supervise the voting and count the ballots.

But Draskovic criticized Serbian President Slobodan Milosevic's Marxist government for not allowing Serbs abroad to cast votes. Draskovic said his nationalist party would suffer most from this policy, contending that a majority of the approximately 500,000 Yugoslav migrant workers living in Western countries would vote for him.

Draskovic said the government's initial decision to bar opposition parties from the vote-counting process pushed the country to ''edge of civil war.''

The opposition has insisted on its direct participation in the ballot-counting process because of fears Milosevic's communist regime, which has suffered a substantial loss of popularity in recent months, will rig the results to retain power.

More than 30 opposition parties had withdrawn their candidates and said they would not participate in the balloting unless democratic conditions were created.

Serbia and neighboring communist-ruled Montenegro are the last of Yugoslavia's six republics to stage multi-party elections following the collapse in January of the national communist organization. Montenegro and Serbia will have assembly and presidential elections Dec. 9 and a second round Dec. 23.

Slovenia and Croatia, the two northwestern republics, in April held Yugoslavia's first multi-party elections since the communists took power after World War II in 1945 and elected their nationalist governments.

The two republics now advocate secession from Yugosavia unless the federation is turned into a confederation of independent states.

Early results of elections being held currently in Bosnia-Herzegovina and Macedonia republics have shown nationalist parties have been leading over the ruling communists.

Serbia rejects the idea of a confederation unless it is given control of Serbian-inhabited enclaves in other parts of Yugoslavia.

Other republics, considerably smaller than Serbia, fear Serbian domination in a federation controlled by Serbs who make nearly 40 percent of multi-national Yugoslavia.

#90331u0847 11/27/1990 ~United Press International
WASHINGTON (NOV. 27) UPI - The Pharmaceutical Manufacturers Association Tuesday announced formation of a commission to speed the development and use of medicines to fight drug abuse.

The trade group said the commission will work with the National Institute on Drug Abuse to establish screening systems and other ways for determining which compounds have promise for treating drug dependency.

In addition, the nine-member panel, comprised of officials and researchers from pharmaceutical firms, will have the authority to seek ''support'' from companies for research into issues relating to treating drug abuse.

''Work on new medicines as possible drug dependence treatments is already underway at some ... companies. But, clearly, more research and development is still needed,'' said Gerald Mossinghoff, president of the Pharmaceutical Manufacturers Association.

Although methadone and some other medications have proven helpful in treating heroin addiction, there currently are no uniformly effective treatments for cocaine abuse or the dual abuse of cocaine and heroin, often injected in a potent form called a ''speedball.''

Drug abuse and dependency costs the United States more than $100 billion a year in lost health and productivity, Mossinghoff said.

Dr. Frederick Goodwin, director of the Alcohol, Drug Abuse and Mental Health Administration, called the industry's action ''a timely initiative.''

''The commission reflects a growing acknowledgement that the nation cannot afford to let the development of treatments for paients with addictive

disorders continue to be viewed as being exclusively a public sector responsibility,'' Goodwin said at a news conference.

Currently, the government's effort to find medications to treat drug abuse is focusing on identifying existing compounds that the pharmecutical industry may already have on the shelf, but which have not been tried against addiction, Goodwin said.

Longer term goals include developing drugs specifically tailored to affect the parts of the brain and nervous system involved in addictive behavior, he said.

#90331u0866 11/27/1990 ~United Press International

AMMAN, JORDAN (NOV. 27) UPI - An Iraqi proposal for bilateral consultations with the United States on how to avoid military incidents in the Persian Gulf has been ignored by the U.S. government, a newspaper report said Tuesday.

The joint report is by the English language daily Jordan Times and the Christian Science Monitor.

The Jordan Times said an Iraqi proposal was delivered to the U.S. State Department on Aug. 21 to discuss through experts from both sides ways to avoid military accidents.

The daily said that the proposal referred to a previous agreement signed in 1987 between Iraq and the United States to avoid accidents in the gulf during the Iran-Iraq war.

Western military experts disclosed that the 1987 agreement, whose provisions were never made public, ''involved a special set-up by which Iraqi pilots used call signals to alert the U.S. Navy and forces in the gulf that they were Iraqi planes.''

The agreement was signed three months after an Iraqi warplane accidentally missiled the U.S. frigate Stark, killing 37 U.S. sailors, and was intended to avoid incidents of a similar nature that might drag both sides into a war, the newspaper said.

It quoted U.S. sources as confirming that Washington ignored the proposal for a meeting of experts, because ''it suspected that Baghdad might use such an agreement as a means of shifting the blame onto the United States for any military incident in the gulf.''

Iraqi sources were quoted as saying that Washington's shelving of the proposal was deliberate and criticized it as ''a pretext to provoke military confrontation or to step up political and psychological pressure on Iraq.''

Iraq said it still awaited a response on the proposal, but Washington sources were quoted as describing it as an ''Iraqi move to obtain information on U.S military movements in the gulf region and elsewhere in the Middle East.''

#90331u0872 11/27/1990 ~United Press International

NEW YORK (NOV. 27) UPI - Eastern Airlines planned to ask a bankruptcy judge Tuesday for $120 million to keep itself aloft through March 31, in a bid to shore up sagging confidence in its chances for survival, a spokeswoman said.

The request, which will likely be opposed by Eastern's unsecured creditors, came late Monday in a surprise filing in U.S. Bankruptcy Court in Manhattan. A hearing on the request was scheduled for Tuesday afternoon.

''We want to get a commitment for the funds through the first quarter of 1991 '' Eastern spokeswoman Karen Ceremsak said in Miami. ''Increments of $15 million don't build consumer confidence.''

A lawyer for Eastern's unsecured creditors committee could not be reached for comment early Tuesday.

Ceremsak said Eastern's efforts to attract customers were badly hurt earlier this month by a highly publicized squabble over money between Eastern and its unsecured creditors.

Those creditors, who are owed about $1 billion, opposed Eastern's request for an additional $30 million, saying the airline should be liquidated instead.

Creditors who had previously supported Eastern's turnaround effort were swayed in part by rising jet fuel prices, which have hurt even the nation's strongest airlines.

U.S. Bankruptcy Judge Burton Lifland compromised by giving Eastern $15 million. The judge told Eastern it could have the other $15 million on Dec. 3 if it met its projections by early December.

Eastern repeatedly has dipped into an escrow account containing money from asset sales to finance its ongoing losses. Eastern filed for Chapter 11 bankruptcy in March 1989, five days after its three unions launched a crippling strike.

Eastern trustee Martin Shugrue, appointed to run the troubled carrier in April has sought to salvage the airline in part by offering incentives for business travelers to fly Eastern.

But Ceremsak said those efforts have been hurt by doubts about Eastern's prospects for survival.

Although she declined to provide specific booking figures, Ceremsak said a substantial portion of the $120 million request is needed because of the damage done by the earlier squabble.

''The estimated damage and recovery costs are $55 million to $70 million,'' she said.

Ceremsak declined to speculate on what would happen if the judge refuses Eastern's request.

''We're not going to talk about what if,'' she said.

#90331u0874 11/27/1990 ~United Press International

(NOV. 27) UPI - The next prime minister of Britain may be selected today as parliamentary members of the Conservative Party vote on three candidates to replace Margaret Thatcher as party leader. The longest-ruling prime minister of this century resigned that post after being challenged for her party leadership role. The new party leader and prime minister needs a simple majority of the 372 Conservative Party members of Parliament. If NO one candidate gets 187 votes then a new ballot will be taken Thursday under different rules.

Everything but the actual date reportedly has been agreed to as the United States pushes the U-N Security Council for a resolution that could involve the use of force to get Iraq out of Kuwait. France is said to be pushing for a January 15th deadline instead of January 1st. The Security Council is set to meet on Thursday to discuss the resolution. A vote may be taken then.

President Bush and Mexican President Salinas held a breakfast meeting in Monterrey, Mexico, this morning... joining business leaders from both nations. Bush is winding up a two-day summit to talk about topics including free trade... the environment... and the war against drugs.

The search for two suspected kidnappers has gone nationwide with the F-B-I saying they could be anywhere between Chicago and California. Federal warrants identify the suspects as 33-year-old David House and 26-year-old Kenneth Studabaker. They allegedly kidnapped three young women at knifepoint from a Mount Clemens, Michigan, restaurant on Saturday and later released two of the women in Chicago. But there's NO word from the third woman, 18-year-old Jamie Lee of Detroit. The suspects were last seen driving her car, a 1990 Blue Toyota Tercel with Michigan license plates 240-WDM.

Hostage John McCarthy of Britain turns 34 years old today... more than four years after being kidnapped by gunmen in Beirut. Relatives and friends of the British journalist are marking the day by sending messages of support to the

captive by way of a newspaper that is widely distributed in mainly-Moslem areas of Lebanon. His family and friends say the only reliable news they have received about him what in 1988 when a group of freed French hostages said he was alive.

They're using that ''R'' word again. Three-quarters of the 51 economic forecasters surveyed by the National Association of Business Economists sau they believe the U-S economy already is in a recession. And two-thirds of the economists said the recession is expected to last six months or less and should be relatively mild. The White House has insisted the economy is NOT in recession, although President Bush recently conceded that the economy has suffered a downturn.

#90331u0883 11/27/1990 ~United Press International

NEW YORK (NOV. 27) UPI - Consumer confidence edged down in November following October's record decline, The Conference Board said Tuesday. The consumer confidence index of the private business research organization stood at 61.5, down from 115.1 one year ago and down from 62.6 in October.

"The current Consumer Confidence Index figure has fallen to rececession levels and is now only marginally above the figure recorded during the lowest point of the 1982 economic downturn," said Fabian Linden, executive director for the board's Consumer Research Center.

Americans have become less confident about current and future business conditions, and plans to buy homes and major appliances weakened slightly, the board reported.

"While rising unemployment and higher prices have made consumers uneasy, the weakening of the economy has, in fact, been relatively moderate. It certainly has not been of a magnitude that would explain the plunge of more than 40 points in consumer confidence since July," Linden said. "It is likley that the Persian Gulf crisis and pending tax increases have contributed to the precipitious decline in consumer spirits."

About 30 percent of all survey participants said current business conditions were "bad," up slightly from October's response. Another 14 percent said conditions were "good." Nearly 57 percent said jobs were "not as plentiful," up from 55 percent in October.

In other results, more than 34 percent of respondents said they expected there would be fewer jobs six months from now, while only ten percent anticipated an increase. Eleven percent expected U.S. business conditions to improve, down from 12 percent in October.

But in a bright spot, more than 22 percent said they expected their income to increase over the next six months, up from less than 20 percent in October.

Buying plans were generally down for November. Some 6.3 percent planned to buy a car, unchanged from October. But only 2.7 percent planned to buy a home, down from 2.9 percent. Interest in purchasing appliances also weakened from

October.

Confidence waned throughout all regions designated by the report, dropping most sharply in New England, the board said. The average New England index for September, October and November was 29.9, down 72.5 percent from 108.8 during the same period of 1989, the board said.

In the Mid-Atlantic, the three-month average declined 49.5 percent to 60.7 from 120.3 in the previous three-month period; in the board's East North Central region the index dropped 35.9 percent to 75.5 from 117.8, and in the West North Central region it dropped 38.2 percent to 65.4 from 105.7, the board said.

In the South Atlantic, the index dropped 42.1 percent to 80.4 from 139; in the East South Central area it dropped 37.5 percent to 64 from 102.5, and in the West South Central area it dropped 10.8 percent to 75.3 from 84.4. In the Mountain region the index dropped 15.6 percent to 81.7 from 96.8 and in the Pacific area it dropped 31.8 percent to 93.9 from 137.6.

The monthly survey covering 5,000 U.S. households was conducted for the board by National Family Opinion Inc. of Toledo, Ohio.

MOSCOW (NOV. 27) UPI - The Saudi foreign minister held talks with Mikhail Gorbachev Tuesday and a Soviet official was sent to Cuba as Moscow continued its intense diplomatic effort before an expected U.N. resolution to allow the use of force in the Persian Gulf.

The efforts came as Soviet officials displayed their growing anger with former ally Iraq, with spokesmen calling Soviet workers unable to leave Iraq ''hostages'' for the first time in the crisis.

Saudi Foreign Minister Saud al Faisal's visit to Moscow came one day after Iraqi Foreign Minister Tariq Aziz was harshly warned by Gorbachev that Iraq must withdraw from Kuwait soon to avoid bloodshed.

Saud held several hours of talks with Gorbachev and Soviet Foreign Minister Eduard Shevardnadze, who was to leave Wednesday for New York to participate in Thursday's U.N. Security Council meeting to consider a resolution allowing additional measures to force Iraqi troops from Kuwait.

Gorbachev spokesman Vitaly Ignatenko and Foreign Ministry spokesman Vitaly Churkin both refused to comment on the Soviet position on proposed U.N. resolutions to give Iraq a deadline to pull out of Kuwait after which a multinational military force may be used. But the Soviet Union is expected to support the resolution.

In the continued Soviet diplomatic efforts concerning the gulf crisis, Gorbachev also dispatched Georgi Memedev, head of the Foreign Ministry's U.S.-Canada department, to Havana Tuesday evening for consultations.

Cuba is a temporary member of the Security Council, but Churkin refused to say if Memedev would be pushing for Havana's support of any particular position in Thursday's meeting.

Deputy Foreign Minister Vladimir Petrovsky, who has spent much of the past month roving the Middle East as a special Soviet envoy, left for Iran Tuesday with a message from Gorbachev on the crisis, Churkin said.

''Time left for a peaceful solution of the conflict is running out, and the understanding of this is obvious,'' Petrovsky said of his meetings with Middle Eastern leaders.

The visit by Saud was the fourth to the Soviet Union by the Saudi foreign minister. On his last trip in September the two countries normalized diplomatic relations that had been frozen for decades.

Saudi Arabia is the United States' chief Arab ally in the face-off with Iraq over the Aug. 2 invasion of Kuwait, and the American-led multinational military force in the gulf is concentrated in the Saudi desert.

Gorbachev warned Aziz Monday to get ready to face the worst if his country does not leave Kuwait, and hinted there was not much more time for talk before military efforts are used to end the stalemate.

''The fate of Iraq is in the hands of its leadership, and time is elapsing,'' Gorbachev said.

Tass said Aziz ''presented the familiar arguments'' to support Iraq's invasion positions that have been rejected by the Soviets along with the rest of the international community.

Ignatenko said Tuesday the meeting between Gorbachev and Aziz was ''tough'' and the two men ''parted coldly.''

''We have increasingly been losing understanding'' with Iraq, Ignatenko said.

Soviet officials also pressed Aziz on the issue of Soviet workers in Iraq who have been unable to leave despite Iraqi promises. Although the Soviets are not being held at strategic sites like Westerners in Iraq, for the first time Tuesday both Ignatenko and Churkin referred to the Soviets as ''hostages.''

''In a political and emotional sense, and we are emotional about this, they could be considered hostages,'' Churkin said. ''If a person cannot leave, then in a broad political sense they can be described as hostage.''

There were thousands of Soviet citizens in Iraq and Kuwait at the time of the invasion, including nearly 200 military advisers, and while many were allowed to leave there have been increasing obstacles to the departure of others.

The Soviet Union has supported the international effort to force Iraq to withdraw from Kuwait, including cutting off arms supplies as part of a trade embargo, but it is not participating in the military force in the gulf.

#90331u0977 11/27/1990 ~United Press International

BOSTON (NOV. 27) UPI - A hormone taken by millions of post-menopausal women to reduce their risk for developing brittle bones and heart disease may boost the danger of being stricken by breast cancer, researchers reported Tuesday.

Synthetic estrogen given to women whose ovaries have stopped functioning or been removed appears to increase their chance of developing breast cancer by a ''moderate'' degree, said Dr. Graham Colditz of Brigham and Women's Hospital in Boston.

However, Colditz said the possible danger of cancer may be offset by the hormone's benefits and decisions about using estrogen might best be made on the basis of an individual's overall risk, including such factors as family history of breast cancer.

''There is a tradeoff involved in estrogen use. A woman with a history of benign breast disease or a family history of breast cancer may be in a different position than a woman with no (other) risk factors,'' he said.

The study found no increased breast cancer risk among women who had discontinued estrogen use for more than one year and no evidence that increased risk was related to prolonged use of estrogen, higher doses or the type used.

Although ''the magnitude in increase risk appears quite modest'' and the risk declines rapidly when estrogen is no longer used, Colditz said the new data nevertheless ''suggest the need for caution in the use of estrogens.''

Colditz and his colleagues studied the use of so-called estrogen replacement therapy - or ERT - and breast cancer incidence among 121,700 female nurses who were part of the ongoing Nurses' Health Study, which began in 1976. Their report appeared in the Journal of the American Medical Association.

When the study began, the nurses ranged in age from 30 to 55, and 23, 607 were classified as post-menopausal. The estrogen research spanned 10 years, during which the nurses were asked to fill out health questionnaires every two years.

Overall, Colditz and co-researchers found 722 cases of breast cancer. Although past users of ERT had no increased breast cancer risk, the study found a 36 percent increased risk among ''current users'' - those who used supplemental estrogen within one year of returning questionnaires.

Breast cancer is the leading cause of cancer among non-smoking women. It is estimated that 150,000 new cases of breast cancer will occur in the United States this year and 40,000 women will die from it.

More than 5 million American women are thought to take estrogen to such symptoms as hot flashes and reduce the risk for heart disease and osteoporosis which causes bones to become brittle and break.

Last year, a study involving 23,244 Swedish women found long-term estrogen use appeared to boost the breast cancer risk by up to four times. However, many of the women in that study took a potent form of estrogen rarely used in the United States.

Among the Swedish women who took a combination form known as ''conjugated estrogens'' popular in the United States, no increased risk was found. Colditz said more than 70 percent of those in the nurses study took conjugated estrogens.

A British study that followed menopausal women for more than five years and a study of 11,468 post-menopausal Seventh Day Adventist women also found apparent increased risks for breast cancer among current estrogen users, Colditz said. However, he said most prior studies have not distinguished between current and past use and have included only small numbers.

#90331u0982 11/27/1990 ~United Press International

BOSTON (NOV. 27) UPI - Estimates appear to be exaggerated of the degree to which workers who test positive on drug tests may be impaired on the job, scientists said Tuesday.

A study of 2,537 applicants for postal workers' jobs found those who turned up positive on urine tests for marijuana or cocaine use had higher rates of injury, accident and other problems on the job, but not to an extent often claimed, said Dr. Craig Zwerling of the University of Iowa in Iowa City.

Zwerling and colleagues who conducted the research for the Boston medical unit of the U.S. Postal Service found those who were positive for marijuana had 55 percent more accidents on the job, 85 percent more injuries and 56 percent more turnover than those who tested negative.

Those whose pre-employment tests turned up evidence of cocaine use had 59 percent more accidents than those who tested negative, 85 percent more

injuries and 15 percent more turnover. Their job absentee rate was 5.8 percent higher - and marijuana users' rate 3.1 percent higher - than non-users.

However, Zwerling noted claims ''have been made that drug-abusing employees have three to four times as many accidents at work, have five times as many compensable injuries and use 16 times as much sick leave,'' as other workers.

Since a recent survey found that 20 percent of all workers are employed by companies with drug testing programs, it is ''surprising'' that only one previous published study has estimated the degree to which drug screening can predict job outcome, the researchers said in the Journal of the American Medical Association.

In an editorial accompanying the study, Eric Wish of the University of Maryland said several factors suggest that ''pre-employment drug testing may have limited potential in the United States.

''First, employers should remember that a single positive urine test provides limited information about a particular employee's level of drug use,'' Wish added. In addition, he said some prescribed drugs, and even some foods, such as poppy seeds, can produce positive results.

Zwerling's study found that 12 percent of the postal job seekers tested positive for drugs - two-thirds of them for marijuana. About 2 percent were positive for cocaine and 2 percent for other drugs, including amphetamines.

This ''low prevalence'' of drug use among workers is ''dwarfed'' by the 50 percent to 60 percent rate of cocaine use found among people arrested in the nation's largest cities, regardless of the crime, said Wish.

He said it may benefit society more to put resources into testing and treating drug abusers in the criminal justice system than ''for industry to use its limited resources to find the comparatively small number of recent, mostly marijuana users in primarily law-abiding employee populations.''

Zwerling said the question of whether it makes sense for employers to test workers for drugs may depend on variables such as geographical location and the nature of the job - especially, whether the job involves a high degree of risk.

''If injury means you may bang your ankle on the job, that's one thing. But if it means you may crash the airplane you are flying, that's quite another,'' he said.

The ''major weakness'' of the study was its inability to estimate the degree to which alcohol abuse may contribute to injuries, accidents, absenteeism and other problems on the job, he said.

Because alcohol disappears from the body in a matter of hours, Zwerling said it is impossible for urine tests to determine whether a person habitually abuses alcohol.

Another problem with the tests is that because cocaine can remain in the body for several days and marijuana for a month, ''there is no way of distinguishing whether someone used marijuana once in his life at a party two weeks before or abuses it all the time,'' Zwerling said.

#90331u0987 11/27/1990 ~United Press International

PHILADELPHIA (NOV. 27) UPI - Cross-border deals accounted for the majority of the value of all merger and acquisition activity in the 1990 third quarter, Mergers & Acquisitions magazine reported Tuesday.

On an overall basis, the magazine said third-quarter activity reflected the slowing pace of the market with 810 completed mergers, acquisiitons, and divestitures valued at $42.9 billion for the 378 deals in which prices were announced.

In the 1989 third quarter, there were 814 completed deals valued at $52.8 billion. During the 1990 third period, there were 112 foreign acquisitions of U.S. companies valued at $14.7 billion and 57 U.S. acquisitions of companies abroad with a value of $7.5 billion. Their combined value of $22.2 billion was about 51.8 percent of the total reported dollar value of $42.9 billion, the magazine said.

The volume of international cross-border deals reflected increased commitments to global markets being made by major companies, M&A said. The largest deal of the quarter was Philip Morris Cos.' acquisition of Swiss coffee and chocolate giant Jacobs Suchard Ltd. for $3.8 billion.

Other deals of note included the purchase of Rorer Group Inc. by France's Rhone-Poulec SA for $3.3 billion, the $2.2 billion acquisition of Motel 6 by Accor SA of France and Swiss-based Roche Holdings Ltd's purchase of Genentech Inc. for $2 billion.

(NOV. 27) UPI - Saudi Arabia's foreign minister met in Moscow today with Soviet President Gorbachev to discuss the Persian Gulf crisis. The Soviets are sending an envoy to Cuba as Moscow intensifies its diplomatic efforts in the days before an expected U-N resolution to allow the use of force to remove Iraq from Kuwait. One Soviet diplomat explained the flurry of activity by saying- ''Time left for a peaceful solution of the conflict is running out.''

The Israeli Army says five of its soldiers and two rebels died in overnight attacks along the border with Lebanon. Hours after the overnight attack, Israeli airplanes this morning bombed what Israel says were bases in Lebanon belonging to two Palestinian guerrilla groups. Israeli leaders are suggesting that Islamic fundamentalists, spurred on by the Iraqi invasion of Kuwait, may be sparking the recent increase in the region's level of violence.

The surprise resignation of Polish Prime Minister Thadeusz Mazowiecki has changed the lineup in the race to elect Poland's next president. Mazowiecki came in third during Sunday's balloting and resigned yesterday, saying the results show voters don't like his economic austerity plans. His backers are now being asked to support rival Lech Walesa as the lesser of two evils in a December 9th runoff against expatriate Canadian businessman Stanislaw Tyminski. A move to replace Mazowiecki as premier also is under way, with one aide to Walesa suggesting that he and several other Walesa aides might be candidates.

Relatives of two jailed activists in China have been told that charges of sedition and counter-revolution have been filed against the pair, jailed for taking part in the 1989 Tiananmen democracy movement. Filing of formal charges generally is considered the same as a conviction under China's socialist legal system. The sedition charge is the more serious of the two and conviction normally carries penalties ranging from long prison terms to death.

Rhode Island's attorney general says a warrant is out for the arrest of the fugitive president of a financially troubled Providence bank. Joseph Mollicone Junior has been missing for more than two weeks and a grand jury is investigating 13-Million dollars in apparently fraudulent loans made at his Heritage Loan and Investment Company. Among the recipients listed on the bogus loans are Mollicone's father-in-law and the mayor-elect of Providence. Dozens of those listed said they never signed for loans nor got any money.

There is both summery and wintry weather to report in the nation's midsection today. Ice covers roads in Iowa, Nebraska, Kansas and South Dakota where wind chills have dropped near zero. All of this is drifting toward the Great Lakes where Chicago is enjoying record highs for this date in the upper 60's. But the UNexpected warmth is accompanied by winds that gusted to 90 miles an hour at one point, ripping part of the roof off a building in Elgin, Illinois.

#90331u1011 11/27/1990 ~United Press International

LONDON (NOV. 27) UPI - In his campaign for prime minister, Foreign Secretary Douglas Hurd found himself in the unaccustomed position of appealing to public sentiment.

He wore louder ties than usual and gestured more aggressively all to make the point that he doesn't lack charisma.

But the public was not buying it. Latest polls showed the Conservatives would fall behind the Labor Party by as much as 22 percent if he was their leader, costing him support on the second ballot for Conservative Party chief.

The tall, composed man calls himself the candidate of unity.

Many believed he would make a good party leader, unifying all factions. His political views tend toward the liberal wing of the Tory party, and he has promised a review of the unpopular poll tax. He is also pro-European unification, as opposed to Prime Minister Margaret Thatcher.

Hurd, 60, is the son and grandson of Tory MPs. Raised in comfortable rural surroundings, he was educated at Eton and Cambridge with a view toward service to his country.

He spent 14 years as a career diplomat, and distinguished himself as foreign secretary for his tough line on the gulf crisis.

His supporters said Hurd would be a ''safe pair of hands'' as prime minister, trusted to continue Thatcher's economic programs and aggressive foreign policy.

But his background, seen as patrician, made him an easy target for the opposition Labor Party.

Hurd was at pains to describe himself as just another bloke, saying his father's 500-acre farm was not the best land in Oxfordshire, and he attended Eton on scholarship.

If all else fails, Hurd has the advantage of having another successful career, as a novelist. He has written eight political thrillers.

#90331u1019 11/27/1990 ~United Press International
LONDON (NOV. 27) UPI - Michael Heseltine is the man who brought down the Iron Lady. Now he wants to succeed Margaret Thatcher as Britain's next prime minister but he may have made too many enemies.

The man nicknamed Tarzan for his long, flowing locks, lean good looks and unpredictable personality fought long and hard to position himself for a move into 10 Downing Street.

Heseltine outlined his future on the back of an envelop while an undergraduate at Oxford - millionaire, then parliamentary member, then prime minister by age 55.

He made his bundle in real estate and publishing before winning election to

Parliament in 1966. Thatcher promoted the charismatic young Conservative to defense secretary in January 1983, but he resigned three years later ostensibly in a clash over a bid to save Britain's only helicopter manufacturer.

It was in fact Thatcher's leadership style that rubbed Heseltine's proud personality the wrong way. He has stalked her ever since.

While Heseltine is running behind on his personal timetable - he is 57 - some say his political timing is incorrigibly ambitious.

Many right-wing Tories will never forgive him for ousting Britain's greatest post-war leader on the eve of a potential conflict in the gulf.

It was his challenge of Thatcher's leadership of the party, issued over her stand on Europe, her unyielding support of an unpopular new tax and her potential liability in a general election, that led to her decision to step down.

Heseltine failed to beat Thatcher on a first ballot last Tuesday but also denied her victory, holding her margin to 54 percent of the vote, .4 percent short of what she needed.

Heseltine's supporters said he was the only man brave enough to do the job.

He has called for a review of the poll tax but claims he is a mainstream Conservative on other issues, the true inheritor of Thatcher's economic reforms.

The Heseltine camp pointed to his charismatic style as a rallying point for the party in looking toward the next general election, due by mid-1992.

#90331u1029 11/27/1990 ~United Press International
MONTERREY, Mexico (NOV. 27) UPI - President Bush said Tuesday that while the United States endorses a common market, ''we reject the idea of a world divided into isolated trading blocks.''

He made the remarks in an address to the Monterrey community as he wound up two days of talks with Mexican President Carlos Salinas de Gortar.

''As we meet,'' Bush said, ''we are poised to conclude negotiations on international trade that will bring greater opportunity to our peoples. We must press now for the successful conclusion of the world trade talks known as the Uruguay Round of GATT (General Agreement on Tariffs and Trade).

''The critical moment is at hand,'' Bush added. ''We must not let the Uruguay Round fail.''

The world trade negotiations are stalled over European agricultural subsidies.

''As two of the world's largest economies, we must insist that all our trading partners act in a spirit of fairness and openness,'' Bush said in the Mexican industrial metropolis often likened to Detroit.

''We know all too well that trade-distorting subsidies and artificial barriers create winners and losers before the game even begins,'' he said. ''We must insist that trade with the nations of Europe, Asia and elsewhere, at the very least, be conducted on a level playing field.''

Bush said a Bilateral Free Trade Agreement will allow the United States and Mexico ''to expand markets.''

''It will allow us to expand opportunity,'' he said, adding that when such an accord is reached by 1992, both countries will be able to produce goods and

services ''that are world-class, competitive.'' Furthermore, he said, it will be good for American and Mexican workers.

''I look forward to the day when we will meet to sign our names to a free trade agreement that will write a new page in North American history,'' he said.

''But while we endorse a common market,'' he added, ''we reject the idea of a world divided into isolated trading blocks. The United States and Mexico must set an example for all nations.''

The president also touched on the Persian Gulf crisis in his speech, saying Mexico and the United States ''stand united in rejecting aggression.''

In remarks before the Monterrey community, Salinas also denounced Saddam Hussein's takeover of Kuwait. ''No nation which respects the rule can allow the impunity of the aggression against Kuwait to stand,'' Salinas said.

Bush praised Mexico for increasing its contribution to the world oil market at a time of heavy stress and thanked the Mexican people ''for your world leadership.''

Tuesday morning, Bush and Salinas held the second in a pair of one- on-one meetings and also held a working breakfast with a few dozen business leaders from the United States and Mexico.

The breakfast session dealt with accelerated efforts by the United States and Mexico to reach a free trade pact, which the U.S. Chamber of Commerce estimates would double over the next 10 years the $52 billion in trade between the two North American neighbors.

The formal negotiations on the free trade agreement, which will parallel the trade agreement reached with Canada last year, are to begin next year.

During his two-day visit to Mexico, his first as president, Bush and Salinas also discussed a variety of other topics, ranging from the war on drugs and efforts to reduce border violence to the protection of the environment and the Persian Gulf.

But the focus has clearly been on trade and efforts to foster U.S.- Mexican relations, which have been strained in the past.

Bush told an estimated 250,000 people at Monterrey's Macro Plaza Monday night that relations between the two nations ''have never been better'' and called for a new era of cooperation.
adv 1:50 p.m. EST

Salinas, in remarks prepared for a state luncheon in Bush's honor Tuesday,

said, ''We gladly accept the responsibility of building a new relationship, aware that there is no time to be lost and prepared to tap the enormous wealth and creative imagination and talent that moves our societies.''

Salinas said his talks with Bush ''have been characterized by a dignified, cordial atmosphere. This is a reflection of the common objectives we pursue.''

#90331u1056 11/27/1990 ~United Press International

LONDON (NOV. 27) UPI - Salman Rushdie came out of hiding for the first time in 21 months and pleaded for Moslem faithful to end a death edict against him, saying the furor over his book ''The Satanic Verses'' was dying down.

In a late-night interview with BBC-TV Monday night, Rushdie called on hard-line Moslems to negotiate an end to the death sentence against him.

Ayatollah Ruhollah Khomeini issued the death sentence against Rushdie Feb. 14, 1989, four months before the Iranian spiritual leader died, for Rushdie's alleged blasphemy against Islam in ''The Satanic Verses.''

Moslem businessmen and government agencies offered a bounty to whoever killed Rushdie.

''It is a finished story to an extent. Let's find a way of putting a full stop to it,'' said Rushdie on the BBC's Late Show.

He went to the studios of the BBC for the show, the first time he has left hiding since shortly after the execution order was given.

Rushdie said some moderate Moslem groups had approached leaders of the Moslem faith in Britain and Iran to try to have the death order lifted.

But a spokesman for the Islamic Action Committee, a hard-line pressure group in Britain, said the death order would stand.

''The problem we have is the continued circulation of the book,'' the spokesman said.

Rushdie, an Indian-born British citizen, has said he cannot be accused of blasphemy since he was never a Moslem believer. He said moderate Moslems now accept that his novel was not intended as an insult to their religion.

HOUSTON (NOV. 27) UPI - Documents filed with the Securities and Exchange Commission indicate Maxxam intends to sell a stake in its Kaiser Aluminum Corp. subsidiary, a newspaper reported Tuesday.

Maxxam plans to use money from the sale to reduce its debts, SEC documents showed. The Houston-based Maxxam is controlled by financier Charles Hurwitz.

''The timing and price range of any offering have not yet been determined,'' company executives said in a prepared statement.

Kaiser Aluminum is a Houston-based company whose main operation, Kaiser Aluminum & Chemical Co., is based in Oakland, Calif. Maxxam executives did not

comment on what percentage of the wholly owned subsidiary the company intends to retain.

Vahid Fathi, an analyst with Cleveland-based Prescott, Ball & Turben, told the Houston Chronicle that aluminum industry analysts have been reluctant to recommend Maxxam's stock because they are unfamiliar with logging and real estate - industries that affect Maxxam's other properties.

''It was a rather complicated form of amalgamation,'' Fathi said. ''Timberland real estate and aluminum - they don't exactly go hand in hand.''

Maxxam's Pacific Lumber Co., which is based in Scotia, Calif., harvests coastal redwoods and Douglas firs in northern California. Pacific Lumber has been attacked repeatedly by environmentalists in recent years.

Pacific Lumber controls the largest stand of virgin redwood trees left on private property, and environmentalists tried unsuccessfully earlier this month to persuade California voters to raise money to buy 3,000 acres of Pacific Lumber's land.

Other Maxxam subsidiaries are engaged in real estate development in the Southwest and Puerto Rico.

Kaiser is one of the world's largest aluminum producers, operating 20 plants in 10 states and five foreign countries, company records showed.

The bulk of Maxxam's revenues come from its aluminum operations. Last year, Maxxam had total sales of $2.4 billion, $2.2 billion of which was generated by Kaiser.

#90331u1076 11/27/1990 ~United Press International

WASHINGTON (NOV. 27) UPI - The government, which has spent $112 million to subsidize farm exports since Oct. 1, may soon run out of money for the subsidies, Agriculture Secretary Clayton Yeutter said Tuesday.

During a speech at the Agriculture Department's annual outlook conference, Yeutter emphasized the department's efforts to boost U.S. exports despite large crops worldwide and low market prices in the United States and abroad.

''We have a lot of (subsidy offers) out now. ... We intend to continue to do that, but it's a highly competitive situtation,'' Yeutter said. ''We will very likely exhaust our (Export Enhancement Program) budget in a relatively short time this year.''

If that happens, Yeutter said, the administration would discuss with Congress what to do about funding.

Since the fiscal year opened Oct. 1, the department has spent $112 million out of the $425 million appropriated for the EEP, the major U.S. export subsidy program, a Foreign Agricultural Service official said.

The new five-year farm policy law, expected to be signed this week by President Bush, would allow the government to spend at least $500 million this fiscal year on the EEP.

Under the EEP, which was created in 1985, exporters are given bonus amounts of government-held surplus commodities if they lower their prices to make a sale to a targeted country.

#90331u1086 11/27/1990 ~United Press International

LONDON (NOV. 27) UPI - Conservative members of Parliament voted Tuesday for a new party leader and head the British government in a time-honored process.

Voters elect their MPs directly, and the leader of the majority party is then asked by the queen to form a government.

When the prime minister loses the confidence of her party, as Margaret Thatcher did, members may demand a leadership contest. Only MPs who are in the majority party are allowed to vote for their party leader.

When the new leader is chosen, he or she is summoned to Buckingham Palace to meet with the queen and formalize the transfer of power of the premiership.

The British government and its institutions are a product of slow evolution over centuries, and may seem quirky to Americans who have an almost mythical faith in their written constitution with its efficient and democratic checks and balances.

The British system relies on unwritten rules and understanding between the houses of Commons and Lords, the political parties and the royal family. The codes of behavior work most of the time to produce a government by consensus.

The head of state for the United Kingdom of Great Britain and Northern Ireland is officially Queen Elizabeth II. The queen calls on the ruling party to form a government and must assent to all the acts of Parliament, much in the way a U.S. president can veto a congressional bill.

In practice, the prerogative is mostly ceremonial. History has reduced the monarch's powers - the queen acts on advice of her government ministers that she cannot ignore.

Parliament itself is divided into two branches, the House of Lords and the

House of Commons, the roots of the U.S. Senate and House of Representatives, respectively.

The House of Lords, comprised of hereditary titleholders, honorary titleholders and religious leaders, has 1,187 members, about 300 of whom regularly attend its sessions.

The House of Commons has 650 members from constituencies in England, Wales, Scotland and Northern Ireland.

Bills become law much as in the United States, by being approved by both houses. The House of Lords, however, is required to approve all bills having to do with finance that already have been passed by the Commons.

In practice, there has been a two-party system in Britain for the past 150 years, with seven general elections won by the Conservatives and six by Labor since 1945.

#90331u1098 11/27/1990 ~United Press International

VIENNA (NOV. 27) UPI - An international team conducting a routine inspection of Iraq's nuclear facilities found no evidence that Baghdad is trying to build nuclear weapons, according to a report released Tuesday.

The inspection last week by the Vienna-based International Atomic Energy Agency turned up no evidence of changes in the use of nuclear facilities and radioactive materials known to be held by Iraq, the IAEA report said.

The three-sentence statement, released at Baghdad's request, said the ''status of nuclear material under safeguards in Iraq'' was unchanged since the last routine inspection in April 1990.

''At that time the conclusion was reached that all nuclear material under safeguards was accounted for,'' the report said.

Full details of the investigation are kept secret under IAEA regulations.

Western governments and the United States in particular were hoping the investigation would shed light on Iraqi leader Saddam Hussein's nuclear ambitions.

Despite Iraqi denials, a number of intelligence experts have concluded that Baghdad is intent on developing nuclear weapons as well as ballistic missiles that could accurately deliver the devices.

The purpose of the IAEA visit was to inspect the remains of Iraq's sole Osirak nuclear plant, which was destroyed in a 1981 Israeli bombing raid. In the

wreckage of the reactor building are fuel rods containing about 25 pounds of enriched uranium, enough for a small nuclear weapon.

The investigators also toured a nuclear fuel processing laboratory and storage sites to ensure that radioactive materials there were being used only for peaceful purposes, IAEA officials said.

#90331u1099 11/27/1990 ~United Press International

NEW YORK (NOV. 27) UPI - The New York Daily News charged Tuesday that ''intimidation and threats'' by striking union employees have scared away its largest advertisers - including Alexander's department stores, a $9 million-a-year ad account.

Alexander's announced Monday that it had no plans to continue advertising in the News ''at this time,'' adding that it was making an ongoing evaluation of all media.

News spokesman John Sloan refused to verify Alexander's withdrawal, commenting ''Due to the pattern of intimidation and threats against our advertisers, we are not going to confirm or deny any specific advertisers either leaving or staying in the News.

''We consider this continued intimidation and these threats grounds for criminal conspiracy charges, and when these issues are resolved and the strike concluded, any advertisers that have temporarily left the paper will come quickly back to the News.''

Alexander's completed the withdrawl of the News' ''big three'' advertisers, all department store chains. Macy's and A&S stores, both of which spent at least $6 million on News ads annually, stopped advertising last week.

Most small advertisers also have withdrawn, leaving the News with only 40 of its 615 pre-strike advertisers, according to striking ad employees at the News York Newspaper Guild strike headquarters.

''The paper had gross revenues of $420 million last year and 75 percent of that came from ads,'' a Guild spokesman said. ''If the News doesn't negotiate an end to this strike soon, it will be forced to close down.''

About 2,500 members of the Guild and eight unions represented by the Allied Printing Trades Council walked off their jobs at the News Oct. 25 after 10 months of fruitless contract negotiations. Since then there have been sporadic talks between union negotiators and managment with federal mediators in attendance.

''Right now there are no talks scheduled,'' said APTC spokesman Al Reiner.

''The News has made no attempt to get negotiations rolling although we have repeatedly said we were ready to resume talks anytime.''

Before the strike, The News, founded in 1919, was the largest- circulation local newspaper in New York. It is owned by the Tribune Co., the Chicago-based publishing, broadcasting and entertainment conglomerate.

#90331u1105 11/27/1990 ~United Press International

WASHINGTON (NOV. 27) UPI - The Supreme Court Tuesday ruled that federal law pre-empts most state regulations governing self-funded group insurance plans used by millions of American workers.

The court in effect said that uninsured employee benefit plans are not technically considered ''insurance companies'' for the purposes of state laws that regulate insurance, and thus are governed by the federal Employee Retirement Income Security Act of 1974.

The case involved an appeal by FMC Corp., a Delaware-based company that $perates a self-funded employee benefit plan, the FMC Salaried Health Care Plan. All funds used in the plan come directly from the company, which does not purchase insurance to provide the benefits.

Federal studies show the type of group health insurance plan used by FMC - self-funded rather than insured - cover more than 9.5 million Americans. In fact, a 1986 federal study showed more than half of all U.S. workers with health insurance belong to self-funded health funds.

In the case decided Tuesday, the court ruled that the 1974 federal law permits a company's self-funded health care plan, which has been obliged to pay hospital bills after an accident, to collect reimbursement from money the injured member received in a separate civil lawsuit.

The case involved 15-year-old Cynthia Holliday, seriously injured in a traffic accident on Jan. 16, 1987, in White Township, Pa.

Her father worked for FMC, and Cynthia was covered under the company's group health insurance plan. She suffered a skull fracture and permanent brain damage in the crash, and within a year of the accident hospital bills totaled more than $178,000.

FMC health care plan paid its share of the bills, but sought partial reimbursement from about $50,000 the Hollidays received in a settlement resulting from a suit against the negligent driver.

A district court and the 3rd U.S. Circuit Court of Appeals agreed that Pennsylvania state law makes it clear FMC was not entitled to reimbursement

from money obtained in the civil suit, despite a clause in the company's health plan that would seem to specifically permit it.

But the Supreme Court Tuesday, by a 7-1 vote, said ERISA, not state law, governs these types of cases. ERISA allows self-funded plans to enforce such subrogation clauses to collect reimbursement.

Justice John Paul Stevens dissented from the opinion, and Justice David Souter who was not yet on the bench when the case was argued Oct. 2, took no part in the decision.

The majority opinion, written by Justice Sandra Day O'Connor, was based in large part on the ''deemer clause'' of ERISA, which states that a benefit plan shall not be ''deemed an insurance company'' for purposes of the insurance company exclusion clause.

The case sparked interest from a wide range of groups, including the Chamber of Commerce of the United States, which had urged the action taken by the court, noting that increased state regulation would be ''devastating to the employers that have chosen to self-insure their plans,'' and would ''ultimately result in diminished coverage for workers and their dependents.''

A coalition of labor unions also urged the court to overturn the 3rd Circuit decision, arguing that if companies were precluded from seeking such reimbursement, insurance costs for all workers would rise.

State and local government groups, however, including the National Conference of State Legislatures and the U.S. Conference of Mayors, had warned that reversing the ruling would ''oust the states of a large portion of their authority to regulate insurance'' and create ''wholly irrational distinctions'' in state law governing employees covered by insured health plans and those with self-funded plans.

In his dissent, Stevens said the court had forged a ''broad and illogical distinction'' between the two types of insurance coverage.
89-1048 FMC Corp., vs. Cynthia Ann Holliday

#90331u1110 11/27/1990 ~United Press International
(NOV. 27) UPI - Early results are expected in about an hour in the vote to determine the next prime minister of Britain. As balloting began in an oak-paneled committee room at Westminster Palace, three men were running for the position vacated by Margaret Thatcher. Her choice for the job is Chancellor of the Exchequer John Major, who's up against Conservative Michael Heseltine and Foreign Secretary Douglas Hurd.

Major has bristled at the implication he may be a puppet of the so- called

''Iron Lady.'' IN HIS WORDS- ''I am not running as 'son of Thatcher.'''

The Commerce Department says the U-S merchandise trade deficit rose to nearly 30-BILLION dollars during the third quarter. That's up from a revised deficit of about 23-BILLION in the second quarter. Petroleum imports increased three and one-half-BILLION dollars to 15- point-seven-BILLION, reflecting increases in prices and volume because of the Persian Gulf crisis. The gulf conflict added almost 10 dollars to the price of a barrel of oil between July and September. The increases in NON-petroleum products were mostly in automotive products from Canada and Mexico, and in consumer goods.

In related news, the New York-based Conference Board reports that consumer confidence edged down this month... following a similar drop in October. The private organization says its barometer of buyer confidence has fallen to what it calls ''rececession levels'' and is now only a bit above the figure recorded during the lowest point of the 1982 economic downturn. The board says Americans are less confident about current and future business conditions, and fewer of them are planning to buy homes or major appliances.

State Department officials have failed in efforts to keep some of the wives of U-S hostages held in Iraq from going to Baghdad to try to gain freedom for their husbands. There was a closed-door meeting in Houston last night with some of the hostage families, one of seven meetings around the country. Some of those present later said they disagree with Bush administration moves toward a possible military solution and instead favor negotiations. State Department officials say they canNOT guarantee the safety of any American going to Iraq.

Iran's official news agency says Tehran has sent home 479 Iraqi prisoners of war during the past week. Iran and Iraq resumed diplomatic ties last month, several weeks after Iraqi President Saddam Hussein made sweeping peace gestures which allowed him to move thousands of his troops from along Iran's border to Kuwait. Iran admits it still holds several thousand Iraqi P-O-W's taken during the eight-year Iran-Iraq war.

Denmark's parliamentary ombudsman has upheld the decision of a Danish hospital that denied the request of a lesbian couple for artificial insemination. The ruling found NO grounds for a complaint that the hospital was guilty of discrimination when it denied the request. There is NO written law in Denmark on the availability of artificial insemination but hospitals have their own guidelines, including one that a heterosexual couple must have lived together for at least three years before the procedure can be used.

#90331u1113 11/27/1990 ~United Press International

NEW YORK (NOV. 27) UPI - Three players and the New England Patriots were fined a total of $72,500 Tuesday by the National Football League as the

culmination of the Lisa Olson sexual-harassment case.

Tight end Zeke Mowatt, cited by Olson as the instigator of the Sept. 17 locker room incident, was fined $12,500, while wide receiver Michael Timpson and fullback Robert Perryman were fined $5,000 each. Perryman was released by the Patriots on Nov. 6 and now plays for the Dallas Cowboys.

The Patriots franchise was fined $25,000 and assessed an additional $25,000 penalty that will be used to defray the cost of preparing instructional materials for all NFL personnel, including players, on responsible dealings with the media.

NFL Commissioner Paul Tagliabue reached his decision following a review of a 60-page report submitted by special counsel Philip Heymann of Harvard Law School.

Heymann, formerly a prosecutor in the Watergate scandal, was appointed Oct. 1 to investigate Olson's allegations.

In a letter addressed to Patriots owner Victor Kiam, Tagliabue wrote: ''This entire episode was distasteful, unnecessary and damaging to the league and others. It included a mix of misconduct, insensitivity, misstatements and other inappropriate actions or inaction, all of which could and should have been avoided.''

Olson, a 26-year-old reporter for the Boston Herald, no longer covers the Patriots. She has been reassigned to cover the NBA Celtics and NHL Bruins.

#90331u1135 11/27/1990 ~United Press International

MOSCOW (NOV. 27) UPI - The Soviet Parliament gave preliminary approval Tuesday to a bill on referendums that appears to rule out popular votes on some of the most important issues in the country.

Although President Mikhail Gorbachev and other officials have recently responded to many problems by calling for referendums on such issues as secession from the union and land reform, the Soviet Union has never had such a vote or a mechanism for holding one.

The prohibition on referendums on public officials would appear to stymie Russian republic leader Boris Yeltsin's call for a plebiscite on Gorbachev's performance as Soviet president.

The law on referendums approved on first reading Tuesday in the central Supreme Soviet, or parliament, says referendums can be held on ''laws of the U.S.S.R. and most important matters of state life.''

But according to a report by the official Tass news agency, the bill would exclude a long list of important questions from those that can be decided by referendum, including ''the appointment and discharge of officials'' and ''change in the status and territorial integrity of subjects of the federation.''

The restrictions in the law appear to contradict Gorbachev's challenge to the Baltic republics and others that want to break from the Soviet Union to decide the issue by referendum. Gorbachev repeated that challenge Tuesday at a meeting of Russian legislators, even as the law was being considered in another building at the Kremlin.

The draft law on referendums will be submitted by the Supreme Soviet, the standing Parliament, to the larger Congress of People's Deputies for final approval at the Congress's session beginning Dec. 17.

Under the law only the Congress of Peoples's Deputies or the Supreme Soviet can call a referendum, although republics and citizens groups can request such a vote.

#90331u1146 11/27/1990 ~United Press International

BAMAKO, MALI (NOV. 27) UPI - Liberian rebels attending peace talks accused West African countries of bombing rebel positions in Liberia Tuesday in the first clash during a summit of regional leaders described as the strife-torn nation's last chance'' for peace.

However the discussions received a boost when the Ivorian president, Felix Houphouet-Boigny, arrived at Bamako airport with senior ministers, Malian state radio reported.

Tom Woweiyu, spokesman for the rebel National Patriotic Front of Liberia, said forces of the Economic Community of West African States bombed Cape Mount and Lofa counties in western Liberia while the first round of talks was going on Tuesday morning.

President Ali Saibou of Niger, one of 13 West African leaders attending the ECOWAS extraordinary summit held to discuss the Liberian crisis, said: ''Essentially this conference is the last chance.''

Woweiyu said ''while everybody is smiling in our faces our people are being killed. There's a chance for a whole lot of good things to happen at the talks and we are hoping to have a cease-fire during the talks.''

Woweiyu, who was speaking after the second meeting between the NPFL leader Charles Taylor and Presidents Joseph Momoh of Sierra Leone and Mousse Traore of Mali, indicated that the NPFL has no intention of abandoning the

extraordinary ECOWAS summit meeting despite continued bombing of NPFL positions by ECOWAS forces.

At least 7,000 people have died in the 11-month Liberian civil war.

Dr. Abbas Bundu, the secretary-general of ECOWAS, refused to comment on the accusation that the bombing had taken place. Woweiyu said he had radio contact with NPFL troops in Liberia who confirmed that they had been attacked.

The presidents of Sierra Leone and Mali met with Charles Taylor for three hours early Tuesday. They had hoped to make recommendations to the full heads of state meeting that was scheduled for Tuesday afternoon, but their talks did not produce substantive proposals and the full meeting was delayed.

Early Tuesday the president of Burkina Faso, Blaise Compaore, arrived in Bamako. Compaore has been the NPFL's main military backer in the region, acting as a conduit for Libyan weapons which have been transported for the past 11 months through the Ivory Coast.

Delegates of the Liberian interim government also arrived Tuesday morning. But Dr. Amos Sawyer, the interim president installed in the Liberian capital Monrovia Nov. 21, did not immediately show up.

Sources in Bamako said Sawyer had been prevented from attending the meeting due to Charles Taylor's claim that he himself is president of Liberia. The Sawyer interim government, which is protected by an ECOWAS force of 6,000 soldiers, heavy artillery and jet fighters from the Nigerian air force, does not recognize Taylor as president, but has allotted him the position of speaker in the interim administration.

Taylor, who controls over 80 percent of Liberia, has already appointed himself president with a capital in the central Liberian town of Gbarnga.

However, when he arrived in the Malian capital Monday, he was not given the ceremony normally accorded to heads of state, and was met by the Malian foreign minister and not the president.

Rebels loyal to rival renegade leader Prince Johnson tortured to death Liberian President Samuel Doe Sept. 9, ending a decade of cruel rule by the former master sergeant in the nation founded by freed U.S. slaves in 1847.

Until Doe staged a bloody takeover in 1980, the West African nation was ruled by descendants of its American founders.

-30- 3834

#90331u1154 11/27/1990 ~United Press International

WEST LAFAYETTE, Ind. (NOV. 27) UPI - Purdue's Gene Keady, named Tuesday to

coach the U.S. basketball team for the 1991 Pan American Games, thrives on the chance to restore American basketball to gold-medal status in world competition.

American losses at the 1987 Pan American Games, 1988 Olympics and this year's Goodwill Games and world championships have dropped the U.S. team behind the Yugoslavians and Soviets in international play. The squad Keady takes to Cuba next August will feel the pressure of those past defeats.

''There's no doubt we'll feel the heat,'' Keady said. ''The most pressure is what you put on yourself. International play has improved. The rest of the world has gotten better. We've had to play against older guys. Those aren't excuses. Those are just the facts.''

Keady, 54, coached the winning team in the 1979 National Sports Festival and guided a U.S. team to victory in the 1988 Jones Cup in Taiwan. The Larned, Kan., native was an assistant at Arkansas and spent two seasons coaching Western Kentucky before joining Purdue. Keady has a 216-94 record after a 1-1 start in his 11th season with the Boilermakers while his career record in just over 12 seasons is 254-113.

''This has to be without a doubt the biggest honor I've ever received, especially given the time we're at in international play,'' Keady said. ''I'm proud they would feel the confidence in me to go in there and get the job done. Hopefully we can win a gold medal. It's important to every coach in America and I'm proud to represent them.''

Keady's appointment must be approved by the U.S. Olympic Committee, but they have traditionally confirmed their selection committee's decision. Keady will choose three assistants from a list determined by U.S. amateur basketball officials.

''This is the second-greatest honor a coach can achieve, next to the Olympics '' Keady said. ''And with a pro coach set for the next Olympics, it may be the greatest honor a college coach can achieve. It's the culmination of a lot of years of experience.''

Professional players are eligible for the 1992 Olympic team but not for the next Pan Am Games in Havana. That will make the bonding process so crucial for U.S. teams a bit easier on Keady.

''Every year you learn more about (putting a team together),'' Keady said. ''In a situation where we're together over a long period of time, you have to have kids who get along and have good team chemistry and play unselfishly. A big thing to the selection committee will be having people who can hit from 3-point range.''

Keady expects a tryout camp in Colorado Springs, Colo., next April or early

May with final choices made at workouts in Colorado Springs or West Lafayette.

-30- 2942

#90331u1159 11/27/1990 ~United Press International

WASHINGTON (NOV. 27) UPI - American master photographer Paul Strand felt the best photographs come from the artist's soul and he must have been onto something for he produced many powerful and moving images during a long career.

''The decision as to when to photograph, the actual click of the shutter, is purely controlled from the outside, by the flow of life; but it also comes from the mind and heart of the artist,'' Strand once said. ''The photograph is his vision of the world and expresses, however subtly, his values and convictions.''

The full range of Strand's accomplishments has not been fully appreciated by the public but an upcoming exhibition may change that.

The National Gallery of Art previewed a collection Tuesday of about 150 Strand photographs that will go on public view Dec. 2 until Feb. 3, 1991.

''Paul Strand has produced some of the most compelling and significant photographs of this century,'' National Gallery of Art Director J. Carter Brown said in describing the exhibition. ''We look forward to expanding the public's knowledge of this exceptional American artist in the United States and abroad.''

It is the first major Strand retrospective in this country since a 1971 Philadelphia Museum of Art exhibition.

Strand was born in 1890 in New York City and published his first photograps in the periodical Camera Work in 1916 and 1917.

A pioneer, Strand took close-up photographs and cut his subjects off from their surroundings. He also experimented with candid photography by taking pictures of people without their being aware of it.

During the 1920s, Strand photographed machine parts and made studies of plants always seeking to reveal the inner beauty of simple things.

During the 1930s and 1940s, Strand examined the relationships between people, objects and their environment in his photographs of New Mexico and Mexico.

Strand moved to France in the early 1950s and for the next 20 years he tried to show ''stories of human victories, however small, in the struggle for social health and well-being.''

Old and in ill health, his last photographs were taken in his garden at his

home in Orgeval, France. Strand was still searching for fresh pictures and trying to take another ''expedition into the unknown.''

He died in 1976.

-30- 2507

#90331u1166 11/27/1990 ~United Press International

PRETORIA, South Africa (NOV. 27) UPI - President Frederik de Klerk and black leader Nelson Mandela affirmed their commitment Tuesday to power-sharing negotiations to end South Africa's racial conflict but expressed concern over recent developments that have threatened the peace process.

A joint statement issued at the end of a two-hour meeting said the two men agreed to meet again ''from time to time in the coming weeks and months'' to personally deal with a series of issues endangering their racial reform efforts.

''Having reaffirmed their commitment to and faith in the peaceful negotiation process, they expressed their concern about developments threatening this process,'' the statement said without elaborating on specific issues or when the nation's two most powerful men would again meet.

It was about the ninth time the two men have met privately since de Klerk ordered Mandela's release from 27 years imprisonment in February at the start of a sweeping racial reform program that included a proposal for formal negotiations with black leaders on a post-apartheid constitution.

The two leaders acknowledged the ''value of personal contact'' and suggested an even closer working relationship was developing in an effort to breathe new life into a process that many observers believe has lost the momentum it developed with Mandela's release and the unbanning of the African National Congress.

In recent months, the reform process has come under increasing strain as the ANC and de Klerk's white minority government have disagreed sharply over the interpretations of agreements reached at two major meetings in May and August and the behavior of the South African security forces.

When Mandela arrived at the main government Union Buildings complex on a hilltop overlooking Pretoria Tuesday afternoon, he told reporters he expected a ''very sensitive'' meeting with de Klerk. When he emerged, he described the mood as ''very cordial as useful'' and said the two- hour session had been ''productive.''

Among a number of sensitive public issues is the ANC's decision in August to suspend its 29-year guerrilla war against white rule in exchange for further reforms, an agreement that seemed to clear the path to formal power-sharing

negotiations.

-30- 2491
#90331u1177 11/27/1990 ~United Press International
LONDON (NOV. 27) UPI - Stock prices closed slightly higher in cautious trading on the London International Stock Exchange Tuesday, but political uncertainty within the Conservative Party kept professional investors sidelined.

Share prices again fell sharply on the Frankfurt Stock Exchange. Volume was moderate.

In London, the blue-chip Financial Times 100-stock index, which fell 18.6 points Monday, closed up 7.6 points to 2,159.5. The narrower top 30 industrial average added 1.1 points to 1,699.7.

Volume amounted to around an estimated 378 million shares, up from 346 million traded Monday.

Traders said the market was taking a breather after recording substantial gains last week.

Most major investors remained to the sidelines as Tory ministers of Parliament prepared to vote Tuesday on selecting a new head of the ruling Conservative Party. The three contenders - Chancellor of the Exchequer John Major, Michael Heseltine and Foreign Secretary Douglas Hurd - each expressed optimism that he would win.

As party chief, the victor will become the next prime minister of Britain, succeeding Margaret Thatcher.

She has said she favors Major, whose camp said it had at least 160 votes - 27 fewer than needed for victory. If none of the three garners 187 votes, a runoff ballot will be held Thursday.

Heseltine, a former defense secretary whose challenge led to Thatcher's resignation, said he had more but declined to give a figure. Hurd's supporters predicted he would post a close second and win in a runoff.

If all of their figures were to be believed, the total far exceeds the 372 members of parliament who will be voting, analysts noted.

Analysts said investors were encouraged by the New York Stock Exchange's recovery late Monday, and stocks opened stronger with the Financial Times 100 Index up more than 14 points around midday.

But the prospect that no clear winner would emerge from the Conservative

leadership vote added uncertainty toward the close of the London session.

The Persian Gulf crisis was another factor restraining investor enthusiasm, analysts said.

On the corporate news front, drink concern Allied Lyons reported its latest earnings rose 10 percent. However, the shares fell 28 cents to $9.17 after the company said its tax charge could be as high as 32 percent for the year.

Thorn EMI fell 19 cents to $12.14 after a local brokerage house told clients to sell in the wake of Matsushita's $6.13 billion takeover of MCA.

The Japanese electronics giant is paying far less than expected for MCA, putting a different complexion on the likely value of Thorn's music business, analysts explained.

A fresh hike in crude oil prices boosted London & Scottish Marine Oil 27 cents to $8.32.

In Germany, stock prices on the Frankfurt Stock Exchange closed sharply lower in moderate trading. The closely watched German Stock Index, which plummented 40.36 points Monday, fell another 27.90 points to 1,415.26.

Traders said stocks fell as a confluence of negative news in the market led buyers to keep a low profile and encouraged sellers to mark down stocks.

-30- 3355

#90331u1188 11/27/1990 ~United Press International

MOSCOW (NOV. 27) UPI - Soviet President Mikhail Gorbachev warned the Russian Federation Tuesday that the secession threatened by republic President Boris Yeltsin would destroy both the republic and the Soviet Union.

Gorbachev made the remarks at an extraordinary congress of deputies from the Russian Federation at which he launched his campaign to persuade the nation's 15 republics to sign a treaty that would reconstitute the country into a ''Union of Sovereign Soviet Republics.''

''There will be no union without Russia, nor will Russia be able to exist without the union,'' Gorbachev said.

But under prodding by Yeltsin, the congress refused even to put the treaty on the agenda but did agreed to exchange views on the principles for such an accord.

Despite its vast size, covering three quarters of the country and with half of its population, the Russian Federation must surrender its resources to the central industrial ministeries who dispose of them and return nominal profits

to the republic.

Even the prestige of Yeltsin has not been able to break the central government's control of Russia's oil, coal, natural gas and timber reserves - which spurs the republic's desire for economic and political autonomy.

Gorbachev, however, told the legislators a fair division of wealth would be creation of ''a union of sovereign states in which each people will have rights and feel confident, and, in addition will remain together.''

He called opponents of the treaty ''bawlers'' and dared them to put their convictions to the test by holding a referendum.

''Even those who are at the helm of power are afraid of holding a referendum '' he said.

As he challenged the federation to hold a plebiscite about Russia's status, Gorbachev's own Parliament, the Supreme Soviet, gave preliminary approval to a bill on conducting referendums that rules out a popular vote on changing borders and the appointment and sacking of officials.

Calls for referendums have resounded in the Russian and national parliaments this winter, with Gorbachev suggesting votes on land ownership and secession and Yeltsin demanding one on an assessment of Gorbachev's presidency.

While Gorbachev mocked Yeltsin for ''demagogic'' calls for referendums, Yeltsin struck back by noting that the nation is now appealing for food from abroad.

Gorbachev, the author of a 10-year food program while in charge of agriculture under Leonid Brezhnev, sat and listened to the onslaught.

''In the last decades we have made more than a few attempts to feed ourselves, worked out grandiose plans, promising bounty to the society, but none of them were fulfilled,'' Yeltsin said.

''Our country has reached the outer limits when the problem of food takes precedence over all others, whose delay threatens the rebirth of Russia,'' Yeltsin said.

As part of Yeltsin's attempts to untie the bonds that have submerged Russia within the Soviet socialist union, the Congress opened to the strains of a newRussian national anthem and discussions about a new constitution for the republic.

Gorbachev, who has vowed a political battle to keep the Soviet Union together, mocked the recent declarations of sovereignty by 14 of the 15 republics as a ''a parade of sovereignty'' declarations.

He also asked for an end to a ''war of laws'' in which republics have repeatedly declared Soviet laws subordinate to their own legislation.

WASHINGTON (NOV. 27) UPI - A decline in sales of previously owned single-family homes created buyer's markets in several areas of the country last month, the National Association of Realtors said Tuesday.

Sales of existing homes fell 4.7 percent in October from the month before to an annual rate of 3.02 million homes. This resale pace was 13.5 percent below year-ago levels, the association said. For the year, resales are expected to total 3.33 million units, down 4.1 percent from 1989.

The national median price for an existing single-family home fell in October to $92,800, down 1.7 percent from September but up 0.4 percent from the year-earlier median.

Harley Rouda, the association's president, said sellers appear to be adjusting their prices in a bid to crack a psychological barrier that has been erected in part by the general malaise sweeping the nation's economy and the threat of war in the Middle East.

"Consumers who are wondering whether to buy now should ignore the gloomy headlines and focus on their own housing situation - what they need, want and can afford," Rouda said.

The sales slowdown comes amid a relative stable period for mortgage rates, which have remained in a tightly confined track for the past several months. Rouda said mortgages remain plentiful despites the tightening of credit to commercial real estate developers in several regions.

"Favorable rates and willing sellers mean excellent opportunities for buyers," Rouda said. "Those who decide to wait for lower prices risk missing out." The month-to-month decline in median price does not mean houses are losing their value, Rouda said.

"Homes generally don't appreciate overnight. Monthly price increases are not reality and should not be taken for granted," he said, noting that October's median price was 23.4 percent higher than that of October 1985.

Declines in resale activity were posted throughout the nation and all regions but the West reported lower median prices. In the West, resales declined 5.8 percent to an annual rate of 490,000 units from September and were 19.7 percent below the year-ago rate. The median price of $140,000 was 4.4 percent higher than September's median and 0.2 percent higher than year-ago prices.

In the Northeast, the resale pace was 470,000 units, down 9.6 percent from September and 23.0 percent below year-ago levels. The region's median price slipped to $136,200, down 0.7 percent from September and 4.9 percent below year-earlier levels.

Resales in the South slipped 2.4 percent in September to an annual rate of 1.23 million units, down 5.4 percent from year-earlier levels. The region's median price was $83,400, down 2.9 percent from September and 0.2 percent from year-earlier figures.

The Midwest posted a resale rate of 820,000 units, down 5.7 percent from September and 15.5 percent below year-earlier levels. Midwestern homes carried a median price of $72,100, down 2.8 percent from September but up 0.7 percent from year-earlier levels.

HOUSTON (NOV. 27) UPI - Anadarko Petroleum Corp. announced Tuesday its wholly-owned subsidiary, Anadarko Algeria Corp., has signed a contract with an Algerian drilling contractor to drill the first well of a multi-well program. The contract is with Entreprise Nationale des Travaux aux Puits. Plans call for the drilling to start in May 1991.

The agreement with ENTP is Anadarko's latest step in its ten-year joint venture with Sonatrach to find and develop crude oil reserves in the Algerian Sahara Desert.

"The contract with ENTP is significant in that it represents the results of competitive bidding and the commitment of a national public sector company to seek new deals with foreign competitors under new and more wide-open commercial and hydrocarbon regulations," said Robert J. Allison Jr., Anadarko chairman and chief executive officer.

Anadarko Algeria teamed up with Sonatrach under a production-sharing agreement signed by the two companies in October 1989, and opened its subsidiary headquarters office in Algiers in July 1990. In September 1990, Anadarko Algeria began full-scale operations of a seismic processing center 25 miles east of Algiers.

Earlier this month, Western Geophysical, under contract to Anadarko Algeria, started acquiring at least 500 kilometers of seismic in the first phase of a multi-year program in Anadarko's four contract blocks located in the Ghadames and Illizi Basins of southeastern Algeria.

The exploration license in Algeria covers an area of 5.1 million acres in the Grand Erg Oriental of the Sahara Desert. Anadarko Algeria is joined by one

partner, LASMO Oil (Algeria) Ltd., which holds a 25 percent interest in the project. Negotiations are under way with a second prospective partner.

#90331u1222 11/27/1990 ~United Press International

Monterrey, Mexico (NOV. 27) UPI - Hailing a new era of cooperation, President Bush and Mexican President Carlos Salinas de Gortar sought to move quickly Tuesday to reach a landmark free trade agreement between their two nations.

Bush and Salinas, wrapping up a two-day summit, pressed ahead on trade talks in the second of a pair of one-on-one meetings and also conferred with American and Mexican businessmen on their joint desire to lift tariffs and quotas.

Formal negotiations on the treaty are to begin next year and the White House has expressed hope that they can have a treaty in place by 1992.

The U.S. Chamber of Commerce predicts that such a pact could double within 10 years the now annual $52 billion in trade between the North American neighbors.

But the AFL-CIO, along with some members of Congress, charged that such a free trade accord, with Mexico's rock-bottom wages, could lead to lost jobs and reduced wages in the United States.

The administration has attempted to maintain that those fears are unfounded and Tuesday Bush asked Mexican and American business leaders for help in winning approval for a free trade agreement.

Bush pointed out that he vetoed a recent textile bill as protectionism and said, ''This president will continue to veto protectionist legislation.''

Bush said, ''Negotiation for the free trade agreement is not going to be easy'' but he expressed hope it would succeed, saying, ''The most important step we can take together ... is the conclusion of free trade.''

Earlier, in an address to citizens of Monterrey in the City Theater, Bush drew applause when he said, ''Free trade is good for the United States and good for Mexico, good for American workers and good for the workers of Mexico.''

''As two of the world's largest economies, we must insist that all our trading partners act in a spirit of fairness and openness,'' Bush said in the Mexican industrial metropolis often likened to Detroit.

''We know all too well that trade-distorting subsidies and artificial barriers create winners and losers before the game even begins,'' he said. ''We must insist that trade with the nations of Europe, Asia and elsewhere, at the very least, be conducted on a level playing field.''

Bush said that a Bilateral Free Trade Agreement will allow the United States and Mexico ''to expand markets.''

''It will allow us to expand opportunity,'' he said, adding that when such an accord is reached by 1992, both countries will be able to produce goods and services ''that are world-class, competitive.'' Furthermore, he said, it will be good for American and Mexican workers.

''I look forward to the day when we will meet to sign our names to a free trade agreement that will write a new page in North American history,'' he said.

Bush praised Mexico for increasing its contribution to the world oil market at a time of heavy stress and thanked the Mexican people ''for your world leadership.''

During his two-day visit to Mexico, his first as president, Bush and Salinas also discussed a variety of other topics, ranging from the war on drugs and efforts to reduce border violence to the protection of the environment and the Persian Gulf.

But the focus has clearly been on trade and efforts to foster U.S.- Mexican relations, which have been strained in the past.

Bush told an estimated 250,000 people at Monterrey's Macro Plaza Monday night that relations between the two nations ''have never been better'' and called for a new era of cooperation.

#90331u1224 11/27/1990 ~United Press International

ORLANDO, FL (NOV. 27) UPI - The average price of gasoline nationwide edged up up by 0.7 cents to $1.366 a gallon during the past week, after dipping briefly before Thanksgiving, the American Automobile Association said Tuesday.

Prices are expected to rise further, perhaps as early as this weekend, because of a five-cent-a-gallon hike in the federal gasoline tax, AAA said. Fuel costs during the past week rose in New England, the Great Lakes region and the West, but declined slightly in other regions, AAA said.

A week ago, AAA reported that the average price for regular gasoline sold at self-service pumps had fallen by 2.6 cents a gallon. AAA said the rise in price last week means regular gasoline is now 29.1 cents more expensive than on Aug. 1, the day before Iraq seized Kuwait.

AAA also said motorists may see prices climb again over the weekend, if retailers begin to pass along the hike in the federal excise tax on gasoline.

The additional tax of five cents a gallon, which was approved by Congress and President Bush as part of a deficit reduction plan, takes effect Saturday. The tax will boost the current federal excise levy to 14 cents a gallon.

Also this week, AAA said the average self-serve price for mid-grade gasoline rose 0.8 cent to $1.453 a gallon, while the average price for premium fuel rose 0.7 cent to $1.537.

#90331u1232 11/27/1990 ~United Press International

JERUSALEM (NOV. 27) UPI - Five Israeli soldiers and two guerrillas were killed in southern Lebanon in the latest in a series of fatal attacks along Israel's borders this month, the army announced Tuesday.

Israeli leaders suggested Islamic fundamentalists, spurred on by the Iraqi invasion of Kuwait, and Syria's expanding influence in Lebanon may have sparked the rise in violence on the country's borders with Lebanon, Jordan and Egypt.

Israeli military officials differed on whether a higher state of tension had occurred in Israel's self-declared ''security zone'' in Lebanon. In less than a week, an Israeli navy patrol boat destroyed a guerrilla boat off the Lebanese coast and a female suicide bomber wounded two Israeli soldiers in the security zone.

Hours after late Monday's confrontation, Israeli airplanes bombarded bases in Lebanon belonging to two Palestinian guerrilla groups, the Abu Nidal organization and Naif Hawatme's Democratic Front for the Liberation of Palestine.

In the raid on the Abu Nidal base in Sharhabil, two were killed and three wounded, medical sources said. The DFLP said three died and two were injured in the raid on their position in the village of Baisour.

The Israeli army described the air raids early Tuesday as representing ''another link in the continuing effort to strike at terrorists' targets in southern Lebanon.''

''I do not think that the (security zone) sector is heating up,'' said Maj. Gen. Yossi Peled, commander of the Northern Command. ''The action is every day because we do not have a day or a night without incidents in the security zone. ... Today we paid. We paid big and heavy.''

The guerrillas involved in the confrontation late Monday in the buffer zone were from George Habash's Popular Front for the Liberation of Palestine and were on their way toward Israel, an army spokesman. The air raids were north of the security zone, which Israel established in 1985.

The deaths bring to 11 Israeli soldiers and one Israeli civilian who have been killed along Israel's borders during November. On Sunday, four Israelis were killed and more than 20 wounded when an Egyptian gunman crossed the border and opened fire on passing vehicles.

Two soldiers also were killed early in November in separate infiltration attempts along the Jordanian border.

During Monday's clash, one soldier also was wounded during while two guerrillas escaped, one who apparently was wounded, the army spokesman said.

The Israeli army unit along the northwestern slopes of the security zone noticed the four guerrillas about 11 p.m. advancing toward Israeli territory. The soldiers opened fire and ''charged toward the terrorist cell,'' the army spokesman said.

The close-range gunfire and grenade explosions killed five soldiers and two guerrillas, the spokesman said. Along with weapons, the guerrillas were armed with explosive materials.

''The area of confrontation is known as an infiltration axis of terrorist cells toward Israel,'' the spokesman said. On Nov. 20, an Israeli officer and four guerrillas were killed in the same area but slightly north of the security zone.

Defense Minister Moshe Arens said he believed the increase in the ''intensitivity in activities'' in southern Lebanon might stem from Syria finding ''encouragement'' from its enhanced relations with the United States.

Right-wing Science and Technology Minister Yuval Ne'eman went further and said the United States had ''most certainly endangered'' Israel by its changed relations with Damascus. Ties between Syria and the United States have improved since Damascus the U.S.-led coalition against Iraq.

#90331u1249 11/27/1990 ~United Press International

CAPE CANAVERAL, Fla. (UPI) - The repaired shuttle Columbia, grounded since May by crippling hydrogen fuel leaks, was cleared Tuesday for a fifth predawn launch try Sunday to begin a 10-day astronomy mission.

After reviewing the status of launch processing, NASA managers said Columbia was finally ready for takeoff on the 38th shuttle mission at 1:28 a.m. EST Sunday.

At the controls will be commander Vance Brand, 59, and co-pilot Guy Gardner, 42. Their crewmates are John ''Mike'' Lounge, 44, Robert Parker, 53, Jeffrey Hoffman, 46, and civilian astronomers Ronald Parise, 39, and Samuel Durrance, 46.

If all goes well, Columbia's countdown will begin at 1 a.m. Thursday with the shuttle's crew scheduled to fly to the Kennedy Space Center from Houston late that night for final preparations. The mission is scheduled to end Dec. 11 with a landing at Edwards Air Force Base, Calif., at 8:25 p.m. PST.

The goal of the long-delayed flight, the sixth of 1990 and the 13th since the 1986 Challenger disaster, is to study the most violent objects in the universe with a $150 million battery of telescopes sensitive to X-rays and ultraviolet light that cannot penetrate Earth's atmosphere.

Data from the mission should help astronomers later gain insights into the nature of quasars, as-yet-unseen black holes, supernovae, interstellar gas and dust, stellar evolution and other critical questions in modern astronomy.

Columbia originally was scheduled for blastoff May 30, but the ship was grounded the night before during fuel loading when sensors detected explosive hydrogen gas building up in the shuttle's engine room.

A subsequent fueling test led engineers to believe the problem involved Columbia's 17-inch ''disconnect'' fitting, a massive fuel line coupling that allows the shuttle's external tank to be jettisoned in space.

The grounded orbiter then was hauled back to its hangar for repairs. Engineers later found damaged seals inside the disconnect fitting that appeared to explain the leak.

Columbia's half of the fitting was replaced with one from the new shuttle Endeavour and the tank half was replaced with one that performed particularly well in previous leak tests.

In the meantime, NASA proceeded with plans to launch the shuttle Atlantis in mid July on a secret military mission, but yet another leak was found.

With Atlantis back in its hangar for repairs, the presumably leak- free

shuttle Columbia was hauled back out to launch pad 39A for a Sept. 1 launch try. After a delay because of problems with an on-board telescope, engineers once again began pumping fuel aboard Sept. 5 for a Sept. 6 launch try.

And once again, a hydrogen leak appeared. But the leak was isolated to the shuttle's engine compartment - the disconnect fitting worked properly - and NASA managers decided to attempt a quick fix.

Three suspect fuel pumps were replaced and then, a damaged seal in a fuel line valve leading to one of Columbia's main engines. The shuttle was rescheduled for a fourth launch attempt on Sept. 18, but the leak, while smaller, had not been eliminated and the launch try was canceled the night before liftoff.

Engineers then replaced yet another damaged fuel valve seal and tightened up virtually every fitting and connector in the shuttle's engine room. The work apparently paid off and Columbia finally passed a fueling test last month without showing any signs of leakage.

Columbia, NASA's oldest shuttle will be making its 10th flight and at 59, Brand, veteran of three previous space missions, will become the oldest person to fly in space.

Along with accomplishing the primary goal of the mission, the shuttle fliers also plan to teach an astronomy lesson from space that will be beamed into middle school classrooms back on Earth.

#90331u1274 11/27/1990 ~United Press International

DEARBORN, MI (NOV. 27) UPI - Ford Motor Co. said Tuesday its Parts and Service Division has signed an agreement with American Telephone & Telegraph Co. to speed up customer calls at Ford and Lincoln-Mercury dealers.

Through an equipment arrangement with AT&T, Ford's Rotunda Equipment Program is offering its 5,500 dealerships nationwide an array of automated voice systems, including automated service messaging, automated attendant and voice mail.

By entering a pre-arranged code number on the telephone keypad, each customer will receive a recorded message that his or her vehicle is ready to be picked up and that the work did not exceed the estimated price.

Or they may get a message that additional work is required. The system will then direct the customer to a service adviser, who can explain what is involved in the repair.

"The service messaging system is designed to reduce telephone backlogs and free service advisors to help customers in the service area," Joe Ogden,

Rotunda manager.

The system is now in use at about 84 Ford and Lincoln-Mercury dealers, company spokesman Jim Trainor said. The cost of the system ranges from $15,000 to $130,000, depending on dealer size and the amount of equipment to be installed he said.

Dealers will be expected to pay for the system, with no financial participation from Ford other than the reduced price negotiated with AT&T under the agreement.

#90331u1279 11/27/1990 ~United Press International

WASHINGTON (NOV. 27) UPI - The former chief federal savings and loan regulator told a Senate panel Tuesday he felt "awkward and pressured" during a 1987 meeting with four of the so-called Keating Five senators, but "personal dignity" prevented him from protesting his treatment.

During the sixth day of hearings before the ethics committee, Edwin Gray, chairman of the Federal Home Loan Bank Board from May 1983 until June 1987, also sought to compare the senators' actions to rape, but was rebuffed by a lawyer representing one of the accused lawmakers.

The panel is trying to determine whether Sens. Alan Cranston, D- Calif., Dennis DeConcini, D-Ariz., John Glenn, D-Ohio, John McCain, R-Ariz., and Donald Riegle, D-Mich., exerted improper pressure on bank regulators to benefit indicted former S&L operator Charles Keating Jr., who donated $1.3 million to the senators' re-election campaigns and other favorite causes.

Gray attended a one-hour late afternoon meeting with Cranston, DeConcini, Glenn and McCain on April 2, 1987, in DeConcini's Capitol Hill office. Gray said he was instructed not to bring aides with him to the session and none of the senators brought aides.

Asked by committee special counsel Robert Bennett if he felt intimidated at the meeting, Gray paused, then said: "Yes, I felt awkward and pressured. The whole setting was an intimidating one under these circumstances because I had never had a meeting like this before."

He added, "There were only five there, five principals, myself and four United States senators - no one else to hear, no one else to know what was said. I recognized that immediately."

Bennett pressed Gray on why he did not put an end to the meeting or at least raise an objection. "I had a certain amount of personal dignity," Gray said. Gray also said he "needed their votes desperately" on legislation to help bolster the failing Federal Savings and Loan Insurance Corp., while adding he

lacked the "temperment of a whistleblower."

Gray also said none of the efforts made by the five senators altered the way he or his staff handled a probe of Keating's Irvine, Calif., Lincoln Savings and Loan, whose 1989 failure is the largest collapse of the S&L scandal, costing taxpayers some $2 billion. "We did not succumb to that pressure," Gray testified. "We did not. No, nothing was speeded up; nothing was slowed down."

Gray said DeConcini offered him a deal on Keating's behalf at the meeting that involved withdrawing a federal regulation limiting risky direct investments by thrifts in exchange for having Lincoln make more home loans. "I considered it improper," Gray said of the DeConcini offer. None of the senators was present while Gray testified.

Gray drew the ire of Bennett and Cranston's lawyer, William Taylor, when he apparently sought to draw an analogy between the senators' actions and an attempted rapist or murderer.

"Let me just say this: someone who attempts to shoot someone, if you miss the target, it doesn't mean, or if you attempt to rape someone and you don't succeed - ," Gray said when interrupted by Bennett. Gray continued, "Well, I'm just saying if that happens, then it only - ," before Taylor objected. Gray did not finish his comment.

Gray is a crucial witness in the case against the five senators. The April 2, 1987, meeting and one on April 9, 1987, held by all five senators with other bank regulators.

In his opening statement Monday, Gray, without mentioning names, said Keating used "paid apologists" to do his work regarding regulatory matters. On the other hand, some lawmakers have accused Gray and other regulators of seeking to use the five senators as scapegoats for the S&L crisis, hiding their own failings during one of the largest financial scandals in the nation's history.

Gray told the committee that Keating, now facing racketeering charges in California, sought to remove him as a regulatory roadblock with a lucrative job offer in 1985, which Gray, through an assistant, rejected. But asked if he was "out to get" Keating, Gray said, "No."

About Riegle, the only one who did not attend the April 2 meeting, Gray said he was "shocked" to learn that Riegle attended the April 9 meeting, only to learn later Keating was a major contributor to the senator. He said he had regarded Riegle, now the Banking Committee chairman, as a "very friendly and understanding" ally who had offered "a shoulder to cry on."

Gray said he later sent Riegle detailed notes from the April 9 meeting, which Riegle attended, as a "senatorial courtesy" to "put him on notice that there was a record of that meeting."

#90331u1288 11/27/1990 ~United Press International

(NOV. 27) UPI - There will be a third Conservative Party vote in a bid to determine the next primer minister of Britain. Chancellor John Major won a second- round ballot today... but fell two votes short of the amount needed to immediately claim the position vacated by Margaret Thatcher. Major got 185 votes today, Michael Heseltine was in second place with 131, and Foreign Secretary Douglas Hurd was third with 56 votes. Heseltine congratulated Major and urged that the party make the chancellor the next prime minister. That will be determined by a third Conservative Party vote now set for Thursday.

Margaret Thatcher may be down and out as Britain's first woman prime minister but she will continue attending parlimentary sessions as the representative for a north London constituency. Thatcher has made NO official statement on her future, although British newspapers are offering their own suggestions and predictions. One is that she eventually will write of her experiences, a tale that could fetch up to 10-Million dollars from a publisher.

Soviet President Gorbachev joined Foreign Minister Eduard Shevardnadze for meetings today with visiting Saudi Foreign Minister Saud al Faisal. The session comes just one day after Gorbachev met with Iraq's Foreign Minister Tariq Aziz and bluntly told him that time was running out for Iraq to get out of Kuwait. And Deputy Soviet Foreign Minister Vladimir Petrovsky is on his way to Iran with a message from Gorbachev on the crisis. Petrovsky has spent much of the past month shuttling around the Mideast as a special envoy.

President Bush and Mexican President Salinas wound up two days of trade meetings with a fancy state luncheon in Monterrey, an industrial city often compared with Detroit. Bush told the meeting that the United States and Mexico must be careful about what he terms ''trade-distorting subsidies and artificial barriers'' that create winners and losers ''before the game even begins.'' The two countries are working toward a trade agreement to be signed in 1992.

Both Bush and Salinas touched on the Persian Gulf in their remarks. Bush says Mexico and the United States ''stand united in rejecting aggression.'' And Salinas denounced Saddam Hussein's takeover of Kuwait.

The F-B-I says an 18-year-old Detroit woman allegedly kidnapped during the weekend has been found safe and UNharmed at a hotel in Las Vegas. But there is still NO word on the alleged kidnappers, identified as 33-year-old David House and 26-year-old Kenneth Studabaker. They had been driving the 1990 blue Toyota Tercel owned by Jamie Lee, kidnapped Saturday night along with two teen-age girls near Mount Clemens, Michigan, but are believed to be scouting around for another escape vehicle. Lee's two friends were released Sunday morning in Chicago.

The strike-bound New York Daily News confirms it has lost the six-Million-dollars a year advertising account from Alexander's department stores, the last of the so-called ''Big Three'' accounts at the newspaper. Macy's and the A-and-S Store chain stopped advertising in the Daily News last week and most small advertisers have also withdrawn, leaving the paper with just 40 of its 615 pre-strike accounts. The Daily News says the advertisers are being scared away by what it calls ''intimidation and threats'' by strikers.

#90331u1296 11/27/1990 ~United Press International

PROVIDENCE, RI (NOV. 27) UPI - The state of Rhode Island has secured a warrant for the arrest of Joseph Mollicone Jr., the missing president of a small, financially beleaguered bank that is missing $13 million, the top state prosecutor said Tuesday.

Attorney General James O'Neil said the warrant was issued Monday night by District Court Judge Francis Darigan, and charges Mollicone, 47, of Providence with embezzlement.

Mollicone has been missing since Nov. 8, and a grand jury investigation has begun into $13 million in apparently fraudulent loans that were made at his bank, Heritage Loan and Investment Co. of Providence.

O'Neil declined comment on whether investigators have any clues as to where Mollicone is. He said the warrant was obtained to assure Mollicone's appearance in court in the event he does turn up.

Trouble at Heritage came to light earlier this month when its private insurer, the Rhode Island Share and Deposit Indemnity Corp., announced that it had seized control of the bank.

The announcement started a run on deposits, and Gov. Edward D. DiPrete responded by closing the bank's doors. It is uncertain when Heritage will reopen.

The loans, 128 of them, were made out to relatives, friends and close business associates of Mollicone, but dozens of the purported recipients said they never signed for them nor received any money. Among the recipients listed on the bogus loans were Mollicone's father-in-law and the mayor-elect of the city Vincent A. Cianci Jr.

In an article published in the Providence Sunday Journal, most associates of Mollicone were at a loss to explain the bank president's disappearance or alleged embezzlement.

But one, food service business owner Anthony Verdi of East Greenwich, R.I.,

told the newspaper that over the last few years Mollicone "got wrapped up with being another Donald Trump ... at the time when Donald Trump was someone to aspire to being."

#90331u1300 11/27/1990 ~United Press International

MOSCOW (NOV. 27) UPI - President Mikhail Gorbachev Tuesday gave Soviet soldiers the right to open fire if they are attacked by armed groups and vowed ''we will maintain order.''

Gorbachev told the independent Interfax news agency he would not stand by while republics shut off fuel and water to the army as Latvia ordered last week.

Soviet soldiers this month have also come under growing harassment in the Baltic republic of Lithuania, where protesters gathered at their garrison and rampaged through an officers club.

''I consider it necessary to respond with weapons if army detachements come under organized armed attack,'' Gorabachev said. ''This (such armed attacks) is not democracy, it is lawlessness, and we are going to maintain order.''

During operations in Armenia and Azerbaijan the last two years, many soldiers were wounded when they claimed - some in bedside television interviews - that they withheld their fire rather than shoot at civilians.

Soviet generals have explained to newsmen that they are hesitant to open fire because of great criticism the army took when 21 civilians were killed in Tbilisi, Georgia, in April 1989 and 83 Azerbaijanis died in the army's entrance into Baku in January 1990 after pogroms there against Armenians.

At least 6,000 soldiers and Interior Ministry troops have been keeping order for the last two years in the disputed Nagorno Karabakh enclave of Azerbaijan, and troops have been sent to halt ethnic conflicts in numerous other hot spots.

Top commanders have labeled the unwillingness to act without specific orders ''the Tbilisi syndrome.''

Gorbachev also instructed Defense Minister Dmitri Yazov to speak on Soviet television Tuesday about the growing denigration and slighting of the army.

''In order to stop the denigration of the army and members of their families, I have given the orders to take all necessary measures within the limits of the constitution, the laws of the country and the decrees of the president,'' Yazov said on the official Vremya television news show.

''In the case of the use of violence and armed attacks against servicemen, military sites and arms depots, soldiers have been given orders to use their weapons,'' he said.

''In the case of illegal actions against garrisons and army towns, such as switching off electricity, water and so on, the commanders of the military regions and the Navy have been orderd to take over the infrastructure.''

Yazov also ordered soldiers to prevent descecration of military cemeteries and monuments to Soviet soldiers, such as have occurred in the Ukraine and Estonia.

The Soviet marshal also said he instructed soldiers to pull down any monuments erected to guerrillas who fought against the Soviet army in the 1940s.

''The armed forces of the Soviet Union,'' Yazov concluded, ''have been, are and will remain the flesh and blood of the people. Their only task is to serve the people.

''They were, are and will be loyal to the cause of perestroika, which is being fulfilled by the president of the Soviet Union.''

As nationalist and secessionist movements have mushroomed with the greater freedom of perestroika, the army has often been sent to non- Russian republics to keep order.

#90331u1321 11/27/1990 ~United Press International

CHICAGO (NOV. 27) UPI - A late rally in soybean oil futures carried over to soybeans Tuesday on the Chicago Board of Trade.

Aggressive professional buying sent soyoil to session highs during the closing minutes before gains were trimmed by profit-taking. The market was supported by reports of active trading of soybean oil in Brazil.

Soybeans were mostly higher and were at or near session highs at the final bell. Hopes of near-term sales of soybean meal to the Soviet Union contributed to the strength in soybeans and limited losses in meal futures.

Corn and wheat were pressured by follow-through selling and liquidation before the first notice day Friday for the December contracts.

Jordan was in the market for 100,000 tons of wheat under the export bonus program and Ecuador reportedly bought a similar quantity, otherwise the export markets were quiet.

Oats rallied and were moderately higher after making contract lows early in the day.

Indications the Soviets may not be offered export credits in the immediate future weighed on prices across the floor. Agriculture Secretary Clayton Yeutter reiterated Tuesday that any such credits would be contingent on reforms of the Soviet emigration policy.

However, Yeutter said the USDA will continue to use the export bonus program aggressively.

Country movement was light and basis levels were steady to firm.

At the close, corn was off 1/2 to 2 1/4, soybeans up 5 3/4 to off 1/2, wheat unchanged to down 2 3/4 and oats up 1 to 2 3/4.

#90331u1328 11/27/1990 ~United Press International

UNITED NATIONS (NOV. 27) UPI - Exiled Kuwaitis accused Iraq Tuesday of systematically destroying their country and they asked the United Nations to take custody of Kuwait's civil records for future litigation against Iraq.

A delegation of seven Kuwaiti refugees told a U.N. Security Council session that Iraqi soldiers acted like ''pirates'' and ''primitive people'' since they invaded the small emirate Aug. 2.

But the testimony was almost derailed by protests from four non- aligned members who charged that the president of the council, U.S. Ambassador Thomas Pickering, delayed a vote on a resolution dealing with the situation in the Israeli-occupied territories.

The resolution, introduced by Cuba, Yemen, Malaysia and Colombia three weeks ago, called for the stationing of a U.N. commissioner and a peace force in the West Bank and Gaza Strip to protect Palestinians living there.

The call for U.N. protection for Palestinians stemmed from non- aligned and Arab countries's repeated charges of human rights violations by Israel.

The non-aligned countries complained that Pickering gave priority of discussions to the Persian Gulf situation and delayed U.N. action in the

territories following the Oct. 8 Temple Mount riots in which at least 19 Palestinians were killed by Jerusalem police. Those countries asked for an immediate vote on their resolution.

The United States voted twice with the council to condemn the killings in Jerusalem and the Israeli rejection of a U.N. inquiry into the riots.

Pickering's presidency ends Friday and Yemen's U.N. ambassador, Abdalla Saleh Al-Ashtal, will take over for December. The council's 15 member states take turns presiding at the U.N. political body on a monthly basis.

While debating the question of Iraqi atrocities and the Palestinian situation, the council's members continued private consultations on a resolution setting a deadline for Iraq to get out of Kuwait before possible military action is taken against it.

In the testimony against alleged Iraqi atrocities, Kuwaiti U.N. Ambassador Mohammad Abulhassan said Iraq embarked on ''very anomalistic'' actions against Kuwaitis including ''unjustifiable killings, displacement, violation of sanctities and rape, torture, humiliation of people's dignity, intimidation of innocent residents and organized pillagings.''

Abulhassan said the destruction brought back the ''era of pirates and primitive ages.''

Videotapes and pictures of victims of Iraqi ''barbaric acts'' were shown to the council.

Abulhassan said civil records of the Kuwaiti government stored in magnetic computer discs had been discreetly shipped to New York City and asked that Secretary-General Javier Perez de Cuellar take charge of them as a ''legal and official'' proof to be used against Iraq once Kuwait is freed from Iraqi occupation.

The council has planned to take a vote Wednesday on a draft resolution condemning Iraqi attempts to ''alter the demographic composition of the Kuwaitis'' and demanding that the United Nations take custody of the records.

A member of the Kuwaiti delegation, Dr. Essa Ibrahim, said Iraq has appropriated 95 percent of medical supplies that Kuwait had prior to the Aug. 2 invasion.

Ibrahim said Iraqi troops acted in a ''sick and sadistic'' mentality when they ordered patients to leave hospitals and removed newborn babies from incubators.

The doctor said he witnessed the burial of 14 babies taken from incubators and 40 epileptic children who died for a lack of care.

#90331u1330 11/27/1990 ~United Press International

ALBANY, N.Y. (NOV. 27) UPI - New York's highest court Tuesday cleared the way for Senate Democratic Minority Leader Manfred Ohrenstein to be prosecuted for hiring ''no-show'' workers.

But it dismissed hundreds of theft and fraud charges against him for paying 1986 campaign workers out of state funds in an unsuccessful bid to win control of the 61-member Senate.

In a 6-1 decision, the Court of Appeals said no law or regulation prohibited paying campaign workers from the state payroll.

But all seven judges agreed it is wrong to put people on the state payroll to do no work at all.

Manhattan District Attorney Robert Morgenthau Tuesday vowed ''to proceed with the prosecution ... as promptly as possible.'' Morgenthau alleges Ohrenstein and two of his colleagues hired four ''no-show'' workers between 1981 and 1986. Ohrenstein's lawyer, however, says the four worked part-time.

If convicted, Ohrenstein and the others would be the first New York state legislators held accountable for hiring ''no-show'' workers. In three previous cases, charges either were not brought or were dismissed against the lawmakers involved.

Ohrenstein, his top aide, two other senators and a former senator were indicted by a Manhattan Grand Jury in 1987 on 665 counts of theft, fraud and larceny.

Most of the charges related to paying campaign workers with state funds. Those are the charges which have now been dismissed.

In addition, all charges against one of the senators, Ralph Quattrociocchi, D-Rochester, were previously dismissed by a lower court.

Tuesday's ruling comes just three weeks after Ohrenstein won re- election and as he battles a challenge from a Brooklyn senator to his leadership position.

#90331u1337 11/27/1990 ~United Press International

MIAMI (NOV. 27) UPI - Two postal employees and a nationwide pen and pencil manufacturer have agreed to enter guilty pleas for their part in a $7.5 million mail fraud scheme, federal authorities said Tuesday.

''This is the largest case of its kind for the Postal Service in its history '' U.S. Attorney Dexter Lehtinen told a news conference.

Since 1981, Atlas Pen & Pencil Corp., a Hollywood firm that makes pens, pencils, golf tees and other items on which names or customized messages are printed, has mailed its goods in bulk for about half of the required postage, said Robert Grudek, Inspector in Charge of the Miami Divison of the U.S. Postal Service.

''The postal employees received a payment in return for simply undercounting or overlooking false postal forms that listed the wrong amount of mail,'' Lehtinen said.

He said the two postal workers allowed Atlas to mail as many as 2 million pieces of mail a month at cut-rate prices. In return for their cooperation, the postal workers received payments ranging from $100 to $400 a month, Lehtinen said.

Together, the pair accepted in excess of $100,000, which they have agreed to turn over to the U.S. government, from Atlas and other companies, Grudek said.

Richard Waesco, a 15-year postal service worker, and Ronnie Ragins, a 12-year post office employee, were charged with one count of conspiracy to defraud the U.S. Postal Service and one count of bribery for accepting cash in return for permitting the underpayment. Both worked for the Postal Service in Hollywood.

They each face a maximum penalty of 20 years in prison and a $500,000 fine. Both men have agreed to enter guilty pleas, Lehtinen said.

Atlas, a family-owned company, and its vice-president and director Robert

Schneider were each charged in a one count indictment with conspiracy to defraud.

Lehtinen said Atlas has agreed to pay back the $7.5 million in back postage, but still faces $15 million in fines. Schneider faces a maximum penalty of 5 years in prison.

Schneider expressed surprise Tuesday that the details of the charges had been revealed as did his attorney, David Bogenschutz of Hollywood.

''There exists and will continue to exist real cooperation on the part of Atlas and Bob Schneider. This unprecedented cooperation has existed since the matter became known to the federal government and efforts began to ferret out perpetrators within the system, federal employees,'' Bogenschutz said.

''I do not know why the U.S. Attorney would choose to do this (announce the uncovering of the scheme) before the matter is in a more crystallized form.''

Grudek said investigators were not sure who initiated the fraud scheme, but Waesco and Ragins also accepted about $8,500 in cash between April 1986 and June 1990 from another bulk mailer, Daniel Hyde of G&G Hyde, for not requiring payment of $18,552 in postage due.

Daniel Hyde, who has already paid back the postage, faces a maximum penalty of two years in prison and a $250,000 fine.

Ragins also reportedly accepted $7,000 from Larry Van Dusseldorp, an employee of Van Dee Mailing Services, between March and April 1990 for not requiring payment of $17,000 in postage. Dusseldorp also faces a maximum penalty of two years in prison and a fine of up to $250,000.

Grudek said the six-month investigation is continuing into the activities of three other companies in the Broward County area who also mail in bulk.

In addition, two postal service clerks and three supervisors at the Hollywood post office will undergo disciplinary action for sloppy work performance for not detecting the illegal activity, he said.

#90331u1340 11/27/1990 ~United Press International

WASHINGTON (NOV. 27) UPI - U.S. farmers, expected to post a record $49 billion in net income this year, will see near-record income in 1991, thanks to larger production that will offset higher costs, the government forecast Tuesday.

During the first day of their annual outlook conference, Agriculture Department analysts forecast a slight increase in crop acreage next year, due

in part to the greater freedom farmers would have under the new farm policy law.

Agriculture Secretary Clayton Yeutter said President Bush was expected to sign the law Wednesday. It would allow farmers to alter their mix of crops on up to 25 percent of their wheat, feed grain, cotton and rice land without jeopardizing future eligibility for subsidies.

"Soybeans, other oilseeds and cotton are expected to effectively compete for this flexible acreage with wheat, feed grains and rice," said James Donald, chairman of the department's World Agricultural Outlook Board.

As keynote speaker, Yeutter said the international market represented the best chance for larger sales and higher profits for U.S. farmers. "We need to provide for a healthy American agriculture based on the international marketplace, based on demand, not based on massive federal subsidies," Yeutter said.

Despite that, Yeutter was pessimistic about the world trade reform talks due to conclude next week. If they fail, he said, the United States would "reappraise our policy structure" with an eye to maintaining U.S. market share.

Richard McCormack, undersecretary of state, joined Yeutter in calling for freer trade. It "would be a catastrophe" for the world to splinter into rival trading blocs, he said.

In response to a question, Yeutter said he interpreted voter rejection of the so-called Big Green initiative in California and environmental initiatives in other states as a sign voter believe the "pendulum has swung too far ... that balance is essential in this area."

Donald said the larger production engendered by larger crop acreage, along with an anticipated increase in meat and dairy output, should mean larger receipts for farmers.

"This outlook points to a year of near-record incomes for U.S. farmers," Donald said in prepared remarks. "Cash receipts will rise with larger marketings and higher prices for a few commodities. "At the same time, production expenses will increase, importantly reflecting higher prices for energy-related inputs."

The department forecast net cash farm income of $55 billion-$60 billion dollars, slightly below the record $59 billion expected this year. Net farm income was estimated at $44 billion-$49 billion, compared with the record $49 billion projected for this year.

At the retail level, food prices were estimated to rise two percent-five percent in 1991, a moderate level. Food price inflation was 5.8 percent in

1989 and will measure about six percent this year.

Farmers devoted 342 million acres to the major U.S. crops this year and idled about 60 million acres, including 34 million acres in the long-term Conservation Reserve.

Wheat acreage and production is projected to drop substantially in 1991 in response to low market prices and the larger land set aside required for eligibility for farm program benefits. The set aside next year is 15 percent, compared with five percent this year.

"U.S. corn production will likely increase in 1991," Donald said, thanks to strong demand that is expected to reduce the size of the U.S. stockpile by next fall.

Government economists have projected an expansion in soybean acreage as a result of the planting flexibility and marketing loan provisions in the new farm law.

Donald said cotton acreage might expand in the coming year if the governent lowers the land setaside requirement. Domestic demand for cotton is high this year, despite a 22 percent gain in production to 14.9 million bales.

Farmers reaped 7.93 billion bushels of corn, 2.74 billion bushels of wheat and 1.9 billion bushels of soybeans this year. Meat production is forecast to rise by three percent in 1991 to a record 64.25 billion pounds. Milk production this year is projected at 148 billion pounds with an increase of one percent-two percent forecast for 1991.

Market prices for milk in early 1991 are projected to be nearly $3 per 100 pounds of milk lower than one year earlier, Donald said, and "prices will continue to be down for the rest of the year."

#90331u1362 11/27/1990 ~United Press International

WASHINGTON (NOV. 27) UPI - Oliver North won another legal battle Tuesday when a federal appeals court turned down a request by independent prosecutor Lawrence Walsh that it reinstate North's three Iran-Contra convictions.

In a 21-page decision, the U.S. Court of Appeals for the District of Columbia Circuit denied Walsh's request but rewrote part of its previous decision to concede that North's jury may have been given confusing instructions.

The decision is a blow for Walsh and may jeopardize the conviction of another Iran-Contra defendant, former national security adviser John Poindexter.

Walsh released a statement Tuesday saying an appeal to the Supreme Court is likely.

North, a retired Marine lieutenant colonel and former National Security Council staff member, was convicted May 4, 1989, of three criminal charges stemming from his involvement in an elaborate scheme to sell arms to Iran and funnel the profits to Nicaraguan Contra rebels at a time when such aid was banned by Congress.

North was found guilty on one count each of obstructing Congress, destroying government documents and receiving an illegal gift in the form of a security system for his home.

But on July 20, the U.S. Circuit Court of Appeals in Washington voted 2-1 to throw out North's conviction for destroying government documents on grounds that the trial judge, U.S. District Judge Gerhard Gesell, had given faulty instructions to the jury.

The panel also set aside North's convictions for obstructing Congress and accepting the gratuity pending a lower court review of whether North's immunized testimony before Congress in 1987 hurt his chances for a fair trial.

On Sept. 4, Walsh asked the appeals panel to reconsider its decision.

Responding to Walsh's request Tuesday, the appeals court declined to grant a rehearing, sticking with its earlier position that Gesell should have held a pretrial hearing to resolve the question of North's televised appearance before Congress and its affect on his trial.

''When all is said and done,'' the court wrote, ''the district judge denied the defendant a hearing to which the Constitution entitled him.''

But on North's overturned conviction for destroying government documents, the appeals court took the unusual step of rewriting parts of its earlier decision while still keeping it in effect.

The new opinion agreed with Walsh's assertions that the North jury may have been confused when Gesell erroneously said jurors must agree unanimously on which documents were destroyed.

''Upon reviewing the petition, the response of North, and the instructions of the district court to the jury, we conclude that this point is well taken,'' the court wrote.

However, the court said the instructions as a whole were not confusing enough to merit a rehearing of the case.

Responding to the court's decision, Walsh said it was likely that he would take the case to the Supreme Court.

''We appreciate the extended consideration that was given to our petition for a hearing,'' Walsh said in a statement. ''We're studying the opinions, and in all probability will petition for certiorari because of the importance of the question involved.''

Walsh has 90 days to appeal the decision to the high court.

At the conclusion of his trial May 4, 1989, North was found not guilty of two other counts of obstructing Congress, three counts of making false statements to Congress and one count each of obstructing a presidential inquiry, making a false statements to a presidential inquiry, cashing for personal use traveler's checks drawn on government funds, and conspiring to defraud the Internal Revenue Service.

Four other charges - including two that were considered the heart of the government's case, defrauding the United States and theft of government property - had been dismissed earlier by Gesell.

North became the first defendant in the Iran-Contra affair to be convicted in a criminal trial. On July 6, Gesell fined North $150,000 but declined to send him to prison, instead giving him a three-year suspended sentence, placing him on probation for two years and ordering him to perform 1,200 hours of community service at an anti-drug program for inner-city youths in Washington.

The Iran-Contra scandal, which surfaced just before Reagan was re- elected in 1984, cast a shadow over his second term and eventually ensnared several of his closest aides, including Attorney General Ed Meese and national security adviser Robert McFarlane as well as Poindexter.

INGLEWOOD, CA (NOV. 27) UPI - The Hollywood Park race track may be placed on the sales block under a proposal announced Tuesday by its management company, which has been the target of a threatened takeover.

Hollywood Park Operating Co. made its proposal in a letter to the track's owner, Hollywood Park Realty Enterprises, which owns both the track and 347 acres surrounding it in Inglewood.

The company did not suggest a price for the property, located near the Great Western Forum, home to the Los Angeles Lakers basketball team and the Los Angeles Kings hockey team.

Hollywood Park Operating said it made the proposal "to assure stockholders the opportunity to receive the maximum possible value for their shares." The move

comes as Hollywood Park Operating faces a proxy fight from shareholder R.D. Hubbard, who holds nearly ten percent of its shares and is seeking to seize control of the track.

Hubbard, who owns race tracks in Kansas and New Mexico and is chairman of Dallas-based glassmaker AFG Industries, has called for the resignation of Marjorie Everett, chairman and chief executive officer of Hollywood Park Operating.

The operating and realty companies have managed to turn around their operations this year after posting more than $25 million of losses during the previous three years.

For the first nine months of 1990, the companies earned $4.7 million, with revenues from simulcasting of races helping to improve performance. The losses stemmed from a disastrous attempt to expand into real estate development by buying the Los Alamitos race track in Cypress.

Hollywood Park bought that track in 1984 for $58 million and took on a large amount of debt to finance the deal. It sold Los Alamitos in late 1989 for $71 million.

Hubbard announced last week that he had been named to the Hollywood Park Realty board and had dropped a lawsuit against that company. The lawsuit sought a ruling that a proxy fight would not activate the companies' "poison pill" plan. But he promised he would press ahead with the proxy fight against Hollywood Park Operating.

At the time the settlment was announced, Hollywood Park Operating said the agreement would have no effect on its operations, since the companies are run independently of one another.

Steven Stern, a spokesman for Hubbard, said the investor, who is out of the country, would have no comment on the move to put the race track up for sale. Other investors have previously tried to force Everett to step down, claiming her management has led to a decline in the track's attendance and negligence of the facility.

Analysts say Hollywood Park is generally not as attractive as the two other race tracks in the region: industry leader Santa Anita in Arcadia and Del Mar, located just north of San Diego. The three tracks do not operate at the same time. Warren Williamson, chairman of Hollywood Park Realty, was not immediately available for comment.

FAIRFIELD, CT (NOV. 27) UPI - General Electric Co. Tuesday confirmed it plans to give up its $6.9 million-a-year management contract at a Florida plant that makes triggers for nuclear weapons.

The Department of Energy, which oversees the contract at the Pinellas plant in Largo, had changed certain conditions of the agreement and thus would have imposed "new liabilities that GE found unacceptable," said Ford Slater, a GE spokesman.

The DOE said it wants contractors running government plants to assume responsibility for environmental liability at the facilities. In the past, the

government has borne such responsibilities.

The department said the estimated 1,600 employees at the Pinellas plant likely will continue to work there for a new operator which would take over when GE quits the facility by May 31, 1992.

"We don't expect any disruption with the workforce," said Deborah K. Smith, a spokeswoman for the DOE. Under terms of the existing contract, GE had to provide 18 months notice it would not continue, GE said.

Smith said the DOE had not yet found a replacement for GE and is currently examining its options, including having one of the five other companies that operate nuclear facilities around the country for the government.

Meanwhile, General Electric denied a claim by a Boston-based anti-nuclear pressure group, Infact, that the decision was the first step toward its withdrawal from all nuclear weapons production.

"This was a business decision related (solely) to the Pinellas contract," Slater said. He said the company had no plan for reducing its involvement in other nuclear-related activities, despite a boycott organized by Infact.

He cited the Knolls Atomic Power Laboratory in Niskayuna, N.Y., where the company designs and develops nuclear power plants for ships. The $6.9 million management fee "is not consequential for a $54 billion company," Slater said.

#90331u1392 11/27/1990 ~United Press International

(NOV. 27) UPI - Britain has its youngest prime minister of the century. Chancellor of the Exchequer John Major won a second round of voting by the Conservative Party today... and succeeded Margaret Thatcher as prime minister. Major fell two votes shy of the 187 needed for a bona fide majority, but electioneers canceled a third vote that had been set for Thursday when Major's opponents dropped out of the running. Although he was Thatcher's first choice when she resigned, Major tried to put some distance between them as he campaigned by saying he was NOT running as ''Son of Thatcher.''

Major's closest challenger, Michael Heseltine congratulated Major after the vote. The rebel who forced Thatcher's downfall, Heseltine received 131 votes and Foreign Secretary Douglas Hurd won 56.

The U-S Navy today announced that the aircraft carriers Theodore Roosevelt and America will ship out from Norfolk, Virginia, just after Christmas to support Operation Desert Shield in the Persian Gulf. The deployment could send up to 15-thousand more U-S military personnel to the gulf.

Soviet President Gorbachev today issued an order giving his troops the right

to open fire if they are attacked by armed groups. Soviet soldiers have come under pressure in the Baltic republics of Latvia and Lithuania this month, where they are taunted as occupiers of those regions.

The American Automobile Association says the average national cost of a gallon of gasoline rose by a fraction of a penny during the past week. The Triple-A puts the average price for self-serve regular at one-dollar and 36-point-6 cents a gallon. But prices could rise more steeply and soon. A new federal excise tax takes effect Saturday and it remains to be seen how retailers will pass along the five-cent-a-gallon increase.

The American Civil Liberties Union of Illinois filed suit in Washington, D-C, today, accusing the F-B-I of spying on people who were part of the J. Roderick MacArthur Foundation. It was was founded 14 years ago to grant money to other charitable organizations in the areas of human rights, civil liberties and social justice.

South African President Frederik de Klerk and black leader Nelson Mandela today affirmed their commitment to higher-profile power-sharing negotiations as a means to end the country's racial conflict. The pair say they'll meet agin in the coming weeks and months.

Dignitaries by the score were gathered in all of their finery to officially dedicate a new suspension bridge 180 miles east of Mexico City yesterday when the bridge collapsed. At least 15 people, including one town mayor and a deputy state attorney general, were injured when they fell some 10 feet onto the river bank or into the river itself. NONE of the injuries was serious.

N-F-L Commissioner Paul Tagliabue today levied fines totalling more than 72-thousand dollars against three players and the New England Patriots team. the fines stem from the sexual harassment of a woman sportswriter in the team's locker room in September.

BATON ROUGE, La. (NOV. 27) UPI - Curley Hallman, who has led Southern Mississippi to two bowl games in the last three years, was named Tuesday to become the new football coach at Louisiana State.

Hallman replaces Mike Archer who announced his resignation 12 days ago after the Tigers posted their second consecutive losing season. Archer made the announcement with two games left on LSU's schedule, but followed broadcast reports he would be fired after the final game of the season.

LSU Athletic Director Joe Dean and other school officials denied they had plans to fire Archer, who led the Tigers to records of 4-7 and 5-6 in the last two seasons. However, a head-hunting company had been hired by LSU about two months ago to compile a list of possible successors.

Hallman, 23-11 in three years at USM, will receive a five-year contract with a base salary of $85,000 per year, Dean said. Hallman's selection is pending the

formality of approval by the LSU Board of Supervisors, which is expected Friday.

Southern Mississippi went 8-3 this season, including defeats of Southeastern Conference teams Alabama and Auburn, and will play Dec. 29 in the All-American Bowl in Birmingham.

Under Hallman, the Golden Eagles finished 10-2 in 1988, including a 38-18 defeat of Texas-El Paso in the Independence Bowl. His 1989 squad finished 5-6, but handed a 30-26 defeat to a Florida State squad that wound up being ranked second in the nation.

''If you work hard enough for long enough, you will be successful,'' Hallman said, outlining his coaching philosophy of hard work and discipline.

Hallman has 23 years of coaching experience and has been on the staff of two national championship teams - Alabama in 1973 and Clemson in 1981.

He was an All-Southwest Conference defensive back at Texas A&M and began his coaching career at that school, working with defensive backs and freshmen.

He spent two seasons coaching at Stark High School in Orange, Texas, before moving to Alabama in 1973 as defensive secondary coach. In four years at Alabama, Hallman also coached quarterbacks, running backs and served as junior varsity coach.

Hallman left Alabama to coach running backs at Memphis State, taking on the added duties of coordinating special teams. He joined the Clemson staff for two years, including the 1981 national championship team.

In 1982, Hallman returned to Texas A&M as as defensive secondary coach and held that job until he became head coach at Southern Mississippi.

#90331u1460 11/27/1990 ~United Press International
DETROIT (NOV. 27) UPI - The nation's automakers posted Tuesday a combined 14.9 percent rise in sales of domestically made vehicles during mid-November, with analysts saying fleet deliveries and comparisons with lackluster year-ago levels made the gains look better.

Sales of domestically built cars alone during the Nov. 11-20 period rose 18 percent from a year ago when measured by sales per day. Light truck sales rose 10.1 percent.

The annual sales rate for domestically built cars, the most common measure of industry performance, was a strong 7.3 million cars during the period, compared with a weak 6.0 million last year.

"This flies in the face of a string of fairly dire economic reports during the last few months," said analyst Jack Kirnan, of Kidder, Peabody in New York.

"Clearly it has got to be continued strength in the fleet business."

"The evidence is overwhelming for continued fleet sales, which have spilled over from October," said Michael Luckey, of The Luckey Consulting Group in East Tappan, N.J.

"Dealers are cutting back on orders because individual buyers are not there, and there are numerous production cutbacks slated for December," he said. "Yet inventories are not really out of hand."

While retail vehicle sales were poor in the East, that weakness was partially offset by continued strength in the Midwest and Southwest because of a good manufacturing base, Kirnan said, noting those regions account for almost 40 percent of the market.

Some of the strength may also be coming from replacement pressure on individual buyers, Kirnan noted. "There were a record number of cars sold between 1984 and 1986," he said. "Those vehicles are aging, paid off, and good candidates for replacement."

So far there has been only a minimal shift toward smaller, more fuel-efficient cars due to higher gasoline prices from the Kuwait invasion Aug. 2, analysts say.

But the light truck market has clearly slowed despite recent gains, mostly in the full-sized pickup and van market that depends on the weakened construction industry.

The nine companies - General Motors Corp., Ford Motor Co., Chrysler Corp., American Honda Motor Co., Nissan Motor Manufacturing U.S.A., Toyota Motor Sales U.S.A., Mazda Motor Manufacturing (USA) Corp., Mitsubishi Motor Sales of America, Inc. and Subaru-Isuzu Automotive Inc. (SIA) - posted combined sales of 176,310 cars and 108,859 trucks during the latest ten-day period. This compares with 149,381 cars and 98,878 trucks sold in the year-ago period.

The daily selling rate of 35,646 vehicles compares with 31,032 vehicles a day for the same period last year. There were eight selling days in the latest period this year, vs. eight last year.

So far in 1990, the firms have sold nearly 6.25 million cars, down 3.2 percent from the almost 6.44 million units sold in the comparable 1989 period. Light truck sales totaled nearly 3.63 million units, down three percent from the 3.73 million trucks sold during the same period a year ago.

-30- 3252

#90331u1461 11/27/1990 ~United Press International

LONDON (NOV. 27) UPI - Chancellor John Major, who was groomed by Margaret

Thatcher to succeed her, Tuesday was elected the youngest prime minister of Britain in more than 150 years.

Thatcher, prime minister for 11 1/2 years, is to formally tender her resignation to Queen Elizabeth II at Buckingham Palace at 9:40 a.m. Wednesday, and minutes later Major will become the 20th prime minister this century.

Although Major fell two votes short of the 187 he needed to win outright on a second-round ballot of Conservative members of Parliament, his two oppponents conceded defeat and urged that he be made party leader and prime minister.

Renegade MP Michael Heseltine, who dealt the blow that led to Thatcher's resignation, received 131 votes and Foreign Secretary Douglas Hurd got 56 to Major's 185.

MP Cranley Onslow, vice chairman of the committee that oversaw the election, cancelled a third-round ballot scheduled for Thursday to determine a final winner.

Major, accompanied by his wife Norma, appeared briefly on Downing Street to claim victory.

''It is a very exciting thing to be a leader of the Conservative Party, and particularly exciting to follow one of the most remarkable leaders the Conservative Party has ever had,'' he said.

''Our job now is quite clear. We are going to unite, unite totally and absolutely and go on to win the next election.''

He also praised the woman who handpicked him as her successor in the early 1980s because he was not afraid to stand up to her and she saw him as ''a true man of the people.'' ''Margaret Thatcher will be seen as a very great prime minister indeed,'' Major said.

Thatcher, the longest ruling prime minister this century, said she was ''thrilled'' by Major's election, according to a close aide. Forced out by her own party, she celebrated with him at his neighboring home at 11 Downing Street.

MP Marcus Fox said said Major's win put the Conservatives back on track for a fourth consecutive general election victory after a month of recriminations against Thatcher.

''A week ago I thought our party had committed suicide. This result has brought me back to believing we can really win the next general election. I always believed John Major could do it,'' Fox said.

Major's yearlong tenure as chancellor of the exchequer, a post equivalent to

secretary of the Treasury in the United States, distinguished himself as a candidate in a country where elections are often turn on the health of the domestic economy. Last month he cut interest rates and took the pound into a European exchange-rate mechanism, a feat his predecessors failed to achieve in the face of objections from Thatcher.

Major is the youngest prime minister since Robert Peel became leader in 1834 at age 46. Harold Wilson was 48 when he led the Labor Party to victory in 1964. The youngest ever was William Pitt who was elected in 1783 when he was 24.

Major, who supported Thatcher until she tearfully bowed to pressure to resign, capitalized on his humble beginnings in a contest of reverse snobbery. His six-day campaign emphasized his self-made success and he said his goal as prime minister would be to create a ''classless society.''

While Hurd attended Cambridge and Heseltine went to Oxford, Major, the son of a trapeze artist with Barnum & Bailey circus, left school at 16. He grew up with four siblings in Brixton, a working-class section of London, and collected unemployment for nine months before becoming a gofer on a construction site.

Major finally got a job in banking and worked his way to the top of the profession. He served on the Lambeth Borough Council from 1968 to 1971. He was elected to Parliament in Huntingdon in 1979, and held a variety of low-level posts until being named chief aide to then- Chancellor Nigel Lawson in 1987. After three-month stint as foreign secretary, he succeeded Lawson when he resigned abruptly in October 1989.

Heseltine and Hurd conceded defeat within minutes of the announcement of the election results at Westminster Palace.

''My purpose is to ensure that unity is achieved so that we win a fourth term '' said Heseltine, 57. ''I congratulate John Major.''

Hurd, 60, who finished in last place with 15 percent of the votes, said, ''There's no bitterness in my disappointment because I think everyone's agreed and I certainly feel it has been a very good fight.''

Hurd said Major's election would unify the party.

''I know that he will be an excellent prime minister and he will have my full and unreserved support,'' Hurd said.

The Conservatives' standing in the polls soared after Thatcher announced she would resign Thursday. Heseltine challenged her 15-year tenure as party leader on a ballot last Tuesday. He fell short of beating her outright but inflicted irreversible damage and her support quickly bled away.

An opposition Labor Party official repeated a call for an early general election, which must be held by mid-1992.

''Neil Kinnock leads a united Labor Party. We're ready to fight a general election whenever the Tories have the guts to name a day,'' said MP Jack Cunningham.

#90331u1528 11/27/1990 ~United Press International
WASHINGTON (NOV. 27) UPI - Sentiment appeared to grow in the Senate Tuesday to stall military action against Iraq and wait longer to see if economic sanctions further collapse Iraq's economy.

''If ever there was a case for giving peace a chance, this is it,'' said Sen. Edward Kennedy, D-Mass. ''This is one search for peace that does not involve appeasement of aggression. We should do all we lcan in Congress to stop this war before it starts.''

Kennedy's comments came at the initial congressional hearings on Gulf policy following the Nov. 8 announcment that the U.S. presence in Saudi Arabia and the Persian Gulf region would be doubled - to about 400,000 by January - to put the multinational force there in a position to go on the offensive if necessary.

While Chairman Sam Nunn, D-Ga., did not endorse a delay, he said there is justification for military action to oust Iraq from Kuwait, the oil-rich emirate it overran Aug. 2.

But Nunn added, ''The question is whether military action is wise at this time and in our own national interest.''

Defense Secretary Dick Cheney and Gen. Colin Powell, chairman of the Joint Chiefs of Staff, declined to testify before expected U.N. action Thursday on a resolution authorizing military force to get Iraq out of Kuwait.

They will testify Monday. On Wednesday two former chairmen of the Joint Chiefs are to testify as well as former Secretary of State Henry Kissinger.

Nunn's sole witness Tuesday, James Schlesinger, said the administration expects that the embargo on Iraq will take a year to work. He said it appears to be working more quickly than expected and Iraq's economy is collapsing.

If no additional demands are added to the basic list of requirements - Iraqi

withdrawal from Kuwait, the restoration of the Kuwaiti government - ''the probability that the economic sanctions will result in a satisfactory outcome is very high.''

Schlesinger, a former secretary of defense and energy and CIA director, added that ''it seems rather illogical to express impatience with them (sanctions) because they will not have produced the hoped-for results in six months time.''

Sen. John Glenn, D-Ohio, added, ''Will the embargo work? We don't know yet. It's only been in a short period of time. Let's give it a chance.''

He also challenged President Bush to give a detailed explanation of the reasons for the U.S. presence in the region and the reasons a war might have to be fought so public opinion is united behind U.S. policy.

''We are talking about war and we've not heard more than sound bite justification,'' said Glenn.

Sen. Carl Levin, D-Mich., noting the debate will involve Congress and whether to authorize military action or even declare war, proposed as an alternative that Congress require that any money used for offensive operations in the gulf be spent only after Congress passes a resolution authorizing operations there.

And he said President Bush ''should be displaying American staying power for the long haul. It is American determination to make the economic sanctions work over a long period that is more likely to impress Saddam Hussein.''

At House Banking Committee hearings on the economic impact of the Gulf crisis, retired Rear Adm. Gene La Rocque, head of the Center for Defense Information, recommended that the sanctions be given a year to work and then, if Saddam has not pulled out of Kuwait, military action should be taken.

He also forecast that a military action that cuts off Iraqi forces in Kuwait from Baghdad and eventually captures Baghdad would inflict about 45,000 casualties on the U.S. forces, including about 10,000 deaths.

#90331u1538 11/27/1990 ~United Press International
NEW YORK (NOV. 27) UPI - The city denied Tuesday any irresponsibility in delaying public announcement for nearly three weeks of the recall of faulty condoms supplied to 300 public agencies for free distribution.

Under fire at a news conference for tardy disclosure of the recall of 750,000 Saxon condoms, Health Commissioner Woodrow A. Myers Jr. told reporters he felt his department had acted properly ''by contacting all organizations to whom we supply condoms'' Nov. 8.

The recall became public knowledge Monday when news of it apparently was leaked inadvertently to a writer by a department employee and was reported in the press. Dr. Myers' news conference was hastily organized Tuesday at Health Department headquarters.

He explained that the Health Department was informed by Safetex Corp. of Colonial Heights, Va., on Nov. 7 that 15 lots of Saxon spermicidal condoms may exceed the four per 1,000 pinhole leakage rate allowed by federal Food and Drug Administration standards.

He said Safetex asked for recall of these lots and promised replacement. Since the Department did not know to whom condoms from these lots had been distributed, the entire distribution of 750,000 Saxons was recalled, even though some had been distributed to the public.

''We don't know how many have been distributed or how remain at the agencies we serve, waiting to be picked up and returned to Safetex,'' he said.

''To suggest that every Saxon condom we distributed was defective would be wrong. They were not, and there was pretty low risk of pregnancy or transmission of disease. But it is a higher risk than we find acceptable.

''The agency that has the formal responsibility in this situation is the FDA.''

The commissioner said only 22 percent of the condoms distributed by his department come from Safetex. The other 78 percent comes from Ansell, a New Jersey firm, which has taken a new order for 500,000 condoms to be delivered in 30 days to help replace the recalled condoms.

The department has been supplying 50 AIDS and teenage pregnancy prevention agencies under contract for free condoms and 250 other organizations that receive condoms on request as they need them.

#90331u1540 11/27/1990 ~United Press International

WASHINGTON (NOV. 27) UPI - Food prices will rise 2 percent to 5 percent in 1991, a return to more moderate levels of price inflation after two years of increases in the range of 6 percent, the government forecast Tuesday.

The estimate from the Agricuture Department suggested food prices might return to the stable levels of the mid-1980s, when the year to year increases were a modest 2 percent or 3 percent.

Food prices are projected to show a rise of about 6 percent this year. Last winter's freeze in the South drove up fruit and vegetable prices. In addition, milk and meat prices ran at high levels for months.

''For 1991, a food price rise of 2 percent to 5 percent is in prospect,'' said James Donald, chairman of the department's World Agricultural Outlook Board. ''Projected record meat supplies, higher dairy product output and the likelihood of bigger citrus crops this season will moderate food price rises.''

A projected lower inflation rate for the U.S. economy could help too, Donald said, since it would hold down any increases in marketing costs.

The higher oil prices that followed Iraq's invasion of Kuwait could play a role in determining the size of food price increases. Higher energy costs would affect virtually every phase of the food system, from the cost of growing crops to the cost of shipping, packaging, processing and selling them.

The major price increases this year were in fresh fruits, expected to rise 14 percent to 17 percent; pork up 10 percent to 14 percent; processed fruits up 10 to 13 percent and dairy products up 8 percent to 10 percent.

Farmers are estimated to produce a record 64.25 billion pounds of beef, pork, veal, mutton and poultry meat in 1991, a 3 percent to 226.6 pounds of meat for every American. Milk output is projected to rise 1 percent-2 percent from this

year's 148 billion pounds although prices are expected to soften.

The citrus crop, slashed by a devastating Christmas weekend freeze last year, is projected at 13.5 million tons this season, up 26 percent. The new harvest is under way.

The government index of fresh fruit prices reached a record level last July.

Food prices zoomed 5.8 percent in 1989, the largest increase since the 7.8 percent increase chalked up in 1981. The 1989 increases were a result of short supplies of fruits and vegetables, a consequence of the 1988 drought, plus higher prices for the fruit and fiber-packed cereals popular with health-conscious consumers.

#90331u1557 11/27/1990 ~United Press International

PRAGUE, CZECHOSLOVAKIA (NOV. 27) UPI - Czechoslovakia, concerned with a growing influx of refugees from economic collapse, famine, civil unrest and ethnic strife in former East Block countries, is taking stronger measures to protect itself, authorities said Tuesday.

Interior Minister Jan Langos told a news conference he has been coordinating actions with the Hungarian and Polish interior ministries to check the potential flood of people, mostly from the Soviet Union but also from poorer former East Bloc states such as Romania.

''We must all agree on new border measures and checkpoints with the Soviet Union,'' Langos said.

A presidential adviser said as many as 50 million refugees, more than three times Czecholsovakia's population, could flee the Soviet Union when Moscow implements its plan to abolish exit visas and distribute passports freely next year.

President Vaclav Havel, on his return from last week's European summit in Paris, said the problem is too big for Eastern European countries to face alone, nor should they.

''I believe we should view it as a European problem and respond along international lines,'' Havel said.

A senior aide to Langos, Martin Fendrych, said border patrols and defenses will be strengthened and measures will be taken to ensure that those crossing into Czechoslovakia from the Soviet Union will return home.

''Very likely there will be some screening measures taken at the frontier to find whether those asking for asylum will meet the requirement for refugee status, and to see if they have enought money to stay here and go back home,'' Fendrych said.

He said apart from the defections of three Soviet soldiers stationed in

Czechoslovakia, he knew of no requests for asylum from Soviet citizens living here.

But the American and British embassies have had inquiries in recent months from Soviets seeking asylum in those countries. No requests have been granted because the Soviets are not considered in danger while in Czechoslovakia.

A senior Western diplomat in Prague said Soviet refugees are unlikely to want to stay in Czechoslovakia, but more likely would cross the unguarded border with the former East Germany.

On Nov. 16, the Parliament passed a law on refugees and created a special government office to deal with them.

Refugee Commissioner Viktor Parkan told the Prague daily Lidove Noviny the public is morally and psychically unprepared to accept refugees.

''We can expect that an overwhelming percentage of these refugees will pass through our territory, which is horrifying,'' said Jiri Krizan, Havel's adviser for military and political affairs.

''We are now trying to cope with sheltering and feeding the 100 Romanians we have here and already that is causing problems,'' he said.

The situation is complicated by the 17,000 ethnic Czechs and Slovaks living in the Ukraine and several tens of thousands elsewhere in the Soviet Union, who went as agricultural colonists to Czarist Russia.

#90331u1570 11/27/1990 ~United Press International

BOSTON (NOV. 27) UPI - The lawyer who once represented Charles Stuart went to court Tuesday to fight a subpoena ordering him to testify before the grand jury investigating the murder of Stuart's pregnant wife.

Suffolk County prosecutors hope to learn what John Dawley may know about the shooting that rocked the city.

Carol DiMaiti Stuart, a pregnant attorney from suburban Reading, was fatally

shot on Oct. 23, 1989, after she and her furrier husband left a birthing class at a nearby hospital. Charles Stuart, who initially blamed the attack on a black robber, committed suicide on Jan. 4 as police sought to arrest him for the crime.

Stuart is believed to have detailed the crime to Dawley, his attorney, in a long conversation one day before he plunged from a bridge into the Mystic River.

The manhunt for the alleged robber angered the city's black community, which accused police of heavy-handed and indiscriminate searches of residents in the inner-city neighborhood where the shooting occurred.

Dawley has said attorney-client privilege prevents him from divulging anything Stuart may have told him about the case, and that state's highest court ruled on Nov. 5 that prosecutors could not force Dawley to break that trust.

Nevertheless, District Attorney Newman Flanagan subpoenaed Dawley and John J. Perenyi, an attorney who once represented Stuart's brother Matthew, to testify before the grand jury.

It was Matthew Stuart who went to police with evidence that incriminated his brother in the murder. Matthew said he met his brother on the night of the killing and agreed to dispose of a gun and several other items, but said he did not realize he was assisting in a killing. He allegedly said he thought he was helping his brother stage a robbery in order to cheat an insurance company.

Perenyi was also expected to fight the subpoena, but he did not appear in court Tuesday. Dawley appeared in a closed-door hearing before Judge Constance Sweeney, who took the matter under advisement.

Neither Dawley nor first Assistant District Attorney Thomas Mundy had comments for reporters as they entered the courtroom. But Nancy Gertner, the attorney now representing Matthew Stuart, said prosecutors were trying to undermine a client's basic right to keep conversations with his attorney confidential.

''How many times do we have to be raising the same issue?'' she asked, saying it was an instance of ''lawyers being used against their clients. This is exactly what they are not supposed to do.''

Despite recent media reports speculating the grand jury would indict Matthew Stuart for insurance fraud, Gertner said she had ''no indication at all'' that any action was planned against her client.

#90331u1577 11/27/1990 ~United Press International

MOSCOW (NOV. 27) UPI - The Moldavian Parliament voted Tuesday to annul the

results of elections for a separate legislature in the Russian-speaking Dniester region of the republic.

Voting that was completed Sunday defied an earlier Moldavian decree and the threat of violence by Moldavian vigilantes, so Tuesday's action was likely to have little effect on the leaders of the self-declared Dniester republic.

The elections in the Russian-speaking region east of the Dniester river were dominated by Russian and Ukrainian Communists intent on keeping Moldavia from separating from the Soviet Union and preventing what they call Moldavian discrimination against ethnic minorities in the republic.

Moldavia's Parliament declared the elections ''null and void'' in a resolution Tuesday and said ''the actions of secessionist leaders and the polling have increased ethnic rifts,'' the Moldavian news agency reported.

Deputy Parliament Speaker Viktor Pushkash charged the elections were undemocratic because of alleged threats and pressure on voters.

Russians and Ukrainians in the Dniester region of Moldavia and Gagauzis in the republic's southern part declared their own autonomous regions earlier this year because of fears that minority rights will be trampled under Moldavian nationalism and the majority group's desire to reunite with neighboring Romania.

At least three people were reported killed in the Dniester region earlier this month in clashes between Russian-speaking residents and Moldavian militia and vigilantes, and elections last month to set up a separate Parliament in the Gagauz region also led to ethnic confrontations.

A republic of 4.4 million people, Moldavia was formed by joining a former Moldavian autonomous area of the Ukraine with large areas of Romania that Josef Stalin seized in 1940 as part of a secret pact with Nazi Germany's Adolf Hitler.

Moldavians, whose language is a dialect of Romanian, make up 64 percent of the republic's population, Ukrainians 14.2 percent and Russians 12.8 percent. Gagauzis represent 3.5 percent and Jews 2 percent of the people in the tiny republic.

Leaders of the Dniester region are demanding that the Popular Front- dominated Moldavian government resign and that a law making Moldavian the official language in the republic be repealed.

They are also seeking assurances that Moldavia will remain in the Soviet Union rather than pursue the Popular Front's goal of eventual unity with Romania.

#90331u1595 11/27/1990 ~United Press International

NEW YORK (NOV. 27) UPI - Atlantic and Gulf Coast longeshoremen have ratified a new master contract that gives a wage and fringe benefit boost while allowing a reduction in workers required on container gangs, it was reported Tuesday.

John Bowers, president of the International Longeshoremen's Assocation, said the new contract is for three years and ten months, and covers ports from Maine to Texas. He said nearly 7,916 of the 8,828 union members voted in favor of the contract. Local bargaining, however, was still continuing in all the ports, centering around benefits, working hours and guaranteed income, he said.

"Both the ILA and management were happy with the agreement," Bowers said. "ILA members will receive increases in their salary and fringe benefit plans, while employers got reductions on container gangs that will help them remain competitive."

He said the master contract would go into effect Dec. 1, and contains increases of a dollar an hour that will bring straight time to $22 an hour during the last year of the contract.

The contract also calls for increases in the employers' contributions to the welfare, pension and other fringe benfit plans, he said. ILA employers obtained a reduction in container gang size by two men. The first reduction on Dec. 1, and the second on Oct. 1, 1992.

The union also agreed in the master contract that local ports or districts may institute a system of flexible hours at waterfront terminals on a local basis to allow for the continuous receiving and delivery of containers, he said. Details of the "flex-time" were being worked out on a local basis, Bowers said.

LANDOVER, Md. (NOV. 27) UPI - Bernard King, the NBA's leading scorer, signed a multi-year contract extension Tuesday with the Washington Bullets, a pact General Manager John Nash said he hoped would ensure the 33-year- old forward will remain a Bullet for the rest of his career.

Also Tuesday, the Bullets activated guard Ledell Eackles, who sat out all of training camp and the first week of the season in a contract dispute. However, Nash said forward John Williams, another preseason holdout, likely will not be in playing shape until at least January.

King, a week short of his 34th birthday, is leading the NBA in scoring, averaging 30.2 points a game heading into Tuesday night's game against Golden State. In the Bullets' first 11 games, he has scored 30 or more points eight times and exceeded 40 twice.

King's current contract, paying him a reported $3.1 million over two years, expires at the end of this season. Nash said it was ''fair to assume'' the new contract extension would pay him more, but he would not reveal its exact terms.

King, who reportedly was seeking a two-year extension, was not immediately available for comment.

Nash said he hoped the new pact would mean King would play out his NBA career in Washington.

''That's our intent and I think it's his as well,'' Nash said.

King's career almost came to an end in March 1985 when he suffered a severe knee injury while playing for the New York Knicks. He missed all of the 1985-86 season and played only six games in 1986-87. After undergoing a lengthy and strenuous rehabilitation, the Bullets signed King in October 1987 as a free agent.

To make room for Eackles on the active roster, the Bullets moved guard Larry Robinson to the injured reserve list. Robinson has tendinitis in his left ankle.

Coach Wes Unseld said Eackles would be in uniform for the Warriors game. He is expected to join Darrell Walker in the starting backcourt as soon as Unseld

feels he is ready.

Eackles ended his holdout Nov. 12, signing a two-year deal worth $1.4 million. Eackles then began working out at Bowie State College to make up for missing camp.

The 6-foot-5 shooting guard averaged 13.5 points a game last season, but in seven starts averaged 25.3 a game. The Bullets are one of the NBA's least productive teams on offense and have needed his scoring ability.

With King's contract settled and Eackles back on the roster, the Bullets have only to get Williams back in action. Williams suffered a season-ending knee injury last December, then skipped training camp in a rehabilitation dispute with management.

Williams, 24, returned from his home in Los Angeles days before the season started and has been working his way back into shape. While neither Williams nor the Bullets would comment on Williams' weight, he appeared to be about 40 pounds above his playing weight of 255 when he rejoined the team three weeks ago.

Williams' offensive presence has also been sorely missed this season. In 18 games before being injured last season, Williams averaged 18.2 points a game. In four seasons with the Bullets, Williams has averaged 13.5 points a game.

''We're still not at full strength until we still have John Williams, '' Nash said. ''In John's case, we do not expect to have him before the first of January. It's a target date.''

#90331u1636 11/27/1990 ~United Press International

NEW YORK (NOV. 27) UPI - The dollar stumbled in New York trading Tuesday after the currency market was churned by a rumor, later disavowed, that a big U.S. insurance company had filed for bankruptcy.

Equitable Assurance Society of the United States issued a statement denying it planned to file for protection from creditors under Chapter 11 of the U.S. Bankruptcy Code, as the unfounded rumors had suggested.

"By then, the dollar had already sagged a bit," said Robert Hatcher, a Barclay's Bank trader in New York, but "bounced back a little bit" when the nervous bankruptcy talk dissipated.

In late New York trading, the dollar stood at 1.48 German marks, down from 1.4865 Monday, and 128.20 Japanese yen, down from 129.00. "The dollar all in all had a poor day," Hatcher said. "It was under pressure across the board" on pessimism about the U.S. economy.

The British pound strengthened to $1.9830 from $1.9695 after members of the ruling Conservative Party in Parliament voted to elect John Major as head of the party, meaning he will succeed Margaret Thatcher as prime minister.

News that Michael Heseltine, whose challenge forced Thatcher out, and Douglas Hurd, Thatcher's foreign secretary, conceded defeat though Major fell two votes short, made players bullish on sterling.

Other New York dollar rates: 1.2590 Swiss francs, down from 1.2615; 4.9920 French francs, down from 5.0115; and 1,110 Italian lire, down from 1,115.

In Europe, the dollar declined on bearish U.S. economic prospects, traders said. The dollar could expect only a short rally if war were to break out in the Persian Gulf, said Barclays de Zoete Wedd dealer Wayne Andrews.

A vote by the U.N. Security Council on a resolution setting a January deadline for Iraq to pull out of Kuwait is expected Thursday. If the Persian Gulf situation remains quiet until January, the dollar could come under more pressure, analysts said.

The dollar slipped in Frankfurt, to 1.4840 German marks vs. 1.4915 Monday, and in Zurich, to 1.2595 Swiss francs vs. 1.2650.

In London, the pound gained on the dollar to finish at $1.9745 vs. $1.9655 Monday, buoyed by the market's belief that Major, appointed chancellor of the exchequer by Thatcher, would win a vote to succeed her.

The dollar also closed lower in Paris, Brussels and Milan, at, respectively: 5.0190 French francs vs. 5.0300; 30.69 Belgian francs vs. 30.7750; and 1,115.85 Italian lire vs. 1,118.30.

Earlier, the U.S. dollar surged against the yen in Tokyo on expectations the U.N. will authorize the use of force to eject of Iraq from occupied Kuwait. The dollar closed at 128.95 yen, up from 127.95 Monday.

"Investors expect the U.S. proposal to go through and lend an upward pressure on the dollar," said Junpei Ishii, a senior vice president at Taiyoi Kobe Mitsui Bank. But Ishii predicted the dollar's firmness would not last.

In Zurich, gold closed lower at $384.50 an ounce vs. $387.50 Monday. London gold also declined, to $385 an ounce from $387.

Silver closed lower in Zurich, at $4.15 against $4.20, and London, at $4.13 an ounce against $4.19.

Republic National Bank in New York closed cash gold at $385.25 an ounce, downfrom $386.25 Monday. The New York Commodity Exchange settled contract gold at $385.20 an ounce, down from $386.10.

Republic closed cash silver at $4.12 an ounce, down from $4.17 Monday. Comex silver concluded trading at $4.102 an ounce, off from $4.152.

#90331u1638 11/27/1990 ~United Press International

LOS ANGELES (NOV. 27) UPI - With two of Hollywood's key players, Columbia and MCA, now in Japanese hands, analysts said Tuesday Paramount could well be the next studio to come under foreign control.

"I would say that Paramount is the crown jewel of what is left," said Jeffrey Logsdon, an analyst with Seidler Amdec Securities in Los Angeles. "The number of players that are available to major foreign investors is starting to run

out."

Logsdon and other industry watchers said that the trend toward globalization, as exemplified in Matsushita's $6.13 billion cash buyout of MCA Inc. Monday, is likely to continue as foreign players look for ways to take advantage of the growing appetite for American entertainment.

For its part, Paramount has been searching for ways to expand, as evidenced by its failed hostile takeover of Time Inc. last year. The studio announced Monday that "Ghost," the year's top-grossing domestic film, has topped $110 million in ticket sales overseas since its foreign opening Sept. 28.

The film, currently showing in 28 countries, is already the No. 1 film of the year in the United Kingdom and trails only "Crocodile Dundee" and "E.T." on the all-time list.

The MCA deal is the fourth that places an American studio into foreign ownership. The trend began with the 1985 acquisition of Twentieth Century Fox by Australia-based News Corp. for $575 million. Matsushita's arch-rival, Sony Corp., bought Columbia Pictures last year in a $5 billion deal and Italian investor Giancarlo Parretti bought MGM/UA for $1.36 billion several weeks ago.

The MCA deal now leaves just four of the eight major Hollywood studios in American hands: Disney, Orion, Paramount, and Warner Bros. "The fact that so few major studios are left that have not been acquired gives Paramount a scarcity value," Logsdon said.

Analyst Steven Hill of investment bankers Sutro & Co. in San Francisco agreed. "There is probably a concern that if you want to buy, you have to buy now," Hill said.

"Paramount is available, but it would take a huge player," Hill said. He estimates that the entire company has a break-up value of between $7.5 billion and $10.1 billion.

Paramount made an unsuccessful bid last year for Time Inc., which subsequently bought Warner Communications, and has been looking for medium-sized acquisitions itself, but none have emerged.

Analysts believe that the company may also agree to more joint ventures, similar to its 49 percent purchase of London-based Zenith Productions earlier this year.

Other foreign investment may come in forms similar to Disney's recent $600 million deal with Japanese investors, headed by Yamaichi Securities, to finance future films. "You're going to see a lot more horizontal integration," Logsdon said.

Still, analysts say that as more mergers and buyouts occur, major investors will become more willing to take the plunge. "The entertainment business is very volatile. But in what other industry can an idea turn into $100 million in two years," Hill said. "Matsushita would not have done this deal if it didn't see a potential profit."

All the same, analysts say it is unlikely that the next suitor seeking a piece of Hollywood will be Japanese. "I think that the Japanese government would discourage any more ownership of American studios," given the potential backlash from the American public, said Paul Marsh, an analyst with Bateman Eichler, Hill Richards in Los Angeles.

Some of the rumored players with deep enough pockets to buy Paramount include West German industrial giant Bertelsmann AG, Swiss food conglomerate Nestle S.A. and South Korean electronics giant Samsung.

Paramount, owned by New York-based Paramount Communications Inc., has been one of the most consistent makers of profitable movies. But, except for "Ghost," it also had a rough summer when a trio of its high-budget films - "Days of Thunder," "Another 48 HRS" and "The Two Jakes" - failed to live up to expectations.

In September, Paramount removed Sidney Ganis from his post as co-chief of the studio and replaced him with former Disney executive David Kirkpatrick. Reports have subsequently emerged that the studio has started to come down hard on film production costs.

Meanwhile, analysts say Disney and Warner are unlikely candidates for a foreign buyout at this point, since Warner was merged just a year ago with Time Inc., and a deal for Disney would be not be politically "doable." "A buyout of Disney would invite legislation, because Mickey Mouse is on the same plateau as Statue of Liberty," Marsh said.

Troubled Orion, the smallest of the major studios, announced last month that it had hired investment bankers Salomon Brothers to "explore strategic alternatives." The studio has been plagued by a heavy debt load and a string of duds at the box office, although its current release, "Dances With Wolves," has performed well.

SACRAMENTO, CA (NOV. 27) UPI - Seventy percent of the people who get paid to help Californians with their taxes say the federal income tax system is in serious trouble, a recent survey released Tuesday showed.

The survey of 2,000 enrolled agents, certified public accountants and tax preparers was conducted by the California Society of Enrolled Agents, with a 4 percent margin of error.

''Tax laws and regulations are more complicated than they've ever been,'' CSEA President Donna Nance said upon releasing the poll results. ''When citizens with relatively simple financial dealings are afraid to prepare their own tax returns, the whole system is in trouble.''

Interviewers found that 32 percent of the survey respondents believe the tax system is in ''very severe'' difficulty, and another 37 percent described the situation as ''severe and getting worse.''

Taxpayers are so bewildered by the complexity of tax laws that they are less inclined to comply with them, the survey found. Thirty-five percent of the tax professionals said tax laws ''greatly discourage compliance'' and another 34 percent said the laws ''somewhat discourage compliance.''

Sixty-one percent of the respondents said most of their clients feel they are worse off under current tax law than in previous years.

Almost half of the tax practitioners blamed the increasing complexity of tax regulations on special interest groups that influence legislators to write in loopholes and other benefits.

Consequently, 75 percent of the respondents said so-called tax reforms enacted in recent years have produced tax laws ''too complex for the Internal Revenue Service to effectively administer.''

#90331u1652 11/27/1990 ~United Press International
WASHINGTON (NOV. 27) UPI - NASA and the company that built the Hubble Space Telescope share the blame for failing to detect the flaw that crippled the instrument's powers, a NASA report concluded Tuesday.

Workers at the Perkin-Elmer Corp. in Danbury, Conn., had at least three major chances to find the defect before the telescope was placed into orbit in April but the employees wrongly dismissed the signs, the report said.

In addition, employees in Perkin-Elmer's optical division failed to bring the signs of trouble to the attention of top company officials or anyone at NASA,

said Lew Allen, who led a team that investigated the embarrassing flaw for NASA and issued the report.

However, NASA also must accept responsibility because the agency was in charge of the project and oversaw the work, Allen said.

''Perkin-Elmer should have not have allowed a situation for those inhibited communications to exist. NASA had every right to expect that Perkin-Elmer would have done a better job than this,'' Allen said at a news conference.

''On the other hand, it is fundamentally NASA's responsibility as the government agency to get this done. NASA should have been aware of what was happening at Perkin-Elmer,'' he said. ''I think you have to say each ... has to bear responsibility.''

Sen. Al Gore, D.-Tenn., who held hearings to investigate the telescope's defect, said the report ''makes crystal clear'' the need for NASA to ''continue its efforts to strengthen testing and quality control efforts.''

Lennard Fisk, NASA's associate administrator for the Office of Space Science and Applications, said it was ''premature'' to say whether the agency would take action against Perkin-Elmer, which is now called Hughes Danbury Optical Systems Inc.

Hughes Danbury had no immediate comment.

Fisk acknowledged the mistakes that led to both the 1986 explosion of the space shuttle Challenger accident and Hubble defect had some similarities. But Fisk noted Hubble's problem occurred 10 years ago and the agency had taken many steps since then to avoid such mistakes.

''Considerable effort has been made to promote communication,'' he said.

Allen noted that his panel checked whether similar problems exist with another NASA project underway at Hughes Danbury and found that improvements had been made.

Although the telescope can do valuable research despite its flaw, NASA plans to correct the defect in 1993 by installing a modified camera on board. The repair will cost between $40 million and $50 million, Fisk said.

The long-awaited $1.5 billion telescope was expected to revolutionize astronomy by being able to study the universe in greater detail than ever before through its advanced optical system and perch 381 miles above Earth.

But about two months after the instrument was placed into orbit, NASA was shocked to discover the telescope's supposedly perfect primary mirror was misshapen, preventing the telescope from bringing starlight into sharp focus.

An embarrassed NASA formed the six-member panel to investigate the defect headed by Allen, director of the Jet Propulsion Laboratory in Pasadena, Calif.

The panel discovered the problem apparently was caused when a Perkin- Elmer worker incorrectly set a device called a reflective null corrector, which was used to measure the mirror while it was being precisely ground.

Employees had indications there was a problem when they had to install washers in the device to compensate for the faulty setting, and twice more when tests with other instruments, called refractive and inverse null correctors, indicated the mirror was shaped wrong.

#90331u1669 11/27/1990 ~United Press International

(NOV. 27) UPI - Oil prices receded Tuesday after reports of excess crude in the Persian Gulf.

On the New York Mercantile Exchange, the benchmark West Texas Intermediate crude for January delivery was down 9 cents to $32.86 a barrel after trading as low as $32.40 and as high as $33.90.

WTI prices began falling after 1:00 p.m. EST, when reports hit the exchange floor that Iran had leased seven ultra-large crude carriers to store 15 million barrels of excess oil, said Tom Blakeslee of Pegasus Econometrics Group in Hoboken, N.J.

''Saudi Arabia is doing similar things, but it hasn't been reported yet,'' Blakeslee said.

Prices earlier had been trading near Monday's $32.95 close, alternatively higher and lower into the afternoon, as profit-taking cancelled out buying in anticipation of a United Nations vote on use of force in the Persian Gulf crisis.

Ann Louise Hittle, senior oil analyst at Shearson Lehman Brothers in New York, said the market was waiting to see the American Petroleum Institute's weekly inventory report and the results of Thursday's anticipated vote of the U.N. Security Council, expected to set a January deadline for Iraq to pull its forces from Kuwait, under occupation since Aug. 2.

''It's the stories with regard to the Thursday resolution. That's the main reason I'm seeing here,'' said Joe Miller of Lehman Brothers' International Energy Department.

''The market is seeking direction while every one is waiting for the U.N. resolution,'' one market expert said. ''In any case production (from the Middle East) is fairly high and unless something is confirmed such as the U.N. resolution, there will be reluctance to buy aggressively.''

The push to higher prices from the market's anticipation of the United Nations vote was tempered by the taking of profits on WTI's runup of $4.04 a barrel - 13.9 percent - over the previous three trading sessions, the trader said.

Peter Beutel, analyst at Pegasus Econometrics Group at Hoboken, N.J., said prices were also affected by lower demand for heating oil, which acts as a baromenter for petroleum prices during this season. He said heating oil demand was now about 4.5 percent less than during the same time last year.

Hittle said she expected the API report, to be released after the close of the Merc Tuesday, to show U.S. crude supplies declined by up to 1 million barrels last week, with similar small reductions in stocks of gasoline and heating oil.

Home heating oil for December delivery fell 0.89 cent on the Merc to 91.49 cents a gallon. But December unleaded gasoline made up its earlier loss and settled 0.52 cent higher to 84.72 cents a gallon.

The Merc suspended trading for a half hour at noon to conduct a fire drill. Traders said the suspension had no effect on prices.

On the European spot market, Britain's widely traded North Sea Brent gave up 10 cents over Monday to $34.70 a barrel.

The United Arab Emirates' Dubai Light - the key OPEC crude from the Middle East shipped mainly to the Far East - added 15 cents to $28.30 a barrel.

Shell Oil Co. and Conoco Inc., the Houston based subsidiary of Du Pont, both raised the posted price they will pay for crude at the wellhead. Conoco hiked its price by $1.25 to $31.75 a barrel for WTI and Shell increased its price $3 a barrel to a WTI price of $30.75.

#90331u1671 11/27/1990 ~United Press International

RIO DE JANEIRO, Brazil (NOV. 27) UPI - The presidents of Brazil and Argentina will sign an agreement Wednesday designed to prevent either country from developing nuclear weapons.

Brazil's Fernando Collor de Mello and Carlos Menem of Argentina will sign the agreement in the border city of Foz de Iguacu, Brazil, 750 miles southwest of Rio de Janeiro.

The accord is expected to end decades of rivalry that allowed both countries to develop secret nuclear programs. The pact creates a joint monitoring system for nuclear material that will allow South America's two largest countries to inspect the other's military installations, research centers, and existing nuclear reactors, sources said.

The monitoring system will permit the governments of Argentina and Brazil to know precisely how much enriched uranium the other country possesses, where it is located and what it will be used for, sources said. Enriched uranium is the key component of atomic weapons.

Under the agreement, both countries will be obligated to disclose the quantity of nuclear material they possess to the International Atomic Energy Agency in Vienna, sources said.

Brazil's secretary of science and technology, Jose Goldemberg, said the agreement would seek to end ''the wicked reciprocal arrangement of maintaining nuclear activities without inspection,'' and that it would attempt ''to do away with the warlike phantoms sustained between the two countries.''

Representatives of the International Atomic Energy Agency and the Organization for the Regulation of Nuclear Arms in Latin America were also scheduled to attend the midday meeting.

The agreement will permit Brazilian specialists to inspect two existing Argentine nuclear power programs: Atucha I, built with German cooperation, and Embalse, built with Canada's help.

Argentine specialists will inspect the Brazilian nuclear power reactors of Angra I and those of Angra II and Angra III, which are presently dormant.

The Brazilian press has recently reported that Brazil received 200 tons of enriched uranium from China during the government of Gen. Joao Baptista Figueiredo, who governed Brazil from 1979 to 1985.

Collor announced Sept. 24 at the U.N. General Assembly that he would not allow nuclear explosions in Brazil, even for peaceful purposes.

Earlier, he announced the end of Brazil's secret nuclear program, as he filled in a pit that was designed to be part of a nuclear testing site in northern Brazil.

#90331u1684 11/27/1990 ~United Press International

MOSCOW (NOV. 27) UPI - The backup Japanese astronaut for a Dec. 2 flight suffered an an appendicitis attack, increasing the pressure on journalist-cosmonaut Toyehiro Akiayama in the joint mission with two Soviet veterans.

Soviet television announced Tuesday that Rioko Kikuchi, 26, a woman journalist from the Tokyo Broadcasting System, underwent surgery Monday and officials at the Japanse news bureau said she was feeling fine.

TBS is paying $10 million for the first flight into space of a journalist anywhwere, and both Japanese cosmonauts were already at the Baikonur Cosmodrome when Kikuchi became ill.

Soviet television said it was the first time in the long history of the space program, that a backup cosmonaut had to be scratched because of illness.

Akiyama, 48, who kicked a four pack-a-day cigarette habit to make the flight, is slated to be launched into space on an eight-day mission along with Viktor Afanasiyev and Musa Manarov, who in his last outing spent a full year aboard the Mir station.

Kikuchi's illness now increases the pressure on Akiyama, former Washington bureau chief of TBS.

''Of course he is nervous, but he is okay,'' said Toshio Koike, Moscow bureau chief of TBS, and himself was an early candidate for the prestige flight.

The Dec. 2 mission will take Akiyama and the two Soviet cosmonauts to the Mir,

where they will join the the station's current occupants, Gennady Strekalov and Gennady Manakov.

During his stay aboard the Mir, Akiyama will make a 10-minute television broadcast and a 20-minute radio transmission from space every day.

''Specialists believe that these two programs will be very intensive work and the flight engineer will assist the Japanese broadcaster in the effort,'' the official Tass news agency said.

When his stay aboard the Mir is ended, Akiyama will return to earth with Strekalov and Manakov while the new Soviet crew remains for about six months until the next rotation.

The Japanese flight is part of new fly-as-you-pay policy by the Glavkosmos space agency, replacing the former joint propaganda flights for cosmonauts from Eastern European and ''friendly'' nations that the Soviets financed.

Waiting in line for flights now are cosmonauts from Austria, Germany and France. A flight for a British cosmonauts is still questionable because the original British sponsor dropped out.

Japan is sending 150 news executives and journalists to cover the flight, and there will be at least 100 Soviet journalists.

''It will almost be like a summit conference,'' said Koike, the TBS chief in Moscow.

#90331u1691 11/27/1990 ~United Press International

NEW YORK (NOV. 27) UPI - What do event planning services, specialty personnel agencies and mail order companies have in common?

They're among the 21 businesses voted most likely to succeed in 1991, according to the December issue of Entrepreneur magazine.

''Even in the face of a recession, people need service and convenience more than ever,'' said Rieva Lesonsky, editor-in-chief of the magazine.

For example, corporations last year spent $43.7 billion on event planning - the No. 1 business for 1991 said Entrepreneur - jazzing up gatherings such as fund-raisers, promotional events and weddings.

Over 1 million temporary workers - in next year's No. 5 business - will be needed to fill in for sick employees or help out during a company's time-crunch. In demand at placement agencies are bookkeepers, financial analysts and anyone else in the accounting field.

Today, thousands of Americans shop without ever leaving home as mail order sales have skyrocketed over the past decade. Mail order, ranked seventh on the Entrepreneur list - also has a special attraction to entrepreneurs because the cost of start-up is a lot less than retail business.

Rounding out the hottest businesses for 1991 were cruise-only travel agencies, ranked second, followed by gift baskets and chicken wings. Senior day care was No. 6, exercise wear was No. 7 followed by exporting and food delivery.

#90331u1700 11/27/1990 ~United Press International

NEW YORK (NOV. 27) UPI - Stocks posted a modest gain in light trading Tuesday despite a slight rise in oil prices, as fears of imminent fighting in the Mideast faded.

The Dow Jones industrial average, which rose 5.94 points Monday, added another

10.64 to close at 2543.81.

Among broad market gauges, the New York Stock Exchange composite index rose 0.91 to 173.87 and Standard & Poor's 500-stock index gained 1.59 to 318.10. The price of an average share rose 15 cents. Advances led declines 948-571 among the 2,001 issues crossing the NYSE tape. Volume was 147,590,000 shares, up from 131,540,000 traded Monday.

Watching the direction in oil prices, the market drifted up and down Tuesday - opening higher, quickly turning lower, moving higher again when oil dipped at midday and closing higher.

The Washington Post reported Tuesday that the five permament members of the U.N. Security Council have reached broad agreement on a draft resolution authorizing the use of force to get Iraq out of Kuwait, with the only sticking point being whether the pullout deadline should be Jan. 1 or Jan. 15. A vote on the resolution by the United Nations body is scheduled for Thursday.

While some analysts viewed this news as having already been largely absorbed by the market, John Burnett, senior vice president and head trader at Donaldson, Lufkin & Jenrette Securities Corp., said it "took the specter of bloodshed away.

"People figure there's not going to be anything in the way of hostilities until at least mid-January, so there's over a month for talks to take place." He said the news took some of the "fear and loathing out of the market. We had some institutional buying and (computerized) programs" kicked in.

Ricky Harrington, director of investment policy and asset management at Marion Bass Securities in Charlotte, N.C., agreed many investors seemed happy enough that the crisis in the Mideast has not undergone any dramatic changes.

"There's quite a bit of cash on the sidelines and no change in the Iraqi situation," so investors put some cash to work, he said. "We have the status quo, so I think we're just going to keep floating in the (Dow industrials) 2450-2600 range with a slight upside bias."

On the trading floor, Tremont was the most active issue, up 3/8 to 1 1/2. MCA followed, up 5/8 to 65 3/4, after having dipped on Monday's announcement that Matsushita agreed to acquire the entertainment company. The $66-a-share price was below what MCA had hoped to attract. Philip Morris was third, down 1/4 to 48 7/8.

Waste Management was next, off 1/4 to 31 7/8. One of the company's units has been awarded a contract by the Hong Kong government to build and operate a chemical waste facility there.

Among the other blue chips, AT&T was unchanged at 32 1/4, IBM lost 3/8 to 113

1/2, Woolworth rose 3/8 to 28 1/4, Coca-Cola jumped 1 1/8 to 46 1/8 and McDonald's gained 5/8 to 28 3/4.

Volume of NYSE-listed issues, including trades in stocks on regional exchanges and in the over-the-counter market, totaled 181,236,470 shares, compared with 159,061,200 shares traded Monday.

Prices rose in moderate trading on the American Stock Exchange. The Amex Market Value index rose 1.08 to 297.00. Advances led declines 309-251 among the 825 issues traded. The price of an average share rose three cents. Composite volume was 15,553,000 shares vs. 11,212,670 traded Monday. Energy Service led the Amex issues, up 3/8 to 2 1/2.

The National Association of Securities Dealers composite index added 5.19 to 354.05.

#90331u1710 11/27/1990 ~United Press International

(NOV 27) UPI - Strong thunderstorms along and in front of a sharp cold front marched through the Mississippi Valley and forecasters posted tornado watches and warnings from Texas to Michigan, the National Weather Service reported Tuesday.

Severe thunderstorms over central Missouri spawned two tornadoes, at Columbia and near Warsaw, that destroyed homes, damaged an apartment complex and downed trees and powerlines. Winds gusted to 61 mph at the airport in Columbia.

Thunderstorms over northeastern Oklahoma produced golf ball size hail east of Collinsville and high winds toppled a house under construction. The towns of Lamar and Stroud reported 60 mph winds, as did Pittsburg, Kan.

Thunderstorms over Missouri knocked down trees and a shed in Greene County and blew a car off the road. St. Louis reported winds of 58 mph.

Thunderstorms in west central Illinois produced 60 mph winds at Sterling and downed trees around Barry and Rushville. Strong thunderstorms were scattered from central Illinois through central Missouri and northwestern Arkansas into northeast Texas in the afternoon.

The weather service posted thunderstorm and hail warnings with possible tornadoes from northeastern Texas through Illinois and Indiana to lower and eastern upper Michigan. The greatest threat of severe weather was from northern Arkansas through most of Illinois to southwestern lower Michigan.

A tornado watch was in effect until mid-evening for northern Arkansas, south central and eastern Missouri and southern Illinois. Another tornado watch was psted for much of northern and central Illinois and northwest Indiana.

Showers and thunderstorms produced locally heavy rain from Arkansas to Michigan.

The weather service said Cedar Rapids, Iowa, registered 1.11 inches of rain in six hours, morel than 2 inches at Peoria, Ill., 1.5 inches at Fayetteville, Ark., and about an inch at South Bend, Ind.

Snow prevailed behind the cold front from eastern Colorado to northern Minnesota. Heavy snow blanketed the Colorado mountains, with up to 8 inches at Copper Mountain and 7 inches at Snowmass.

Snow advisories continue for most of Nebraska as up to 8 inches had fallen at Lexington, 5 inches at Broken Bow and Mason City.

Snow advisories were in effect for much of Iowa and southeast South Dakota.

Showers prevailed over eastern New York state and Vermont, northern Idaho, western Montana and Florida, but it was sunny from California to west Texas. Strong southerly winds prevailed ahead of the cold front in the central states from eastern Texas to the Gulf states to lower Michigan and the lower Great Lakes region.

Lake wind advisories were posted for parts of Oklahoma, Texas, Arkansas, Missouri and Alabama and gale warnings flew over all five Great Lakes.

Temperatures were in the 60s as far north as central Michigan and the lower Great Lakes region; the 70s from central and eastern Texas and the Southeast into the middle Mississippi and lower Ohio valleys and in the 80s in south Florida and the lower Rio Grande Valley of Texas.

#90331u1720 11/27/1990 ~United Press International

NEW YORK (NOV. 27) UPI - In a move that allows entry-level investors to speculate on blue-chip stocks, the American Stock Exchange began trading options Tuesday on an index valued at 1/20th of the Exchange's Major Market Index.

The LT-20 index, like the Amex's XMI Major Market Index, is based on the stock prices of 20 blue-chip companies, including AT&T, Chevron, Exxon and Coca-Cola. But because it is based on just .05 percent of the XMI index's value, it provides a more affordable way to speculate on the blue-chip market, the Amex said.

Put or call options allow the owner to buy or sell securities at a given price at a future date. The options allow investors to wager whether the value of a stock or stock index will rise or fall in that time period.

''The LT-20 options are significantly more affordable, allowing new investors to enter the index options market,'' said American Stock Exchange Chairman James R. Jones. ''For investors who are already familiar with index options, LT-20s help them manage their portfolios more easily.''

LT-20 options opened under the ticker symbol ''XLT'', with exercise prices of $25 per share and $30 per share, bracketing the current index value. Initial series of LT-20s expire in December 1992.

In addition to the new options, the American Stock Exchange said Tuesday it would ''aggressively pursue'' trading of unregistered foreign securities.

Such securites currently are traded on the over-the-counter market as American Depositary Receipts, or ADRs, but are not listed on any major U.S. exchange because the companies do not adhere to U.S. accounting and disclosure requirements.

A proposal to trade unregistered ADRs of large foreign issuers will be submitted to the exchange's board of governors Dec. 13, the Amex said. The board will review a number of options, including trading the foreign securities using existing floor facilities, using an electronic network under development by the Amex and Reuters Holdings P.L.C, or using a new trading facility planned in Hawaii.

Any action of the exchange's board of governors would require approval of the Securities and Exchange Commission. Jones said the exchange would monitor trading in the securities to ''the fullest extent possible'' to protect investors.

#90331u1730 11/27/1990 ~United Press International

CHESTNUT HILL, MA (NOV. 27) UPI - Jack Bicknell, who led Boston College through the Doug Flutie glory years, Tuesday was fired after 10 years as head coach.

The Eagles were 4-7 this fall, their fourth straight losing season. Not since 1909-12 had Boston College's football team had four successive losing seasons.

Athletic director Bill Flynn said, ''It was a difficult decision on the part of Boston College. Jack Bicknell has been a great representative of Boston College and led our football teams to some of their most glorious moments ever.''

Alumni unhappy about the football team's lack of success had been calling for Bicknell to resign or be fired, despite the three years left on his contract. After Saturday's 29-10 loss to Temple, Bicknell, 52, said, ''I can't quit. Nothing has happened to make it not fun anymore, (although) it's not fun losing or going 4-7.''

He said he had received letters from people advising him to ''Hit the Road, Jack,'' ''but half of them don't mean it and the other half, I don't worry about what they think.''

On Tuesday morning, the coach was summoned to the office of college president Rev. J. Donald Monan. Bicknell said, ''(I) was determined to talk him out of firing me. But after listening to him, I knew it would be useless.

''If I was a president of a college and had all these things in front of me and had to come to a conclusion, a business decision, I might have made the same decision,'' said Bicknell.

''I hope to get another job as a Division One head coach. I don't want a 1-AA job and I am not interested in an assistant's job. I still think I am a pretty good football coach.''

In his first year, the 1981 Eagles had a 5-6 mark, but Flutie led the team to wins in its final four games. The popular quarterback helped restore national recognition to the Boston College football program and paced the Eagles offense to three straight bowl appearances.

After a losing season in 1985, the Eagles were 9-3 in 1986 with another bowl bid but had not managed a winning season since.

Bicknell, the college's 29th head football coach, was hired from the University of Maine, where he had an 18-35-1 record over five seasons. From 1968 through 1975, Bicknell was offensive backfield coach at Boston College.

Bicknell had thought Boston College was good enough to win eight of its 11 games this season. ''When we didn't, the first guy to look at is me.''

Freddie Mac30-year mortgage	9.31	9.27	9.09

Quotations are representative of all sectors and maturities of the credit markets: Treasuries; top-rated corporates as represented by telephone issues; quality municipal AA- and A-rated bonds and the increasingly important government-backed mortgage bonds.

Municipal General Obligation year-ago yields are weekly averages.

Government mortgage yields are corporate bond equivalents.

(NOV. 27) UPI - A delegation of seven Kuwaiti refugees told the U-N Security Council today that Iraqi soldiers are acting like pirates and are destroying their tiny country. One spokesman said the invaders acted in a ''sick and sadistic'' manner when they ordered patients to leave hospitals and removed newborns from life-sustaining incubators.

Soon-to-be British Prime Minister John Major says his election as leader of the Conservative Party is ''a very exciting thing'' and that his role now is to unite Britain ''totally and absolutely.'' Major will become prime minister tommorrow, once Margaret Thatcher officially submits her resignation.

Federal authorities say two postal employees and a nationwide pen and pencil manufacturer have agreed to enter guilty pleas for their part in a more than seven-Million-dollar mail fraud scheme. The company mailed its goods in bulk for about half of the required postage.

With chilly weather upon much of the nation, the National Fire Protection association is warning that rising energy costs will mean more house fires this winter as hard-pressed consumers turn to portable heaters to save money.

Boston Herald reporter Lisa Olson today thanked N-F-L Commissioner Paul Tagliabue for what she calls a through and revealing investigation of sexual harassment allegations she lodged against the New England Patriots. The N-F-L today fined three players and the team management.

NEW YORK (NOV. 27) UPI - The nation's home-heating oil supplies held steady last week as fuel imports surged and crude oil inventories declined, the American Petroleum Institute reported Tuesday.

In the week ending Nov. 23, gasoline stocks rose, in keeping with normal seasonal trends, but refinery capacity slipped slightly, the oil industry trade group said.

Stocks of distillate, used primarily for home-heating oil and diesel fuel, remained virtually unchanged at 134.8 million barrels compared to 134.5 million barrels a week earlier. But this was substantially above the 119.6 million barrels in storage the same week last year.

Daily distillate production averaged 2.8 million barrels in the latest week, the same rate as in the year-earlier week but below the 3.1 million turned out in the corresponding 1989 week.

Distillate imports shot up to 196,000 barrels a day from 98,000 a day in the preceding week. This was also higher than the 182,000 barrels a day imported in the year-ago week.

The nation's crude oil stocks declined to 337.1 million barrels from 341.2 million the week before and from the 344 million barrels on hand last year.

Daily crude oil imports averaged 5.2 million barrels, unchanged from the rate of the previous week but below the year-ago pace of 5.6 million barrels a day.

Imports of refined petroleum products rose to 1.7 million barrels a day last week from 1.3 million a day in the prior week and 1.4 million a day in the year-earlier week.

U.S. refineries operated at 83 percent of capacity last week, down from 83.2 percent in the previous week and 86.1 percent in the same week last year.

Gasoline inventories crept up to 218.3 million barrels last week from 217.3 million in the prior week but remained slightly below the 222.1 million in storage in the year-earlier week.

Daily gasoline production tapered off to 6.6 million barrels from 6.7 million the week before and from 7 million a year earlier.

Gasoline imports jumped to 272,000 barrels a day from 140,000 in the preceding week and 152,000 a day in the comparable 1989 week.
